Mr. WARREN. Every dollar that has been asked for by the department for the care of soldiers has been furnished from time to time, going up to the 1st of July, and there are sums in some accounts that have not all been used, while other branches have caused deficiencies, and those deficiencies have been reported now to the House and are under consideration in the deficiency appropriation bill which will soon follow. This does not, however, cover the sundry civil bill, now being considered by the Senate Committee on Appropriations, as to hospitals, which are proposed to be cared for by the Senate and added to the bill.

Mr. BORAH. Mr. President, then the fault must lie elsewhere, because I have letters, and I presume many other Senators have letters, from soldiers who are in hospitals in which we ought not to keep horses, let alone men; buildings which are wholly unfitted for the use to which they are being put, with conditions surrounding those boys that we would not think of allowing to exist where an ordinary individual was suffering from ill health. I do not know where the fault lies. I only know that there is a condition of affairs which is most deplorable in regard to it. I can not search it out here now.

Mr. ASHURST. Mr. President, assuming it to be true that 10,000 beds are urgently needed, and Congress does not supply the money, then where does the fault lie? With Congress, manifestly.

I ask the Senator to allow me to interrupt him until I read from the letter of the Surgeon General, which I read into the RECORD. It is three days old. The Surgeon General wrote me as follows, and I read the concluding paragraph:

> In round numbers 10,000 beds are urgently needed, of which the beds for tubercular and neuropsychiatric patients are of the greatest urgency. These additional beds will serve only to meet the present needs of the increase expected within the present fiscal year.
>
> At the estimated cost of $3,000 per bed, the 10,000 beds urgently needed would require an appropriation of $30,000,000. The amount authorized by S. 4357—$29,530,000—is approximately correct. From the best advice obtainable, it is not believed that the estimate of $3,000 per bed for hospital construction is excessive. Indeed, unless there is a further decline in the cost of material and labor, it is doubted whether this estimated cost would be sufficient.

Mr. WARREN. We have the testimony of the Surgeon General, and he elaborates more fully the necessities to which the distinguished Senator from Arizona has alluded. What he proposes to do as soon as other buildings can be erected, which, of course, would take time, is to remove the patients entirely from a large share of buildings that are now used for hospitals, and hence the necessity, which the Senator mentions, for 10,000 beds.

Mr. BORAH. One thing seems to be quite evident as a mathematical proposition, that if we transfer the $30,000,000 which is necessary to maintain an Army of 175,000 instead of an Army of 150,000, we will have money to take care of the men. That seems to be certain. Otherwise, if we were to take care of them, of course, it must be by increasing the taxes and increasing the burden. Assuming that we do take care of them, we can take care of them by this expenditure.

Mr. McKELLAR. Mr. President, I think the Senator from Mississippi [Mr. WILLIAMS] and the Senator from Missouri [Mr. REED] have shown beyond a shadow of doubt that we do not need a great standing Army to defend ourselves from foreign foes at this time. The Senator from Idaho [Mr. BORAH] has certainly shown that we do not need it for policing in our own country. It seems to me that at this time, when the whole world is talking about disarmament, the United States of America was never in a better position, and no nation was ever in so good a position, to set a good example to the world in the matter of disarmament by reducing our Army to the minimum. We have a chance now to show to the world that we have confidence in the disarmament idea. Will we do it? Have we the courage to do it? Have we the grit to stand against the beginning of a military oligarchy which we gave birth to in the Army reorganization act? I hope we have.

My understanding from the newspapers is that President-elect Harding, a distinguished former Member of this body, is about to base an agreement for a world association, as he calls it, upon the theory of disarmament, upon the plan of disarmament among the nations. If so, he deserves credit for having one good view about it, at least. It seems to me that his colleagues in the Senate, regardless of party affiliation, ought to uphold him in this high resolve. It is a great move in the right direction. We ought not only to aid him, but we ought to set the example in the very beginning, and we have the opportunity now in cutting down our Army to 150,000.

Let us see what the joint resolution before the Senate really provides. Last May Congress passed what was known as the Army reorganization bill, providing for an Army of 280,000 enlisted men and about 18,000 officers. I voted against that bill.

I thought that the organization was too large and that the number of enlisted men was too large. I did not think we needed such a large establishment as that provided for. I agreed with the distinguished Senator from Minnesota [Mr. NELSON] when he said he thought such an organization was top-heavy. I thought that adequately described the situation at the time. I think so now.

While the bill was passed providing for an Army of that size, when it came to appropriate for the number of men in the Army, Congress did not appropriate for 280,000 men. It appropriated for only 175,000 men. It was then argued that we would not get 280,000, nor even 175,000 men. Some Senators voted for the 175,000 because it was assumed that we would not get that many men. Mr. Secretary Baker came along and took the view that the law authorized and directed him to recruit the Army up to 280,000 men. Surely he had the right to take that view. There was the plain letter of the law authorizing him to recruit up to 280,000 men, and if Congress had not believed that we ought to have the 280,000 men it was perfectly natural that the query should arise in his mind, "Why did they put it in the law?" He is within the letter of the law when he endeavors to recruit it up to the larger number, and we all agree about that.

While that was put on the statute books, however, Congress, it is true, only appropriated for 175,000 men. That was not fair to the Secretary, it was not fair to the administration, and it was not fair to the Government.

While Mr. Baker and I disagree on many subjects, I do not think that he has violated the law with reference to recruiting the Army as he has been doing. What has he done? He recruited the Army until we now have some 230,000 men. Our friends say we must reduce it, and in that I heartily concur. The only difference between us is the extent of the reduction.

I think the joint resolution ought to pass, but what does it accomplish? Let us see what it accomplishes. We talk a great deal about reduction and how much the joint resolution is going to accomplish. We have 230,000 men now and if the joint resolution passes providing for a maximum of 175,000, in the course of about 16 months, under the amendment which was added to the bill on last Friday, it will be reduced to 175,000. In other words, the Army will be reduced in about 16 months the difference between 230,000 and 175,000. We will have an average number of about 200,000 after all in the Army when Congress has only appropriated for 175,000.

Mr. POMERENE. Mr. President——

Mr. McKELLAR. I yield to the Senator from Ohio.

Mr. POMERENE. Do I understand it to be the Senator's view that if the joint resolution is passed reducing the Army to 175,000 it will, in fact, be 16 months before it actually is reduced to that number?

Mr. McKELLAR. That is my judgment about the matter, and I will give the Senator the reason for my judgment.

Mr. POMERENE. Allow me to suggest that if that is true we ought to pass the joint resolution immediately.

Mr. McKELLAR. I agree with the Senator that we ought to pass the joint resolution immediately, and I think we ought to pass it providing for 150,000 enlisted men, so as to get it down within a reasonable time to something nearer what I believe to be the right number.

Mr. POMERENE. If it will take 16 months to reduce the Army to 175,000, how long will it take to reduce it to 150,000?

Mr. McKELLAR. It would take much longer, but at the same time we would be traveling in the right direction under the law. I wish to explain to the Senator from Ohio and to the Senate, before we go any further, just why it is going to be so. It was estimated that it would be reduced to 175,000 by next September. There are many branches of the service, notably, I think, the Infantry branch, the most important branch, which have not been recruited up to the number they would have under the 175,000 plan. We passed an amendment on Friday last providing that enlistments shall not be discontinued in those branches where 62½ per cent, I believe, as it is now, have not been secured; so that we will be continuing enlistments in those branches of the service as before, and we will only be reducing in those branches of the service where they already have an overplus. I think that it will take at least 16 months to bring the total number of the Army down under the joint resolution to 175,000 men.

It is argued that Mr. Secretary Baker and Gen. Pershing testified before the committee last Friday, and that their testimony very strongly supports the 175,000 plan. Unfortunately, I did not know that they were going to appear before the committee, and had an engagement at one of the departments, and so missed hearing them testify. But I have their testimony before me, and I wish to read Secretary Baker's position upon the matter. First, he is offered as a witness as to why we should accept the 175,000 figure. I read:

Senator FRELINGHUYSEN. We place in the Army reorganization bill a skeleton organization, and do you feel that skeleton organization will be impaired if the Army is reduced to 175,000 men?

Secretary BAKER. It will be impaired, Senator, but it will not be so sensibly impaired as to make it a very serious matter if it is a temporary thing. I understand the disposition of Congress, and I am in the profoundest sympathy with it, is to economize, and I think the Army could get along with 175,000 until the present necessity for economy was somewhat relieved, but I think then it ought to be increased to 250,000 at least.

Senator JOHNSON. The disposition, I want to make plain to you, will be to make this reduction to 175,000, and I think I speak with accuracy in this regard, and the next thing that will be done will be not to increase it but to reduce it further. That is the disposition, I think, all along the line, and that is in the atmosphere.

Secretary BAKER. I think it is in the atmosphere. I think the world is strongly desirous of reducing the size of armies and reducing the size of armaments, and I know of no more wholesome or helpful thing to do than to bring that about.

In substance it will be noted this last statement contradicts his first statement, but is at war with his whole course of conduct in attempting to recruit the Army up to 280,000 men, as has been his professed purpose.

Here is the Secretary of War, who is recruiting the Army above the number that Congress has appropriated for. Congress appropriated for 175,000, and the Secretary of War has recruited up to 230,000 and is continuing recruiting day by day. He says that it will be unsafe to reduce it below 250,000. He does not make any distinction between 175,000 and 150,000, or if he does, he takes it back in the very next sentence. He say that he knows of no more helpful thing to do than to bring it about. He regards the 280,000 provision in the Army reorganization bill as a mandate to him and has been acting upon that mandate. In one breath he says it ought to be carried out, and we ought to have at least 250,000 men, and in the next breath he says he knows of no more helpful thing to do than to reduce it. Is that testimony upon which we can act here? It seems to me not, but that we ought to act upon our own judgment.

Much has been said about Gen. Pershing's testimony, and I wish to call the attention of the Senate for a moment to his testimony. He never made the distinction that is being made here. Gen. Pershing said:

Well, I said in my reply to the Senator, I think at this time it should not be reduced below 200,000. It seems to me it is getting on dangerous ground if we undertake to do too much at this time, with the world's affairs as they appear to be now.

That is the excuse he gives for it. There is no specific reason given and there is no specific reason that exists in the country to-day for a big Army. It seems to me we ought to set an example to the other nations of the world. We have some 3,000,000 young men in the country splendidly trained now, amply able to defend the country almost on a moment's notice. We have their names and we can bring them into an army whenever we will. Congress is almost constantly in session. Why should we build up this large skeleton Army, as it is called? What necessity is there for it? We do not expect any war.

There is no nation on earth that could possibly think of coping with us on the field of battle or in battle on the seas. There is no reason in the world at this time which has been offered by anybody for an army of the size proposed. It has been suggested, rather inferentially, that there may be trouble in this country, but no real reason is given for this proposed trouble. The President elect of the United States is urging disarmament throughout the country; he has given out interviews in favor of disarmament. The Republican Senate say they are in favor of disarmament; the Republican Senate say they wish to reduce the Army. Well, if you are going to reduce it, why not reduce it in a manner which will do some good? Why make only a pretense at it? Under this joint resolution we are scarcely proposing to reduce the Army at all. It will take more than a year to reduce the Army to 175,000 men; and that is twice as many men as we had before the war, for we all know that we only had about 75,000 men on an average for a number of years before the war, in our Army, and hardly that many. We did not need them, and we do not need them now.

I understand that while the President of the United States agreed at the peace conference to leave 7,500 men on our portion of the line on the Rhine in Germany, to-day we have now some 14,800 men there, and have had that number of men there all the time—about double the number of men the President agreed should stay there. Why are those men kept there? What necessity is there for the excess number? The Secretary of War in this very statement testifies that the department has recruited men and sent them over there to replace some of the men whose enlistments expired.

Mr. WADSWORTH. Will the Senator yield?

Mr. McKELLAR. I yield.

Mr. WADSWORTH. I think the Senator from Tennessee can not have read the testimony.

Mr. McKELLAR. I have the testimony before me and am reading from it. I will turn to the testimony and see if I have made a mistake. I desire to correct it if I have, but my understanding is as I have stated.

Mr. WADSWORTH. The statement was made perfectly plain to the committee, and if the Senator had been present he would have known it.

Mr. McKELLAR. I shall be glad to have the Senator from New York explain it. I wish to be corrected if I am wrong. But I have the testimony before me.

Mr. WADSWORTH. It was agreed upon while the peace conference was in session that 7,500 or 8,000 men should be the American contribution for the army of occupation on the Rhine. After that agreement was made the allied powers came to an agreement to send forces to Silesia, and our administration, for reasons thought good by the President, I assume, decided to contribute 5,000 men to police a referendum or a public election in Silesia.

That force was sent from the United States. When it reached Europe it was halted and not allowed to go to Silesia, but ended upon the Rhine. As a matter of fact, as the terms of enlist-

ment of the men now stationed under Gen. Allen on the Rhine expire they are brought home and no men are sent to take their places.

Mr. McKELLAR. May I ask the Senator a question?

Mr. WADSWORTH. Yes.

Mr. McKELLAR. I desire to ask the Senator if it is not true that there are some 14,000 or 15,000 men now on the Rhine?

Mr. WADSWORTH. I can give the exact number. There are now on the Rhine 14,800 men.

Mr. McKELLAR. I now desire to read the testimony which I have before me. Senator KNOX asked the question:

How many have we in Europe?

Gen. PERSHING. I think something like 12,000.

Secretary BAKER. I think 14,000.

Senator KNOX. How are they located?

Gen. PERSHING. They are all located upon the Rhine. The original number to be left there was 7,500; that was agreed upon in conference when the President was there. It was about as small an amount as could be organized, to be given any sort of balance. They have a little artillery and some cavalry. I think they have organized the cavalry since, but with auxiliary troops and everything necessary there are a fixed number at 7,500. After that there were some 5,000 sent over, originally intended for service in Silesia, but were never sent to Silesia. I think they were stopped on the Rhine and made a part of the command under Gen. Allen, whose headquarters were at Coblenz; and I presume that has been followed up by recruitments sent over from time to time, making now something like 14,000 men.

Mr. President, instead of taxing the American people for 25,000 additional men at this time, at a cost of some $35,000,000 or $40,000,000—because that is what we are proposing to do when we adopt the proposition to fix the number at 175,000 men instead of fixing the number at 150,000—why can we not bring the 7,500 additional men now on the Rhine back to this country and use them in our Army here and thus save the American people this great expense?

Mr. FLETCHER. Will the Senator allow me to interrupt?

Mr. McKELLAR. I yield.

Mr. FLETCHER. I desire to say that the testimony shows that the United States is not put to a dollar of expense by reason of the maintenance of the Army on the Rhine or for the pay of the men.

Mr. McKELLAR. I am glad the Senator has brought that fact forward, because I desire in just a moment to explain what the testimony shows about that. The testimony does not uphold the statement of the Senator.

Mr. FLETCHER. The testimony also shows that those men are coming home very rapidly, so that within the next month or two—I forget the exact figures, but I remember a statement was made as to enlistments expiring, and so forth—they will be coming home at the rate of something like 1,000 a month, or even more than that.

Mr. McKELLAR. Yes, sir; that is always the excuse given; that excuse is always ready; that we are going to do something in the future; that we are going to reduce the Army, for instance, but we do not do it. The joint resolution is in large part exactly of that character. It says that we are going to reduce the number to 175,000, but we shall not do it for a long, long time. Now, let me read on a little further.

Secretary BAKER. But they have got as high as 16,000 at one time by refilling the vacancies—

We are recruiting in this country for the purpose of keeping 15,000 men on the Rhine, when the contract which the President made at Versailles was that we should keep but 7,500 men there.

Mr. WADSWORTH. Will the Senator yield to me?

Mr. McKELLAR. I yield.

Mr. WADSWORTH. Why does not the Senator desire to be fair?

Mr. McKELLAR. Of course, I desire to be fair. I am fair. I am reading from the testimony.

Mr. WADSWORTH. The Senator is not reading all of it.

Mr. McKELLAR. I will read it all.

Mr. WADSWORTH. He would not make the last statement if he had read it all.

Mr. McKELLAR. I will read it all here and now, for I have nothing before me except the testimony given to the committee.

Mr. WADSWORTH. Very well; read it all. Even, I may say, a member of the Republican majority has to ask fairness in the treatment of a Democratic Secretary of War.

Mr. McKELLAR. I do not know about that, but I will stop long enough here to say that I have my doubts about it. The joint resolution advocated by the Senator is a criticism of the Secretary of War; the joint resolution reported out by the Senator from New York is a direct criticism of the Secretary's action in recruiting the Army as he has recruited it. By the way, I wish to say that I am not in the attitude of a critic of Mr. Baker, the Secretary of War. He has legal authority to recruit, and every Senator knows it. The Senator brought forth a bill here last year which, in words, gave him authority to recruit up to 280,000 men. I have defended Secretary Baker as to his authority. I am opposed to his exercise of that authority. Now, this joint resolution is a criticism of Secretary Baker for doing what the Republican majority, in language which could not be mistaken, authorized and directed him to do.

However, I hold no brief for Secretary Baker. I owe him no defense. I do not recall his ever having considered the interests of my State when they have come before him. In the six years he has been Secretary, Tennessee has received short shift at his hands. So that I am all the more free to uphold him when he is right and criticize him when I believe he is wrong. In exercising the authority to recruit the Army up to 280,000, as you authorized him, he is clearly right. In the policy of carrying out your directions he is clearly wrong.

I now read:

Secretary BAKER. But they have got as high as 16,000 at one time by refilling the vacancies; but that has been suspended for some months. As enlistments——

Mr. WADSWORTH. That is what I wanted to call to the attention of the Senator.

Mr. McKELLAR. I am reading that statement. I had simply not got to it.

Mr. WADSWORTH. But the Senator made a statement to the Senate before he read it.

Mr. McKELLAR. I am reading the whole thing; I am not going to be unfair to any man, if I know it, whether he be an officer, or Secretary, or whoever he may be.

As enlistments expire the men return to this country, and no fresh replacements are being sent over.

He does not say when that was; he says "recently."

Mr. WADSWORTH. He said "for some months."

Mr. McKELLAR. "For some months"; yes.

Senator NEW. I see that it is proposed to bring home all but about 8,000 men. I saw a newspaper announcement to that effect yesterday. On what was that based?

Secretary BAKER. It was based on the expiration of enlistments. As Gen. Pershing said, the original force was something like 7,500 men, but while the Peace Congress was still in session in Paris it was arranged that a part of Gen. Pershing's army should be retained for service in Silesia. These troops had been there a long time, and instead of retaining them there, with their period of enlistment, we brought them home and sent another contingent——

I will stop long enough there to call the Senator's attention to the fact that he said that these troops were intended for Silesia. They originally were intended for Silesia. Then they came home, but others were sent to the Rhine to take their places, according to the Secretary of War.

Mr. WADSWORTH. I stated the fact with absolute accuracy. I said that 5,000 men were sent from this country to serve in Silesia, but were stopped on the Rhine and did not go to Silesia.

Mr. McKELLAR. But the Senator did not state all of the fact, because those troops were sent back and another 5,000 were sent over to the Rhine to take the place of the first 5,000, according to Mr. Baker's testimony. I read further from the testimony:

Those troops had been there a long time, and instead of retaining them there, with their period of enlistment we brought them home and sent another contingent of about 5,000 over to take their places. They were attached to Gen. Allen's command at Coblentz to keep it up to the full strength. As their commissions and enlistments——

I assume that he means 16,000, or more than double the strength that it was originally intended to retain there by the President at Versailles.

As their commissions and enlistments are expiring, they are all coming home, and we are not sending any more replacements; so that by about the middle of May the force will get down to what it was originally designed to be.

Senator NEW. That was my understanding of it, and it was in order to develop that that I asked that question. The whole thing comes down to the point, then, that you are simply not replacing the expiring enlistments?

Secretary BAKER. That is right, sir.

Senator NEW. These men are coming home individually and as casuals, and there is no fixed purpose to bring home any considerable number of them in one outfit?

Secretary BAKER. That is right, Senator.

Now we come to the matter of pay. I shall read what the witnesses testified, because I myself do not recall exactly what was said.

The CHAIRMAN. What portion of the expense does Germany pay?

Secretary BAKER. It pays all of it, sir.

The CHAIRMAN. Including the pay of the troops?

Senator WARREN. It agrees to pay it.

Secretary BAKER. Well, they sent us some money; I do not know how much.

The CHAIRMAN. The pay of the officers and men?

Secretary BAKER. Yes, sir; that is my understanding.

Gen. PERSHING. Oh, yes; I think it was paid up to about September, 1919. I do not know what they have done since then.

Secretary BAKER. I have had checks since then, and Gen. Allen reported not long ago that he had marks enough on hand to pay all the expenses of his force.

Senator BECKHAM. I would like to ask Gen. Pershing, in line with Senator Johnson's question, what he thinks of the proposed reduction of the Army to 150,000?

Gen. PERSHING. Well, I said in my reply to the Senator, I think at this time it should not be reduced below 200,000 men. It seems to me it is getting on dangerous ground if we undertake to do too much at this time with the world's affairs as they appear to be now.

That is the testimony of Gen. Pershing in regard to the size of the Army.

Mr. President, it does not seem to me that the testimony of either Mr. Baker or Gen. Pershing is important as to this question now before the Senate. Both are asking for more than 200,000. Neither asking for the 175,000 men.

Mr. BORAH. Mr. President, even if they are correct, we are not following them. Gen. Pershing says we should not reduce the Army below 200,000, but the committee proposes to disregard his recommendations.

Mr. McKELLAR. A majority of the committee propose to disregard Gen. Pershing's recommendations, and all the committee propose to disregard the recommendations of the Secretary of War. The statement has been made that I am criticizing the Secretary of War. I am stating the fact when I say that the whole committee desires to disregard his recommendations, and apparently his testimony is being used simply to prove what he has done is wrong. It is a strange defense of the Secretary. The purpose of the pending joint resolution is to disregard the Secretary of War in toto. He has brought the Army up to 230,000 men and is recruiting it still further, and says it ought not to be less than 250,000 men.

Mr. President, it seems to me it is our duty to act upon our knowledge and judgment in the matter, in accordance with the time-honored traditions of this Republic, for the benefit of all the people, and save this large difference in the cost of the Army. Thirty-five million dollars or $40,000,000 is still a considerable sum of money. If properly used it would do much good.

Mr. MYERS. Mr. President——

Mr. McKELLAR. If the Senator will pardon me for a moment, we all know that the actual difference in effectiveness between a skeleton Army of 150,000 men and a skeleton Army of 175,000 could not be told by any expert.

Mr. ROBINSON. Mr. President, will the Senator yield right there?

Mr. McKELLAR. I yield. I beg the Senator's pardon. I must yield to the Senator from Montana [Mr. MYERS] first. He first interrupted.

Mr. ROBINSON. It is right on that point that I want to ask the Senator a question, with the indulgence of both the Senator from Tennessee and the Senator from Montana. In view of that fact and a consideration of the subject generally, and in view of the further fact, as stated by the Senator from Tennessee, that the reduction to 175,000 can not possibly be accomplished before the first or last of September, does not the Senator think that we might dispose of this matter by making the reduction suggested by the Senator from New York and proceed to other business? Otherwise, the end of September may come before we finally dispose of it.

Mr. McKELLAR. That is true. I am willing to take a reduction to 175,000 if we can not get the 150,000, but I am very much in favor of reducing it to the lower number; and I want to say to the Senator from Arkansas that while the thirty or forty million dollars which would be saved is not a matter of very much moment to many Senators it is, to my humble way of thinking about it, a very important matter. I would a thousand times rather vote to devote this thirty or forty million dollars to looking after and protecting and keeping up the maimed, wounded, and tuberculosis-cursed boys who have already been serving their Government in the Army, who are now without proper hospital service, as has been shown here, than to add to the Army this additional number of 25,000 men that are wholly useless at this time. I think the Senator from Arkansas is mistaken in saying that we are losing time or wasting time when we are endeavoring, first, to lower the tax burdens upon the people of this country and also in endeavoring to use this money for the benefit of those who are entitled to it, who have already given most of their lives to their country.

Mr. ROBINSON. Mr. President, will the Senator yield further?

Mr. McKELLAR. I yield.

Mr. ROBINSON. But the point I am making is that, according to the Senator's own argument, we could make this reduction now to 175,000, and before that is concluded we could give further consideration to the subject, if necessary, and provide for any other reduction that may be deemed advisable; but if we continue to debate the subject indefinitely there is likely to be no action.

Mr. McKELLAR. But why take two bites at a cherry when you can take it with one just as easily?

Mr. MYERS. Mr. President——

Mr. McKELLAR. I yield to the Senator from Montana.

Mr. MYERS. I wanted to make a remark in connection with the suggestion made by the Senator from Idaho [Mr. BORAH] a few minutes ago. Reference was made to the fact that Gen. Pershing opposes any reduction below 200,000. That is true; and yet while it is his opinion that the number of enlisted men should not be reduced below 200,000, he says it could be reduced to 175,000 without totally impairing the framework on which the Army is founded, but that if you go below 175,000 you destroy the foundation upon which the reorganized Army was built and would have to do it all over again.

Mr. McKELLAR. Did Gen. Pershing say what the foundation or framework was? I do not find it in his testimony here. He merely makes that as an excuse for not reducing it. Why, Gen. Pershing, from his point of view, would not reduce the Army at all. He would increase it. He is a military man, and one of the greatest in the world, but, of course, he looks at all these questions from a military standpoint.

Mr. MYERS. He gave an explanation of it further on, about so many units and regiments being required on which to expand, and that if we went below 175,000 we would not have them.

Mr. McKELLAR. Yes; but when we come to look into what has been done under the present Army reorganization act we find that the staff units of the Army have been enlisted to a greater strength than they ought to have been enlisted to, whereas the infantry, or fighting units, have not been enlisted up to their full strength.

Mr. MYERS. I know that Gen. Pershing says in effect that if Congress sees fit we can reduce the Army to 175,000, although against his judgment, without destroying the foundation on which it is constructed, but that if we go below 175,000 we are virtually destroying the foundation on which the house is built. He is a military expert, and I am willing to take his judgment.

Mr. McKELLAR. Oh, no. The Senator is mistaken about that. He does not say that.

Mr. MYERS. He did not use those words, but that was the effect of what he said.

Mr. McKELLAR. No; if you want to follow the advice of Gen. Pershing, do not vote for 175,000, because he is opposed to it. He says you will destroy those units if you bring the Army down below 200,000.

Mr. MYERS. There is more there on the subject. He says that you destroy it all the more if you go below 175,000.

Mr. McKELLAR. He does not say that. That may be the argument which the Senator has in his own mind, but Gen. Pershing does not say that.

Mr. MYERS. That was advanced while he was testifying, either by him or by some Senator, and he assented to it.

Mr. McKELLAR. Perhaps so, but this record does not show it.

Mr. DIAL. Mr. President——

Mr. McKELLAR. I yield to the Senator from South Carolina.

Mr. DIAL. Would it not be well if we could take some steps to stop the recruiting of officers as well as to stop the recruiting of enlisted men?

Mr. McKELLAR. Mr. President, I am not prepared to agree to that. The Army reorganization act, as I recall, provides for about 18,000 officers, and they have commissioned up to date about 14,000, and there are now about 4,000 less than the number required. I do not know whether or not the Secretary takes the same view about decreasing the number of officers that he does about decreasing the number of men. I think they have a rule now that officers can only come up from second lieutenants.

Mr. DIAL. That is on the assumption, though, that we are going to have an Army of about 280,000.

Mr. McKELLAR. The 18,000 was on the assumption—I am giving round numbers, of course—that we would have an Army of 280,000 men.

Mr. DIAL. Now, if we should reduce the Army down to 150,000 or 175,000, we would need less officers than we would for an Army of 280,000.

Mr. McKELLAR. The Senator may think so; but I think it is very much more important to have a larger number of officers proportionately than of men, for the reason that we can bring men into the Army very rapidly, while it takes some time, it takes years, to train officers. I am rather inclined to think that we ought not to reduce the number of officers.

UMI

Mr. DIAL. I agree to that proposition as a rule, but it does seem to me that there is a very great disproportion.

Mr. McKELLAR. Mr. President, I regret very much that the Senate has seen fit to change its views since last Friday. On last Friday, by a substantial majority, the Senate held that 150,000 men in the Army were enough. This morning, by a very much larger majority, the Senate went the other way. I regret it very much. I hope that the amendment for 175,000 may be defeated, and that we may have 150,000 in our Army.

Mr. FLETCHER. Mr. President, I am very anxious—as others are, no doubt—to reach a conclusion of this discussion, and I shall not delay the action upon it. I do, however, feel called upon to say just a word in view of the remarks which have been made to the effect that we could use the amount of money required over and above the amount necessary to provide for 150,000 to 175,000 enlisted men for taking care of the disabled and the injured.

Of course, it would seem unnecessary to say, although the arguments made rather call for an expression of that kind, that no Member of this body who favors enlistment up to 175,000 men is in favor of decreasing in any amount whatsoever the provisions which ought to be made for disabled or wounded or otherwise incapacitated men by reason of their service. On the other hand, I favor taking care of those men to the limit, and I believe Congress will do it. The country demands it, considerations of humanity require it, and everyone who favors this provision for the Army certainly favors taking care of the incapacitated and the disabled men in every respect whatsoever, no matter to what extent it may be necessary to go.

We must make provision for those men. It is our duty to do it, and we will do it. I have not any question about that. It makes no difference whether the joint resolution provides for 175,000 or 150,000 men; that has nothing to do with the question of taking care of the incapacitated and the disabled. That is going to be done, anyhow.

Mr. McKELLAR. Mr. President, will the Senator yield?

Mr. FLETCHER. Certainly.

Mr. McKELLAR. According to the testimony that was read a while ago, it is very far from being done at present. There are a great many tuberculosis patients that are not being cared for.

Mr. FLETCHER. I understand that already provision of a temporary character has been made for taking care of those men, and that further provision will be made as the bills are considered by the committees which are now handling them. That situation will be met independently of any question as to what is done with regard to this joint resolution and the number of enlisted men provided for hereafter in the Army.

The arguments made by the Senator from Mississippi [Mr. WILLIAMS] and the Senator from Idaho [Mr. BORAH] and the Senator from Tennessee [Mr. McKELLAR] lead us to this: Why have any Army at all? If you can save $30,000 by striking off 25,000 men, why not save $50,000 by striking off 40,000 men, and why not save a million dollars by striking off a few more men, and finally we get to the point where we do not need to have any Army at all, and we will take the whole amount of money and use it for constructive purposes.

Of course, you can do that if you want to; but one Government after another has been committing suicide for the last four years. Austria-Hungary committed suicide. I suppose we can do it if we want to do it.

Mr. McKELLAR. Mr. President, I want to say to the Senator that I know he does not want to misstate what I have said.

Mr. FLETCHER. No.

Mr. McKELLAR. I am not in favor of having no Army. I am in favor of a proper Army. This Army will be twice as large as we had before the war if it is reduced to 150,000. The Senator talks about Austria committing suicide. The Senator knows that the reason why Austria had to commit suicide was because for many generations she maintained one of the greatest standing armies in Europe.

Mr. WALSH of Montana. Mr. President, I was about to remark that Austria-Hungary committed suicide by increasing her army, not by reducing it.

Mr. McKELLAR. Why, of course.

Mr. ROBINSON. Mr. President, will the Senator yield to me for one moment?

Mr. FLETCHER. Austria-Hungary committed suicide by a very foolish, absurd, ridiculous, asinine move or policy——

Mr. McKELLAR. Well, we do not want to follow it.

Mr. FLETCHER. Not by reason of having an army, but by reason of undertaking to put the world on fire. There are various ways of committing suicide; but if the country is dead, it is immaterial how it got there.

Mr. ROBINSON. Mr. President, will the Senator yield to me just for a brief statement?

Mr. FLETCHER. Certainly.

Mr. ROBINSON. The Senator from Tennessee has just stated that the Army proposed in the amendment carrying 150,000 enlisted men would be twice as large as the Army of the United States prior to the war.

Mr. McKELLAR. Yes.

Mr. ROBINSON. No doubt the Senator will recall that under the national defense act passed in August, 1916, the Army, prior to our entering into the war, was augmented to 202,000 officers and men, or approximately that number, and that from the beginning to the end of the war those in charge of the Government were execrated by the people of this Nation for failing to provide for a sufficient Army, for a total disregard of what they termed necessary preparedness. Now, Mr. President, we are still technically in a state of war; and I respectfully suggest that especially those—I do not now refer to the Senator from Tennessee, but to other Senators who have participated in this debate—especially does it not lie in the mouths of those Senators who have opposed this Government entering into any relations for the preservation of the future peace of the world with other Governments to say that under the conditions as they now exist this Government ought not to have an Army of 175,000 men.

Mr. McKELLAR. Mr. President, of course, I am familiar with the Army reorganization act of 1916, in which the authority was given to raise an Army of some 225,000 men; but, as a matter of fact, it was by voluntary enlistment, and for the six years preceding the war, I would say, the Army on an average was very much nearer to 60,000 than 70,000, and it is now four times, or more than four times that number.

Mr. OWEN. Mr. President——

The VICE PRESIDENT. Does the Senator from Florida yield to the Senator from Oklahoma?

Mr. FLETCHER. I yield to the Senator; but I will be through in just a moment.

Mr. OWEN. I merely wanted to make the observation that when the authority was given to increase the Army the world was then ablaze with war.

Mr. McKELLAR. Of course.

Mr. OWEN. Moreover, with the destruction of the great military establishments of Europe the threat which hung over the world of a possible world war has been almost entirely removed.

Mr. McKELLAR. Absolutely.

Mr. OWEN. And the whole world is now trying to get back to a basis of disarmament in order to relieve the people of the world from the gigantic taxation which is consuming the taxpayers of the world. I am myself very much in favor of the smaller number.

Mr. McKELLAR. I think we ought to set an example to the world by going ahead and reducing our own Army.

Mr. ROBINSON. The Senator from Oklahoma has spoken just as if the world were at peace. He has referred to the fact that at the time the United States augmented its Army, in the manner and to the extent I spoke of a moment ago, the world was ablaze. I call his attention to the fact that the fire has not been extinguished yet. The United States has not yet made peace with her enemies, and war still continues along many battle fronts, bitter and desolating warfare. It is within the knowledge of every Senator present that the foreign relations of this Government respecting some of the great powers of the earth are, to say the least, not the most amicable that could be desired or that could be established.

Mr. FLETCHER. Mr. President, I do not look for any war; I do not expect that we are going to have any conflict with any country in the world; but, at the same time, I am not in favor of doing away with the framework, the skeleton, if you please, of a standing Army. I know the Senator from Tennessee is not in favor of doing away with the Army, either. I merely stated a moment ago that his argument led to that sort of a conclusion. But I am not in favor of so crippling the Army as to make it ineffective, to make it worthless and useless in case there should be trouble. It would be unwise, it seems to me, to so limit the number of enlisted men in the Army that we could not carry on any training at all; that we could not keep up the necessary additions to the arms or branches which the World War has demonstrated we should have made, namely, the Chemical Warfare branch, the Air Service, and the Motor Transport Service, all of them calling for men in addition to those required in the Regular Army before this war. I am not in favor of abolishing those and preventing this work in connection with what may happen in the future in the air and under the sea. I say, it

would be folly for us to discontinue those branches of the Army.

Mr. McKELLAR. Mr. President——

Mr. FLETCHER. I yield to the Senator from Tennessee.

Mr. McKELLAR. If the Senator holds those views, he ought to oppose this bill entirely, for the reason that the best thought in the Army, of the leading officers of the Army, the Secretary of War, and all the important generals of the Army, who appeared before Congress last spring, was that the organization they proposed was the least organization, both of officers and men, consistent with the safety of the country. If the Senator thinks that 150,000 men will destroy it, by the same process of reasoning he must come to the conclusion that 175,000 will almost equally destroy it, and he should not vote for the joint resolution now. If I had the views about it the Senator has, I would certainly vote against the joint resolution.

Mr. FLETCHER. I understand, of course, about the testimony taken before the committee some months ago. But conditions have changed. Conditions are changing almost every day. It may be that six months from now I will vote to reduce the Army further. We can not foresee what may happen in that time. It may be that in six months from now we will vote to increase it, and the Senator from Tennessee will be ready to vote with us on that proposition.

Mr. McKELLAR. I will vote for it whenever it is necessary.

Mr. FLETCHER. But we do know now that conditions have changed since the Army reorganization bill was first submitted and hearings were had upon it. I was referring to these additional branches by way of comparing the 150,000, as proposed to be provided now, with the prewar number of about 103,000. That is about the comparison. If you add those I have mentioned, which we have seen fit to add, and will continue the Motor Transport Service, the Chemical Warfare Service, and the Air Service you will just about place the Army on the prewar footing. I think we ought to stand for that. I am therefore in favor of the joint resolution providing 175,000 enlisted men.

It may be material here to read in this connection a telegram which I have just received. Many of us have received similar telegrams, and this is a sample of the letters and telegrams which have come to me in this connection. The telegram is from Chicago, dated January 15, and is as follows:

> In connection with newspaper publicity relative to proposed standing army, we ask that consideration be given to reports of Secretary of War Baker and Gen. Pershing, both stating that 200,000 is the minimum on which our Army can be successfully administered. We advocate nothing less than this figure.
>
> THE CHICAGO ASSOCIATION OF COMMERCE,
> ARMY AND NAVY COMMITTEE,
> CHARLES S. DEWEY, *Chairman.*
> GEORGE M. SPANGLER, *Secretary.*

Mr. President, I am very anxious to have a conclusion reached regarding the joint resolution, and I shall not detain the Senate longer, although I might add something to what I have already said in support of the measure.

The VICE PRESIDENT. The question is on concurring in the amendments made as in Committee of the Whole.

Mr. HARRISON. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Assistant Secretary called the roll, and the following Senators answered to their names:

Beckham	Hale	McKellar	Sheppard
Borah	Harris	McLean	Simmons
Brandegee	Harrison	McNary	Smith, Ariz
Calder	Heflin	Moses	Smith, Ga.
Capper	Henderson	Myers	Smith, Md.
Colt	Hitchcock	Nelson	Smoot
Curtis	Johnson, Calif.	New	Spencer
Dial	Johnson, S. Dak.	Norris	Sterling
Dillingham	Jones, N. Mex.	Overman	Sutherland
Fall	Jones, Wash.	Owen	Swanson
Fernald	Kellogg	Page	Trammell
Fletcher	Kenyon	Phelan	Underwood
Frelinghuysen	Keyes	Pittman	Wadsworth
Gay	King	Poindexter	Walsh, Mass.
Gerry	Kirby	Pomerene	Walsh, Mont.
Glass	Knox	Ransdell	Warren
Gooding	La Follette	Reed	Williams
Gronna	McCumber	Robinson	Willis

The VICE PRESIDENT. Seventy-two Senators have answered the roll call. There is a quorum present.

Mr. PHELAN. Mr. President, when the notice for reconsideration was given by me last Friday, the Senate was not in possession of the information which had been given to the Committee on Military Affairs by Gen. Pershing and Secretary Baker, and the reconsideration was sought in order that the information given by the commanding general of the Army and the Secretary of War might be in the possession of the Senate before final action would be taken. I simply desire briefly to state what that testimony was. The testimony in part was as follows:

> Senator BECKHAM. I would like to ask Gen. Pershing, in line with Senator JOHNSON'S question, what he thinks of the proposed reduction of the Army to 150,000.
>
> Gen. PERSHING. Well, I said in my reply to the Senator, I think, at this time it should not be reduced below 200,000. It seems to me it is getting on dangerous ground if we undertake to do too much at this time, with the world's affairs as they appear to be now.

Again, on page 13 of the testimony, Senator JOHNSON asked:

> We would like, Gen. Pershing, to have your view about this temporary reduction.
>
> Gen. PERSHING. It seems to me that at the moment there should be no very radical reduction made. I am of the opinion that conditions in the world do not warrant us in making too great a reduction. I should not like to see it reduced below 200,000 at the present time.

The Senator from Tennessee [Mr. McKELLAR] said that 150,000 would represent about double the strength of the Army before the war. The chairman of the committee, Senator WADSWORTH, at that meeting, in answer to a suggestion of that kind said:

> The reduction to 150,000 men should be considered in the light of the new obligations imposed upon the Army rather than in the light of the strength of the Regular Army of 1916.
>
> That makes a very considerable difference. There should be at least 10,000 men in the Air Service. We authorized 16,000. There are 8,000 in the Philippine Scouts. There are 18,000 extra. There are 1,200 in the chemical-warfare department, which makes a total of 19,200. There are 1,800 in the Porto Rico regiment. That makes a total of over 21,000 men right there.
>
> Secretary BAKER. And those were previously extra.
>
> The CHAIRMAN. Previously they were not in the Regular Army.

Secretary of War Baker urged 250,000 men as a minimum.

So the war has brought new methods of warfare, chemical warfare and warfare growing out of the Air Service, and the Army of to-day, in the light of experiences of the war, of course, is not the same organization that it was before the war. In order to have the same strength in the Army, we must have numerically a greater Army to-day to be on a parity with our military strength before the war.

The high command, if I may so call it, of our Army, the respected General of the Army, in unequivocal terms, has stated that 200,000 would be the lowest number of enlisted men with which we might consider ourselves in the possession of a skeleton army with power to expand. If that is true, the Senate ought to be advised of it.

Some one wrote a book not a long time ago called "The Valor of Ignorance," a very illuminating title. I think it might bear critically upon Members of this body who, without any familiarity with war or the organization of an army, certainly not in the field, have ventured to express views diametrically opposed to the view of our respected commander of the Army, whose opinion certainly is entitled to the greatest weight. In that book, The Valor of Ignorance, which conveyed the idea that we are valorous because we do not know the danger, it was clearly pointed out that we required an army because there was danger.

The writer of that book—an American—was a general in the Chinese Army, and had his collegiate training at Leland Stanford Junior University. He was a man of action and a man of letters, and he clearly foresaw all the dangers into which this country was about to be precipitated. He knew the necessity of having an adequate defense. In the book he gives information which leads us to believe, coming from him as a distinguished strategist, that there would be no difficulty in landing an army upon the American coast, notwithstanding the assertions here to-day that it would be impossible to make a landing upon the Pacific coast of America. If it is at all possible to land upon the Pacific coast of America, we must not only have a navy as a first line of defense, but we must have a garrisoned coast, where we have an adequate number of men to man our shore batteries.

We are not in a position to-day to take advantage of the opportunities we possess for the public defense of Alaska, the Canal Zone, Guam, the islands of the Caribbean. In the island of Hawaii there is an inadequate garrison. During the war we had to strip the Hawaiian Island garrison and substitute a national guard composed one-half of Japanese. The island of Guam requires a garrison, more so to-day since the Japanese have taken possession of the Mariana, Marshall, and Caroline Islands surrounding Guam, which has destroyed it in the eyes of military men as a strategical point for the United States and brought Japan 2,000 miles closer to our shore. Japan has fortified a great island nearer her coast which our ships are not permitted to approach, a veritable Gibraltar.

When it is stated that there is no danger in the Pacific which would justify adequate preparedness, I will call the attention of the Senate to the fact that it has developed that at this very moment there is a controversy, involving considerable danger,

between the powers of Europe and Asia on the one hand and the United States on the other, with respect to the island of Yap, vitally necessary for our communication with the Far East and which we were promised in the conference at Versailles, according to the President. If that is vital for our communication, perhaps it will be necessary for us to insist upon the redemption of the promise made to the President of the United States by the Japanese at that time. At any rate, whatever may happen, it will persevere and cause friction.

I am not speaking of the California situation to-day, because it is a long story, although the Senator from Mississippi [Mr. WILLIAMS], I believe, belittled the danger which arises from the presence of Japanese in California. I need only to direct your attention to the fact that within a week the Legislature of the State of California, both in the senate and in the assembly, by a unanimous vote informed the Federal Government that should it interfere, by treaty or otherwise, in invalidating the alien land law of California barring oriential aliens from the soil, or if it endeavored to confer citizenship upon orientals resident in California a situation would be created which, I am sure, would be both painful and disagreeable for the country at large.

The memorial itself is on the way and will be published in the RECORD in a few days and will speak for itself.

I do not know what recourse California would have should her vital interests be sacrificed to the maintaining of a so-called "friendship" with a country that is disputing every foot of ground in the Pacific; with a country that holds no friendly feeling toward the United States, which it regards as an aggressor.

I call attention to this Associated Press dispatch from Tokyo:

JAPAN EXPECTS UNITED STATES TREATY TO KILL LAND LAW—TOKYO DIET TOLD CALIFORNIA MEASURE WILL BE NULLIFIED.

[By the Associated Press.]

TOKYO, *December 24, 1920.*

Addressing preliminary meetings of the diet here to-day, Viscount Uchida, the foreign minister, expressed the opinion that a new Japanese-American treaty will be concluded, leading to nullification of the California land law. He said he expected such action to result from the negotiations which have been in progress at Washington between Ambassador Morris and the Japanese ambassador.

Ambassadors, he said, were making efforts to obtain an understanding with the Senate to obtain passage of the treaty, but if the negotiations fail a formal protest would be lodged.

Answering interpellations, M. Uchida said the negotiations were proceeding on the understanding that such a treaty would override the State laws.

Texas the other day received only two families of Japanese who had acquired land and who were about to settle in the Rio Grande Valley. What happened? This is significant. It was not a vigilance committee that waited upon the Japanese. It was a great law-abiding and law-enforcing body of men, none less than representatives of the American Legion. In their two conventions at Minneapolis and at Cleveland, nation wide, the American Legion resolved that the Japanese question must be settled upon the lines demanded by California, and that great organization of fighting men is behind the cause advocating the exclusion of the Japanese, barring them from the ownership of the soil and the enjoyment of the voting privilege. I was rejoiced to see it, because the Congress, while it might, which I sincerely doubt, ignore the petition of California, a State afflicted and most familiar with the subject, would not ignore the petition of that great body of patriotic Americans who established the prestige of United States arms in the World War.

We must bear in mind, therefore, that this is as much an American question as it is a California question, and if there is any danger in that situation it is idle for Senators to say we are in a time of profound peace. War is going on all over the world. Gen. Pershing knows that. He knew our inadequate Army before he was sent into Mexico with an insufficient force which made our service ridiculous and brought discredit upon our country by failing to make an effective strike.

I am told that with a knowledge of that expedition to Mexico, the very peons of Mexico look upon us with a great deal of contempt. If we ever entered Mexico, we should have finally established the purposes for which we entered Mexico, but we have gone on in a policy of vacillation; our councils have been pacific; but the nations of the world have imposed on our pacifism, and the only way to win their respect, I believe, is to have a strong Army and a strong Navy until the dangers are passed, not to strike but to be ready to strike.

The times are out of joint. The world is really at war to-day, and there are potentialities in the immediate future which are alarming. That has been indicated by discussion in the Committee on Foreign Relations, in the Committees on Naval and Military Affairs, and in the press. There is no peace in the world to-day, and the United States technically is still at war.

In view of these circumstances, I lay great stress upon the testimony of Gen. Pershing. I think it would be a mistake to weaken our Army organization. As the chairman of the Committee on Military Affairs may possibly tell the Senate, we have an organization of an Army on the basis of 240,000 enlisted men, and if we cut it down to 175,000 it will make the task difficult, but far more difficult if we cut it down to 150,000. So, in order to maintain an organization that is worthy of the name, upon which a greater organization, if necessary, may be built, it seems to me extremely desirable that the recommendations of the committee be adopted by the Senate establishing the Army strength at 175,000 enlisted men.

Mr. WILLIAMS. Mr. President, I have listened, as everybody always does listen, with a great deal of intensive interest to the utterances of the Senator from California. It is not always given to all of us to regard his conclusions with any degree of tolerable respect, but it is always given to us to regard his earnestness and his zeal for the Pacific slope with that degree of respect which a sectional man, as I am, regards a sectional effort of another man, such as he is.

The Senator tells us that the Legislature of California has just "given notice" that it will defy any treaties of the United States that do this, that, or the other thing; and he tells us that it would be an awfully "disagreeable thing" if an impasse came between the Legislature of California and the United States Government. My memory goes back—historically, not individually—to a period when 11 different Southern States read riot acts like that to the Federal Government, and the result was, as predicted, very disagreeable, very, indeed.

The State of the Senator from California is not really proposing a new secession or a new nullification, or a new war against the Union. But if he did not mean that, he did not mean much of anything; he was simply "vaporing in the air." Our people, when we said that we meant all that, really did mean it and we intended to fight. We did fight, we fought for four years, and we died, a whole lot of us—not myself amongst them, but some of us, you understand, amongst our ancestors.

The Senator does not mean a word of that. California is not going to declare war against the Union. She is not going to nullify anything. She is not going to secede. She is not going to nullify any treaty. She is not going to defy any laws of the United States. She has not the slightest idea of doing it to-day, and the Senator knows it. But he bases his entire argument in favor of the possibility of war between Japan and the United States upon the action of the Legislature of California and the possible counteraction of Japan. He knows the Government of the United States is not going to be bulldozed by the Legislature of California—I will not say bulldozed; I mean influenced. It will not be influenced in the slightest degree. It might have been under a Democratic administration and with the weakness of Democracy, but it can not be under the plutocratic administration which is just coming in with the strength of plutocracy that insists that everything should be surrendered to money. Even at the beginning of the Civil War if plutocracy had been in command, we never would have had any war. They would have said, Let us trade together and let us have peace.

The Senator from California tells us in the next place that there is "war all over the world." Yes, everywhere except in the United States and everywhere except between the United States and another party. Why does the Senator want to say "there is war all over the world" as an inducement for us to build up a great big Army to keep off enemies? Where are the enemies? I ask the Senator from California now to rise in his place and tell me where are the enemies.

Mr. PHELAN. Mr. President, the Senator from Mississippi, of course, means enemies of the United States. It is very hard to declare as enemies people who, in the language of diplomacy, are on friendly terms with the United States. I do not believe that the Japanese Government is, in a true sense, friendly to the interests of the United States.

Mr. WILLIAMS. Nor do I.

Mr. PHELAN. I know that she resents the attitude of the United States on the subject of racial inequality, and I can understand the Japanese position. She simply says, "We are a world power, and our nationals are entitled to as much consideration as are the nationals of any other country." That, if acceded to, would bear very hard upon the Pacific coast, because, as in the case of the Hawaiian Islands, the Pacific coast would soon pass to the political and actual control of orientals. If we conferred citizenship upon those who reside there, it would simply speed that day.

So there is a real situation there. However, I did not say, as the Senator from Mississippi has repeated—and I think he is mistaken—that the Legislature of California has defied the Federal Government. There is no note of defiance, but I referred to a memorial adopted by a sovereign State.

Mr. WILLIAMS. I did not yield to the Senator from California to make a speech. I yielded to him to answer a question.

Mr. PHELAN. Then, I will answer the question in one word more. I would say that we are also on terms of amity and peace with the Republic of Mexico, but they are passing laws which are prejudicial to our nationals there, and there was an incipient revolution there the other day. There is a constant menace to us upon the Mexican border. It is easy to recall the raid at Columbus.

Mr. WILLIAMS. Mr. President, I asked the Senator from California to point out a possible enemy of the United States, meaning by it, as you must have understood and as every Member of the Senate must have understood, any power anywhere that had the will to attack, had the power to attack, and would attack the United States. The Senator has failed to answer the question. He knows as well as I do that Japan neither dares nor will attack the United States because of any legislation which may be passed in California.

Mr. PHELAN. Russia once thought so.

Mr. WILLIAMS. Oh, well, never mind about that. I was not going off on side issues of one description or another.

The Senator from California tells us that the peons of Mexico despise us. Is not that awful? Just think of it! The peons of Mexico despise the American Republic because we have not properly asserted our dignity; because we have not gone down and spanked a lot of little children who are playing around in the back yard and are shooting bows and arrows at us and spitting fire at us now and then, chewing gum and squirting out of their upper lips at us. Is not that awful? The peons of Mexico despise us! Let us raise an immense, great big Army because the peons of Mexico despise us!

What would happen to the peons of Mexico if we should let loose the State of Texas on her without any of the other States of the Union at all? Mexican statesmen have said they could whip the United States if we would keep Texas off her. If we should turn Texas, Arizona, and New Mexico, all three of them, at any time onto Mexico, we should never hear another word of the peons of Mexico.

Oh, my friend, the Senator from California, does not mean that sort of stuff; he really does not mean it. He thinks he means it now and then when he is talking freely, but he really does not mean that because the peon of Mexico despises the United States we should have an Army of 175,000 instead of an Army of 150,000 men; or because now and then a Negro in South Carolina despises a white man that the white man should go around all the time with a howitzer, a mountain pistol, and a rifle. He does not mean that. I have more respect for his intelligence than to think so.

Mr. President, I have been waiting all day to hear the testimony of Gen. Pershing. From the way Senators were talking about it I thought it must be awful, but when I came to hear it, it is this, as quoted by the Senator from California:

> It seems to me we are getting on dangerous ground.

That is Pershing's utterance. Is not that an oracular sort of a thing? It sounds like the oracle of Delphi when the ambassadors from the Greek Republic came before it. Later on Gen. Pershing says:

> It seems to me that at this moment no radical reduction should be made.

What that means I can not tell; what it means the Senator from California can not tell, or at least does not explain. I do not know what a "radical reduction" means; I do not know what "reduction" means. Reduction from what and to what and when? It means absolutely nothing. Of all the miraculous, oracular, indefinite, vague things I have ever heard, it is the most miraculous, oracular, indefinite, and vague. I do not think Gen. Pershing can have been accurately quoted. He must have said something more definite than that. Did Gen. Pershing tell us what he thinks the strength of the United States Army ought to be? I think the Senator from California said that Gen. Pershing said it ought to be 200,000 men. Is that correct?

Mr. PHELAN. Yes. The Senator from Mississippi has his testimony there. Gen. Pershing said the minimum number should be 200,000; the Secretary said 250,000.

Mr. WILLIAMS. Then, Mr. President, Gen. Pershing's testimony goes for naught, because Gen. Pershing stated that the strength of the United States Army, as the least possible skeleton around which to build flesh and muscle and blood, should be 200,000. Already the committee has reduced it by 25,000, and now all we wish to do is to reduce it by another 25,000.

Pershing is as badly off with the skeleton, even if he could keep all the bones, with a reduction of 25,000 men, as he would be with a reduction of 50,000. I believe the Senator from California is a member of the Committee on Military Affairs.

Mr. PHELAN. No.

Mr. WILLIAMS. But the Senator is defending the report of the committee; the committee has come in with a report proposing to maim and cripple Pershing's estimate by 25,000 men; the Senator from Wisconsin [Mr. LENROOT] comes in with a proposition to maim and cripple him by 25,000 more; and the Senator from California is supporting the 25,000 maim and cripple proposition, but is not supporting the other 25,000. What is the difference? If the skeleton will not fit by 25,000, it is not much worse off if it does not fit by 50,000.

Mr. PHELAN. It is a misfit.

Mr. WILLIAMS. Yes; the Senator is supporting an absolute misfit of 25,000.

"A skeleton Army with power to expand." My God! expand to what? The funny thing about this debate is that nobody tells us to what this skeleton is going to expand; and yet they dwell with absolute literalness—and the Scripture says the letter kills while the spirit saves—on the skeleton as a prerequisite to the expansion, but never tell us what the expansion is. I defy the Senator from California right now to tell me in figures what the expansion is of men, officers, and various branches of artillery, infantry, and so forth.

Mr. PHELAN. That is to be determined by the necessity which may arise.

Mr. WILLIAMS. "Now, I have you on the hip," as Gratiano said to Shylock. "To be determined by necessity"—the skeleton to accord with the necessity, and the necessity to be determined by the necessity. Therefore there must be à la Pershing absolutely an Army of 200,000; à la the committee exactly 175,000; à la LENROOT exactly 150,000; à moi probably 100,000. The Senator tells me that the maximum up to which the skeleton is to be built is to be fixed by "necessity." Well, why not build the skeleton by necessity then, and why not consider the present moment as a part of the necessity?

Now, as a citizen of America, of whom are you afraid? Who is going to attack you in the immediate or in the remote future, so far as you know? Of whom are you scared? Why, Mr. President, the funniest thing about this is that this debate begins with a Yap and as far as the Senator from California is concerned it almost concludes in a yap, because he tells us that if we do not carry out this thing far enough we may probably lost Yap. Three-fourths of the Senate right now do not know where Yap is; nine-tenths of the Senate, including the Senator from California, and certainly including myself, never heard of Yap until the Versailles treaty was concluded, when we found out that Yap was an island somewhere in the Pacific. So we are going to yap for a big Army; we are going to yap against the Japanese; we are going to yap between a reduction of 25,000 and 50,000 in the Army, in order that we may have an opportunity to yap forever. I doubt if the Senator from California can tell me right now, by longitude and latitude, or even if the Senator from Wyoming [Mr. WARREN], the best informed man in this body upon military affairs, can tell me by longitude and latitude where Yap is.

Mr. WARREN. Mr. President, I presume my judgment of latitude and longitude is much like that of the Senator from Mississippi—somewhat mixed.

Mr. WILLIAMS. Mr. President, if the judgment of the Senator from Wyoming as to the latitude of Yap is like mine, it is the most vague and indefinite judgment that he could possibly describe. I positively do not know anything about Yap, and do not care anything about it, and I would not give a continental cent to-morrow for the difference between the United States having it and China having it and Japan having it and Great Britain having it and France having it and Germany having it, or even poor little Austria having it.

Mr. PHELAN. Mr. President, the Senator asks me concerning the location of Yap. It is sufficient to know that it lies between our Philippine possessions and our possessions at Guam. But when the Senator says that two-thirds of the Senate have not heard about the Island of Yap, I desire to say that the Naval Affairs Committee was informed confidentially by the naval authorities that it was vital to our communications. That was stated in a document that was held confidential. It is not new. I knew it at that time. The Senator from Mississippi, not being a member of the committee, was not informed, and for that I am sorry. I recall a rhyme that—

> The latitude is rather uncertain,
> And the longitude is equally vague,
> But that person I pity who knows not the city—
> The beautiful city of Prague.

Mr. WILLIAMS. Mr. President, I differ with the Senator from California about one thing. He rather regrets that I do not know, or did not know at some time, where Yap was. I am rather proud of the fact that I have not encumbered my intellect with any knowledge concerning Yap. A fellow has a good deal to learn in this world, and he ought to learn to conserve his intellect, and one of the best things that he can

do is to disregard Yap and all other nonessentials at the beginning; but there is some lesson in this.

This debate begins in favor of an Army of 175,000 against an Army of 150,000 in a yap, and concludes in a yap. That is about all there is to it.

Mr. PHELAN. Mr. President, one word. I desire a vote as much as anyone, and I want to thank the Senator for having brought up the question of the protest of California, which I deny was a defiance.

Mr. WILLIAMS. I never said that it was a defiance.

Mr. PHELAN. The Senator said that the Southern States also made a protest, but finally had to resort to arms. Our very purpose in California is to make a protest at this time to prevent the Japanese becoming a race question, which may involve war, just as the importation of slaves in the early days of the Republic ultimately led to war. We are taking this precaution in time, and I am very glad that the Senator reminds me of that struggle.

Mr. WILLIAMS. Mr. President, the South also for 10 or 15 years prior to the Civil War again and again took State action of one sort or another and convention action of one sort or another, and always coupled it with the protestation, which was absolutely sincere, that its object was not to bring about a war, but to prevent war.

Mr. PHELAN. But you made no attempt to get rid of the Negroes. We want to eliminate the provocation in time and rid the State of the Japanese.

Mr. WILLIAMS. Ah! Mr. President, that reminds me of another thing that occurred on this floor some time ago. But, to go on with this thought, we also protested all the time that we were trying to preserve and not to destroy the Union, and we were trying to do it; but we finally got to a point which was a point of impasse, where we had to fight, and the other side had to fight, and then when that came we fought; and, by the way, we did not fight behind hedges. We did not fight hiddenly. We fought as brave men—not I; I mean my ancestors. I did not fight. I never fought anything much; but we did it.

"Ah," then the Senator says, "but you made no proposition to get rid of the Negroes."

I suppose he means to get rid of slavery—of course, we could not get rid of the Negroes without killing them. That reminds me that in a previous debate upon this floor the Senator said something which I did not at that time hear. I have much wherewith to charge my deaf ears. I wish that I had heard it. It was when he exclaimed, in highly dramatic tones, "Ireland fights for liberty and the South fought for slavery!"

Mr. President, if the Senator from California were right about that, then the greatest man upon the northern side, Abraham Lincoln, and the greatest man upon the southern side, Robert E. Lee, were liars, and the Senator from California is the only man who knows what the sections fought about. Abraham Lincoln, in his first inaugural, just before the war broke out, professed upon the east portico of this Capitol, right out here, in substance: "I do not pretend that we have the constitutional right or the power to interfere with slavery wherever it exists, nor are we fighting for that." I am not quoting him accurately. The Senator ought to remember what he said, in spirit. And Robert E. Lee, later on, said: "I would set every Negro that I have free to-morrow rather than have this trouble." But after Abraham Lincoln said that we were not fighting about slavery, but were fighting, from his standpoint, to maintain the Union, and after Robert E. Lee—noble descendant of thousands of English ancestry, all noble in their way—said that he was not fighting to maintain slavery, but was fighting for the right of self-determination, the right of a community to adopt and maintain its own government, which seems to be a right sacred right now in Ireland across the ocean; then steps into the arena the great Senator from California, and pronounces Abraham Lincoln and Robert E. Lee both liars, while he himself becomes the infallable pope of the history of the war between the States.

The VICE PRESIDENT. That is clearly out of order if the rules of the Senate are to be obeyed.

SEVERAL SENATORS. Question!

The VICE PRESIDENT. The question is on concurring in the amendments made as in Committee of the Whole.

Mr. WADSWORTH. Mr. President, a parliamentary inquiry. Would it be possible to decide upon concurrence in these amendments en bloc, or should it be done one by one?

The VICE PRESIDENT. There was no reservation in Committee of the Whole for a separate vote in the Senate. There is just one of two things that can be done. One is not to concur in these amendments, and then submit other amendments to the Senate; or the action can be taken back, the vote whereby the joint resolution passed to the Senate can be reconsidered, and the bill can go back to the Committee of the Whole.

Mr. WADSWORTH. I think, if it is agreeable to the Senate, it would be quicker to take a vote on concurrence in all the amendments at once. If that motion to concur, which is the pending motion, fails, then the bill is open to amendment, still being in the Senate; and in that event I should offer an amendment correcting the bill so that 62½ per cent of the various branches may be substituted for 53½ per cent, and the amendments reported from the committee to which there was no objection might also be included.

Mr. BORAH. Mr. President, I desire a separate vote on the question of the size of the Army, because I have no objection to the other amendments, and I would not care to vote against them. In fact, I think they ought to go in; but I want a separate vote upon the number, because we can not vote intelligently in any other way.

Mr. WADSWORTH. But the Vice President has informed me that a separate vote was not reserved for any of the amendments in the Senate.

Mr. SWANSON. It is not necessary to reserve it. It comes up as a new proposition in the Senate. When there is a close yea-and-nay vote, as in Committee of the Whole, it is customary to reserve a question so that there is an excuse for not taking the vote on concurrence en bloc. This is a reconsideration of the vote concurring in the amendments made as in Committee of the Whole.

Mr. BORAH. I should assume that the question would be as to whether or not we would concur in the amendments made as in Committee of the Whole.

The VICE PRESIDENT. Yes; and the Chair is ruling that as the record now stands there can be but one vote upon that question, there having been no reservation of a separate vote upon any particular amendment in the Committee of the Whole.

Mr. WADSWORTH. It really makes no difference so far as the result is concerned, I will say to the Senator from Idaho. Those who desire an Army of 175,000 will vote against concurring in all the amendments. Those who want an Army of 150,000 will vote to concur in the amendments. If those favoring an Army of 175,000 prevail, then all the amendments adopted in Committee of the Whole will be stricken from the bill, whereupon I shall endeavor to secure the floor and offer amendments to perfect the bill as it came from the committee on the basis of 175,000.

Mr. SWANSON. Mr. President, as I understand, this amendment came from Committee of the Whole fixing the number at 150,000, did it not?

The VICE PRESIDENT. There are other amendments besides that.

Mr. SWANSON. There are other amendments, but I say the amendment came from the Committee of the Whole fixing the number at 150,000, not 175,000.

The VICE PRESIDENT. Exactly.

Mr. SWANSON. Then, what is the pending question—that all these amendments, including the number of 150,000, be voted upon?

The VICE PRESIDENT. To be sure.

Mr. SWANSON. There is no amendment pending for 175,000 at all, then, is there?

The VICE PRESIDENT. Of course not. If they are concurred in, the status is fixed at 150,000. If they are not concurred in, the body of the act remains at 175,000.

Mr. SWANSON. As I understand, there is a general rule to the effect that where a proposition contains different propositions a separate vote can be asked for; but I have never seen anything in the rules or in the precedents saying that it must be reserved. It is generally reserved as a matter of precaution.

The VICE PRESIDENT. The Chair is going to stick to his ruling, however, until the Senate overrules him.

Mr. SWANSON. The Chair usually does when he makes one.

Mr. BORAH. Especially if he is right.

The VICE PRESIDENT. The Chair is right in that, too.

Mr. BORAH. Mr. President, as I understand, those who should vote "yea" on the question as to concurring in the amendments would be voting for 150,000?

The VICE PRESIDENT. Exactly.

Mr. BORAH. And those who should vote "nay" would vote so that they could afterwards have an opportunity to vote for 175,000.

Mr. TOWNSEND. Mr. President, it seems to me, if the Senator will permit me, that if this joint resolution should go into the Committee of the Whole, then the motion to go into the Senate could be preceded by a request to reserve these two amendments for a separate vote. If that is done, we will get a direct vote on those two amendments, because everybody, as I

UMI

understand, concurs in the general amendments to the bill except this one fixing the number at 175,000 and the one in regard to the 62½ per cent, which must be changed if we change the number of men.

SEVERAL SENATORS. Question!

Mr. DIAL. I suggest the absence of a quorum.

Mr. WADSWORTH. I hope the Senator will withdraw that suggestion. I think there is a quorum present.

The VICE PRESIDENT. We had one just a moment ago.

Mr. BORAH. They are not here now.

Mr. DIAL. I withdraw the suggestion, Mr. President.

Mr. WADSWORTH. The yeas and nays will determine it.

The VICE PRESIDENT. The Chair thinks nothing has been done since the last quorum call.

Mr. WADSWORTH. No business has transpired.

The VICE PRESIDENT. The Chair, then, will not entertain the motion.

Mr. WADSWORTH. Mr. President, would it not be possible, by unanimous consent, to vote separately on the question mentioned by the Senator from Idaho?

The VICE PRESIDENT. If the Senate so desires, there is no reason in the world why it should not, by unanimous consent, send the joint resolution back to the Committee of the Whole and vote on each of these amendments. The Senate can send the joint resolution back to the Committee of the Whole, set aside all the votes on all the amendments, and then proceed to vote on the amendments.

There is no reason why it can not be done. Is there any objection?

Mr. NORRIS. Mr. President, I do not want to object, but it seems to me that the thing we should do is to vote in the regular way on whether or not the amendments of the Committee of the Whole shall be approved. If it should develop that they are approved, that would approve the 150,000 amendment and also all the others. It would end it. If it should develop that the motion is defeated, then all the committee amendments are defeated, and the joint resolution is subject to amendment in the Senate; and there would not be any objection—I suppose it could be done by unanimous consent—to having the Senator immediately offer his amendment and that would end it.

Mr. WADSWORTH. That is the plan I proposed.

Mr. NORRIS. As I understand, then, the vote now is on this question: Shall the amendments made as in Committee of the Whole be concurred in by the Senate?

If the Senator from Michigan will give us his attention for just a moment, suppose, as he says, that that question is decided in the negative; then the bill is still in the Senate and open to amendment, and the Senator from New York can offer his amendment, and it will go through, as a matter of course.

Mr. WADSWORTH. Mr. President, a parliamentary inquiry. Under those circumstances, would a committee amendment, after having been defeated in the Senate, be subject to be offered again in the Senate?

Mr. NORRIS. I should like to say to the Senator that it has not been defeated separately. If the motion is decided in the negative, the amendments are all defeated, en bloc.

Mr. WADSWORTH. Can any one of them be offered again in the Senate?

The VICE PRESIDENT. The Chair has not any doubt about that. Of course, they can be offered in the Senate.

Mr. NORRIS. I ask for the yeas and nays on concurring in the amendments.

The yeas and nays were ordered.

The VICE PRESIDENT. The Chair is going to state the question as the record stands now. The question is, Will the Senate concur in the amendments made as in Committee of the Whole? The yeas and nays have been ordered, and the Secretary will call the roll.

The reading clerk proceeded to call the roll.

Mr. FLETCHER (when his name was called). I have a general pair with the Senator from Delaware [Mr. BALL]. He is absent, but I understand he would vote as I shall, and, being at liberty to vote, I vote "nay."

Mr. HENDERSON (when his name was called). I have a general pair with the junior Senator from Illinois [Mr. MCCORMICK]. In his absence I transfer my pair to the senior Senator from Oregon [Mr. CHAMBERLAIN] and vote "nay."

Mr. KNOX (when his name was called). I am informed that my pair, the senior Senator from Oregon [Mr. CHAMBERLAIN], would vote as I propose to vote, in the negative. Therefore I am at liberty to vote, and vote "nay."

Mr. POMERENE (when his name was called). I have a general pair with the senior Senator from Iowa [Mr. CUMMINS]. I do not know how he would vote upon this subject. I therefore withhold my vote.

Mr. UNDERWOOD (when the name of Mr. SMITH of South Carolina was called). The senior Senator from South Carolina [Mr. SMITH] asked me to announce that he is compelled to be absent on account of important business, and that he is paired with the Senator from North Dakota [Mr. STERLING]. I ask that the announcement may stand for the day.

Mr. NEW (when Mr. WATSON'S name was called). I desire to announce the absence of my colleague [Mr. WATSON] on account of illness. He is paired with the Senator from Delaware [Mr. WOLCOTT]. If here and permitted to vote, my colleague would vote "nay."

The roll call was concluded.

Mr. FALL. I have a pair with the junior Senator from Wyoming [Mr. KENDRICK]. I transfer that pair to the senior Senator from Massachusetts [Mr. LODGE] and vote. I vote "nay."

Mr. SHERMAN (after having voted in the negative). I understand the junior Senator from Virginia [Mr. GLASS] has not voted.

The VICE PRESIDENT. He has not.

Mr. SHERMAN. I have with him a general pair. I transfer my pair to the junior Senator from West Virginia [Mr. ELKINS] and allow my vote to stand.

Mr. OWEN. I transfer my pair with the Senator from New Jersey [Mr. EDGE] to the Senator from Texas [Mr. CULBERSON] and vote "yea."

Mr. MCCUMBER. I have a general pair with the senior Senator from Colorado [Mr. THOMAS]. Not knowing what his vote would be upon this question, I withhold my vote.

Mr. CURTIS. I desire to announce the following pairs:

The Senator from Wisconsin [Mr. LENROOT] with the Senator from Tennessee [Mr. SHIELDS];

The Senator from Indiana [Mr. WATSON] with the Senator from Delaware [Mr. WOLCOTT]; and

The Senator from North Dakota [Mr. STERLING] with the Senator from South Carolina [Mr. SMITH].

Mr. GERRY. I desire to announce the absence of the Senator from Oregon [Mr. CHAMBERLAIN] on account of illness.

The result was announced—yeas 33, nays 41, as follows:

YEAS—33.

Borah	Jones, N. Mex.	Owen	Swanson
Capper	Jones, Wash.	Pittman	Trammell
Dial	Kenyon	Reed	Underwood
Gerry	King	Sheppard	Walsh, Mass.
Gore	La Follette	Simmons	Walsh, Mont.
Gronna	McKellar	Smith, Ariz.	Williams
Harrison	McNary	Smith, Md.	
Heflin	Norris	Smoot	
Johnson, S. Dak.	Overman	Stanley	

NAYS—41.

Ashurst	Gay	McLean	Sherman
Beckham	Gooding	Moses	Smith, Ga.
Brandegee	Hale	Myers	Spencer
Calder	Harris	Nelson	Sutherland
Colt	Henderson	New	Townsend
Curtis	Hitchcock	Penrose	Wadsworth
Dillingham	Johnson, Calif.	Phelan	Warren
Fall	Kellogg	Phipps	Willis
Fernald	Keyes	Poindexter	
Fletcher	Kirby	Ransdell	
Frelinghuysen	Knox	Robinson	

NOT VOTING—22.

Ball	France	McCumber	Sterling
Chamberlain	Glass	Newberry	Thomas
Culberson	Kendrick	Page	Watson
Cummins	Lenroot	Pomerene	Wolcott
Edge	Lodge	Shields	
Elkins	McCormick	Smith, S. C.	

So the amendments made as in Committee of the Whole were nonconcurred in.

Mr. WADSWORTH. Mr. President, I offer a number of amendments, indicated upon the copy of the joint resolution, which I send to the desk and I ask that they may be acted upon.

The VICE PRESIDENT. The Secretary will state the amendments in their order.

The ASSISTANT SECRETARY. Offered on behalf of the Committee on Military Affairs:

On page 2, line 4, strike out the words "and instructed"; at the end of line 4, after the words "Regular Army," insert "except reenlistments of men who at the time of the passage of this act have served more than one year in the Regular Army or the Army of the United States during the recent emergency," and a comma; on line 10, after the words "pay of," insert the words "more than 175,000."

The amendment was agreed to.

The ASSISTANT SECRETARY. After the word "Congress" and the period at the end of line 11, insert a colon and the following proviso:

Provided, however, That during the period in which the Army is being reduced to such enlisted strength sufficient enlistments may be made in any branch of the Army to bring such branch to not more

than 62½ per cent of the number prescribed therefor in the act entitled "An act to amend an act entitled 'An act making further and more effectual provision for the national defense, and for other purposes,' approved June 3, 1916, and to establish military justice," approved June 4, 1920.

The amendment was agreed to.

The ASSISTANT SECRETARY. Insert a new section in the joint resolution, as follows:

SEC. 2. That until the enlisted strength of the Army is reduced to 175,000 men the Secretary of War is authorized in his discretion to grant applications for discharge of enlisted men who have served one year or more with records satisfactory to their commanding officers without regard to the provisions of existing law respecting discharges.

The amendment was agreed to.

The joint resolution was ordered to be engrossed for a third reading, read the third time, and passed.

The VICE PRESIDENT. Without objection, the Senate reconsiders the vote whereby it amended the preamble and the title of the bill, and the preamble and title will stand as reported from the committee.

DISTRICT OF COLUMBIA APPROPRIATIONS.

Mr. CURTIS. I ask that the unfinished business be laid before the Senate.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 15130) making appropriations for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1922, and for other purposes.

Mr. CURTIS. I move that the Senate adjourn.

The motion was agreed to; and (at 5 o'clock p. m.) the Senate adjourned until to-morrow, Tuesday, January 18, 1921, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

MONDAY, *January 17, 1921.*

The House met at 12 o'clock noon.

The Rev. John H. Jeffries, D. D., of the Ryland Methodist Episcopal Church, of Washington, D. C., offered the following prayer:

Let the words of our mouth and the meditations of our heart be acceptable in Thy sight, O Lord, our strength and our redeemer. Command Thy blessing to rest upon Thy servants here to conserve the best interests of the Nation. May they walk in the consciousness of divine direction. May the peace of God, which passeth all understanding, rest upon us this morning and upon this Nation, and may all that shall be said and done be to the honor and glory of God. We ask it in the name of our common Lord and Master. Amen.

The Journal of the proceedings of Saturday, January 15, 1921, was read and approved.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES.

A message in writing from the President of the United States, by Mr. Sharkey, one of his secretaries, who also informed the House of Representatives that the President had, on January 13, 1921, approved and signed the bill of the following title:

H. R. 12337. An act to provide for the relief of Anthony Sulik, former sergeant, United States Marine Corps.

UNANIMOUS CONSENT CALENDAR.

The SPEAKER. This is suspension day, and the Clerk will call the Calendar for Unanimous Consent.

COURTHOUSE AND JAIL AT CORDOVA, ALASKA.

The first business on the Calendar for Unanimous Consent was the bill (H. R. 12437) to authorize the expenditure of the sum of $100,000 heretofore appropriated for the erection of a United States post office, courthouse, and jail at Cordova, Alaska, by the act approved March 4, 1913, for the erection of a United States courthouse and jail at Cordova, Alaska.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. GARD. Mr. Speaker, reserving the right to object, the bill is one which I have no doubt is peculiarly within the information of the Delegate from Alaska, and I have reserved the right to object in order that he may explain the circumstances and the necessity for the appropriation.

Mr. LANGLEY. I suggest that the gentleman from Alaska [Mr. GRIGSBY] explain the bill.

Mr. GRIGSBY. Mr. Speaker, the bill is one to make available, for the construction of a courthouse and jail, the sum of $100,000, which was appropriated in 1913 to construct a courthouse and jail and post office. The sum was found to be insufficient for that kind of a building. The Supervising Architect, however, reported that he could construct the courthouse and jail with that amount. This bill makes available that sum for that purpose. There is no additional appropriation. It is simply making available an original appropriation.

Mr. SNELL. Will the gentleman yield for a question?

Mr. GRIGSBY. I yield.

Mr. SNELL. I did not understand. What was the original appropriation?

Mr. GRIGSBY. One hundred thousand dollars.

Mr. SNELL. And is this for an additional appropriation?

Mr. GRIGSBY. No; it is not. It is to make available the same amount of money for a building which can be constructed.

Mr. SNELL. They are going to erect a new type of building that can be constructed for the $100,000?

Mr. GRIGSBY. For the same money, and dispense with the post-office part of the building.

Mr. SNELL. What will be the proposition in future years for a post office? Will they have to have another building for that later on?

Mr. GRIGSBY. The Government has not appropriated any money for post offices in Alaska up to date. They rent post-office buildings all over the Territory, and probably will continue to do so.

Mr. LANGLEY. The committee reported this bill because it asked for no additional appropriation, but merely a modification of the original plans to come within the limits of the appropriation already made.

Mr. SNELL. The thought I had in mind was, if they would come back for an additional appropriation for a post office.

Mr. LANGLEY. It does not look now as if anybody will have a chance to "come back" on that score at an early date.

Mr. SNELL. I think it is a proper thing to know whether, as soon as that is done, there will be a request for an additional sum for a post office.

Mr. LANGLEY. The gentleman from Alaska [Mr. GRIGSBY] can answer that question. The committee does not know what the purpose is in that regard, but will, of course, consider any proposition presented at the proper time, just as they will any other proposition.

Mr. MONDELL. Will the gentleman from Alaska yield?

Mr. GRIGSBY. I will.

Mr. MONDELL. There are a great many cases in which the appropriations for public buildings are inadequate for the construction of the buildings as planned at this time. There are, as I recollect it, upward of 100, perhaps 150, such cases in the country.

Mr. LANGLEY. One hundred and sixteen, I think, that are classed as "emergency cases" by the department, although there are many more than that that are really emergent.

Mr. MONDELL. One hundred and sixteen, the gentleman says. We are making no provision for the 116, although some of the buildings are badly needed. I take it for granted that the Committee on Public Buildings and Grounds, when it reported this bill, reported it because of some extraordinary emergency existing in Cordova. Is that true? If there is no extraordinary condition existing at Cordova over and above and beyond the conditions existing elsewhere throughout the country, then there is no justification for a bill of this kind, and it seems to me the gentleman from Kentucky [Mr. LANGLEY], the chairman of the committee, ought to be able to inform the House whether or not there is some extraordinary condition of urgency at Cordova over and above and beyond that existing elsewhere which justified the reporting of a bill for Cordova which accomplishes, by the elimination of one use, the erection of a building which could not otherwise be erected without an increase of the limit of cost.

Mr. LANGLEY. I will state to the gentleman that the distinction between this and the other class of cases is that this does not involve an additional appropriation, while the other propositions would involve it, and I will say further that I did not happen to be in the city when the hearing was had and the report prepared, and am not, therefore, as familiar with the facts as I would otherwise be.

Mr. MONDELL. If the gentleman will yield?

Mr. LANGLEY. Yes.

Mr. MONDELL. It does involve an additional appropriation——

Mr. SNELL. Because we are doing only a part of the work.

Mr. MONDELL (continuing). Because you are eliminating one of the purposes for which the building is to be used, evidently with the idea of providing for a post office later. So that this bill does in effect involve an increase just as much as though it had increased the limit of cost in the bill.

Mr. LANGLEY. Now, the gentleman from Alaska can perhaps explain what the purpose is in that regard, and I suggest that he enlighten the gentleman and the House.

Mr. SNELL. Before that, may I ask the gentleman from Kentucky another question?

Mr. LANGLEY. Certainly.

Mr. SNELL. It seems to me that until we adopt a general policy to take care of these emergency propositions we ought not to pick out one particular place and pass an appropriation for it at this time. I have a post office in my district that has been an emergency proposition for 10 years, and it has been so described by the Secretary of the Treasury and the Postmaster General. They assort the mail on the sidewalk. So I believe that until we make a general proposition to take care of all these post offices we ought not to pass a special one at this time.

Mr. LANGLEY. Mr. Speaker, I yield to the gentleman from Alaska [Mr. GRIGSBY], who can explain the necessities in this case.

Mr. GRIGSBY. Mr. Speaker, I will say to the gentleman that it is probable that when this courthouse is constructed that the seat of the court of the third division of Alaska will be removed to Cordova. The seat of the court is now at Valdez. It is eight hours by boat from Cordova. At every term of court there are hundreds of witnesses and jurors and prisoners transported to Valdez at an enormous expense. This will be a great saving to the Government. The seat may be transferred to Cordova as soon as the building is completed. It is an emergency case. I do not think there is any doubt about that.

Mr. CLARK of Florida. Mr. Speaker, will the gentleman yield?

Mr. GRIGSBY. Yes.

Mr. CLARK of Florida. I want to say, Mr. Speaker, that this $100,000 has already been authorized and appropriated.

Mr. SNELL. Mr. Speaker, will the gentleman yield for a question right there?

Mr. CLARK of Florida. Let me finish this statement. Then I will yield and endeavor to answer all questions you may want to ask, if I have time. This $100,000 has been authorized and appropriated for the specific purpose of constructing a building to take care of the court, the jail, and the post office. The money is not sufficient for that purpose. They need the courthouse and the jail worse than they do the other. So it has been thought advisable to do this, so long as it took no additional money, and this particular amount has already been appropriated. The Treasury officials say they can construct the jail and the courthouse within the limit of cost, and therefore the committee reported the bill, simply eliminating the post office in order to allow the jail and the courthouse to be constructed, which are so badly needed by these people in Alaska.

There will not be a dollar saved by objecting to the passage of this bill. On the contrary, it is going to entail thousands of dollars of cost in bringing these witnesses and jurors back and forth, as stated by the gentleman from Alaska.

Now, let me say this, further: Gentlemen have raised the question of these buildings that are needed. As the gentleman from Kentucky [Mr. LANGLEY] said, every one of them requires an additional authorization, and we have been informed that no bill of that character will be permitted to pass. Therefore the committee, bowing to that rule or order, or whatever you may term it, has not reported any of those bills. I believe that the Committee on Public Buildings and Grounds will agree, if they get any intimation from this House that it will pass it, to report a bill in here that will take care of every one of these emergency cases that the gentleman from New York [Mr. SNELL] refers to. But in his case it will require an additional appropriation of money out of the Treasury. If the House wants us to do that, we are perfectly willing to do it.

Mr. SNELL. Mr. Speaker, will the gentleman yield?

Mr. CLARK of Florida. Yes.

Mr. SNELL. It seems to me you are doing the same thing as asking for an additional appropriation, because you are doing only one-half or two-thirds of what was contemplated. You are asking for only two-thirds.

Mr. CLARK of Florida. Not at all.

Mr. SNELL. But, after all, the money comes out of the Treasury, and it does not seem to me we should pick out one case unless we are in a position to deal with all of them.

Mr. CLARK of Florida. It takes $100,000 now to build the courthouse and jail. That is what the authorities tell us. To add a provision for a post office might take $50,000 or $100,000 more; I do not know.

Mr. SNELL. I agree with the gentleman.

Mr. CLARK of Florida. You have got to appropriate that extra money, possibly $50,000, now or some time hereafter. Why not construct the building when you can save thousands of dollars to the Government in transportation of these witnesses and jurors and prisoners, when the money is already appropriated and available? Does the gentleman propose to say that because it has been considered by those in authority in the House that you will not make these appropriations, therefore you are going to mulct the Government in thousands of dollars in needless expenses because a jail and a courthouse are to be built somewhere, and you do not get a post office?

Mr. SNELL. I am not asking for any post office at the present time, and I think I have been as considerate in asking for appropriations as anyone else in the House. I have really earnestly tried to cut down appropriations at this time, and until there has been some general policy adopted to deal with these emergency propositions I am constrained to object to this measure, and I do object.

The SPEAKER. The gentleman from New York objects. The Clerk will report the next bill.

ALLOTMENTS ON FORT BELKNAP RESERVATION, MONT.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 13225) providing for the allotment of lands within the Fort Belknap Indian Reservation, Mont., and for other purposes.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of this bill?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That within one year from the date of approval of this act the Secretary of the Interior shall cause to be prepared, in such manner as he may deem advisable, a complete and final roll to contain the names of all Indians ascertained to have rights on the Fort Belknap Reservation, Mont. Immediately upon the approval of the said roll, which shall be the conclusive and final evidence of the rights of any Indian of the reservation to an allotment of land, the Secretary of the Interior is hereby authorized and directed to allot pro rata, under rules and regulations and in such areas and classes of lands as may be prescribed by him, among such enrolled Indians all the unreserved and otherwise undisposed of lands on the Fort Belknap Reservation: *Provided*, That not exceeding 40 acres of irrigable land shall be allotted to any one Indian: *Provided further*, That trust patents of the form prescribed by existing law shall be issued in the names of the said allottees: *And provided further*, That any names found to be on the said roll fraudulently may be stricken therefrom by the Commissioner of Indian Affairs, with the approval of the Secretary of the Interior, at any time within one year from the approval thereof, after giving all persons interested a full opportunity to be heard; and the fraudulent allotment shall be canceled and the lands thereof be subject to disposal under the provisions of this act: *And provided further*, That the land allotted hereunder shall be subject to any tribal leases existing at the date of approval of the said allotments.

Notwithstanding the death of any person duly enrolled as herein provided, allotment shall be made in his or her name as though living, the land embraced in such allotment to pass by descent to the legal heirs of the decedent and be subject to disposition as in the case of lands of other allottees passing upon their death.

SEC. 2. Upon the issuance of the trust patents provided for herein the Indians thus allotted are hereby declared to be citizens of the United States and entitled to all the rights, privileges, and immunities of such citizens, and the allottees shall have the benefit of and be subject to the laws, both civil and criminal, of the State in which they may reside.

SEC. 3. The Secretary of the Interior is hereby authorized to reserve from allotment such reasonable areas as may be needed for Indian agency, school, religious, cemetery, and administrative purposes, to remain reserved as long as needed, and as long as agency, school, and religious institutions are maintained thereon for the benefit of said Indians, and he is hereby directed to reserve for park purposes an area not to exceed 640 acres, embracing Mission Canyon in the Little Rockies, and an area not to exceed 160 acres within which is the Snake Butte Spring: *Provided*, That a patent in fee simple for not exceeding 160 acres may be issued to the duly authorized missionary board or other proper authority of any religious organization heretofore engaged in mission or school work on said reservation for such lands thereon (not included in any town site provided for herein) as have heretofore been set apart to such organization and are now used for mission or school purposes.

Mr. MANN of Illinois. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MANN of Illinois. This bill is now being considered in the House as in Committee of the Whole?

The SPEAKER. Yes.

Mr. MANN of Illinois. I think amendments should be acted upon as the bill is read.

The SPEAKER. The Chair thinks so. The Clerk will report the amendments.

The Clerk read as follows:

Committee amendment: Page 3, line 1, strike out the word "upon" and insert in lieu thereof the words "that upon."

The SPEAKER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The SPEAKER. The Clerk will report the next amendment.

The Clerk read as follows:

Page 3, line 8, strike out the word "the" at the beginning of the line and insert in lieu thereof the words "that the."

The SPEAKER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The SPEAKER. The Clerk will report the next committee amendment.

The Clerk read as follows:

On page 3, line 13, after the word "Indians," strike out the comma and insert a period and the following language: "Should any such lands be abandoned said lands so abandoned shall revert to the tribe and become available for allotment or other disposition."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER. The Clerk will report the next committee amendment.

The Clerk read as follows:

On page 3, line 16, strike out the word "he" and insert in lieu thereof the words "the said Secretary."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The Clerk read as follows:

SEC. 4. Prior to the allotments being made as authorized herein the Secretary of the Interior shall cause an examination to be made by experts of the Geological Survey of all lands of the reservation for the purpose of determining the mineral character of any thereof, but lands founds to be mineral shall not be subject to allotment as herein provided: *Provided*, That such coal lands as may be required for use in connection with the construction and maintenance of the irrigation projects may be reserved for that purpose: *Provided further*, That lands valuable for timber shall be reserved for the tribal benefit, and any member of the tribes having rights in the said reservation may cut and take away from such lands such timber as he may require for fuel, fencing, or for building.

With the following committee amendments:

Page 4, line 4, strike out the word "Prior" and insert in lieu thereof the words "That prior."

The amendment was agreed to.

Page 4, line 8, strike out the words "of any" and after the word "but" insert the words "the surface of any such."

The amendment was agreed to.

Page 4, line 9, strike out the word "founds" and insert in lieu thereof the word "found."

The amendment was agreed to.

Page 4, line 10, strike out the word "not."

The amendment was agreed to.

Page 4, line 10, after the word "provided," insert "but such minerals shall be reserved for the benefit of the tribe."

The amendment was agreed to.

The Clerk read as follows:

SEC. 5. The Secretary of the Interior is hereby authorized to reserve and set aside for town-site purposes not more than 80 acres at the present settlement of Lodge Pole, and not to exceed 80 acres at such other locations as he may deem necessary, and to lay out, survey, and plat said tracts into blocks, lots, streets, alleys, parks, and school sites: *Provided*, That the area reserved for parks and school sites shall not exceed 10 acres in any one town site; and patents shall be issued for such lands to the municipality legally charged with the care and custody of the lands hereby set aside for such purposes. That such town sites shall be appraised and disposed of as provided in section 2381 of the United States Revised Statutes: *Provided further*, That any person who, at the date when the appraisers commence their work upon the land, shall be an actual resident upon any one such lot and the owner of substantial and permanent improvements thereon, and who shall maintain his or her residence and improvements on such lot to the date of his or her application to enter, shall be entitled to enter, at any time prior to the day fixed for the public sale and at the appraised value thereof, such lot and any two additional lots of which he or she may also be in possession and upon which he or she may have substantial and permanent improvements: *And provided further*, That before making entry of any such lot or lots the applicant shall make proof, to the satisfaction of the register and receiver of the land district in which the land lies, of such residence, possession, and ownership of improvements, under such regulations as to time, notice, manner, and character of proofs as may be prescribed by the Commissioner of the General Land Office, with the approval of the Secretary of the Interior: *And provided further*, That in making their appraisal of the lots so surveyed, it shall be the duty of the appraisers to ascertain the names of the residents upon and occupants of any such lots, the character and extent of the improvements thereon, and the name of the reputed owner thereof, and to report their findings in connection with their report of appraisal, which report of findings shall be taken as prima facie evidence of the facts therein set out. All such lots not so entered prior to the day fixed for the public sale shall be offered at public outcry, in their regular order, with the other unimproved and unoccupied lots. That no lot shall be sold for less than $10: *And provided further*, That said lots, when surveyed, shall approximate 50 by 150 feet in size.

With the following committee amendment:

Page 4, line 20, strike out the word "The" and insert "That the."

The amendment was agreed to.

The Clerk read as follows:

SEC. 6 The construction of systems for the irrigation of the irrigable lands shall be undertaken as the needs of the Indians shall require, as determined by the Secretary of the Interior, and there is hereby appropriated the sum of $50,000 for preliminary investigations and surveys to determine the needs of the Indians and for the commencement of such work as may be advisable at this time: *Provided*, That the cost of all such systems on this reservation, including the Milk River irrigation system, shall be assessed against the lands irrigable under the respective systems in the proportion that each acre of irrigable lands bears to the whole area of irrigable land under each system, and such assessments shall be reimbursed to the United States under such rules and regulations as may be prescribed by the Secretary of the Interior, after the Secretary of the Interior may fix operation and maintenance charges which shall be paid as he may direct: *Provided further*, That the provision of the act of April 4, 1910 (36 Stat. L., p. 277), requiring reimbursement of the cost of the Milk River system from Indian funds, and any other act or parts thereof in conflict with this proviso, is hereby repealed: *And provided further*, That if any allottee shall receive patent in fee to his allotment before the amounts so assessed or charged against him shall have been paid to the United States, then such amount remaining unpaid shall be and become a lien upon his allotment, and the fact of such lien shall be recited in such patent and may be enforced by the Secretary of the Interior by foreclosure as a mortgage, and should any Indian sell any part of his allotment with the approval of the Secretary of the Interior, the amount of any unpaid assessments or charges against the lands sold shall be and become a first lien thereon and may be enforced by the Secretary of the Interior by foreclosure as a mortgage and delivery of water to such land may be refused within the discretion of the Secretary of the Interior until all dues are paid.

Nothing in this act shall be construed to deprive any of said Indians of the Fort Belknap Reservation of the use of water appropriated and used by them for domestic purposes or for the necessary irrigation of their lands, or lands claimed and occupied or used by them, or any ditches, dams, flumes, or reservoirs constructed and used by them in the appropriation and use of said water. No Indian shall acquire any priority of right to any of the waters of said reservation as against any other Indian by priority of appropriation to an extent greater than the water necessary to the irrigation of 40 acres.

Every person entitled to allotment on the Fort Belknap Indian Reservation shall designate as a homestead 40 acres of irrigated land or 320 acres of nonirrigated land, already allotted or to be allotted hereunder, which homestead shall remain forever inalienable.

Any and all minerals, including oil and gas, on any of the lands to be allotted hereunder are reserved for the benefit of the members of the tribe in common and may be leased for mineral purposes, upon the request of the tribal council under such rules, regulations, and conditions as the Secretary of the Interior may prescribe, but no lease shall be made for a longer period than 10 years, but the lessees shall have the right to renewal thereof for a further period of 10 years upon such terms and conditions as the Secretary of the Interior may prescribe: *Provided, however*, That until the same shall be leased any Indian being the head of a family and having rights on the said reservation may take coal from any of the lands within the same for his own domestic use: *Provided further*, That allotments hereunder may be made of lands classified as valuable chiefly for coal or other minerals which may be patented as herein provided with a reservation, set forth in the patent, of the coal, oil, gas, or other mineral deposits for the benefit of the Indians having rights on the said reservation: *And provided further*, That at the expiration of 50 years from the date of approval of this act the coal, oil, gas, or other mineral deposits upon or beneath the surface of said allotted lands shall become the property of the individual allottee or his heirs.

With the following committee amendment:

Page 6, line 15, strike out "The" and insert in lieu thereof the words "That the."

The amendment was agreed to.

The Clerk read as follows:

SEC. 7. Sections 16 and 36 of each township, except such lands thereof as the State has heretofore received as indemnity under existing laws, are hereby granted to the State of Montana for school purposes: *Provided, however*, That for any lands thereof lost to the State by allotment, withdrawal, or otherwise under the provisions of this act, the State may through its proper officers select as indemnity other unoccupied, unreserved nonmineral and nonirrigable lands within such reservation, not exceeding two sections in any one township: *Provided further*, That all such selections by the State must be completed within one year after the approval of this act, and be made with the view to preventing any final conflict between the claims of the State and the allotments and withdrawals provided for herein: *And provided further*, That the United States shall pay to the Indians of the reservation the sum of $2.50 an acre for the lands thus granted to the State.

With the following committee amendments:

Page 9, line 16, strike out the word "Sections" and insert in lieu thereof the words "That sections."

The amendment was agreed to.

Page 10, line 7, strike out "$2.50" and insert "$5."

The amendment was agreed to.

The Clerk read as follows:

SEC. 8. There is hereby appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $85,000, or so much thereof as may be necessary, to pay for the lands granted to the State of Montana; and there is hereby appropriated the further sum of $50,000, or so much thereof as may be required, to be immediately available, to be used in paying the expenses of making the roll, classifications, and allotments hereunder, in such further allotment surveys as are necessary, and in defraying the expenses of the survey, appraisement, and sales of the town sites provided for, the said $50,000 to be reimbursable from the proceeds of the town-site sales or from other tribal funds available or that may become available for such purpose.

With the following committee amendments:

Page 10, line 9, strike out the word "There" and insert in lieu thereof the words "That there."

The amendment was agreed to.

Page 10, line 11, strike out "$85,000" and insert in lieu thereof "$179,000."

The amendment was agreed to.

The Clerk read as follows:

SEC. 9. The lands allotted, those retained or reserved, and the surplus lands sold, set aside for town-site purposes, or otherwise disposed of, shall be subject for a period of 25 years to all the laws of the United States prohibiting the introduction of intoxicants into the

Indian country, and that the Indian allottees, whether under the care of an Indian agent or not, shall for a like period be subject to all the laws of the United States prohibiting the sale or other disposition of intoxicants to Indians.

With the following committee amendment:

Page 10, line 23, strike out "The" and insert in lieu thereof "That the."

Mr. MANN of Illinois. Mr. Speaker, I should like to ask some member of the Committee on Indian Affairs what is the necessity for further considering a provision like section 9 of this bill, providing that the laws prohibiting the introduction of intoxicants into the Indian country shall remain in force for any length of time? As long as the laws of the United States prohibit the introduction of intoxicants into any part of the country, whether it is Indian country or not Indian country, what is the necessity of continuing provisions that those laws forbidding the introduction of intoxicants into the Indian country shall remain in force?

Mr. EVANS of Montana. Mr. Speaker, I do not think there is any valid reason for it as long as the constitutional amendment exists and the introduction of liquor is prohibited everywhere. It has been the custom to carry this provision in every such bill, and the committee undoubtedly followed the custom.

Mr. MANN of Illinois. I presume that is the case. I think it was very desirable to do it, but when you have a constitutional amendment and a law based upon it forbidding the transportation of liquor anywhere, I do not see why we should pass a special law in reference to this matter, which I suppose means that it is only a basis for asking an appropriation for the employment of additional persons in the service of the Government.

Mr. HASTINGS. If the gentleman will permit me, this bill was introduced sometime ago and was reported last March. I agree with the gentleman from Illinois [Mr. MANN] that there is no further necessity now for section 9, and it may well be stricken from the bill.

The SPEAKER. The question is on the committee amendment.

The committee amendment was agreed to.

Mr. MANN of Illinois. I move to strike out section 9.

The motion was agreed to.

The bill as amended was ordered to be engrossed and read a third time, and was accordingly read the third time and passed.

On motion of Mr. EVANS of Montana, a motion to reconsider the vote by which the bill was passed was laid on the table.

CERTAIN LIEU LANDS IN SOUTH DAKOTA.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 397) to authorize a lieu selection by the State of South Dakota for 160 acres on Pine Ridge Indian Reservation, and for other purposes.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. GARD. Reserving the right to object, Mr. Speaker, I note that H. R. 397 is for the purpose of a lieu selection by the State of South Dakota for certain lands, which are said to be now and to have been in the possession of Trinity Episcopal Church. The report says that the land can not formally be set apart for church and mission purposes until the claim of the State has been adjusted. My inquiry is as to whether the State is to get the additional 160 acres and the church retain its 160 acres, or what is to be the procedure under this bill?

Mr. GANDY. This is on section 16, which is one of the common-school sections. After title had passed to the State it was disclosed that for many years an Episcopal Church mission had been located on this quarter section. The State now has the title. It is willing to surrender this 160 acres to the Government and take a lieu selection. After that is done, it will be a matter to be determined by the Secretary of the Interior as to what shall become of the 160 acres that the State deeds back.

Mr. GARD. The proposition is to have the State deed back the 160 acres now occupied by the Trinity Episcopal Church?

Mr. GANDY. Yes.

Mr. GARD. And then under this bill the State makes a lieu selection?

Mr. GANDY. For the 160 acres, and the disposition of the 160 acres deeded back would remain to be determined by the Secretary of the Interior.

Mr. GARD. In other words, it simply provides for the selection by the State of lands which have had no previous occupancy or title?

Mr. GANDY. Yes.

Mr. GARD. And the occupancy by the Trinity Episcopal Church of this land will then depend on the action of the Secretary of the Interior?

Mr. GANDY. On the action of the Secretary of the Interior. The bill further provides for the return to the Government of 160 acres.

Mr. GARD. Under the law, the selection which is authorized to be made by the State of South Dakota must be approved by the Secretary of the Interior?

Mr. GANDY. Yes.

Mr. GARD. Is it necessary to put that in the bill?

Mr. GANDY. No; that is a part of the law. A State must go regularly to the Secretary of the Interior with an application for a patent based on a lieu selection.

Mr. GARD. And it must have the approval of the Secretary of the Interior?

Mr. GANDY. Certainly.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The Clerk read the bill, as follows:

Be it enacted, etc., That the State of South Dakota, acting through its proper officials, is hereby authorized to select 160 acres of unappropriated, unreserved, nonmineral lands within the boundaries of the former Pine Ridge Reservation, S. Dak., or an equal area of public land of like character within the boundaries of the said State, in lieu of the northeast quarter of section 16, township 38 north, range 40 west, sixth principal meridian, in South Dakota, upon due and proper showing that the lands authorized herein to be surrendered by the State have not been sold or otherwise encumbered by it, and that the selection of such lieu lands by the said State shall be a waiver of its right, title, and claim in and to the 160-acre tract in section 16 above described: *Provided*, That in case the exchange herein contemplated shall be perfected the lands so surrendered by the State shall be held to be a part of the present Pine Ridge Reservation and subject to the laws enacted for or applicable to the said reservation.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. GANDY, a motion to reconsider the vote by which the bill was passed was laid on the table.

JUDICIAL DISTRICT OF ALASKA.

The next business on the Calendar for Unanimous Consent was the bill (S. 4205) to amend section 4, chapter 1 of Title I of an act entitled "An act making further provision for a civil government for Alaska, and for other purposes," approved June 6, 1900, as heretofore amended by section 2 of an act entitled "An act to amend section 86 of an act to provide a government for the Territory of Hawaii, to provide for additional judges, and for other judicial purposes," approved March 3, 1909, and for other purposes.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. GARD. Mr. Speaker, reserving the right to object, this bill has been several times on the calendar and has been up for consideration. Each time it has been reported by the Committee on the Judiciary it has been said to be in need of correction so far as the boundary line is concerned. I would inquire of the gentleman from Minnesota [Mr. VOLSTEAD], the chairman of the Committee on the Judiciary, or the gentleman from South Dakota [Mr. CHRISTOPHERSON], who reported the bill, whether the description of the boundaries contained in the bill is now correct?

Mr. CHRISTOPHERSON. Mr. Speaker, I understood the gentleman from Alaska [Mr. GRIGSBY] was going to offer an amendment to correct that error. Personally, I do not know just what it is, but there is a little error in the description of the boundary.

Mr. GARD. The gentleman knows that there is no opposition to the bill, except that it is desired to get the description of the boundaries exactly correct.

Mr. CHRISTOPHERSON. That is my understanding.

Mr. GARD. And is the description of the boundary not correct?

Mr. CHRISTOPHERSON. I believe not. The gentleman from Alaska [Mr. GRIGSBY] told me the other day that he expected to make a correction.

Mr. GARD. My understanding is that the chairman of the committee, the gentleman from Minnesota [Mr. VOLSTEAD], had that description in his possession. In the interest of its being corrected, I am compelled to object to the consideration of it unless the gentleman has further information at this time. It is a bill to correct the judicial boundaries of the Territory of Alaska. As I understand it, the gentleman from Minnesota [Mr. VOLSTEAD] or the gentleman from Alaska [Mr. GRIGSBY] was to offer an amendment. I therefore ask that the bill be passed over without prejudice.

The SPEAKER. The gentleman from Ohio asks unanimous consent that the bill be passed over without prejudice. Is there objection?

There was no objection.

LEMHI NATIONAL FOREST, IDAHO.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 13051) to add certain lands to the Lemhi National Forest, Idaho.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. BLANTON. Mr. Speaker, reserving the right to object, is there anything in this bill that would in any way interfere with the present park system in regard to commercializing any part of it in the way of irrigation?

Mr. SMITH of Idaho. Absolutely not. There are no national parks within the State of Idaho. This proposes to extend the boundary lines of the Lemhi forest reserves, which was established by Executive order before a survey or examination of land was made, and this bill is to make the boundary conform to the character of land contemplated by the general forest reserve law.

Mr. BLANTON. There is no provision in the bill that would in any way permit anyone to put reclamation schemes in these forests?

Mr. SMITH of Idaho. Oh, yes; the national forests are all open to reclamation projects, but the national parks are not. The national forests are open to homestead and mineral entries as well as for storage of water for power and reclamation purposes.

Mr. BLANTON. But it would not extend over into the park system.

Mr. SMITH of Idaho. No; there is no national park in the State of Idaho.

Mr. GARD. Mr. Speaker, reserving the right further to object, I note that there are some 400,000 acres to be added to this park or to the park area. My understanding is that a great portion of this area is in broken pieces, and that it makes no collective body of ground, and, in fact, to a greater or less extent it is noncontiguous to the park. Is that correct?

Mr. SMITH of Idaho. This particular reserve is in broken areas, because it takes in a section of the country where there are mountain ranges and valleys, but these different areas are in one national forest for the purpose of administration.

Mr. GARD. What advantage can there be, or what is the policy in the matter of extension of the boundaries of national parks when the survey of the boundaries begins to take in noncontiguous territory under the name of national forest?

Mr. SMITH of Idaho. This is not a national park; it is a national forest. It is timberland that has been set aside by Executive order with a view of preserving the timber and stream flow. All of this reserve and most of the others in Idaho were created by Executive order before the law was passed throwing upon the Congress the responsibility of creating forest reserves, and it was done before the land was examined as to its character. It is found now on examination that there is a great deal of land on the public domain that should be within the national forest in order to conserve the timber and the stream flow.

Mr. GARD. The report of the Secretary of the Interior states that there are 13 noncontiguous areas as described in the bill.

Mr. SMITH of Idaho. Yes; that is true.

Mr. SINNOTT. The Secretary states they join several divisions of the national forest. With one exception, he says they do.

Mr. SMITH of Idaho. It is not unusual to have a national forest in parcels because of the topography and character of the land. Valleys are not included in the national forest. The valleys between mountain ranges in that section of the country are not included, but for administrative purposes it is a great convenience to have the mountain ranges under one reserve.

Mr. GARD. I also note that the Secretary of the Interior recommends an amendment which the bill does not follow. The Secretary of the Interior, on page 7 of the report, asks that an amendment be included in the bill "that all unappropriated public lands within the following-described areas," and so forth.

Mr. SMITH of Idaho. I did not catch the gentleman's question.

Mr. GARD. The Secretary of the Interior suggests that there should be an amendment, said suggestion being found on page 7 of the report, "that all unappropriated public lands within the following-described areas," and so forth. That language is not contained in the bill.

Mr. SMITH of Idaho. There is no objection to having those words inserted. We endeavored to follow the suggested amendment of the Secretary.

Mr. GARD. The Secretary of the Interior, on page 7 of the report. The gentleman doubtless has it before him.

Mr. SMITH of Idaho. We will accept that amendment. It is simply explanatory. Of course, it does not include appropriated public lands to the exclusion of rights which have been initiated.

Mr. SINNOTT. Under the amendment inserted in the bill there is an absolute distinction made as to what land may go in.

Mr. SMITH of Idaho. The amendment on page 1 provides that these lands shall be set aside only on the approval of the Secretary of the Interior.

Mr. GARD. The point I was making—I do not know it is especially valuable, except it is a suggestion of the Secretary of the Interior—is that the language of the amendment he suggests is not followed in the amendment offered by the committee. The gentleman from Idaho says he has no objection to its being followed.

Mr. SMITH of Idaho. I have no objection to its being inserted, although I do not think it is material.

Mr. GARD. I understand so. I merely thought, inasmuch as he has suggested that, that the gentleman doubtless was trying to follow the amendment suggested by the Secretary of Agriculture and Secretary of the Interior, and possibly it should be kept in. What is the advantage, may I ask, if this bill is passed by the House, that accrues either public or private?

Mr. SMITH of Idaho. Well, it is valuable to the Government in this way: Lands in forest reserves that are good pasture bring a revenue to the Federal Treasury, whereas if they are out on the public domain they bring no revenue. It is an advantage to the stockmen of the country, because the land embraced within the forest reserves adapted to grazing is taken care of and guarded, and roving bands of sheep on the public domain will not tramp down the pasture within the national forest.

It is not only an advantage to the Government to have this land within the national forest, but also of advantage to the stockmen living in the vicinity of the national forest, and it is on their earnest petition that the bill was introduced. There is no objection to the bill by the stockmen or from any other source.

Mr. GARD. Is there any purpose within this bill to create a private ownership in water rights in this territory?

Mr. SMITH of Idaho. Of course, any rights that have attached to the public lands will be preserved, and if the rights have not attached the law affecting water rights will apply to lands within national forests just as they do upon the public domain.

Mr. GARD. The gentleman from California seems desirous of being recognized.

Mr. ELSTON. Mr. Chairman, I would like to ask the gentleman from Idaho a question if I may. Does this add 200,000 acres of public land to the area administered by the Forest Service?

Mr. SMITH of Idaho. Yes; with the permission of the Secretary of the Interior.

Mr. ELSTON. Now, the gentleman is in favor also of including large acreages of this land under the administration of the Forest Service for the public good?

Mr. SMITH of Idaho. Yes.

Mr. ELSTON. Is the gentleman opposed to the inclusion of like areas of public domain which are distinctively attractive for park purposes if they are under the administration of the park service?

Mr. SMITH of Idaho. Yes; I am opposed to such inclusion if within those areas there should be any water-power site or any reservoir site that could be utilized for irrigation purposes.

Mr. ELSTON. In the event there was no provision in an act including such areas into park areas, and making a proviso that the areas should be subject to the administration of the water-power act, can the gentleman see any great objection to it then?

Mr. SMITH of Idaho. Yes, I can; because of the attitude of certain interests against the use of any reservoir site within national parks. I think it would be very unwise legislation to tie up any more land on the public domain within the boundaries of a national park, because of the attitude of certain officials and private citizens who contend that land within a national-park area is sacred and must not be disturbed for any purpose.

Mr. ELSTON. What limitations will be placed upon these 400,000 acres if it goes into the forest area, in regard to the use of water and minerals?

Mr. SMITH of Idaho. None whatever. It is still open for use, just the same as if it had never been taken into the national forest. The water power act would apply to land on the national forests just as land in the public domain.

Mr. ELSTON. Without check by the Secretary of the Interior?

Mr. SMITH of Idaho. We provide especially here that the Secretary of the Interior shall have these lands examined and only the additions to the forest reserve shall be made by his consent and approval.

Mr. ELSTON. The inclusion of this area under the administration of the forest reserve will remove it for all time from taxation, where there is probability now that it will be homesteaded and be subject to taxation?

Mr. SMITH of Idaho. None of these areas will be homesteaded. The 640 homestead act has been in force three years, and they have not been applied for to any great extent. If they have initiated a claim they can get their patent to the land if they comply with the law.

Mr. ELSTON. Then the gentleman does not believe, with all the considerations he urges in objecting to any park bill, that they are applicable to the present bill?

Mr. SMITH of Idaho. Absolutely not, because we do not take away from the people any right to the use of water for irrigation or power purposes, which would be the case if these lands were embraced in a national forest.

Mr. ELSTON. The gentleman must concede, then, that I am somewhat charitable in not objecting, when the gentleman expects to object to my bill a few minutes later?

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. The Clerk will read the bill.

The Clerk read as follows:

Be it enacted, etc., That the following-described lands are hereby added to and made parts of the Lemhi National Forest, subject to all laws applicable to national forests; but the addition of these lands shall not affect adversely any valid existing entry or claim established prior to the passage of this act:

Boise meridian and base: Township 2 north, range 23 east, sections 1, 2, 3, 10, 11, and 12. Township 2 north, range 24 east, sections 6 and 7. Township 3 north, range 22 east, sections 13, 14, 23, 24, 25, and 26. Township 3 north, range 23 east, sections 12, 13, 19; sections 23 to 30, inclusive; sections 34, 35, and 36. Township 3 north, range 24 east, sections 1 and 2; section 5, west half; sections 6 and 7; section 8, west half; sections 11, 12, 13, and 14; section 17, west half; sections 18 and 19; section 20, west half; section 29, west half; sections 30 and 31. Township 4 north, range 24 east, sections 12 and 13; sections 23 to 26, inclusive; sections 31, 35, and 36. Township 4 north, range 25 east, sections 1 to 5 inclusive; sections 7 to 12, inclusive; sections 17 to 20, inclusive; sections 29 to 32, inclusive. Township 4 north, range 28 east, sections 2 to 11, inclusive; sections 14 to 21, inclusive. Township 5 north, range 24 east, sections 1 to 25, inclusive. Township 5 north, range 25 east, sections 4 to 9, inclusive; sections 17 to 20, inclusive; sections 23 to 27, inclusive; sections 33 to 36, inclusive. Township 5 north, range 26 east, sections 1, 12, 13, 24, and 25. Township 5 north, range 27 east, sections 5 to 11, inclusive; sections 14 to 30, inclusive. Township 5 north, range 28 east, sections 11, 14, 23, 25 to 36, inclusive. Township 6 north, range 24 east, sections 4 to 9, inclusive; sections 16 to 36, inclusive. Township 6 north, range 26 east, sections 3, 4, 9, 10, 11, 13, 14, 15, 23, 24, and 25; section 26, east half; section 36, all. Township 6 north, range 27 east, sections 19, 30, 31, and 32. Township 7 north, range 19 east, sections 1 to 4, inclusive; sections 10 to 12, inclusive. Township 7 north, range 20 east, sections 1, 2, 10, 11, and 12. Township 7 north, range 21 east, sections 1 to 12, inclusive. Township 7 north, range 22 east, sections 4 to 18, inclusive; sections 23 and 24. Township 7 north, range 23 east, sections 17 to 24, inclusive; sections 28, 29, 30, 32, and 33. Township 7 north, range 24 east, sections 13, 19, 24, 30, and 31. Township 7 north, range 25 east, sections 19, 20, and 21. Township 7 north, range 26 east, sections 20, 28, 29, 32, and 33. Township 8 north, range 19 east, sections 1 to 5, inclusive; sections 8 to 17, inclusive; sections 20 to 29, inclusive; sections 33 to 36, inclusive. Township 8 north, range 20 east, sections 1 to 23, inclusive; sections 28, 29, 30, and 31. Township 8 north, range 21 east, sections 25, 26, 27; sections 31 to 36, inclusive. Township 8 north, range 22 east, sections 30 and 31. Township 8 north, range 23 east, sections 4, 5, and 6; section 7, north half; section 8, north half; section 9, all. Township 8 north, range 26 east, sections 1 to 4, inclusive; sections 10 to 13, inclusive. Township 8 north, range 27 east, sections 5 to 8, inclusive; sections 17 to 20, inclusive; sections 29, 30, and 32. Township 9 north, range 22 east, sections 3, 4, 11, 13, 14, 23, and 25. Township 9 north, range 23 east, section 31, all. Township 9 north, range 24 east, sections 1 to 4, inclusive; section 12, all. Township 9 north, range 25 east, sections 1 to 17, inclusive; sections 21 to 26, inclusive; sections 35 and 36. Township 9 north, range 26 east, section 10, south half; sections 14, 15, and 16; sections 19 to 36, inclusive. Township 9 north, range 27 east, sections 30, 31, and 32. Township 9 north, range 29 east, sections 4, 5, 6, and 9; section 10, south half; section 11, south half. Township 9 north, range 30 east, sections 1 and 12. Township 9 north, range 31 east, sections 6, 7, 8, 16, 17, 18, and 21. Township 10 north, range 22 east, sections 5 to 8, inclusive; sections 16, 17, 20, 21, 28, 29, and 33. Township 10 north, range 29 east, sections 7, 18, 19, and 20; sections 29 to 33, inclusive. Township 10 north, range 30 east, sections 1 to 4, inclusive; sections 9 to 16, inclusive; sections 21 to 28, inclusive; sections 34, 35, and 36. Township 10 north, range 31 east, sections 19, 30, and 31. Township 11 north, range 21 east, section 4, east half; sections 13, 14, and 15; sections 22 to 27, inclusive; sections 34, 35, and 36. Township 11 north, range 22 east, section 1, all; sections 19, 29, 30, 31, and 32. Township 11 north, range 23 east, sections 5 and 6. Township 11 north, range 30 east, sections 5, 6, 8, and 17; section 20, east half; sections 21, 27, 28, 33, and 34. Township 12 north, range 21 east, sections 7 and 18; section 19, east half; section 29, all; section 32, north half; section 33, all. Township 12 north, range 22 east, section 36, all. Township 12 north, range 23 east, section 31, all. Township 12 north, range 24 east, sections 2 to 11, inclusive. Township 12 north, range 29 east, sections 1 to 4, inclusive; section 9, east half; sections 10 to 15, inclusive; section 22, east half; sections 23, 24, and 25; section 26, east half; section 36, all. Township 12 north, range 30 east, sections 5 to 8, inclusive; sections 17 to 20, inclusive; sections 29 to 32, inclusive. Township 13 north, range 24 east, sections 5, 9, 15, 22, 27, and 35. Township 13 north, range 29 east, sections 26 to 29, inclusive; sections 32 to 36, inclusive. Township 13 north, range 30 east, section 31, all. Township 14 north, range 23 east, sections 2 to 5, inclusive; section 8, east half; sections 9, 10, 11, 13, 14, and 15; section 24, east half. Township fourteen north, range 24 east, sections 19, 20, and 29; section 30, east half; section 32, all. Township 15 north, range 22 east, sections 3, 4, 5, 8, 9, 10, 13, 14, 15, 23, 24, and 25. Township 15 north, range 23 east, sections 18, 19, 28, 29, 30, 32, 33, and 34. Township 16 north, range 22 east, sections 32, 33, and 34.

The SPEAKER. The Clerk will report the committee amendments.

The Clerk read as follows:

Page 1, line 3, after the word "described," strike out all the remainder of lines 3, 4, 5, 6, and 7, up to and including the word "act," and insert: "areas, found by the Secretary of Agriculture to be chiefly valuable for the production of timber or the protection of stream flow, may, with the approval of the Secretary of the Interior, be included within and made a part of the Lemhi National Forest, in Idaho, by proclamation of the President, said lands to be thereafter subject to all laws affecting national forests."

Mr. GARD. Mr. Speaker, I offer an amendment, to strike out, on page——

The SPEAKER. Is it an amendment to the amendment?

Mr. GARD. It is to carry out the request of the Secretary of the Interior, which is to strike out the words, on line 3, "the following-described," and insert after the word "That," the words "all unappropriated lands within the following-described."

The SPEAKER. The Clerk will report the amendment of the gentleman from Ohio.

The Clerk read as follows:

Amendment offered by Mr. GARD: Page 1, amend the committee amendment by striking out the words "the following-described," on page 1, line 3, and insert: "all unappropriated public lands within the following-described."

The SPEAKER. The question is on the amendment offered by the gentleman from Ohio [Mr. GARD].

The amendment was agreed to.

The SPEAKER. The question is on the committee amendment as amended by the amendment of the gentleman from Ohio.

The committee amendment as amended was agreed to.

The following committee amendments were severally read and agreed to:

Page 3, line 2, strike out "25" and insert "35" in lieu thereof.

Page 3, line 9, strike out the word "five" and insert the word "three."

Page 5, line 4, insert after the word "twenty-three" the word "twenty-four."

Page 6, line 3, strike out the word "to" and insert the word "and."

Page 6, line 24, after the word "eleven" strike out the word "inclusive."

Page 7, line 9, strike out "26" and insert in lieu thereof "27."

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. SMITH of Idaho, a motion to reconsider the vote by which the bill was passed was laid on the table.

The SPEAKER. The Clerk will report the next bill.

LESSEES AT CAMP FUNSTON, KANS.

The next business on the Calendar for Unanimous Consent was the bill (S. 3706) authorizing the Secretary of War to make settlement with the lessees who erected buildings on a five-year lease on the zone at Camp Funston, Kans., and for other purposes.

The title of the bill was read.

The SPEAKER. Is there objection?

Mr. GARRETT. Mr. Speaker, I object.

The SPEAKER. Objection is made. The Clerk will report the next bill.

ASSESSMENT WORK ON MINING CLAIMS.

Mr. RHODES. Mr. Speaker, I ask unanimous consent that House joint resolution 404 be stricken from the calendar.

The SPEAKER. It does not require unanimous consent to do that. The gentleman can object.

Mr. MONDELL. Mr. Speaker, the gentleman asks that it be stricken from the Union Calendar.

Mr. RHODES. I do that for this reason, Mr. Speaker: A companion measure [S. 4565] was introduced and passed the Senate on December 13, 1920. It was referred to the Committee on Mines and Mining of the House, and reported December 17, and placed on the Union Calendar. The rules were suspended

and the bill was passed on December 20, 1920, and approved on December 31, and is now a law.

Mr. WINGO. Mr. Speaker, I suggest that the best way of proceeding would be to lay the companion resolution on the table. That is the customary proceeding.

Mr. GARD. What is the bill?

The SPEAKER. It is House joint resolution 404, Calendar No. 300.

Mr. RHODES. I will do that, Mr. Speaker.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

The SPEAKER. The Clerk will report the next bill.

RELIEF OF WAR MINERAL PRODUCERS.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 13091) to provide further for the relief of war minerals producers, and to amend an act entitled "An act to provide relief in cases of contracts connected with the prosecution of the war, and for other purposes," approved March 2, 1919.

The title of the bill was read.

Mr. BLANTON. Mr. Speaker, I object.

The SPEAKER. The gentleman from Texas objects. The Clerk will read the next bill.

EXCHANGE OF LANDS WITHIN RAINIER NATIONAL FOREST, WASH.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 11851) authorizing the exchange of lands within Rainier National Forest, in the State of Washington, and for other purposes.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. GARD. Reserving the right to object, Mr. Speaker, pending the calling of the next bill, is the bill by Mr. GARLAND the mines and mining bill?

The SPEAKER. That has been objected to.

Mr. GARD. What became of the bill immediately preceding that?

The SPEAKER. That was taken from the calendar.

Mr. KNUTSON. That was transferred to the Union Calendar.

The SPEAKER. Is there objection?

Mr. GARD. Reserving the right to object, Mr. Speaker, I do so for the purpose of making an inquiry of the gentleman from Washington [Mr. JOHNSON], who either reported the bill or is the author of the bill, regarding H. R. 11851. Will the gentleman state its purpose and public benefit?

Mr. JOHNSON of Washington. This bill is similar to bills which have been passed heretofore in order to secure water supply to Salt Lake City and Colorado Springs and Portland, Oreg., and Seattle, Wash., and others. The necessity arises for the city of Tacoma to have a different and better water supply. Back of the city are high mountains. A large portion of that area is in a forest reserve, and in that reserve the Government does not own all the sections, but in parts of the reserve every other section was allotted originally to the Northern Pacific Railroad Co., and is now in possession of others. In order to secure this water supply it is necessary to have control of certain sections of land. The city proposes to use a canyon, and dam the lower end of it, control the watershed, and to give to the Government other forest lands, privately owned, in that reservation in exchange for those needed by the city. The practice has been recognized in these previous bills to which I referred, and is necessary. It is the only way in which the city can secure a better water supply.

Mr. GARD. The bill has for its purpose the procurement of a water supply for the city of Tacoma?

Mr. JOHNSON of Washington. Yes.

Mr. GARD. The first section provides for certain transfers of land; for the United States to accept ownership and transfer other land in lieu thereof?

Mr. JOHNSON of Washington. Yes.

Mr. GARD. What is the character of the land which the Secretary of the Interior is authorized to accept, and what is its comparative value, if it has any value, with respect to that which is given for this purpose?

Mr. JOHNSON of Washington. The land which the Secretary will accept will be superior to the land in question, for the land in question is either in the bed of this former glacier or is on abrupt lifts or cascades on the sides.

As I have just explained, every other section in this particular tract in the forest reserve is privately owned. The city buys that, and the city then uses a measure of this kind to secure the right to exchange the land for other land and give up better lands in the true forest for those in the reserve. These lands, except those on the river bed, are covered with unmerchantable timber, and even if it were merchantable, it could not be logged and handled.

Mr. BEE. Mr. Speaker, will the gentleman yield?

Mr. JOHNSON of Washington. Yes.

Mr. BEE. Do the benefits which accrue to the city for this grant justify the city in purchasing more expensive property?

Mr. JOHNSON of Washington. Yes.

Mr. BEE. That is the reason for the proposed exchange—the benefit that will accrue to them?

Mr. JOHNSON of Washington. That is it.

Mr. CARTER. How much of this land is it proposed to exchange?

Mr. JOHNSON of Washington. The Public Lands Committee caused an amendment to be inserted, covering—designating each section—20 in all.

Mr. CARTER. How much land is there at present in Mount Rainier National Forest Reserve?

Mr. JOHNSON of Washington. I can not say offhand, but it is a great amount. It is one-half as large, probably, as the smallest of the New England States. It is a very large area.

Mr. CARTER. I have been over it. It is a beautiful country, but the land is perfectly worthless except for timber up there.

Mr. JOHNSON of Washington. This is not even good for timber. After the gentleman got out 20 miles or so from Tacoma he rode along the edge of a canyon where he could look down into the Nisqually gorge—with the river perhaps 2,500 feet below.

Mr. CARTER. Beyond the glacier?

Mr. JOHNSON of Washington. Many miles before you reach the snout of the glacier. Now that timber is fairly merchantable; but as you come down toward Puget Sound, still following that old glacial bed, the sloping sides have some timber on them, that is scrubby, unmarketable, and worthless.

Mr. CARTER. The gentleman proposes to exchange acre for acre, does he?

Mr. JOHNSON of Washington. The equivalent of acre for acre. I have a letter from the chief forester saying that the Forest Service is glad to do it.

Mr. GARD. What is the acreage which will come to the Government in the exchange?

Mr. JOHNSON of Washington. It will be selected by the forest reserve people.

Mr. SINNOTT. The bill provides "not to exceed an equal value."

Mr. JOHNSON of Washington. The gentleman is correct. It is for equal value.

Mr. GARD. Any lands not in Government ownership.

Mr. JOHNSON of Washington. Lands of equal value not owned by the Government. These exchanges are carried out under the supervision of the chief forester. I have a letter from the chief forester in which he says they are very glad to cooperate, and that it is their purpose to assist western cities in securing water supplies.

Mr. GARD. How much of the land is to be set aside for the Tacoma water supply? How large an acreage will that be?

Mr. JOHNSON of Washington. Does the gentleman mean how much is to be exchanged?

Mr. GARD. How much will come to the city of Tacoma by this, of land which belongs to the Federal Government?

Mr. JOHNSON of Washington. It will be a matter of adjudication by Government officials. They will select some of those sections further up in the reserve which are privately owned, and which have on them real timber which is accessible.

This letter from the forester says:

UNITED STATES DEPARTMENT OF AGRICULTURE,
FOREST SERVICE,
Washington, January 3, 1920.

Hon. ALBERT JOHNSON,
House of Representatives.

DEAR MR. JOHNSON: Reference is made to your inquiry respecting the desire of the city of Tacoma, Wash., to acquire the use of certain national forest lands in connection with a contemplated new source of water supply for the city.

It is gathered from Mayor Riddell's letter of December 17 to you that the construction of a new reservoir is proposed, and that the city's officials are particularly desirous that the watershed be protected in such a manner as to reduce the possibilities of contamination of the water to a minimum.

As to the construction of any works on national forest lands, this may be authorized under section 4 of the act of February 1, 1905 (33 Stat., p. 628), which would give the city a right of way amounting to an easement for any dams, reservoirs, water plants, ditches, flumes, pipes, tunnels, and canals which may be constructed on national forest lands. An application for a grant under this act should be filed in the United States land office at Seattle, Wash., in accordance with instructions of the Department of the Interior relating to the preparation of plats, etc.

As to the protection of the watershed, I feel sure that this can be handled to the entire satisfaction of the city's officials under a coopera-

tive agreement between the Secretary of Agriculture on one side and the city's representatives on the other. Agreements of this character have been entered into with a number of municipalities, including the city of Seattle; Salt Lake, Utah; Colorado Springs, Colo.; and a number of smaller cities, which obtain their water supply from the national forests.

I shall be very glad to ask the district forester at Portland, Oreg., to get in touch with the mayor of Tacoma and arrange for a conference with him, where this whole matter can be gone into fully and the nature of the agreement which the department has hitherto favored in like cases fully explained to the city's representatives.

It is perhaps unnecessary to say that the Forest Service is heartily in favor of doing everything it can in aiding municipalities which obtain their water supply from the national forests in securing and maintaining an adequate supply of pure water for the needs of the city's inhabitants.

The papers which you submitted to me are returned, copies having been made for the information of the district forester.

Very sincerely, yours,

H. S. GRAVES, *Forester.*

Mr. GARD. What is the present source of the water supply for the city of Tacoma?

Mr. JOHNSON of Washington. In the last 10 or 12 years the source of the water supply for the city of Tacoma has been mountain reservoirs. The electric power for that city is secured from water in reservoirs in that canyon 20 miles up, before they reach the forest reserve. Great quantities of water are impounded there by the city for a municipal electric lighting plant, but that water can not be used for drinking purposes, because it comes out from under the bottom of the glacier and carries arsenic in such quantities as to make it undesirable for drinking.

Mr. GARD. In some statement in the report I see that the water supply is polluted, because certain transcontinental railroads run adjacent to it.

Mr. JOHNSON of Washington. Yes. A few years ago it was necessary to pass a bill similar to this covering a very wide area for the city of Seattle, and that bill gave protection for what is known as the Green River watershed, and one reason for that protection was that two or three transcontinental railroads crossed that watershed. As a result of the passage of that act, by which the city was enabled to control that portion of that watershed, the exits to the lavatories on the transcontinental railroad trains have to be stopped while the trains are crossing the watershed.

All that this bill does is to make an exchange of lands, and then the city of Tacoma exercises police and fire patrol and keeps off transient or migratory people, hunters, and others for the purpose of guaranteeing a pure water supply.

We have attached to this report the laws passed in previous cases. The city of Portland, Oreg., secured a similar law, and even went so far as to forbid the grazing or moving of cattle on the Bull Run watershed.

Mr. CHINDBLOM. Will the gentleman yield?

Mr. JOHNSON of Washington. With pleasure.

Mr. CHINDBLOM. I observe that in section 2 there is a provision that the President and the Secretary of Agriculture may exercise the right to forbid persons other than forest officers and those authorized by the municipal authorities from entering or otherwise trespassing upon reservations made in the interest of these watersheds.

Mr. JOHNSON of Washington. Yes.

Mr. CHINDBLOM. Is there any danger of that right being abused, so as to interfere with the purposes of the park?

Mr. JOHNSON of Washington. Oh, no. This is not a park. This is a forest reserve. There is a great forest reserve there covering many miles in all directions. In the center of that forest reserve is the Mount Rainier National Park. This particular place is 20 miles, probably, from where the park begins.

Mr. CHINDBLOM. That is what I wanted to ask the question about—whether it is anywhere near the national park, so that there is any danger of encroachment on the use of the park.

Mr. JOHNSON of Washington. Not at all. Neither does this interfere with any of the natural lines of communication to and from the park.

Mr. LINTHICUM. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of Washington. Yes.

Mr. LINTHICUM. What is the population of the city of Tacoma, according to the last census?

Mr. JOHNSON of Washington. Ninety-seven thousand, I think.

Mr. LINTHICUM. For what distance do they have to get the water?

Mr. JOHNSON of Washington. I would have to make a guess, but I suspect 25 miles.

Mr. BLANTON. That is not very far.

Mr. JOHNSON of Washington. No; that is not far in that country.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized to accept on behalf of the United States title to any lands not in Government ownership within the Rainier National Forest which, in the opinion of the Secretary of Agriculture, are chiefly valuable for national forest purposes, and in exchange therefor may give not to exceed an equal value of such Government timber or land in any national forest in the State of Washington as may be determined by the Secretary of Agriculture and acceptable to the owner as fair compensation, considering any reservations which either the grantor or the Government may make of timber, mineral, or easements. Timber given in such exchanges shall be cut and removed under the direction and supervision and in accordance with the requirements of the Secretary of Agriculture. Lands conveyed to the United States under this act shall, upon acceptance of title, become parts of the Rainier National Forest.

SEC. 2. That the President is hereby authorized, upon application by a municipality, to reserve and set aside from all forms of location, entry, or appropriation, under either the mineral or nonmineral land laws of the United States, any lands of the United States within the exterior boundaries of the Rainier National Forest which, in his judgment, are essential for the protection of the water supply of such municipality, and such reservation shall remain in force until revoked by him or by act of Congress, said lands thereafter to be administered for watershed protection by the Secretary of Agriculture in cooperation with the municipality for whose benefit they were reserved, and the Secretary of Agriculture is authorized, in addition to the rules and regulations authorized by the act of June 4, 1897 (30 Stat., 11), and acts supplemental thereto and amendatory thereof, to prescribe and enforce rules and regulations necessary to carry out the purpose of this act, including the right to forbid persons other than forest officers and those authorized by the municipal authorities from entering or otherwise trespassing upon such reservations. Any violation of this act or of regulations issued thereunder shall be punishable as is provided for in section 50 of the act entitled "An act to codify, revise, and amend the penal laws of the United States, approved March 4, 1909" (35 Stat. L., 1098), as amended by the act of Congress approved June 25, 1910 (36 Stat. L., 857).

With the following committee amendments:

Page 1, line 5, after the word "ownership," insert: "in sections 3, 5, 7, 9, 11, 15, 17, 19, 21, 23, 27, 29, and 31 in township 14 north, range 4 east, Willamette meridian; sections 13 and 25 in township 14 north, range 3 east, Willamette meridian; and sections 21, 27, 29, 33, and 35 in township 15 north, range 4 east, Willamette meridian."

Page 2, line 9, after the word "which," strike out the words "either the grantor or."

Page 2, line 10, after the word "make," strike out the words "of timber, mineral, or easements."

The committee amendments were severally reported and severally agreed to.

Mr. MANN of Illinois. Mr. Speaker, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. MANN of Illinois: Page 3, line 6, after the word "prescribe," insert the words "from time to time."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. BLANTON. Mr. Speaker, I move to strike out the last paragraph, and I do it for the purpose of calling the attention of the Committee on Rules and of the gentleman from Wyoming [Mr. MONDELL] to the following facts: The bill under consideration appears on the Unanimous Consent Calendar. On a day such as this the calendar is worth something to the Members of Congress because we can look at it in the morning and find out what bills are to be called up under it, but I call the attention of the gentleman from Wyoming [Mr. MONDELL] and the Rules Committee to the fact that under paragraph 5 of Rule XIII this calendar has to be printed every day. There are 128 pages of printed matter. There are very few changes in it from day to day. The changes would not amount to half an inch of space. Yet, under that paragraph 5 of Rule XIII, the whole document has to be reprinted every day. Suspension day comes twice a month, on the first and third Mondays, and on such first and third Mondays these unanimous-consent bills can be called up. There is some reason why this calendar should be printed just before each suspension day, which would be twice a month.

Mr. MANN of Illinois. Mr. Speaker, will the gentleman yield?

Mr. BLANTON. Yes.

Mr. MANN of Illinois. When the gentleman from Wyoming [Mr. MONDELL] came here, and when I came here, the calendar was not printed every day. It was printed two or three times a week.

Mr. BLANTON. Twice a month I think it ought to be printed.

Mr. MANN of Illinois. It was that way for a long time. As far as I was individually concerned, I think I never made any complaint about it, but there was serious complaint about it. I do not remember just when it came, but the House determined to change it and have the calendar printed every day as a matter of convenience. This is the historical situation.

Mr. BLANTON. I knew the gentleman would know its historical history, if anyone would. Let me suggest this: An appropriation bill may take five days of the time of the House. Surely during the consideration of that appropriation bill, when everyone knows that that is the only measure that is likely to come up, it would be quite a saving to the Government to stop the printing of these 128 pages in this calendar every day during that time. I think if it were printed just the day before suspension day, so that on the Monday morning of the first and third Mondays every Member of the House who wanted to keep up with what was going on could obtain one and be thoroughly advised as to what was going to come up, it would be quite sufficient and it would be quite a saving to the Government.

Mr. SMITH of Idaho. Mr. Speaker, will the gentleman yield?

Mr. BLANTON. Yes.

Mr. SMITH of Idaho. I am curious to know whether or not the gentleman from Texas would be willing to have the CONGRESSIONAL RECORD held in manuscript form and not printed as a matter of economy?

Mr. BLANTON. Oh, no.

Mr. SMITH of Idaho. Does he not think that would be a good idea?

Mr. BLANTON. Oh, no. I dare say that except before each suspension day this calendar is not read by over 20 Members of the House.

Mr. SMITH of Idaho. Does the gentleman not think that we could expedite public business if the proceedings of the House in detail were not printed each morning?

Mr. BLANTON. Oh, no. I think it is the greatest safeguard to the American people that there can be, and I think it is the best money spent by the Government.

Mr. SMITH of Idaho. Does the gentleman realize how much it would cost to print the RECORD if all of the Members of Congress occupied as much time on the floor as the gentleman from Texas?

Mr. BLANTON. I want to state to the gentleman that I have a right to use the time of the House, because I am here more than most Members. With the gentleman from Illinois [Mr. MANN] and a few other Members, I am here and stay here and work all of the time, and I have a right to be heard. If the gentleman would stay here as much as I do, he would have as much right to be heard.

Mr. SMITH of Idaho. Oh, well, I think my record for attendance will compare favorably with the record of the gentleman from Texas.

Mr. BLANTON. The gentleman butted into this matter and I want to butt him out.

Mr. SMITH of Idaho. My "butting in" seems to have embarrassed the gentleman.

Mr. BLANTON. Not at all. It would take more than the gentleman from Idaho to embarrass the gentleman from Texas.

Mr. Speaker, I withdraw the pro forma amendment.

Mr. MONDELL. Mr. Speaker, of course this discussion is a little out of order, and I suggest to the gentleman from Texas [Mr. BLANTON] that the matter is one which he might very properly take up with the proper committee. Let me make this suggestion, however, with regard to the calendar.

When one takes up the calendar of the House at any time, they expect to secure accurate information as to the status of different bills at that time. The situation with regard to bills is changing constantly. It is true there are times when there are not many bills reported for a day or two—some one or two or three days may pass in which not many bills are placed on the Unanimous Consent Calendar—but there is enough shifting in the situation in regard to bills reported or disposed of that at times one might be seriously misled and wholly uninformed if the calendar were not right up to date. I do not assert that we might not, without any serious detriment to the public business or inconvenience to Members, go back to the old practice, but I think if a change is to be urged it ought to be considered by the appropriate committee and all sides and views of the subject presented.

The bill as amended was ordered to be engrossed and read the third time, was read the third time, and passed.

On motion of Mr. JOHNSON of Washington, a motion to reconsider the vote by which the bill was passed was laid on the table.

RELIEF OF WAR MINERAL PRODUCERS.

Mr. TAYLOR of Colorado. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. TAYLOR of Colorado. Mr. Speaker, I ask unanimous consent to speak for two minutes and to refer to the bill preceding the one we have just been considering.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. TAYLOR of Colorado. Mr. Speaker, I want to say that I regret very much that there was objection to the immediate consideration of that bill, H. R. 13091, introduced and reported out of the Committee on Mines and Mining by our former colleague from Pennsylvania [Mr. GARLAND]. I will not attempt to discuss the merits of the bill in two minutes. I only desire to mention one matter in connection with that bill. I believe the best showing for financial economy that has ever been made by any commission established or authorized by Congress that I have ever heard of has been made by that War Minerals Commission, the chairman of which is former Senator John F. Shafroth, of Colorado. I know there is some complaint against the commission for being overstrict and exceedingly zealous in guarding the rights of the Government. But from a financial standpoint, in saving money to the Federal Treasury, the commission has certainly made a unique and remarkable record. Commissions always spend all the money appropriated for them and then ask for more. Congress authorized that commission to expend $8,500,000, and I understand they will be ready to wind up their business early in March of this year, and they have expended less than $3,000,000 and will turn back into the Federal Treasury approximately $5,500,000 of the amount that we authorized them to expend for a most worthy and laudable purpose. The commission has examined nearly 1,200 claims, at a total cost of less than 2 per cent of the total amount of the claims handled. That feature of the commission's work is so remarkably unprecedented that I wanted to mention it in passing over that bill.

Mr. BLANTON. Will the gentleman yield?

Mr. TAYLOR of Colorado. I have only two minutes.

Mr. CARTER. Will the gentleman yield?

Mr. BLANTON. The gentleman should yield to me; I was the one who objected, and I want to tell the gentleman why.

Mr. TAYLOR of Colorado. Just a moment, if the gentleman please.

The SPEAKER. The gentleman declines to yield.

Mr. TAYLOR of Colorado. I asked the chief clerk of that commission the other day for a statement down to date of their financial operations. He answered in the form of a letter. It is very short, and I ask to have it go in the RECORD as part of my remarks.

The SPEAKER. The gentleman from Colorado asks unanimous consent to extend his remarks in the manner indicated. Is there objection?

Mr. WINGO. Mr. Speaker, I object.

Mr. TAYLOR of Colorado. Mr. Speaker, I ask an extension of my time for one minute to read the letter into the RECORD.

The SPEAKER. Is there objection?

Mr. WINGO. I object.

The SPEAKER. Objection is made.

Mr. MADDEN. Mr. Speaker, I ask unanimous consent for two minutes on this same subject.

The SPEAKER. Is there objection?

Mr. WINGO. I object.

MESSAGE FROM THE PRESIDENT (S. DOC. NO. 353).

The SPEAKER laid before the House the following message from the President of the United States.

The Clerk read as follows:

To the Senate and House of Representatives:

I transmit herewith a report from the Acting Secretary of State inclosing a draft of a joint resolution authorizing the Secretary of the Navy to permit Mr. Jose A. de la Torriente, a citizen of Cuba, to receive instruction at the United States Naval Academy at Annapolis at the expense of the Government of Cuba.

The Acting Secretary of State points out that the passage of the resolution would be regarded as an act of courtesy by the Government of Cuba, and that it would follow established precedents.

WOODROW WILSON.

THE WHITE HOUSE,
17 January, 1921.

The SPEAKER. Referred with accompanying papers to the Committee on Naval Affairs.

HOSPITALS FOR BENEFICIARIES OF THE BUREAU OF WAR RISK INSURANCE.

The next business in order on the Calendar for Unanimous Consent was House joint resolution 411, authorizing the Secretary of the Treasury to enter into an agreement to lease or to execute lease for hospitals acquired or to be constructed by the State of New York, or other States of the United States of

America, for the care and treatment of beneficiaries of the Bureau of War Risk Insurance.

The Clerk read the title of the bill.

Mr. LANGLEY. Mr. Speaker, I ask that this resolution be passed over without prejudice.

The SPEAKER. The gentleman from Kentucky asks that this resolution be passed without prejudice. Is there objection?

Mr. LANGLEY. Mr. Speaker, I want to suggest that one reason I ask that is that the gentleman from New York [Mr. DUNN], the author of the resolution, is not present. Another is that the Committee on Rules has agreed to bring in a rule in a few days for the consideration of this hospital question.

The SPEAKER. Is there objection?

Mr. GARD. Mr. Speaker, reserving the right to object, I did not hear the gentleman's statement about bringing in a rule of some kind.

Mr. LANGLEY. I said there would be a rule brought in within a few days bringing this whole subject before the House.

Mr. GARD. Just the one subject of this bill, or the entire subject?

Mr. LANGLEY. In reference to the entire hospital situation.

Mr. MONDELL. Mr. Speaker, I do not think any action we may take at this time should be predicated on what may occur hereafter.

Mr. LANGLEY. I wanted the House to understand the situation.

Mr. MONDELL. Section 1 of this bill, I think, should be passed; section 2 should not. There ought not to be objection to the passage of section 1 at this time. Section 2 of the bill is rather too broad and far-reaching to be considered by unanimous consent.

Mr. LANGLEY. If the gentleman will permit me, I want to make this statement: I received a letter from the Secretary of the Treasury covering this entire subject, and I have called a meeting of the committee for Wednesday to consider that in connection with the bill which the Rules Committee report will make in order.

Mr. CARTER. Will the gentleman yield for a question?

Mr. LANGLEY. Yes.

Mr. CARTER. Was there not some action taken on a similar bill in the Senate?

Mr. LANGLEY. My understanding is that in another body this same proposition was turned down by the Committee on Appropriations. I desire to say that I am heartily in favor of this measure or any other measure that will give relief to the very urgent situation that now exists with regard to the treatment of our disabled ex-service men, and I have been pressing such action all I could, and I shall continue to do so.

Mr. CARTER. The gentleman speaks about a rule for a bill. Explain to the House to what bill the gentleman refers.

Mr. LANGLEY. I refer to the bill introduced and reported at the last session by me which authorized an appropriation of $10,000,000 for the construction of five hospitals in different sections of the country, two of them for tubercular cases and three for shell-shock cases.

Mr. CARTER. If I understand the gentleman, the other legislative branch of this Congress has already rejected a bill for the renting of hospitals from States?

Mr. LANGLEY. The New York proposition? Yes, sir, as I understand it.

Mr. CARTER. And the gentleman proposes in the other bill that the Government shall enter into the erection of these hospitals?

Mr. LANGLEY. The gentleman states the situation correctly.

Mr. BLANTON. When the people of New York State are constantly leaving that State for Arizona and New Mexico because of being afflicted with tuberculosis in order to get relief, does the gentleman think it wise to place tubercular hospitals in New York State?

Mr. LANGLEY. That is not the proposition. It is not proposed to place any there by this bill.

Mr. BLANTON. You could under this proposition rent them there?

Mr. LANGLEY. Yes; one of them, but not——

Mr. BLANTON. That is what I was driving at. I think in framing legislation to erect tubercular hospitals, such hospitals ought to be placed in a country where the altitude and the climate make it possible to have successful treatment.

Mr. MADDEN. It does not make any difference what the climate is in the treatment of tuberculosis.

Mr. LANGLEY. There is a variety of medical opinion on the subject, but I think the latest medical thought conforms to what the gentleman from Illinois says.

Mr. MADDEN. We have the best tubercular hospital in the world located in Chicago.

Mr. CHINDBLOM. And I want to say in response to the inquiry of the gentleman from Texas [Mr. BLANTON] that this hospital to be leased from the State of New York is for the purpose of treating mental and nervous disorders, and not tuberculosis.

Mr. CARTER. I would like to have unanimous consent to place in the RECORD a statement of Senator JONES in relation to this matter, taken from the Washington Post.

Mr. MANN of Illinois. I do not think that ought to be done. I do not know why, if we can not be heard on it, Senator JONES should be heard.

Mr. CARTER. I expect the gentleman from Illinois saw the article. The Senator just gave statistics and figures.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

Mr. MANN of Illinois. I object.

The SPEAKER. Is there objection to the bill being passed without prejudice?

There was no objection.

IMPROVEMENT OF RED LAKE AND RED LAKE RIVER, MINN.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 14311) to authorize the improvement of Red Lake and Red Lake River, in the State of Minnesota, for navigation, drainage, and flood control purposes.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. GARD. I reserve the right to object for the purpose of making an inquiry regarding this particular bill of the gentleman from Minnesota [Mr. STEENERSON] and the others who are interested. The report seems to be rather inadequate, and therefore I am asking for information from him and others who may know about it. The report shows a short statement by the Secretary of War and then recites that it was also submitted to the Secretary of the Interior, and that extended conferences with him were held, and the Secretary recommended a large number of amendments, but we are not advised in the report of whether he approves or anything else. I am asking for additional information under the reservation I have made.

Mr. STEENERSON. Mr. Speaker, the bill was introduced in February, and extensive hearings were held. The principal of the Northwest School of Agriculture, a branch of the University of Minnesota, came down, and we held a conference with the Secretary of the Interior, and some 15 or 20 amendments were agreed to, and with those amendments the bill was satisfactory to the Interior Department. I brought back those amendments to the Committee on Flood Control, and the committee unanimously said that I had best incorporate them in the bill and reintroduce it. They amended it the next day and reported the amended bill without any amendments appearing in print, because they were technical and very numerous. That was done the next day after the agreement had been made. And the clerks of the Interior Department had not yet transmitted the Secretary's letter. The Secretary's letter, however, came the next day, approving the bill, just as they said they would, and I have a photostatic copy of the letter, which letter approves of the bill, because we included all the amendments suggested by the Interior Department, which is the guardian of the Indians. And this concerns them, because part of the land is in an Indian reservation. As I have said, the bill was satisfactory to the Department of the Interior. When that report was written that letter was on its way toward the House. It was on the 29th of May, and the session was going to end in a few days. We had a telephone message that the letter was on the way when that report was written, and the letter came the very next day.

Mr. LINTHICUM. I would like to ask the gentleman what the nature of the improvement is going to be and at whose expense?

Mr. STEENERSON. This item was first carried in the river and harbor bill of 1916. It had a clause in it improving the navigation, and a survey was authorized, and they were to take into consideration the local interests. It turned out that local interests were about all there was to it. The interests that are to be contributed to this improvement are some 250,000 or 260,000 acres of privately owned land along the river and about the same amount of land in the Indian reservation.

I will show the gentleman on the map. Here [indicating] is the Red Lake, and this river flows some 15 miles from Red Lake until it enters the privately owned land. Now, the fall here is only about 5 inches to the mile, and the land on both sides of this, the Indian land, is rich soil, but owing to the fact that this lake has a large watershed, the land is flooded every sum-

UMI

mer and is absolutely useless for agriculture, although if we could control the outlet it would be fertile, rich land. The Indians are interested. They have long been wanting to drain it, but there is no way to do it without this outlet here [indicating]. And these people from the line of the reservation west are also flooded to some extent. These lands will be assessed some $250,000. This is only a preliminary estimate by the War Department engineers. Two hundred and thirty-six thousand is estimated to be the benefit on the Indian lands. The War Department recommends that it be done by a municipal corporation or drainage district, to be organized under the laws of Minnesota. That is in the report of the engineer. Minnesota did pass the appropriate legislation, and the drainage survey of the district is authorized. It is authorized to tax privately owned land and tax benefits derived by water power companies who have several mills, and they can tax municipalities whose domestic water supplies are improved. They can issue bonds. Of course, there is no way to tax the Indian land. So the bill provides there shall be a mutual agreement between the Secretary of the Interior and the conservancy district. It is not organized for profit but organized simply in the interest of agriculture, and there is no stock at all.

It is just the same as the case in Ohio, I will say to the gentleman from Ohio; I think there has been some drainage conservation legislation in Ohio, which we followed when we wrote this law in the State of Minnesota.

Mr. GARD. Yes; the difference between this project and the project in Ohio is that the very large project in Ohio is paying about $30,000,000 of its own money in the enterprise.

Mr. STEENERSON. We pay here 98¼ per cent of the cost of all the improvements. These lands here have been talked about by the Interior Department and they have had two drainage surveys made in many years past, and this is the only practical plan by which they can be drained, and it is impossible to have anybody occupy these lands until they are drained. These lands are all held in common by the Indians, those that are on the Indian reservation, and it is thought desirable to have them drained before they are allotted in severalty. You can not drain them after they have been occupied.

Mr. LINTHICUM. The navigation part involves only about $15,000?

Mr. STEENERSON. Yes; $15,000 out of $850,000. The origin of the act was the desire to improve navigation, but it was found that the local interests contributed 98¼ per cent of all the expense, one of the local interests being the Indian land, which is to contribute, according to the agreement of the Secretary of the Interior.

Mr. GARD. I think it should be more comprehensively considered than we can consider it on the Unanimous Consent Calendar.

Mr. HUMPHREYS. This matter has been very thoroughly thrashed out heretofore. There is only $15,000 involved on the part of the Government out of almost a million dollars that is to be contributed by other interests, and that $15,000, according to the United States engineers, is to be appropriated in the interest of navigation. It is worthy of that improvement. I hope the gentleman will let the bill go through.

Mr. GARD. There is no navigation there, as I understand.

Mr. HUMPHREYS. Oh, yes; there is.

Mr. KNUTSON. There is navigation, I will say to the gentleman.

Mr. HUMPHREYS. There is some, according to the report of the engineers.

Mr. GARD. There is in time of high water.

Mr. HUMPHREYS. There is navigation there, and only $15,000 is to be appropriated by the Federal Government out of almost a million.

Mr. KNUTSON. The products of the reservation are largely taken to market on boats. Of course, there is no navigation there like that on the Ohio River or on the Mississippi River, but the navigation that is there is of great importance to these settlers.

Mr. GARD. It is stated in the report that there is 40 miles.

Mr. STEENERSON. That ought to be 71 miles, where the boats run.

Mr. GARD. This is not at all to my mind a flood-prevention project. It is a drainage project, for the benefit of lands here, some of which are in Indian reservations and some of which are outside—236,800 acres of reservation and 248,000 acres outside of the reservation.

Mr. HUMPHREYS. Nearly 500,000 acres are to be drained. They are not asking the Federal Government to pay a nickel of it. They are simply asking us to give them permission to do it.

Mr. GARD. It is a drainage proposition.

Mr. HUMPHREYS. And it is a flood-control proposition.

Mr. KNUTSON. At high-flood times the Red Lake River overflows and runs into the Clearwater River, 13 miles to the south, and sometimes it is a continuous sheet of water. We are trying to have this land reclaimed and to pay for it ourselves. Only $15,000 is to come out of the Public Treasury.

Mr. GARD. I have no desire to object to anything that will benefit the people, but my thought was that in the case of a bill of this magnitude we had better consider it under a wider scope than we can have in the discussion of a bill under unanimous consent.

Mr. STEENERSON. The gentleman will realize that it is getting late, and there was thorough discussion in the committee, in which the gentleman from Mississippi [Mr. HUMPHREYS] took part.

Mr. MONDELL. Mr. Speaker, will the gentleman yield?

Mr. GARD. Yes.

Mr. MONDELL. Does the gentleman feel that it is his duty to object? Does the gentleman from Ohio contemplate objecting?

Mr. GARD. I am trying to secure information to determine whether I should object or not.

Mr. MONDELL. It is a very excellent measure, but I thought if the gentleman was proposing eventually to object, it was hardly worth while to discuss the matter further.

Mr. GARD. That is the reason why I did intend to object. It is a matter which should be brought up in another way and we should have more information on the subject.

Mr. KNUTSON. Mr. Speaker, if I may say so to the gentleman, very extensive hearings have been held before the Flood Control Committee on this matter. The engineers of the War Department and of the Interior Department have gone into it carefully and conceded the necessity for it.

Mr. HUMPHREYS. And also the Indian council.

Mr. KNUTSON. Yes; and the Indian council. They are anxious to have this work done. I hope the gentleman will not object.

The SPEAKER. Is there objection?

Mr. GARD. I object.

Mr. STEENERSON. Mr. Speaker, I move to suspend the rules and pass the bill.

The SPEAKER. The gentleman from Minnesota moves to suspend the rules and pass the bill. The Clerk will report it.

The Clerk read as follows:

A bill (H. R. 14311) to authorize the improvement of Red Lake and Red Lake River, in the State of Minnesota, for navigation, drainage, and flood-control purposes.

Be it enacted, etc., That the Red Lake drainage and conservancy district of the State of Minnesota, duly created and organized under the laws of said State and authorized to construct improvements and projects therein, is hereby authorized to deepen, widen, and straighten the said Red Lake River and tributaries thereof, or any portion thereof, as may be deemed necessary, and to fix and regulate the height of water in Red Lake, and to construct and maintain such ditches, drains, dams, dikes, spillways, or other controlling works as may be found necessary and advisable to utilize the said Red Lake for reservoir and flood-control purposes, and to facilitate drainage into said lake and river, as indicated and outlined in the report of the preliminary survey of the Board of Engineers for Rivers and Harbors to the Secretary of War on March 28, 1919 (H. Doc. No. 61, 66th Cong., 1st sess.), with such modifications and changes as may be found advisable: *Provided*, That detailed plans for such work and improvements shall first be submitted to and approved by the Secretary of War and the Chief of Engineers in accordance with the act to regulate construction of dams across navigable waters, approved June 23, 1910: *Provided further*, That the deepening, widening, and straightening of that part of Red Lake River within the Red Lake Indian Reservation and all other work necessary or desirable to be done within the Red Lake Indian Reservation shall be done in accordance with plans submitted to and approved by the Secretary of the Interior, provided that due compensation shall be made to the Indians for any lands that may be required for straightening said river: *And provided further*, That before the acceptance of the plans the Red Lake Drainage and Conservancy Board and the Secretary of the Interior shall ascertain and agree upon the maximum and minimum levels between which the water in Red Lake shall be permitted to be fluctuated, and such levels shall not be deviated from without the consent of the Secretary of the Interior.

SEC. 2. That the Secretary of the Interior is hereby authorized to enter into such contract arrangements as may be found necessary and advisable with the said the Red Lake drainage and conservancy district relative to all work within the Red Lake Indian Reservation as contemplated in section 1 of this act and as to the assessment of lands within the limits of the Red Lake Indian Reservation in said State for their proportionate share of the cost of such improvement and their maintenance and operation. The said the Red Lake drainage and conservancy district is hereby authorized to include within the boundary of the said drainage and conservancy district all lands within the limits of the said Red Lake Indian Reservation located within the Red Lake River drainage basin, and to assess the lands benefited in the same manner and proportion as other lands outside of the limits of said reservation, but within the said drainage district and benefited by such improvement: *Provided*, That all such assessments within the limits of said district shall be on a per acre basis against the lands benefited in proportion to the benefits received: *Provided further*, That the maximum cost to any lands within the boundaries of said reservation shall not exceed $2.50 per acre. All assessments so levied by said drainage and conservancy district shall be in the manner provided by the laws of said State, except as modified by contract with the Secretary of the

Interior, and the Secretary of the Interior is hereby authorized to make such regulations for the payment thereof as may be found necessary or desirable. There is hereby authorized to be appropriated, out of any moneys in the Treasury of the United States not otherwise appropriated, a sum sufficient to pay the share of the United States as shown by said report, and to pay that part of the cost of said improvements apportioned to the lands within the said Red Lake Indian Reservation, which latter amount shall be reimbursable to the United States under such rules and regulations as the Secretary of the Interior may prescribe: *And provided further*, That the assessment against the lands within the Red Lake Indian Reservation shall become a first lien on said lands and such lien shall be recited in any trust or fee patent that may be issued thereafter, and any such lien shall be enforceable by the Secretary of the Interior by foreclosure as a mortgage as soon as fee simple patent is issued: *And provided further*, That any fund standing to the credit of any Indian allottee, or which may hereafter be placed to his or her credit, may be used in payment of such lien.

SEC. 3. That wherever it is deemed necessary or advisable, roads suitable for post roads may be constructed out of the spoil banks or other suitable material along any of the drainage ditches or canals to be constructed hereunder.

SEC. 4. That as to all lands outside of the Red Lake Indian Reservation, the act entitled "An act to authorize the drainage of certain lands in the State of Minnesota," approved May 20, 1908, shall be applicable to the enforcement and collection of all assessments made for such improvements by said drainage and conservancy district.

Mr. BLANTON. Mr. Speaker, I demand a second.

The SPEAKER. The gentleman from Texas demands a second.

Mr. STEENERSON. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

The SPEAKER. The gentleman from Minnesota asks unanimous consent that a second may be considered as ordered. Is there objection?

There was no objection.

The SPEAKER. The gentleman from Minnesota has 20 minutes and the gentleman from Texas [Mr. BLANTON] has 20 minutes.

Mr. STEENERSON. Mr. Speaker, I have already explained the proposition in answer to the inquiry of the gentleman from Ohio [Mr. GARD], and I will only add now that the engineers, both those of the Federal Government and the State of Minnesota drainage engineers, have all pronounced this project as the most feasible project of reclamation of land that has ever been found in the United States.

The cost in proportion to the area benefited is very slight, and by looking at the map you can see why that is true. The water area of upper and lower Red Lake is 441 miles, but the drainage watershed basin of that lake is something like 2,000 miles. In the spring of the year the water coming into the lake rises high, but the river, which is the outlet of the lake, has a fall of only 5 inches to the mile as far as the boundary of the Red Lake Reservation, which is 15 miles west of the lake. From there down the land is privately owned. The river continues for some 8 or 10 miles more with this very little fall and low banks. When the lake is high, the land on each side of the river is overflowed, so that it is impossible to cultivate it in its natural state. As my colleague [Mr. KNUTSON] has stated, it gets so high in the spring that the water flows down through this river to the south, and for miles on each side the country becomes a lake.

Mr. GARD. Will the gentleman show me on the map where Highlanding is?

Mr. STEENERSON. Here it is. About 12 miles west of the west line of the reservation. Farther down the banks of the river are higher and the fall greater.

In order to accomplish this reclamation it is necessary to build controlling works at the outlet of the lake and straighten and deepen the river through this 15 miles of Indian land and 12 or 15 miles of privately owned land. That will give this Indian land a proper flood outlet, as well as help the farmers and settlers who also suffer from flood water every spring. It will help them by having the river straightened and deepened so as to carry off the water and furnish a proper outlet for ditches.

Mr. KELLY of Pennsylvania. Will the gentleman yield?

The SPEAKER pro tempore (Mr. MADDEN). Does the gentleman from Minnesota yield to the gentleman from Pennsylvania?

Mr. STEENERSON. Yes.

Mr. KELLY of Pennsylvania. The plan includes the Red Lake Indian Reservation, does it not?

Mr. STEENERSON. It includes the Red Lake Indian Reservation, but the drainage conservation district under the law will simply make the same assessment on that land as on the privately owned land, and that will not be a valid assessment or apportionment of the cost until it is approved by the Secretary of the Interior on behalf of the Indians.

Mr. KELLY of Pennsylvania. I understand the cost will be about $236,000, to be paid from the tribal funds of the Indians.

Mr. STEENERSON. It should not exceed that. That is the estimate of the War Department engineers.

Mr. KELLY of Pennsylvania. One more question. The gentleman knows well from the hearings we have held that in 1889 an act was passed by Congress for the allotment of the lands in this Red Lake Indian Reservation. That allotment has never been accomplished in spite of the fact that the Indian Affairs Committee has been trying to get the allotments made. Does the gentleman think the passage of this measure will expedite the allotment of these lands so that the Indians will be finally removed from the care of the Government and become self-sustaining?

Mr. STEENERSON. It certainly will, for this reason, that, as stated by an official of the Indian Department before the committee in my presence, it has been impracticable to make allotments to the Red Lake Indians because these lands in their present state are not fit for cultivation, and the other lands on the reservation are pine-timber lands, some of them worth $15,000 or $20,000 per quarter, and some of them worth $1,000 per quarter for the timber, and if you allot them you will have the same injustice as you had on the White Earth Reservation. They do not want to allot the timberlands. They want the timber cut according to forestry practice and the money divided equitably, and they want to allot these lands to the Indians as soon as they are fit for cultivation. They have no land now that is fit for cultivation, except the few places along the shore of the lake. So this will expedite allotment to the Indians.

Mr. BEE. Will the gentleman yield?

Mr. STEENERSON. Yes.

Mr. BEE. I notice on page 4 it is provided that there is appropriated out of any money in the Treasury a sum sufficient to pay the share of the United States. Has that share been definitely settled?

Mr. STEENERSON. It has been settled in this way: The origin of this project was a clause in the river and harbor bill of 1916 authorizing a survey of the Red Lake River with a view to improving navigation, and they were to take into consideration local interests, and they said that local interests should contribute all except $15,000, which is the amount they state ought to be apportioned to the United States on account of improving the navigation. The clause reads:

Red Lake, Minn., and Red Lake River from its outlet at Red Lake to its junction with the Red River of the North at Grand Forks, N. Dak., with a view to devising plans for regulating works whereby the level of said lake and the flow of said stream may be controlled in the interest of navigation, and in making such examination and survey any proposition by local interests for participation in the expense of said project shall be taken into consideration.

Mr. BEE. Will any navigation result from this?

Mr. STEENERSON. Oh, certainly.

Mr. BEE. If they are willing to put up all the money except $15,000, why do they not put up the $15,000 and let the Government out of it, so far as any appropriation is concerned?

Mr. STEENERSON. You can not make this improvement and carry out this project without the consent of the United States. This is a navigable river. It is navigated to-day.

Mr. BEE. You can get that consent without appropriating any money for it, can you not?

Mr. STEENERSON. Yes; but the United States engineer said the amount that ought to be paid by the United States was estimated at $15,000.

Mr. HUMPHREYS. If the gentleman will allow me, why should not the Federal Government pay its share of $15,000 if the interests of navigation justify it and the report of the engineers says that that is the fact? These people there are going to put up $800,000. Now, the amount which the Government of the United States should pay in the interest of navigation is $15,000. Everywhere else the Government contributes for the interest of navigation. There is navigation there and it is worth $15,000. Why should not the Federal Government pay it?

Mr. BEE. That is argumentative, on the question as to whether or not there is a benefit to navigation.

Mr. HUMPHREYS. The engineers in their report say so.

Mr. BEE. Unless I misread the report, you take $236,000 from the Indians?

Mr. STEENERSON. No.

Mr. BEE. From the Indian reservation. In other words, they estimate that it is going to cost $779,000.

Mr. STEENERSON. The gentleman is reading from the report on the bill which says this preliminary survey of the War Department engineers estimated that the portion allotted to the Indian lands as benefits to them would be so much, and the portion allotted to the privately owned lands would probably be so much. But that is not final or conclusive.

Mr. BEE. How much is this thing going to cost?

Mr. STEENERSON. The War Department engineers estimate $800,000.

Mr. BEE. Is it proposed to make the Indian tribes pay a proportion of that?

Mr. STEENERSON. Yes; the same as the privately owned lands.

Mr. BEE. What benefit will the Indian tribes get out of it?

Mr. STEENERSON. Oh, they get the benefit of it. They are getting this land drained, and they never could get an allotment; they could not do anything before.

Mr. BEE. I see in the report that it is a municipal corporation and is authorized to do this.

Mr. STEENERSON. It is organized for the purpose of carrying on this work, without any profit or capital stock. It is organized to reclaim these lands so as to make them useful.

Mr. BEE. I have no especial objection to this matter, but I do want to understand from some source how it is that every time we come here something is taken away from these poor Indians.

Mr. STEENERSON. The gentleman is entirely mistaken about that. There is nothing to be taken away from these Indians. I am their very best friend.

Mr. BEE. I do not mean in this particular instance, but I am talking generally.

Mr. HUMPHREYS. The Indian council asked for this.

Mr. CARTER. Mr. Speaker, if the gentleman will permit, this simply provides, as I understand it, for the diking of this river and for protecting these lands which the water now overflows, and most of those lands I understand to be Indian lands.

Mr. STEENERSON. Yes; there are 236,000 acres of them.

Mr. BEE. Why should it be charged to the Indians, when this is being done?

Mr. KNUTSON. If I may make this observation to the gentleman, the Indian lands that we are seeking to reclaim at the present time are worth not to exceed three or four dollars an acre. I think that would be a very liberal estimate.

Mr. STEENERSON. They are not worth anything.

Mr. KNUTSON. We claim that these lands will be worth from $20 to $50 an acre after this reclamation project is put through, and that increase in value accrues to the Indians and no one else.

Mr. BEE. Is it the purpose to compel the Indians to sell these lands after they are benefited?

Mr. KNUTSON. He is going to hold them; we are going to put the Indians on them and make them self-sustaining citizens.

Mr. BEE. If the lands are to be worth $20 an acre after they are reclaimed, how much is it going to cost the Indian to reclaim them?

Mr. KNUTSON. About a dollar an acre. Two hundred and thirty-six thousand dollars is the amount.

Mr. STEENERSON. Mr. Speaker, I reserve the remainder of my time.

Mr. BLANTON. Mr. Speaker, I want to congratulate my friend from Minnesota [Mr. KNUTSON], the distinguished Republican whip, for in so short a time gaining enough power in the House to get a bill of this character by the gentleman from Illinois [Mr. MADDEN], who happens to be the distinguished Acting Speaker of the House at the present time. The gentleman from Illinois, as has been shown heretofore, from his presiding position at the head of the steering committee of the House, sent out his decree all over the United States that Congressmen west of the Mississippi and south of the Ohio River should not have any more rights in this House from now on, and yet the distinguished whip——

Mr. GARRETT. Mr. Speaker, will the gentleman yield?

Mr. BLANTON. I yield.

Mr. GARRETT. The statement that I saw was that in the next Congress they would not have any rights.

Mr. BLANTON. Oh, the gentleman knows how this steering committee arrogates unto itself power even before it is time. It is attempted even before the new Congress is to meet, on the 4th of April next.

Mr. GARRETT. It just occurred to me that perhaps that is why they are hurrying this bill through. [Laughter.]

Mr. BLANTON. That is exactly why they are hurrying it through at this time, and although the distinguished Member from Minnesota [Mr. KNUTSON], who deservedly happens to be the majority whip, has been here only about four years, yet he has been able to put it over an old stage horse like the distinguished member of the steering committee, the gentleman from Illinois [Mr. MADDEN], the man who gave out this edict, and although the bill involves the financial expenditure of $779,000, yet the Republican whip has so arranged matters as to get the distinguished gentleman from Illinois [Mr. MADDEN] out of the way by having him taken off the floor and put into the chair. [Laughter.] If I had not demanded a second, the bill would have been railroaded through here by unanimous consent and passed with about 30 or 40 Members on the floor.

Mr. JOHNSON of Washington. Oh, there are more than that here.

Mr. BLANTON. That was about the number when the bill was called up. Of course all of this $779,000 does not come out of the Public Treasury, thank the Lord. Part of it comes from individuals. But I call attention to this fact, that in addition to the $15,000 that comes out of the Treasury first-hand, there is the sum of $236,000 also that comes out of the Public Treasury and may go back and be reimbursed, or it may not be, according to the success of this undertaking. Not all such undertakings are successful, even among financiers. Financial enterprises of this character, involving even more than $779,000, are failures sometimes.

I am not objecting to the gentleman's bill. I expect to vote for it. I expect to help pass it, because I think it is a good proposition. I endeavored to get myself into the mood where I would be in favor of the bill, not because of hearing the argument of the distinguished gentleman from Minnesota [Mr. STEENERSON], as he did not convince me by his argument.

However, he showed me that it would benefit the Indian, and I am going to vote for it because the Indian is supposed to get some benefit from it. The reason I am taking up the time of the House now is to protest against this kind of procedure, which passes legislation involving $779,000 by acclamation on a suspension day with only a handful of Members present.

Mr. LINTHICUM. Mr. Speaker, will the gentleman yield?

Mr. BLANTON. Yes.

Mr. LINTHICUM. Does not the gentleman think he ought to be fair to the House and state more accurately how many Members are present? Anyone can see that there are nearly 100 Members on the floor rather than 30 or 40.

Mr. BLANTON. Oh, as soon as I began my castigation of the gentleman from Illinois [Mr. MADDEN] everyone was interested in it, and they all came in from the corridors. [Laughter.] Whenever you can castigate the gentleman from Illinois [Mr. MADDEN], who made the statement to which I have referred—and he has never denied it—everyone is interested in it, because there are a good many of us living west of the Mississippi and south of the Ohio Rivers, and we are interested in his edicts; therefore we have an audience.

I yield five minutes to the gentleman from Ohio [Mr. GARD].

Mr. JOHNSON of Washington. Mr. Chairman, I want to know if the gentleman from Texas was interested in having the gentleman from Illinois made Speaker pro tempore so that he could castigate him?

Mr. BLANTON. Anything on earth that would take the gentleman from Illinois [Mr. MADDEN] off the floor of the House I am always interested in, so that we fellows west of the Mississippi and south of the Ohio Rivers may have a chance.

Mr. GARD. Mr. Chairman, I ask the indulgence of the House if I discuss the provision under consideration; therefore I am compelled to ask questions of the gentleman from Minnesota, Mr. STEENERSON, or the gentleman from Minnesota, Mr. KNUTSON, because I do not desire to impede a meritorious bill, if it be meritorious. The bill, as I understand it, provides for the expenditure of some $779,000, of which a small percentage, $11,000, is said to be for the governmental value of the increase in navigation and of $256,000 for Indian lands. Now, the project is for the protection of a river which is called the Red Lake River; is that the name?

Mr. STEENERSON. Yes.

Mr. GARD. What I want to know is whether the river flows into Red Lake—is that the flow of the river?

Mr. STEENERSON. No; it is the outlet of Red Lake, as the gentleman sees it here [pointing to a map]. See this red spot? There is another river that joins it and it goes to Grand Forks, N. Dak.

Mr. GARD. The river flows from Red Lake?

Mr. STEENERSON. Flows from Red Lake and is a tributary of the Hudson Bay watershed of the Red River of the North, which flows into Hudson Bay.

Mr. GARD. And immediately adjacent to Red Lake there is an Indian reservation?

Mr. STEENERSON. Yes; it is marked here on the map; it surrounds the lake on three sides.

Mr. GARD. On the southern part of the river there are lands outside of the reservation, some 248,500 acres, privately owned. Is that correct?

Mr. STEENERSON. Westerly of the reservation. The first 15 miles west of the lake is the Indian lands.

Mr. GARD. The Secretary of War states that the department was only interested in section 1 of the bill, and stated that the

bill was primarily for the purpose of drainage of land and reclamation, and incidentally for the better utilization of the waters of these streams for sanitary, domestic, and transportation services.

Mr. STEENERSON. Yes.

Mr. GARD. Of course, the transportation purpose is only incidental in a very limited sense, as the gentleman was frank enough to say.

Mr. STEENERSON. Yes; but the estimate on the part of the war engineer was that the domestic water supply should contribute and the water-power interest should contribute $240,000.

Mr. GARD. The project is one which seems to me to be two-fold in its benefits, and I am not criticizing the benefits, but one project is for the benefit of the land, draining the land, and the other is the increase of the water power.

Mr. STEENERSON. Yes; the increase in the water power is assessed so as to help pay for the drainage of the farmers' land. It is proposed to assess the land that is estimated there to be allotable to the water power, so as to help pay for the whole project.

Mr. GARD. There is always a distinction, as I view it, in conservancy that has to do with the protection of land and water power, which has somewhat to do, not with the protection of the land, but with the use of power in a river or lake or some water power for the purpose of developing hydraulic power. The terms "conservancy" in water power are not the same; in fact, very often very distinct one from the other, because at times the proper use of conservancy prohibits the use of water power. I notice the report states that the carrying out of this project is feasible only through the cooperation of the State authorities having the authority to exercise the right of eminent domain and taxation. It is, as the gentleman states, only exceedingly incidental in so far as the Government obtaining navigation or flood control is concerned. It states that these authorities can not carry out the improvement because it involves the erection of controlling works at the outlet of the lake, to control the level and the outflow and the straightening and deepening of the river not only for the 15 miles within the reservation, but for 10 miles farther to the west beyond the reservation line. So I would like to have the gentleman, in my time, for the information of the committee——

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. BLANTON. I yield the gentleman two additional minutes.

Mr. GARD. I would like to have the gentleman, either in my time, or preferably in the time which he has in his control, inform the House what will be the character of the erections at the outlet of the lake to control the level and outflow; what opportunity they have there to benefit the land and incidentally to benefit the other projects.

Mr. STEENERSON. I want to call the gentleman's attention to the fact that these figures he cited are simply the estimates of the preliminary survey of the War Department engineers.

Mr. GARD. I know that. That is why some of us have to ask these questions, because the estimate is made here of $779,000, and it is exceedingly probable we will have to double that amount in the expenditure before we get through.

Mr. STEENERSON. Well, that would not be a calamity if it is necessary to improve these lands.

Mr. GARD. No; it would not be a calamity, but it would be well to explain it so that we can understand it.

Mr. CANNON. Will the gentleman yield for a minute?

Mr. BLANTON. Yes; I yield to the gentleman from Illinois.

Mr. CANNON. I want to ask the gentleman from Minnesota what the expense in the end will be to the United States Treasury?

Mr. STEENERSON. Fifteen thousand dollars is estimated, and this bill authorizes an appropriation of that amount, but if the Committee on Appropriations does not see fit to appropriate, they do not have to. It amounts to less than 2 per cent—about 1¾ per cent—of the total cost of the project.

Mr. CANNON. There is no chance of this legislation going to the Treasury beyond $15,000?

Mr. STEENERSON. No, sir.

Mr. CANNON. I am from Illinois. We formed drainage districts, and the lands that we drained and that were of negligible value are now worth from $100 to $500 an acre. But am I right in supposing that along this river and in the Indian reservation the drainage districts would be formed and a pretty large area would pay for this district?

Mr. STEENERSON. A pretty large area.

Mr. CANNON. Is there authority to issue bonds?

Mr. STEENERSON. Yes.

Mr. CANNON. In the bill?

Mr. STEENERSON. No; in the drainage and conservancy district. It is organized under the laws of Minnesota. They finance the project.

Mr. CANNON. If the gentleman is right in his statement, why, I will say that I believe in drainage; but I do not believe in taxing the Treasury of the United States under existing conditions, reimbursable to all this, that, and the other.

Mr. STEENERSON. I am glad to mention that also.

The SPEAKER. The time of the gentleman from Illinois [Mr. CANNON] has expired.

Mr. STEENERSON. Mr. Speaker, I want to make an explanation.

Mr. BLANTON. The gentleman can do it in his own time. I want to state to the gentleman from Illinois [Mr. CANNON] that, in addition to the $15,000 under this bill, the Government will advance the $236,000 for the Indians, to be reimbursed to the Government by them if the plan succeeds.

Mr. KNUTSON. If the gentleman will please permit an interruption——

Mr. BLANTON. In just a moment.

Mr. KNUTSON. Would not the gentleman allow a correction to be made? I am sure the gentleman does not wish to be unfair.

Mr. BLANTON. I yield five minutes to my colleague from Texas [Mr. BLACK].

Mr. BLACK. Mr. Speaker, I wanted to ask the gentleman from Minnesota a question about the clause which provides that certain funds expended by the United States shall be reimbursable. The bill says that the amount we expend on this Red Lake Indian Reservation shall be reimbursable to the United States under such rules and regulations as the Secretary of the Interior may prescribe. Now, it does not say out of what funds the reimbursement shall be made, and I call attention to the fact that the usual language carried in the Indian appropriation bill for similar appropriations as this is that it is to be reimbursable from any funds of the Indians on said reservation now or hereafter deposited in the Treasury of the United States. The bill that we are now considering just merely states that the amount shall be reimbursable to the United States, under such rules and regulations as the Secretary of the Interior may prescribe. Now, I understand, of course, that it is expected that this amount will be reimbursed out of the funds of these Indians who live on the Red Lake Reservation, but does the gentleman think that the language is sufficient to make that absolutely clear, so that there would be no mistake about the construction?

Mr. STEENERSON. I discussed it with the Secretary's office after the bill had been reported, as to whether it would be necessary to put in an amendment. Somebody had suggested to me the same objection. But the officials there said this was sufficient, and they further informed me that under the contract for the cutting of timber that had been completed this winter there is $500,000 in the Treasury belonging to the Red Lake Indians. It is not necessary to take that much money at once. The conservancy district will issue bonds.

Mr. BLACK. I wanted to be certain that the language was sufficient to insure that the Government would be reimbursed out of the funds of these Indians. Mr. Speaker, as the gentleman states he has already taken the matter up with the Department of the Interior and has received their construction of the language, I think we may safely rely that the appropriation will be reimbursable.

The SPEAKER pro tempore. The time of the gentleman from Texas has expired.

Mr. CANNON. Mr. Speaker, I want to ask a question, if the gentleman will allow me. This money would come out of the Treasury in the first instance. My attention has been called to the fact that the Treasury finances the Indians for three-quarters of a million dollars.

Mr. BLANTON. Two hundred and thirty-six thousand dollars.

Mr. STEENERSON. The money will not be wanted for two or three years. It has to be paid as the work progresses.

Mr. CANNON. I know. But could we not give authority to put this under the Legislature of Minnesota, and let them issue bonds and raise the money?

Mr. STEENERSON. Has the gentleman again finished?

Mr. CANNON. Precisely. What I object to is putting $236,000 out of the Treasury. You have got enough of a load to carry without doing anything like that.

Mr. STEENERSON. There is no danger. I want to read the report of the War Department on the method by which this project shall be carried out. The district engineer says:

In my opinion the project is worthy of adoption by the United States to the extent of $15,000 for supervision during its execution and $200 annually thereafter. The work of improvement can best be financed and accomplished by the formation of a drainage district under existing and pending drainage laws of the State of Minnesota.

The laws were framed with this in view, and this simply authorizes; it does not take a dollar out of the Treasury, but it authorizes the appropriation to be made, and by that time, if the money is on hand sufficient to pay it——

Mr. CANNON. There is no objection to the $15,000.

Mr. STEENERSON. I mean the $236,000. This authorizes the Secretary of the Treasury to reimburse the Treasury in such manner as he may require, and if he has the funds of the Indians he can do it immediately.

Mr. CANNON. Why not authorize him to take the money?

Mr. STEENERSON. We did not have the money on hand. That money came in lately. By reason of the contracts with lumber companies, they have sold a lot of timber.

Mr. HASTINGS. Mr. Speaker, will the gentleman from Minnesota yield?

Mr. STEENERSON. Yes.

Mr. HASTINGS. How many acres of Indian land are affected here?

Mr. STEENERSON. Two hundred and thirty-six thousand acres.

Mr. HASTINGS. And how much of white men's land?

Mr. STEENERSON. Two hundred and forty-eight thousand acres.

Mr. HASTINGS. And this is proposed to be made a charge against the Indian lands, to be reimbursed to the Government?

Mr. STEENERSON. Yes.

Mr. HASTINGS. I just want to take a minute of the gentleman's time, if I may, to say that I have no objection to it, because I think it will improve the value of the land; but I want to call the attention of the House, and also that of the very alert chairman of the Committee on Indian Affairs, to the fact that in my judgment this bill, inasmuch as it affects Indian lands and Indian money, ought to have gone to the Committee on Indian Affairs, and ought to have been reported by that committee, although I raised no objection myself.

Mr. STEENERSON. I will say to the gentleman from Oklahoma that this measure originated in the river and harbor bill for the improvement of the navigation. It was said that the improvement of the navigation was proper, and it was recommended that the local interests should contribute to it. It turned out that the local interests, including the lands to be drained, carried 98½ per cent of the appropriation. Still the jurisdiction went to the Committee on Flood Control.

I will say, further, that 10 years ago I introduced a bill for a drainage survey of the reservation. The Indian Committee approved it, and it was made a part of the Indian appropriation bill, and later on we had another survey of these very locks and dams, so that the Indian Committee has recommended the legislation for the drainage of this reservation.

Mr. HASTINGS. Has the Interior Department reported favorably upon this project?

Mr. STEENERSON. They certainly did, and two successive surveys by the drainage department have been made, and the project has been favorably recommended. The Interior Department is in favor of it.

Mr. HASTINGS. The letter of the Interior Department does not accompany this bill.

Mr. STEENERSON. The letter of the Interior Department, as I explained to the gentleman from Ohio [Mr. GARD], was not in the committee room, but I have a photostatic copy of it.

The SPEAKER pro tempore. The question is on agreeing to the motion of the gentleman from Minnesota to suspend the rules and pass the bill.

The question was taken; and the Speaker pro tempore announced that two-thirds having voted in the affirmative, the rules were suspended, and the bill was passed.

Mr. BLANTON. Mr. Speaker, would it be out of order to show that the bill was passed unanimously? There was no vote against it.

The SPEAKER pro tempore. The Clerk will report the next bill.

CLAIMS OF BANDS OR TRIBES OF INDIANS IN CALIFORNIA.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 12788) authorizing any tribes or bands of Indians of California to submit claims to the Court of Claims.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the consideration of the bill?

Mr. CANNON. I object. I did object heretofore, on full examination, and I object again.

The SPEAKER pro tempore. Objection is made. The Clerk will report the next bill.

Mr. RAKER. Mr. Speaker, will the gentleman withhold his objection?

Mr. CANNON. I will yield, out of courtesy to the gentleman; but I am going to object.

The SPEAKER pro tempore. The Clerk will report the next bill.

MILK RIVER VALLEY GUN CLUB.

The next business on the Calendar for Unanimous Consent was the bill (S. 793) authorizing the issuance of patent to the Milk River Valley Gun Club.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection?

Mr. BEE. Reserving the right to object, is the gentleman from Colorado [Mr. VAILE] here? I do not know that I have any objection to this bill, but I am curious to know what the Congress of the United States has to do with the issuance of a patent to the Milk River Valley Gun Club.

Mr. VAILE. I will say to the gentleman from Texas that the gentleman from Montana [Mr. RIDDICK] is the author of this bill, and will be able to answer the gentleman's question.

Mr. BEE. Does the gentleman mean that the Milk River Valley Gun Club is the owner of real estate, and that this is a land patent?

Mr. RIDDICK. The Milk River Valley Gun Club would own real estate if this bill were passed. I will say to the gentleman for his information that this region referred to is a marsh where game birds gather and breed. In order to enforce the game laws the gentlemen of the gun club want to protect this land and keep poachers away and protect the game in that northern part of the State.

Mr. BEE. I still do not understand. You propose through the Committee on Public Lands to authorize the issuance of a patent to this gun club to land where the game birds propagate?

Mr. RIDDICK. Yes; when this club pays the price, $1.25 an acre.

Mr. BEE. Is it proposed to issue a patent to the gun club for the preservation of these game birds?

Mr. RIDDICK. It is proposed that a patent be issued to the Milk River Valley Gun Club for a game preserve so long as it is used for that purpose. If at any time it should not be used for that purpose, it goes back to the Government.

Mr. BEE. What is the life of the patent?

Mr. RIDDICK. The same as any patent.

Mr. VAILE. It is the same as any other land patent.

Mr. BEE. Somebody near me suggests that the life of the patent would correspond with the propagation of the birds.

Mr. VAILE. Not with the life of the bird.

Mr. MANN of Illinois. They will still propagate birds after we are dead.

Mr. BEE. I agree with the gentleman on that, but I am still a little in the dark. For the propagation of the birds, is it necessary to have a patent of this kind?

Mr. RIDDICK. There is nothing unusual about this request to have a tract of land set aside for game-breeding purposes. A group of gentlemen in Montana wish this land to be set aside, so that they can have the guardianship of it and promote the preservation and propagation of game.

Mr. BEE. Does not the Government of the United States protect these birds itself?

Mr. RIDDICK. The State laws, if enforced, would protect them except during a short season. That is just the point. These birds are not being protected. These gentlemen desire to protect the birds. Montana at one time was a great hunting State. There is danger of it losing all of its game birds and other game unless they are better protected. This is a step toward the protection of these birds.

Mr. MANN of Illinois. If my memory is correct, we have passed several bills similar to this since I have been a Member of the House, designed to protect birds and other game.

Mr. BEE. The reason I asked the question was that I was under the impression that the State itself passed laws for the protection of the birds of that State, and while I defer to the gentleman from Illinois [Mr. MANN], it is a rather new proposition to me that in order to protect the birds of the State the Government of the United States would issue a patent to an association of gun-club men.

Mr. RIDDICK. The State of Montana does have laws to protect game birds, but Montana is a very large State, and the law is not enforced as well as it should be.

Mr. BEE. Does this give the members of this gun club the exclusive right to hunt upon this game preserve?

Mr. RIDDICK. There is nothing in the bill to indicate that purpose. Of course, if it is privately owned, it would be subject to any rules and regulations that this gun club may make.

Mr. BLANTON. Reserving the right to object, the distinguished gentleman from Illinois [Mr. MANN] is an expert horticulturist, and he knows all about birds and bees and flowers, but I imagine he does not know very much about gun clubs.

Mr. MANN of Illinois. No; I do not.

Mr. BLANTON. My experience is that whenever a gun club protects game, it protects it for its own private, exclusive use and benefit as against the interests of the public. My colleague [Mr. BEE] asked the gentleman from Montana whether or not this gun club would have the exclusive use. The gentleman said, in reply, No; not under the terms of this bill. But under the terms of the patent, which would give them title to the property, I want to say that they could keep every single person in Montana and Colorado and every other State from having the benefit of these game birds and their protection, and their life and death, except the members of this club.

Mr. RIDDICK. Will the gentleman yield?

Mr. BLANTON. I will.

Mr. RIDDICK. The gentleman is right as to the rights of this gun club; but I know these gentlemen, and I know that their purpose is to protect these birds from being slaughtered indiscriminately throughout the whole year.

Mr. BLANTON. If the gentleman from Montana and my friend from Colorado [Mr. VAILE] happened to be officers or directors of this gun club, I am sure they would not keep voters from hunting there, as long as they were Members of Congress, but after they got out of Congress they might be a little more independent. And then they might say to Tom, Dick, and Harry, who wanted to hunt the same as they do, "You must join our club before you will have the hunting privilege." Now, I do not believe in taking public land of the United States and putting it into the hands of the few as against the rights of the many.

Mr. MANN of Illinois. Will the gentleman from Texas yield for a moment?

Mr. BLANTON. I yield.

Mr. MANN of Illinois. The gentleman from Texas will at once see that though a gun club may protect nesting birds in a marsh, neither that gun club nor anybody else can keep the birds from flying away from the marsh after the young birds get big enough to fly, and the gun club can not control the killing of the birds off the reservation. The main purpose of this bill, as I understand it, is to protect the birds from being destroyed while the old birds are sitting and while the young birds are being hatched out. This is a very small reservation, 70 acres, or something of that sort.

Mr. BLANTON. Has the gentleman from Illinois looked closely into the bill?

Mr. MANN of Illinois. I have.

Mr. BLANTON. And he knows it to be a good bill?

Mr. MANN of Illinois. I think it is a good bill.

Mr. BLANTON. For all the people of that country?

Mr. MANN of Illinois. For all the people of that country. I think it is to the interest of everybody out there.

Mr. BLANTON. Then I withdraw the objection.

Mr. HASTINGS. How much land is involved?

Mr. MANN of Illinois. Less than 100 acres.

Mr. GARD. Reserving the right to object, the report shows that part of this reserve is in connection with the Milk River irrigation project. I should like to be advised by the gentleman from Montana, who probably has greater information than the gentleman from Colorado, what this project is. Of course, I presume the place where these ducks alight for the purpose of laying eggs and hatching them is swampy ground. I understand that as the birds fly over they stop there and hatch their eggs. Is that the purpose?

Mr. RIDDICK. This tract of 76 acres lies below a proposed irrigation ditch, and under ordinary provisions it would have to pay its share of the expense for building that ditch. This bill provides, among other things, that such part of this land as is not irrigable shall not be required to pay any portion of the irrigation expenses. It is a very fair and reasonable provision.

Mr. GARD. What I am trying to get at is this: I assume that the Milk River Valley irrigation project is now underway?

Mr. RIDDICK. Yes.

Mr. GARD. When that is completed is there going to be any place for the ducks to lay their eggs?

Mr. RIDDICK. Oh, yes; the water for this irrigation project comes from an entirely different source. This swamp will remain.

Mr. GARD. Will the land out there be still swampy?

Mr. RIDDICK. The swamp will remain. This land is of no value except as a swamp and a breeding place for birds. It is gumbo land and is a permanent swamp.

Mr. GARD. The gentleman is entirely frank to say that under the terms of the bill the undoubted purpose of the bill is, if this project is acquired and a patent given for it, that the Milk River Valley Gun Club members would be the only people allowed to hunt within these preserves of 70 acres?

Mr. RIDDICK. There is no use of questioning that purpose, but I wish the gentleman to understand that the first purpose of the gun club is not to get an exclusive place to do their shooting, but to protect the birds and to require others perhaps to join in this general effort by joining the club and protecting the game in that part of the State.

Mr. GARD. The protection, as I view it, is rather selfish protection, since the protection is only for the birds so that the members of the Milk River Valley Gun Club may in this limited territory of 76 acres have the exclusive right of killing the birds.

Mr. RIDDICK. I would not say that it is a selfish project for this reason: Under the present practice everybody who wants to go in there and kill the birds now does so. Montana being a dry State, the birds hunt these swampy places——

Mr. BEE. What does the gentleman mean by Montana being a dry State in the sense of birds? Are they migratory?

Mr. RIDDICK. Oh, I think the gentleman from Texas will not have any trouble in understanding that. These birds come in there in great quantities, and the people who live in that neighborhood hunt and destroy them out of season. The hunting season is very short in Montana. The purpose of these gentlemen is to have the birds propagate during the entire 12 months of the year and be hunted only during a restricted hunting season, a very laudable purpose.

Mr. GARD. What is this Milk River Valley Gun Club? Is it a club incorporated under the laws of Montana?

Mr. RIDDICK. It is a Montana corporation, as I understand it.

Mr. GARD. I see that the acting secretary suggests that there be placed in the bill an amendment showing where the club was incorporated, if it is incorporated. That does not appear in the bill, and I am inquiring as to where it is incorporated.

Mr. RIDDICK. I think it is incorporated at Helena, the capital of Montana.

Mr. GARD. Will the gentleman from Colorado [Mr. VAILE] advise me if there is any such corporation?

Mr. VAILE. At the time the Public Lands Committee reported out the bill we were not advised that the club had been incorporated, and we did not insert that in the bill as it was reported. However, the club will undoubtedly take steps to be incorporated, so that the patent can be issued to a corporation.

The SPEAKER pro tempore (Mr. MADDEN). The time of the gentleman from Ohio has expired.

Mr. BEE. Mr. Speaker, under the further reservation of the right to object, I would ask the gentleman from Montana a question. I am rather interested in knowing why the Milk River Valley Gun Club is wishing to take out a patent on 76 acres of land in order that they may protect the game birds of that locality. I note also that in connection with the Milk River irrigation project there is a provision in the bill that the gun club shall pay the expenses for the irrigation of this area. What is the interest of the Milk River Gun Club which induces it not only to secure a patent upon the 76 acres, but also to pay the expenses of the irrigation for the Milk River irrigation project?

Mr. VAILE. The amount is 67 acres, as a matter of fact, and it lies with other lands, a great many pieces of land, under the Milk River irrigation project. The secretary wanted to be sure that when any land under that was patented the land which would be benefited by the project should pay its proportional share of the expense of the project, and that is all there is to it.

Mr. BEE. Why should the Milk River Gun Club pay the expenses of the irrigation project?

Mr. VAILE. That is not what it is doing, but if any of this land is found to be susceptible of irrigation, and, as a matter of fact, none of it will be susceptible of irrigation, the amount is to be determined by the Secretary and that land will pay its share just like any other land.

Mr. GARD. Mr. Speaker, further reserving the right to object, what is the gentleman's idea about making a grant of this patent to something not in existence? There is no Milk River Valley Gun Club incorporated.

Mr. VAILE. I think the gentleman will understand that the uniform practice of the department is to issue patents only to grantees who can properly take them. A voluntary association simply would not get the patent under departmental regulations. This gun club will take the precaution, as I have no doubt it already has, to be incorporated in order to take the patent, but the committee had no fear in respect to that, know-

ing the practice of the department in that regard, and not knowing definitely that it had incorporated at the time we reported out the bill we did not insert the provision.

Mr. GARD. I am interested in the legislative aspect of granting a patent to an organization that has not been perfected.

Mr. VAILE. I do not think the gentleman need be concerned about that. That will be taken care of by the departmental regulations.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to issue patent to the Milk River Valley Gun Club for lots 5 and 6 and the southeast quarter of the southwest quarter of section 32, township 31 north, range 31 east, Montana meridian, Montana, containing 76.69 acres, upon payment of $1.25 per acre and the further payment of $50 per irrigable acre for the construction of irrigation works for the Milk River irrigation project, the irrigable area being fixed at 30 acres to be used for a game preserve: *Provided*, That said Milk River Valley Gun Club shall apply for patent and tender full payment within six months from the date of approval of this act: *Provided further*, That patent issued hereunder shall contain a reservation to the United States of all gas, oil, coal, and other mineral deposits that may be found in said land, and the right to the use of the land for extracting the same, and shall be subject to all rights under the T. E. Brady Canal and Bowdoin Lake Reservoir approved by the Secretary of the Interior October 23, 1901, under the act approved March 3, 1891 (26 Stat. L., p. 1095), and the patent shall also reserve to the United States right of way for canals, ditches, and telephone lines heretofore or hereafter constructed by the authority of the United States: *And provided further*, That if the land is ever used for any purpose other than that herein authorized title thereto shall revert to and revest in the United States.

With the following committee amendments:

Page 1, line 9, after the word "acres," insert the words "to be used for a game preserve."

The SPEAKER pro tempore. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The Clerk read as follows:

Page 2, line 1, strike out the word "the" and insert the words "for such."

The amendment was agreed to.

The Clerk read as follows:

Page 2, line 2, strike out the words "being fixed at 30 acres to be used for a game preserve" and insert "as may be determined by the said Secretary."

The SPEAKER pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

The Clerk read as follows:

Page 2, line 6, strike out the words "approval of this act" and insert "such determination"

Mr. MANN of Illinois. Mr. Speaker, I desire to be heard on the amendment. I would like the attention of the gentleman in charge of the bill. Apparently this amendment would not require the gun club to apply for a patent or a patent to be issued perhaps for many years in the future. I take it that was not the intent of the bill.

Mr. VAILE. No; it was expected they would apply for a patent immediately or as soon as——

Mr. MANN of Illinois. The bill as originally introduced and as it stands provides that application for patent shall be made within six months from the date of the approval of the act. Now, it is proposed it shall be changed to make it within six months from the date of the determination by the Secretary of the Interior. How much of this land shall be included in the irrigation project?

Mr. VAILE. I have no doubt that could be determined right along.

Mr. MANN of Illinois. That may not be done for a long time. Now, it seems to me they ought to make them apply for a patent within one year from the passage of this act.

Mr. VAILE. I would be very glad, indeed, to agree to such an amendment if the gentleman will offer it.

Mr. MANN of Illinois. Mr. Speaker, I offer a substitute for the committee amendment. Strike out the language "six months from the date of the approval of this act" and insert "one year from the passage of this act."

The SPEAKER pro tempore. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. MANN of Illinois to the committee amendment: On page 2, line 5, strike out the language "six months from the date of the approval of this act" and insert in lieu thereof "one year from the passage of this act."

Mr. VAILE. Mr. Speaker, that amendment is acceptable to the author of the bill, I understand, and to the Member reporting it.

Mr. GARD. Will the gentleman yield?

Mr. MANN of Illinois. I will.

Mr. GARD I want to make inquiry of the gentleman from Illinois, whether his substitute strikes out the words "such determination"?

Mr. MANN of Illinois. My substitute will leave that language out of the bill.

The amendment to the committee amendment was agreed to.

The bill as amended was ordered to be read the third time, was read the third time, and passed.

On motion of Mr. VAILE, a motion to reconsider the vote by which the bill was passed was laid on the table.

CLAIMS OF BANDS OR TRIBES OF INDIANS IN CALIFORNIA.

Mr. RAKER. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. RAKER. With respect to the bill H. R. 12788, just before this bill on the Calendar for Unanimous Consent, to which objection was made. I ask unanimous consent that it may remain on the calendar and go to the foot thereof.

The SPEAKER. The gentleman from California asks unanimous consent that the bill mentioned be placed on the calendar, to go to the foot thereof. Is there objection? [After a pause.] The Chair hears none.

AUTHORIZING SALE OF GOVERNMENT EXPLORATORY WELL SITES.

The next business on the Calendar for Unanimous Consent was the bill (S. 2379) to provide for the disposition of certain public lands withdrawn and improved under the provisions of the act of Congress approved June 25, 1910 (36 Stat. L., p. 847), as amended by the act of August 24, 1912 (37 Stat. L., p. 497), and which are no longer needed.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. JONES of Texas. Mr. Speaker, reserving the right to object, I would like to ask the gentleman if it is his purpose to offer an amendment to this bill with reference to coal, oil, and mineral rights of the United States?

Mr. SINNOTT. I have no objection to that amendment covering mineral rights. It is a small area of land anyway.

Mr. JONES of Texas. All right.

Mr. GARD. Mr. Speaker, reserving the right to object, for the purpose of asking a question. This bill has for its purpose the sale of sites wherein the Government has made exploration for water?

Mr. SINNOTT. Where the Government has drilled for water. There is 280 acres withdrawn——

Mr. GARD. What is the idea of the proviso in line 18, page 2, that not over 160 acres shall be sold to any one person? Are exploratory sites as large as 160 acres?

Mr. SINNOTT. They have only withdrawn 280 acres so far, but I do not know how much they will withdraw in the future. In case they should withdraw more than that in one particular site——

Mr. GARD. But I am interested in knowing just about the amount of land withdrawn, of, say, one site. How much land was withdrawn for one site for exploration purposes?

Mr. SINNOTT. One contemplated sale embraces 80 acres. Only 280 acres have been withdrawn so far.

Mr. GARD. Eighty acres?

Mr. SINNOTT. Two hundred and eighty acres have been withdrawn, and they contemplate selling one 80-acre tract.

Mr. MANN of Illinois. What does the gentleman mean by withdrawn?

Mr. SINNOTT. It is withdrawn from entry for exploration for artesian water for irrigation purposes.

Mr. MANN of Illinois. Only 280 acres have been withdrawn for exploration by the Geological Survey?

Mr. SINNOTT. So they report.

Mr. MANN of Illinois. As I understand, the Geological Survey develops the well and finds water, and then that land and water is to be sold?

Mr. SINNOTT. Yes; to be sold.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The Clerk read as follows:

Be it enacted, etc., That whenever in the opinion of the Secretary of the Interior any lands which have been withdrawn under the provisions of the act of Congress approved June 25, 1910 (36 Stats. L., p. 847), as amended by the act of Congress approved August 24, 1912 (37 Stats. L., p. 497), for the purpose of exploratory drilling to discover water supplies for irrigation or other purposes, and which have had wells or other permanent improvements placed thereon by and at the expense of the United States, are no longer needed for the purpose for which they were withdrawn and improved, the Secretary of the Interior may appraise the lands, together with the improvements thereon, and thereafter sell the same to a citizen of the United States for not less than the appraised value at public auction to the highest bidder, after

giving public notice of the time and place of sale by posting upon the land and publication for not less than 30 days in a newspaper of general circulation in the vicinity of the land.

The committee amendment was read, as follows:

Page 2, line 7, after the word "same," insert the words "to a citizen of the United States."

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

SEC. 2. That upon payment of the purchase price the Secretary of the Interior is authorized by appropriate patent to convey all the right, title, and interest in and to said lands to the purchaser at said sale, subject, however, to such reservations, limitations, or conditions as said Secretary may deem proper: *Provided*, That not over 160 acres shall be sold to any one person.

Mr. JONES of Texas. Mr. Speaker, I offer an amendment.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amendment by Mr. JONES of Texas: Page 2, line 19, after the word "person," strike out the period, insert a comma, and add the following: "*Provided further*, That any patent issued hereunder shall contain a reservation to the United States of all oil, gas, coal, and other mineral rights."

Mr. SINNOTT. I do not think the gentleman wants the word "rights."

Mr. JONES of Texas. No. Strike out the word "rights."

The SPEAKER. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

The SPEAKER. The question is on agreeing to the amendment as amended.

The amendment as amended was agreed to.

The Clerk read as follows:

SEC. 3. That the moneys derived from the sale of such lands and improvements be disposed of as are other receipts from the sale and disposal of public lands.

The SPEAKER. The question is on the third reading of the bill.

The bill was ordered to be read a third time, was read the third time, and passed.

REFUND OF DUTIES ON FIELD KITCHENS.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 6171) to authorize the refund of duties collected on field kitchens imported during the year 1916.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. GARD. Reserving the right to object, I do not see the gentleman from Illinois [Mr. BRITTEN] present——

Mr. BLANTON. I object, Mr. Speaker. I objected heretofore.

The SPEAKER. The Clerk will report the next bill.

RELIEF TO PERSONS IN MILITARY TELEGRAPH CORPS.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 5815) granting relief to persons who served in the Military Telegraph Corps of the Army during the Civil War.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. BLANTON. I object.

EXCHANGE OF LANDS, MONTEZUMA NATIONAL FOREST.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 8692) authorizing the exchange of lands within the Montezuma National Forest in Colorado.

The SPEAKER. Is there objection to the present consideration of this bill? [After a pause.] The Chair hears none. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Interior be, and hereby is, authorized to accept on behalf of the United States title to any lands within the Montezuma National Forest in Colorado which, in the opinion of the Secretary of Agriculture, are chiefly valuable for national forest purposes, and in exchange therefor may give not to exceed an equal value of such national forest land or timber within the national forests of the same State as may be determined by the Secretary of Agriculture and acceptable to the owner as fair compensation, considering any reservations which either the grantor or the Government may make of timber, minerals, or easements. Timber given by the Government in such exchanges shall be cut and removed under the direction and supervision and in accordance with the requirements of the Secretary of Agriculture. Lands conveyed to the United States under this act shall, upon acceptance of title, become a part of the national forest in which they are located.

Also the following committee amendment was read:

Strike out all after the enacting clause and insert:

"That the Secretary of the Interior be, and hereby is, authorized, in his discretion, to accept on behalf of the United States title to any land free and clear of all encumbrances within the Montezuma National Forest, or within section 23, township 37 north, range 14 west, New Mexico principal meridian, within the State of Colorado, which, in the opinion of the Secretary of Agriculture, are chiefly valuable for national-park purposes or for the protection of stream flow, and in exchange therefor may issue patent for not to exceed an equal value of such national forest land or to exchange timber within the said national forest as may be determined by the Secretary of Agriculture to be of approximately equal value and acceptable to the owner or owners as fair compensation, considering any reservations which either the grantor or the Government may make of timber, minerals, or easements. Timber given by the Government in such exchanges shall be cut and removed under the direction and supervision and in accordance with the requirements of the Secretary of Agriculture, and lands conveyed by the United States under this act shall, upon acceptance thereof, become a part of the Montezuma National Forest and subject to all laws affecting national forests."

The SPEAKER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. TAYLOR of Colorado, a motion to reconsider the vote by which the bill was passed was laid on the table.

RECLAMATION OF CERTAIN ARID LANDS, CALIFORNIA.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 8864) to encourage the reclamation of certain arid lands in the State of California, and for other purposes.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. MONDELL. Mr. Speaker, I very much regret to object to a bill the purpose of which is declared to be to encourage reclamation of arid lands. This bill is identical with an experimental measure placed upon the statute books about a year ago, applying only to the State of Nevada, as I recall, and as the measure is one which, in my opinion, is likely to be abused I do not think we should go further with this legislation until we have tried it out pretty thoroughly in Nevada.

Mr. RAKER. Will the gentleman reserve his objection?

Mr. MONDELL. I will for a moment. I shall object, however.

Mr. RAKER. Will not the gentleman yield in order to allow an explanation?

Mr. MONDELL. I have thought the matter over carefully, and I know that legislation of this kind is subject to abuse. The gentleman from California is going to be here indefinitely, I hope, and if this plan works well in Nevada he can reintroduce the bill and urge its passage, and in the meantime we shall have tried out this experiment in Nevada.

Mr. RAKER. Now, that is just why I want to take a few minutes in order to present it to the committee.

Mr. MONDELL. Oh, I know the gentleman will say there are conditions in California that are somewhat different from those in Nevada.

Mr. RAKER. I trust the gentleman will give me at least a couple of minutes, or that the committee will, in order to call attention to the facts of this law that are within the knowledge of the introducer of this resolution, who lives adjacent to and adjoining the lands that are affected by the law as to Nevada.

Mr. MONDELL. I withhold my objection for two minutes. But I shall object.

Mr. RAKER. Mr. Speaker, I ask unanimous consent that I may have five minutes.

Mr. MONDELL. It seems to me, Mr. Speaker, that it is not fair to other gentlemen who have bills on the calendar to consume time when bills are to be objected to.

Mr. RAKER. Now, many of these bills might have been objected to on the same ground, but here is a meritorious bill, and the record shows and the facts on the ground show that the law is working ideally, and it has developed desert land that can not be developed otherwise.

Mr. MONDELL. No harm will be done, Mr. Speaker, if we wait a short time before we try further.

Mr. RAKER. Mr. Speaker, I ask that I may have five minutes.

Mr. MONDELL. I object.

Mr. RAKER. Mr. Speaker, I ask unanimous consent that the bill may remain on the calendar, to go to the foot thereof.

The SPEAKER. The gentleman from California asks unanimous consent that the bill may go to the foot of the calendar. Is there objection. [After a pause.] The Chair hears none.

Mr. BLANTON. Reserving the right to object, I want to remark that I think the gentleman from Wyoming [Mr. MONDELL] ought to temper his objection with patience as well as flattery.

The SPEAKER. Is there objection to the request of the gentleman from California? [After a pause.] The Chair hears none.

Mr. RAKER. Mr. Speaker, I make the further request that I may have unanimous consent to extend my remarks in the RECORD on this bill for the purpose of having the facts printed, to the end that the Members of the House may become familiar with the working of the proposed legislation in the State of Nevada before it comes up next time.

The SPEAKER. The gentleman from California asks unanimous consent to extend his remarks in the RECORD on this bill.

There was no objection.

The SPEAKER. The Clerk will report the next bill.

ADDITIONAL POWERS AND DUTIES, MARINE HOSPITAL SERVICE.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 11841) to amend "An act granting additional quarantine power and imposing additional duties upon the Marine Hospital Service," approved February 15, 1893.

The SPEAKER. Is there objection to the consideration of this bill? [After a pause.] The Chair hears none. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That section 2 of the act granting additional quarantine powers and imposing additional duties upon the United States Public Health Service, approved February 15, 1893, be amended to read as follows:

"SEC. 2. That any vessel at any foreign port clearing or departing for any port or place in the United States or its possessions or other dependencies or any vessel at any port in the possessions or other dependencies of the United States clearing or departing for any port or place in the United States or its possessions or other dependencies, shall be required to obtain from the consul, vice consul, or other consular officer of the United States at the port of departure, or from the medical officer where such officer has been detailed by the President for that purpose, a bill of health in duplicate, in the form prescribed by the Secretary of the Treasury, setting forth the sanitary history and condition of said vessel, and that it has in all respects complied with the rules and regulations in such cases prescribed for securing the best sanitary condition of the said vessel, its cargo, passengers, and crew; and said consular or medical officer is required, before granting such duplicate bill of health, to be satisfied that the matters and things therein stated are true; and for his services in that behalf he shall be entitled to demand and receive such fees as shall by lawful regulation be allowed, to be accounted for as is required in other cases.

Mr. JONES of Pennsylvania. Mr. Speaker, I offer an amendment.

The SPEAKER. The gentleman from Pennsylvania offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. JONES of Pennsylvania: In line 3, page 1, after the word "That," insert the words "first paragraph of," so that it will read "That first paragraph of section 2 of the act," etc.

The SPEAKER. The question is on agreeing to the amendment.

Mr. MANN of Illinois. Mr. Speaker, this is an illustration of how dangerous it is for a committee to accept the draft of a bill prepared by one of the departments without any examination by the committee itself.

The Public Health Service asked for the introduction of a bill to amend section 2 of a certain act, so as to read so-and-so, and it looked all right on its face, and was all right on its face. But it so happened that section 2 embraced other subjects, and the drafter of the bill in the Public Health Service did not follow out section 2 at all, but he repealed all of section 2 which was not in his draft. I do not know when it would have been discovered if I did not have a good secretary.

Mr. JONES of Pennsylvania. Mr. Speaker, I discovered it when the matter was referred to me to be reported out. I noticed that it was an amendment to section 2, and I got the original act and found that only a part of the section had been amended. I took it up with the Public Health Service and asked them if that was their intention, and they said, "No." The matter was then brought to the attention of our committee, when the matter was on the calendar before an amendment was prepared to correct the mistake.

Mr. MANN of Illinois. Mr. Speaker, I am very glad indeed that the gentleman from Pennsylvania discovered the error. What I wonder at is that the gentleman did not correct it before the bill was reported to the House. That was the proper time to make the correction, when it was in the committee, in his hands, and not wait until it was reported to the House.

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill as amended.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. JONES of Pennsylvania, a motion to reconsider the vote whereby the bill was passed was laid on the table.

The SPEAKER. The Clerk will report the next bill.

NATIONAL FOREST LANDS IN SOUTH DAKOTA.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 11118) authorizing the consolidation of lands in national forests in the State of South Dakota.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. GARD. Reserving the right to object, Mr. Speaker, it seems to me that this bill is couched in such general language, without any limitation at all upon the power of exchange, that I am disposed to object at this time, and I do object.

The SPEAKER. Objection is made. The Clerk will report the next bill.

SEQUOIA NATIONAL PARK.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 5006) to add certain lands to the Sequoia National Park, Calif., and to change the name of said park to Roosevelt national park.

The title of the bill was read.

The SPEAKER. Is there objection?

Mr. SMITH of Idaho. I object.

The SPEAKER. Objection is made.

Mr. ELSTON. Mr. Speaker, I hope the gentleman will withhold his objection for a moment.

Mr. SMITH of Idaho. Very well.

Mr. ELSTON. I would like to recall to the gentleman's attention something that he was probably not advised about before.

I have acceded to the suggestion, first, of the gentleman from Oklahoma [Mr. HASTINGS] to amend the proposed name of this park to "Roosevelt-Sequoia." The gentleman from Oklahoma indicated that he would oppose the bill unless this amendment were made; and on full consideration it was decided to make that amendment, and I am ready now to propose that amendment.

I would state further that in regard to the opposition of the Forest Service to this bill touching the boundary lines, I am prepared at this time to offer an amendment conformable to the suggestion of the Forest Service, and I am ready to incorporate in the bill the boundary lines recommended by them.

That obviates objections presented on the floor of this House many times when the bill came up previously.

I wish to say further that the suggested objections which the gentleman mentioned a moment ago to the general policy of creating additional parks are obviated in this bill. Section 3 of this bill provides that the area covered into the new park shall be subject to all the mineral-land laws and coal-land laws now applicable to the public lands. It further provides that all valid and existing locations of any kind now resting upon lands in this park shall be continued in force.

That practically reduces this proposition to a question as to whether or not the gentleman's objection lies only to the policy of adding this wild waste of mountain land to an existing park. I think he has been advised heretofore or can easily find out that this area comprises nothing but great mountain ranges, peaks, and canyons, with an average elevation of between 9,000 and 15,000 feet, and that there is practically no land in the territory to be added to the park that is usable for commercial purposes.

I would further state that, in regard even to the use of the waters in this additional area, that subject is covered by the water power act, and all those waters are now available for use under the administration of the Water Power Commission. I hope that this statement will satisfy the gentleman that all his basic objections to this bill have been met. Unless he is opposed to the general proposition of adding a new wonderland of Alpine scenery to an existing park he should permit this bill to be considered at this time.

Mr. RAKER. Mr. Speaker, will the gentleman yield?

Mr. SMITH of Idaho. Mr. Speaker, if this bill were enacted, I should insist on a change in the name of the park to Roosevelt National Park, and I am surprised that the gentleman from California [Mr. ELSTON] would be willing to accept an amendment which would eliminate the proposition to change the name to the Roosevelt National Park.

Mr. ELSTON. It does not eliminate the name. The amended name will be Roosevelt-Sequoia National Park.

Mr. SMITH of Idaho. But, on general principles, I am opposed to tying up in a national park any public lands which might be used for the conservation of water for irrigation purposes or might be used for the development of water power; and I therefore object.

The SPEAKER. Objection is made. The Clerk will report the next bill.

ABANDONED RAILROAD RIGHTS OF WAY.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 9899) to provide for the disposition of abandoned portions of rights of way granted to railroad companies.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. GARD. I object.

The SPEAKER. The gentleman from Ohio objects. The Clerk will report the next bill.

VALIDATION OF CERTAIN PUBLIC LAND APPLICATIONS.

The next business on the Calendar for Unanimous Consent was the bill (S. 3994) validating certain applications for and entries of public lands, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The bill was read as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized to issue patents upon the entries hereinafter named upon which proof of compliance with law has been filed:

Adjoining farm homestead entry, Eureka, Calif., No. 02188, made by Warren Henry Leach on February 19, 1914, for a tract of land containing 137.77 acres, described by metes and bounds, within sections 2 and 35, townships 30 and 31 north, range 11 west, Mount Diablo meridian.

Homestead entry, Timber Lake, S. Dak., No. 05023, made by Andrew W. Strommer on March 27, 1911, for the northeast quarter of section 9, township 12 north, range 19 east, Black Hills meridian, such patent to be issued to Charlotte Strommer.

Homestead entry, Glasgow, Mont., No. 036403, made by Elizabeth H. Boucher on June 7, 1916, under the acts of May 30, 1908 (35 Stats. L., p. 558), and February 19, 1909 (35 Stats. L., p. 639), for the southeast quarter of section 15 and southwest quarter of section 14, township 31 north, range 46 east, Montana principal meridian.

SEC. 2. That the Secretary of the Interior be, and he is hereby, authorized to issue patent to the party named, and for the lands described, as follows:

Robert W. Stroud, for the southwest quarter of the northwest quarter, section 26, township 151 north, range 103 west, fifth principal meridian, in the State of North Dakota, upon the payment of $1.25 per acre within six months after the approval of this act.

SEC. 3. That the entries hereinafter named be, and the same are hereby, validated, and the Secretary of the Interior authorized to issue patents thereon upon submission of satisfactory proof of compliance with the laws under which such entries were allowed:

Additional homestead entry, Helena, Mont., No. 017219, made by Charlotte Daniels, widow of Hugo Peter Weirig, deceased, on April 16, 1918, under section 7 of the act of July 3, 1916 (39 Stat. L., p. 344), for lots 4 and 5, section 3, township 8 north, range 1 west, Montana principal meridian.

Homestead entry, Miles City, Mont., No. 036842, made by Benjamin B. Gross on March 14, 1917, under the act of February 19, 1909 (35 Stat. L., p. 639), for the north half of the north half, section 32, northeast quarter of the northeast quarter, section 31, south half of the southwest quarter and northwest quarter of the southwest quarter, section 29, township 2 south, range 60 east, Montana principal meridian.

Homestead entry, Glenwood Springs, Colo., No. 013234, made by Roseberry G. Ridgway on October 9, 1917, for the south half of the southeast quarter, section 32, township 10 north, range 91 west, and the northeast quarter and north half of the southeast quarter, section 5, township 9 north, range 91 west, sixth principal meridian.

Homestead entry, Glasgow, Mont., No. 048226, made by John H. Cavanaugh on July 6, 1917, under the act of February 19, 1909 (35 Stat. L., p. 639), for the east half of the northwest quarter and the west half of the northeast quarter, section 18, township 33 north, range 50 east, Montana principal meridian.

SEC. 4. That the Secretary of the Interior be, and he is hereby, authorized to allow the following applications to make entry:

Additional homestead application, Glasgow, Mont., No. 043452, filed by Lawrence Benson for the northeast quarter of the northwest quarter, north half of the northeast quarter and southeast quarter of the northeast quarter, section 13, township 29 north, range 41 east, Montana principal meridian.

Homestead application, Salt Lake City, Utah, No. 014998, filed by Arthur Lawrence Whitmore for the east half of the southeast quarter, northwest quarter of the southeast quarter, northeast quarter of the southwest quarter, section 32, township 11 south, range 14 east, Salt Lake meridian, effective May 29, 1915, the date filed, and that the State of Utah through its proper officers be, and it is hereby, authorized to select 160 acres of surveyed, nonmineral, unappropriated, and unreserved public land in lieu of the above-described tract.

SEC. 5. That the allotment application made by Johnny Steele (Bull) for and on behalf of his minor child, Ed Steele (Bull), under the fourth section of the act of February 8, 1887 (24 Stat. L., p. 388), as amended, for the south half of the south half, section 27, township 43 north, range 12 east, Mount Diablo meridian, be, and the same is hereby, validated: *Provided*, That such allotment is to exhaust any right in the minor when he becomes of age to make entry under the provisions of the general homestead laws.

SEC. 6. That the Secretary of the Interior is hereby authorized and directed to sell to S. S. Markley, within a period of 90 days from and after the passage of this act, at the original purchase price of $1,800, the southeast quarter of section 2, township 3 south, range 12 west, Indian meridian, Cotton County, Okla., and issue to him a patent therefor.

SEC. 7. That Mattie R. Mayer, of Shreveport, La., be, and hereby is, authorized to enter at the minimum price of $1.25 per acre, the north fractional half of the south half of section 21, township 17 north, range 13 west, Louisiana meridian, Caddo Parish, La., in virtue of her long settlement, bona fide title and possession, and valuable improvements thereon: *Provided*, That the entry made hereunder shall be subject to a reservation under the act of July 17, 1914, of all rights in the oil deposits that may be found therein.

SEC. 8. That the soldiers' additional homestead application No. 01693, Juneau, Alaska, filed on July 8, 1914, by Thomas H. Holland, assignee of Clark S. Bemis, for a tract of land embraced in United States survey No. 941, duly approved, containing 6.50 acres, described by metes and bounds, on which final certificate issued December 18, 1914, be, and the same is hereby, validated, and the Secretary of the Interior authorized to issue patent thereon.

SEC. 9. That the soldiers' additional homestead application No. 01694, Juneau, Alaska, filed on July 8, 1914, by Thomas H. Holland, assignee of George Fritzinger, for a tract of land embraced in United States survey No. 942, containing 3.99 acres, described by metes and bounds, on which final certificate issued December 18, 1914, be, and the same is hereby, validated, and the Secretary of the Interior authorized to issue patent thereon.

SEC. 10. That upon the survey of an island, locally known as "Island Park," situated in the North Fork of Snake River in section 1, township 7 north, range 40 east, Boise meridian, Idaho, the city of St. Anthony, through its proper representative, shall have the right to purchase said island so surveyed for park and memorial purposes, for a period of 60 days after the filing of the official plat of such survey in the United States local land office, at the rate of $1.25 per acre: *Provided*, That the island herein mentioned shall be used by the city of St. Anthony for park and memorial purposes only, and should the city abandon its use for such purposes said island shall revert to the United States: *Provided further*, That nothing herein contained shall have the effect of defeating the rights of any person or persons which may have attached to the island or any part thereof: *And provided further*, That the Secretary of the Interior is authorized to make all necessary rules and regulations to carry this act into effect.

The following committee amendments were severally read, considered, and agreed to:

At the end of section 1, add the following paragraph:

"Homestead entry, Sterling, Colo., No. 016335, made by Amelia P. Clark on August 14, 1911, under the act of February 19, 1909 (35 Stat. L., p. 639), for lots 6 and 7, and the east half of the southwest quarter and the southeast quarter of section 6, township 11 north, range 57 west, sixth principal meridian."

At the end of section 2, add the following paragraph:

"Jennie Dunphy Meyer for the north half of the northeast quarter and the south half of the northwest quarter of section 10, township 33 north, range 47 east, Mount Diablo base and meridian, in the county of Lander, State of Nevada, upon the payment in advance therefor to the Secretary of the Interior for the Government of the United States of the full sum of $2.50 per acre, for such lands, which patent shall confirm the conveyance of such lands to the said Jennie Dunphy Meyer by the State of Nevada: *Provided*, That proper application for the purchase of these lands be filed hereunder in the district land office within six months from the passage of this act, and that no adverse claim thereto be officially of record as pending when the application is allowed and the sale consummated."

At the end of section 3, add the following paragraphs:

"Homestead entry, Buffalo, Wyo., No. 08829, made by Donald Thompson on October 18, 1916, for the west half of the southwest quarter, section 3, and north half of the northwest quarter, section 10, township 53 north, range 79 west, sixth principal meridian.

"Homestead entry, Durango, Colo., No. 07648, made by Mary A. Reim on May 28, 1918, for the northwest quarter of the southeast quarter, east half of the southwest quarter, southwest quarter of the southwest quarter, section 13, and west half of the northwest quarter, section 24, township 36 north, range 15 west, New Mexico principal meridian: *Provided*, That it be duly noted that this entry is made in accordance with and subject to the provisions and reservations of the act of June 22, 1910 (36 Stat. L., p. 583), as to the east half of the southwest quarter and the southwest quarter of the southwest quarter of section 13.

"Homestead entry, Glenwood Springs, Colo., No. 014097, made by Ladernia N. Lucore on May 10, 1918, under the act of February 19, 1909 (35 Stat. L., p. 639), for lots 3 and 4, section 1, and lots 1, 2, 3, and 4, and south half of the northeast quarter section 2, township 10 north, range 93 west, sixth principal meridian.

"Homestead entry 013785, Dodge City series, made by Gustavus F. Gallagher, for south half section 28, township 24 south, range 40 west of the sixth principal meridian, Kansas."

At the end of section 4, add the following paragraphs:

"Homestead application of Ralph B. Quinn, of Phoenix, Ariz., for lots 1 and 2 and the south half of the northwest quarter section 6, township 1 south, range 3 east, Gila and Salt River meridian, subject to the provisions of the act of June 17, 1902 (32 Stats., p. 398), and acts amendatory thereof and supplementary thereto: *Provided*, That said Quinn tender a proper application therefor within 90 days from receipt of notice of the passage of this act from the register and receiver of the United States Land Office: *Provided further*, That the entryman shall not be entitled to receive water for irrigation until public announcement by the Secretary of the Interior that water is available for the irrigation of the land.

"Additional homestead application, Rapid City series 039141, to Edward E. Voedisch, embracing the east half northwest quarter section 3 and north half northeast quarter section 10, township 6 south, range 1 east, Black Hills meridian, subject to the requirements of the enlarged homestead act as to residence, cultivation, and improvement: *Provided*, That patent shall not issue for said east half of the northwest quarter of section 3 until said tract shall have been duly surveyed by the Government.

"Homestead application 037866, Rapid City series, of William Holsten for the northeast quarter of the southeast quarter of section 15, township 2 north, range 5 east, Black Hills meridian, in the State of South Dakota."

At the end of the bill add the following paragraph as section 11:

"That the Secretary of the Interior be, and he is hereby, directed to change homestead entries Nos. 021565 and 021566, embracing all of section 27, township 35 north, range 80 west, sixth principal meridian, Douglas, Wyo., land district, made by Frank O. Kellman, on October 23, 1919, and November 11, 1919, respectively, and to transfer the payments made thereon to any other tract of 640 acres of land subject to entry under the said act of December 29, 1916 (39 Stats. L., p. 862), and to issue patent thereon subject to the provisions and limitations of said act without any showing of residence, cultivation, or improvement: *Provided*, That the said Kellman shall file application for said tract within 12 months from the date of the approval of this act."

Add the following as section 12:

"That the location No. 20, township 6 north, range 6 west, second prime meridian, Indiana, which has been surveyed in the name of

Thomas Johnston, as appears from the field notes of survey on file in the General Land Office, be, and the same is hereby, confirmed to the said Thomas Johnston, and the Commissioner of the General Land Office shall issue his certificate as register ex officio and cause a patent to be issued for said claim to Thomas Johnston, his heirs, assigns, and legal representatives: *Provided*, That this act and the patent which may be granted in pursuance of the same shall only operate as a relinquishment on the part of the United States, and shall in no way prejudice any valid adverse right, if such exist, to the said land, the intent being that title shall issue to the true owners of the land under the laws of Indiana, including laws of limitation and prescription, as though patent had issued during the lifetime of said Thomas Johnston."

The following committee amendment was read:

After section 12 insert the following:

"SEC. 13. That the Secretary of the Interior is hereby authorized and directed to certify to the Secretary of the Treasury the amounts paid as fees, commissions, and purchase moneys by the persons hereinafter named, in connection with homestead entries at the United States land office at Glasgow, Mont., in the year 1917, as follows:

"Serial No. 044427, Nick Sitch, west half southeast quarter, section 27, and west half of northeast quarter, section 34, township 29 north, range 41 east.

"Serial No. 044521, Billie H. Evashanks, south half southeast quarter, northwest quarter southeast quarter, section 34, township 29 north, range 41 east; and west half east half, northeast quarter southwest quarter, section 1, township 28 north, range 41 east.

"That upon receipt of the certificate from the Secretary of the Interior as provided in section 1 of this act the Secretary of the Treasury is hereby authorized and directed to make payment of the amounts so certified out of any moneys not otherwise appropriated, and issue his warrant in settlement thereof."

Mr. SMITH of Idaho. Mr. Speaker, the legislation contained in section 13 has been taken care of by a Senate bill, which passed the House about two weeks ago, so it is unnecessary to adopt this amendment.

Mr. MANN of Illinois. This is a House amendment. We can vote it down.

The question being taken, the amendment was rejected.

The Clerk read the following committee amendment:

At the end of the bill add the following section:

"SEC. 14. The Secretary of the Interior is hereby authorized and directed to issue a patent to R. L. Douglass, of Fallon, Nev., for a certain tract of land now a part of the public domain, lying below the Carson Lake meander in the unsurveyed portion of section 19, township 17 north, range 29 east, Mount Diablo meridian, in the State of Nevada, more fully described as follows: Beginning at the meander corner south of section corner common to sections 12 and 13, township 17 north, range 28 east, and sections 18 and 19, township 17 north, range 29 east, Mount Diablo meridian; hence south 9.6 chains; thence north 89° 21" east 21.9 chains; thence north 20.56 chains; thence north 73° 30" west .81 chain along Carson Lake meander; thence south 61° 30" west 24 chains to the point of beginning, containing 33.74 acres, more or less, on the express condition, however, that said R. L. Douglass shall first execute and deliver to the Secretary of the Interior a warranty deed satisfactory to such Secretary conveying to the Government of the United States, free of all encumbrance, a certain tract of land composed of portions of lots 2, 3, and 4 of section 19, township 17 north, range 29 east, Mount Diablo meridian, in the State of Nevada, more fully described as follows: Beginning at the meander corner of the section line common to sections 18 and 19, township 17 north, range 29 east, Mount Diablo meridian, running thence along the north boundary of section 19, south 89° 21" west 53.82 chains; thence south 1.34 chains to a point in the meander line of Carson Lake; thence south 73° 30" east 36.69 chains along Carson Lake meander; thence north 56° 30" east 22.41 chains to the point of beginning, containing 33.74 acres, more or less, which shall thereupon become a part of the public domain.

"That as a consideration for the issue of said patent, R. L. Douglass will construct a substantial fence around the tract of land conveyed to him under the provisions of this act."

Mr. SMITH of Idaho. Mr. Speaker, I wish to offer an amendment to the committee amendment: On page 13, line 13, after the word "section," to strike out "14" and insert "13."

The SPEAKER. The gentleman from Idaho offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. SMITH of Idaho: Page 13, line 13, after the word "section" strike out "14" and insert in lieu thereof "13."

The amendment was agreed to.

The committee amendment as amended was agreed to.

The bill as amended was ordered to a third reading; and was accordingly read the third time and passed.

On motion of Mr. SMITH of Idaho, a motion to reconsider the vote by which the bill was passed was laid on the table.

ENLISTMENTS IN THE ARMY.

Mr. KAHN. Mr. Speaker, I move to suspend the rules and pass House joint resolution 440, directing the Secretary of War to cease enlisting men in the Regular Army of the United States, except in the case of those men who have already served two or more enlistments therein.

The SPEAKER. The gentleman from California moves to suspend the rules and pass a joint resolution, which the Clerk will report.

Mr. GARD. May we have it reported in full?

The SPEAKER. It will be reported in full.

The Clerk read as follows:

Resolved, etc., That the Secretary of War be, and he hereby is, directed and instructed to cease enlisting men in the Regular Army of the United States until the number of enlisted men shall not exceed 175,000: *Provided, however*, That nothing contained herein shall be held to prohibit the reenlistment of those enlisted men who have had two or more enlistments and who desire to reenlist in the Regular Army.

Mr. GARRETT. Mr. Speaker, I raise the point of no quorum present.

Mr. BLANTON. I demand a second.

Mr. MANN of Illinois. You can not demand a second after the point of no quorum present is made.

Mr. GARRETT. I withdraw the point of no quorum for a moment and demand a second.

Mr. BEE. I am opposed to this resolution, and do not want to lose any right to object to unanimous consent.

The SPEAKER. This is a motion to suspend the rules. The gentleman demands a second.

Mr. KAHN. I ask unanimous consent that a second be considered as ordered.

The SPEAKER. The gentleman from California asks unanimout consent that a second be considered as ordered. Is there objection?

There was no objection.

Mr. GARRETT. Now, Mr. Speaker, I make the point of no quorum present.

The SPEAKER. It is quite clear that no quorum is present.

Mr. KAHN. I move a call of the House.

A call of the House was ordered.

The Clerk called the roll; and the following Members failed to answer to their names:

Almon	Flood	Layton	Reed, W. Va.
Andrews, Md.	Fordney	Lea, Calif.	Riordan
Ayres	Foster	Lehlbach	Rodenberg
Babka	Frear	Lesher	Rowan
Baer	Gallagher	Lonergan	Rowe

Emerson	Kreider	Reavis	
Evans, Nev.	Lampert	Reber	
Ferris	Larsen	Reed, N. Y.	

The SPEAKER. On this call 269 Members have answered to their names, a quorum.

Mr. KAHN. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

The doors were opened.

The SPEAKER. The gentleman from California [Mr. KAHN] is entitled to 20 minutes and the gentleman from Tennessee [Mr. GARRETT] to 20 minutes.

Mr. GARRETT. Mr. Speaker, I ask unanimous consent that the gentleman from Kentucky [Mr. FIELDS], the ranking minority member of the Committee on Military Affairs, be substituted for myself in the allotment of the 20 minutes.

The SPEAKER. Without objection, it will be so ordered.

There was no objection.

Mr. KAHN. Mr. Speaker, on the 4th of June, 1920, the President of the United States approved the Army reorganization bill which allowed a total enlistment of privates in the Army of 280,000. The next day, June 5, 1920, he signed the Army appropriation bill, which provided pay and equipment for a force of only 175,000 men for this fiscal year. The Secretary of War appeared before the Committee on Military Affairs on December 10, 1920, and stated that he had gone beyond the 175,000 enlisted men, as provided in the appropriation act, because he construed the reorganization bill which provided for a total force of 280,000 men as mandatory. I called his atten-

tion to the fact that the reorganization bill of 1901, which used similar language to that used in the reorganization bill of 1920, provided for 100,000 enlisted men, but that the then Secretary of War had not attempted to enlist the total of enlisted men provided for in that law, because Congress did not appropriate for the full number. That under the Roosevelt administration only 50,000 men had been enlisted, although the law permitted 100,000. I further called his attention to the fact that in the Taft administration only about 60,000 men were enlisted at the beginning thereof, and that that number had been increased to something like 80,000 men at the time of the Mexican border trouble. The Secretary of War, however, told the committee that while he did not desire to criticize the previous administrations, yet he maintained and held that the reorganization law as we passed it was absolutely mandatory, and that it compelled him to enlist a total force of 280,000 men. The latest figures seem to indicate that about 225,000 men have been enlisted in the Army; a considerable number, about 50,000, more than the appropriation of Congress provided for. Of course, that means a very large deficit for the taxpayers of the country to pay. The present resolution would cut off all enlistments from the time it is signed until the total force is reduced to 175,000 men.

Mr. CRISP. Mr. Speaker, will the gentleman yield?

Mr. KAHN. Yes.

Mr. CRISP. Will the gentleman please tell us about how much expense there is for each enlistment?

Mr. KAHN. The Secretary stated to the committee that the cost of enlisting men had been materially reduced, and that now it is about $67 per man. He claimed that it was formerly considerably above that amount.

Mr. CRISP. What I wanted is the expense for the year of these 50,000 additional men enlisted over the amount that Congress provided for.

Mr. KAHN. Of course, the cost of enlistment is for the whole period of the enlistment, but the expenses to the Government will be largely increased, because we have to pay the wages of these men.

Mr. CRISP. That is what I was getting at—the cost to the Government of this additional enlistment.

Mr. KAHN. I think the Secretary of War has sent to the Committee on Appropriations a deficiency appropriation which amounts to something like $70,000,000, and out of that I think about $50,000,000 is in connection with these additional enlistments.

Mr. MADDEN. Mr. Speaker, will the gentleman yield?

Mr. KAHN. Yes.

Mr. MADDEN. Will the gentleman be kind enough to tell the House what the cost per annum per man is?

Mr. KAHN. That varies.

Mr. MADDEN. The average.

Mr. KAHN. I think it is cut down somewhat since the war. Naturally, during the war it cost about $2,000 per man. Since then I think the expenses have been materially reduced, and I think $1,500 or $1,600 per man would be the present amount.

Mr. MADDEN. I understand that it is about $1,700 per man.

Mr. KAHN. My figures are between $1,500 and $1,600 per man.

Mr. MONDELL. With the singing schools and the spelling schools and the other frills and furbelows which we are now providing for the Army—the pianos and ukeleles, all included—does it not cost all of $2,000 per man now?

Mr. KAHN. I understand not.

Mr. MONDELL. I do not think the gentleman is including the ukeleles and the singing schools and the singing masters.

Mr. KAHN. The gentleman is better informed about singing than I am.

Mr. BEE. Is it not a fact that we passed a bill here authorizing a maximum of 280,000 men?

Mr. KAHN. Yes.

Mr. BEE. And subsequently we made an appropriation estimating the Army at 175,000 men?

Mr. KAHN. Yes.

Mr. BEE. Then was not the Secretary of War within his right in following the instructions of the Congress to enlist up to 280,000 men, if he had done so, because you did not appropriate and say in your appropriation bill 175,000 men, but estimated what that would come to?

Mr. KAHN. But the debate in the House plainly indicated that it was the desire of the House and Senate, that it was the desire of Congress to reduce it in this fiscal year to 175,000.

Mr. BEE. Why did we pass a bill authorizing 280,000 men if we intended to reduce the Army?

Mr. KAHN. I did not catch that.

Mr. BEE. Why, if it was the intention of Congress to have only an Army of 175,000 men, did we authorize one of 280,000 men?

Mr. KAHN. Because we have always done that in this country, and the Secretaries before the present Secretary took the figures of appropriations made by the House as a basis for the size of the Army. The maximum figure was placed at 280,000, so that if this country should become implicated with a foreign power so that war might result the President, if he should deem the situation serious, might enlist our forces to the full number of 280,000. Mr. Speaker, how much time have I used?

The SPEAKER. The gentleman has used eight minutes.

Mr. WINGO. Will the gentleman yield?

Mr. KAHN. I will.

Mr. WINGO. Am I correct in the assumption that the Judge Advocate General has held that any of its expeditionary force—that is, the drafted Army—are enlisted men, and under this resolution they would be permitted to be reenlisted because they would be called men of one or more enlistments?

Mr. KAHN. They would.

Mr. WINGO. In other words, this resolution will not bar any man who served in the Army as a drafted man from a reenlistment if he determines so to do?

Mr. KAHN. No. That is, provided he is now in the Army.

Mr. HASTINGS. That is just the question I wanted to ask the gentleman and wanted his construction on. The gentleman says there are 225,000 in the Army now?

Mr. KAHN. Yes.

Mr. HASTINGS. Practically all of those over and above the 175,000 are reenlisted men.

Mr. KAHN. I have not seen the figures, but I do not think that is the case.

Mr. HASTINGS. The gentleman knows because of age they must have been reenlisted. There were about 4,000,000 in the Army. How many will this permit to be reenlisted? We could enlarge the size of the Army, it seems to me, very materially.

Mr. KAHN. Only those men who are now in the Army. Not those who have been in the Army at some time in the past, but who are now in the Army, according to the language of the resolution, could be reenlisted.

Mr. HASTINGS. Does the gentleman place that construction on the proviso?

Mr. KAHN. That was the opinion of the committee when it reported the resolution.

Mr. HASTINGS. Suppose I had been in the Regular Army and I wanted to reenlist. Could not I reenlist under this proviso so as to increase the number above 175,000?

Mr. GREENE of Vermont. If the gentleman from California will permit, I think he will observe that the language of the resolution identifies the men who are to be permitted to reenlist as being now enlisted men. If the gentleman was out of the Army he would be a civilian and not an enlisted man.

Mr. KAHN. The gentleman will see, on page 1, line 8, they must be "now enlisted" men, so that I think it would exclude the men who are not now in the Army.

Mr. BANKHEAD. Will the gentleman yield?

Mr. KAHN. I do.

Mr. BANKHEAD. How long is it estimated it would take in order that the present number of 225,000 shall be reduced by the expiration of enlistments to 175,000?

Mr. KAHN. I think it will take some months to do that—six or seven months.

Mr. BANKHEAD. Did the committee consider the advisability of bringing in a resolution to compel the discharge of the excess at the present time?

Mr. KAHN. Well, those men who are in excess have made a contract with the Government of the United States, and I do not think it is proper for the Government to violate its contracts.

Mr. MILLER. Will the gentleman yield?

Mr. KAHN. I will.

Mr. MILLER. Is it not true that the Secretary before the committee justified his action entirely upon the mandatory section of the bill and said nothing concerning world conditions?

Mr. KAHN. Exactly. How much time have I used?

The SPEAKER. Eleven minutes.

Mr. HAYDEN. Will the gentleman yield?

Mr. KAHN. I want to reserve the balance of my time.

Mr. HAYDEN. I want to ask the gentleman a question.

Mr. KAHN. Just one question.

Mr. HAYDEN. Will the passage of this resolution in any way interfere with the plan for universal military service, which the gentleman from California favors?

Mr. KAHN. Oh, the gentleman is asking a foolish question. The question of universal military training is not involved in the resolution at all.

Mr. HAYDEN. The gentleman from California is now presenting a resolution for a reduction in the number of enlisted men in the Army, while he favors the adoption of universal military training. Does not the gentleman think that is inconsistent——

Mr. KAHN. The gentleman from Arizona shows how little he knows about the subject. The gentleman has constantly stated that he does not favor universal military training and put the men into the Army, but the training was altogether out of the Army.

Mr. HAYDEN. Will the gentleman answer my question?

Mr. KAHN. Let the gentleman ask me some sensible question instead of such a question as that. I reserve the remainder of my time.

Mr. FIELDS. Mr. Speaker, I yield three minutes to the gentleman from Texas [Mr. BEE].

Mr. BEE. Mr. Speaker, I realize how futile it is to utter a protest against this resolution. I want to say to this House that this same Congress, after an extended debate, authorized the Secretary of War to enlist to a maximum of 280,000 men. Afterwards we passed an appropriation bill that it is claimed would only bring the Army to 175,000 men.

This resolution is a direct attack upon the integrity of the action of the Secretary of War in enlisting up to 220,000 men under the mandatory authority of Congress. [Applause on the Democratic side.] In other words, my Republican friends attack a Democratic Secretary of War because he obeyed the law. The Congress of the United States authorized him to raise 280,000 men, and he went ahead under the action of Congress. Let me say to the gentlemen of this House, you are going to adopt your 175,000, or your 150,000, perhaps, when you get your lecture from the Senate, but with the Philippines, Porto Rico, Hawaii, with the unsettled conditions in Cuba, with the vast Mexican border, the internal conditions all over this country, 150,000 Regular troops are not enough, and the day will come when Members of Congress who sit here now and joyfully vote to reduce the Army of the United States will confess their complete error in this action. I realize it is futile. The cards have been laid out and the dictum has gone forth that this reduction shall be made, and the Republicans approve of it because it is criticism of the Secretary of War, whom the Congress of the United States authorized to enlist to 280,000 men. He has stated that he considered it mandatory, and I declare that the action of Congress was mandatory on him when it was made. I live on a great border that is unprotected, except in part by the Rangers of Texas, who keep that Mexican border in peace, and it is now proposed to take away from the United States any responsibility for safeguarding that border. For one, I register my protest against the passage of this resolution and raise my voice in defense of the integrity of the action of the Secretary of War.

Mr. FIELDS. Mr. Speaker, I yield two minutes to the gentleman from Texas [Mr. BLANTON].

Mr. BLANTON. Mr. Speaker, I am not going to defend the Secretary of War when I believe that he has done wrong in overriding the express will and direction of this Congress and creating a deficiency of $70,000,000, to be paid for by the tax-burdened people of this country. On every occasion and opportunity I have voted to decrease the size of our standing Army.

It is almost impossible now to get a man out of the Army who has dependents and who is entitled to a discharge. Only last Saturday Maj. Gilmore, in talking with my office over the phone in regard to Pvt. Abner N. Cason, Fourteenth Company, Oahu, Coast Artillery Corps, Fort Ruger, Hawaiian Territory, a man who has good reason for being discharged under the law of this country, said, "I will discharge him if he demands it, but I will discharge him about 2,000 miles away from his home, and give him a discharge that is not honorable; that will go down to his children and grandchildren; and I will make him pay his way home, a distance of about 2,000 miles." But I am also not here to defend this majority side of the House. When the gentleman from California [Mr. KAHN] placed upon this country a maximum limit of 280,000 men in our Army, one of his colleagues, Mr. LaGuardia, tried his best to reduce the maximum number, and each time this military machine, controlled by the gentleman from California [Mr. KAHN], voted him down, and put that maximum limit of 280,000 men in the bill. And he ought to shoulder some of the responsibility, inasmuch as he is just as much to blame as the Secretary of War. And in a motion to recommit the gentleman from Alabama [Mr. DENT] sought to reduce the size of the Army, both privates and officers, and again our Republican colleagues unanimously voted against it and defeated reduction. I voted for all proposals to reduce.

Mr. FIELDS. Does the gentleman from California [Mr. KAHN] desire to use more time now?

Mr. KAHN. I have used 11 minutes of my time. I hope the gentleman will proceed.

Mr. FIELDS. Mr. Speaker, I yield three minutes to the gentleman from Mississippi [Mr. QUIN]. [Applause].

Mr. QUIN. Mr. Speaker, I do not indorse at all what the Secretary of War has done in this matter. I did not vote for this bill to start with, because I was afraid he would do that very thing. Another reason that I would not vote for this bill was because, as I stated on the floor of this House, I understood it to be more of an officers' bill than it was anything else. There have been carried out, according to my judgment, the very objections that were raised by the gentleman from Alabama [Mr. DENT] and other gentlemen and myself against this bill. They are carrying it through. Now, so far as the Secretary of War thinking it incumbent upon him to enlist all these men, I do not take any stock in it. It is as plain as the nose on a man's face, according to the conception of his office, that the amount of money appropriated for the 175,000 soldiers was the limit for him to enlist. [Applause.] But he is attempting to enlist the full strength, and now has over 220,000. I am for reducing this Army to 150,000, and I will vote to reduce it more than that. I think 175,000 is too much. One hundred and fifty thousand, as provided in the Senate resolution which comes over to us, ought to be the number that this House will place in the Army. That would accord with my idea of it. Let the War Department know in emphatic terms and in specific language that not more than 150,000 men can be placed in the Army. Do you reckon the Secretary of War thought he would be impeached if he did not make the Army 280,000? According to the arguments made on this floor and before the committee, the 280,000 was to be the maximum number of men in the Army, and it was placed with this elastic latitude so as to be enlisted up to full strength in the event of an emergency arising, which would make that number necessary. [Applause.]

The SPEAKER. The time of the gentleman has expired.

Mr. FIELDS. Mr. Speaker, I yield five minutes to the gentleman from Tennessee [Mr. GARRETT]. [Applause.]

Mr. GARRETT. Mr. Speaker and gentlemen of the House, I take it that the great majority of us here are now for this resolution. But I do not think it is either fair for the present or for history that the criticisms which have been made directly and by inference of the Secretary of War by the gentleman from California [Mr. KAHN] should pass unchallenged. I congratulate gentlemen upon the Republican side of the Chamber that they have reached that point where they are willing to eat the words they spoke less than a year ago. [Applause on the Democratic side.] When the Army reorganization bill was pending, the gentleman from Alabama [Mr. DENT], the ranking member of the minority, offered a motion to recommit the bill and to expressly provide that the number of enlisted men should not at any time exceed 185,000.

Mr. DENT. One hundred and seventy-five thousand.

Mr. GARRETT. One hundred and eighty-five thousand, it says here. Also the gentleman put in that motion to recommit a proper provision for officers for an Army of that size. A yea-and-nay vote was had on that question. The vote was yeas 115 in favor of the motion to recommit, and nays 222 against the motion to recommit, and all those votes against the motion to recommit, so far as I can find from a hurried examination of the call, came from the Republican side of the Chamber. [Applause on the Democratic side.] No wonder the Secretary of War construed the language contained in the bill to be mandatory upon him, when the overwhelming majority of the House had, in the very passage of the bill itself, voted down a proposition that would have limited the number to 10,000 above that at which it is now proposed to limit it by this resolution. [Applause on the Democratic side.]

Ah, gentlemen have not made provision in this bill to get rid of the surplus officers, as the gentleman from Alabama [Mr. DENT] did in his motion to recommit. You are to leave the officers that are required for an Army of 280,000, whatever that may be, and it is simply to affect the number of enlisted men under this joint resolution that it is now proposed to pass.

Mr. GREENE of Vermont. Mr. Speaker, will the gentleman yield?

Mr. GARRETT. I am inclined to believe that the fears of the gentleman from Mississippi [Mr. QUIN] were well founded when he stated on that bill, when it passed, that it was an officers' bill.

Now, I yield to the gentleman.

Mr. GREENE of Vermont. I think if the gentleman will read the text of the hearings of the Secretary of War before the Committee on Military Affairs, he will learn from them that he did not consult the debates on the floor as his authority for anything. In fact he argued to the contrary; he took the text of the bill.

Mr. GARRETT. I know. I did not say that he consulted the debates. I do not know whether he consulted the votes, but, if he did, he certainly had a right to assume from the overwhelming majority cast by the Republican side of the House that they did favor an Army of more than 185,000. I will ask my friend if that is not a fair inference?

Mr. GREENE of Vermont. The inference is fair, if you can base any argument on the floor of this House upon an "if." [Laughter.]

Mr. GARRETT. I am not basing my argument on an "if." I am basing it on the 222 Republican votes cast against the motion to recommit and cut the Army down to 185,000.

Mr. GREENE of Vermont. If the gentleman will permit me further, I may say he has had too long experience and is too well distinguished in the House not to know that roll calls do not show the reasons for things. [Laughter.] The laughter may come from those who have found that out by experience.

Mr. GARRETT. Well, Mr. Speaker, the gentleman is correct in part, that the votes do not always show the reasons. But this vote on this pending proposition, as it will come from the Republican side of the House, will at least show that the light has broken on that side since they cast that vote at the last session. [Applause on the Democratic side.]

Mr. KAHN. Mr. Speaker, how much time has the gentleman from Kentucky used?

The SPEAKER. The gentleman from California has eight minutes. The gentleman from Kentucky [Mr. FIELDS] has six minutes.

Mr. KAHN. Mr. Speaker, I yield three minutes to the gentleman from Vermont [Mr. GREENE].

The SPEAKER. The gentleman from Vermont is recognized for three minutes.

Mr. GREENE of Vermont. Mr. Speaker, it is obvious that three minutes will not enable me to explain all that has been done in the last year. But it is the practice, and has been the practice and policy of this House back at least of the time of any man now in it, for the military law to establish a maximum for the strength of the Army and for the Army appropriation bills from year to year to indicate, by the amount appropriated for the support of the Army, something of a direction to the Secretary of War as to how many men were from year to year to be raised and maintained in that Army.

Mr. EVANS of Montana. Mr. Chairman, will the gentleman yield at that point?

Mr. GREENE of Vermont. Not in three minutes, if the gentleman will permit me.

Mr. EVANS of Montana. Just for a moment.

Mr. GREENE of Vermont. Then, in justice to me, I must have more time. The gentleman will pardon me.

This is undisputed: Men who have stayed here year after year know that annually as the appropriation bills come up we ascertain how many men we want for the coming fiscal year, and then appropriate a sum of money to bring that about and make it possible.

It has been stated on the floor of this House times without number what the reason is for the maximum number of enlisted men provided for in the law. In an emergency, when perhaps our relations with a neighboring power are becoming somewhat delicate, the President, if afraid of some possible friction of a military character, may quietly raise his enlisted force without coming to Congress and asking for specific authority so to do, and thus perhaps avoid intensifying and increasing the irritation and alarm, because otherwise what he would be doing would look like a military threat.

That has been well understood as a part of the unwritten law and policy subsisting between the War Department and Congress for the last quarter of a century, and there has been no dispute about it until the present abuse by the Secretary of War of the authority contained in the Army reorganization act of June 4, 1920. At the time that act was debated the assurance given to the Members on the floor of this House who voted for exactly the same thing that the gentleman from Tennessee says now binds us was that we expected to regulate the size of the Army under this act by the annual appropriation made for its maintenance. Every gentleman here familiar with legislative matters or civic matters knows that there may be certain language in the text of a law and yet something less than that language may be realized in its policy of administration. [Applause on the Republican side.]

Mr. KAHN. Mr. Speaker, will the gentleman from Kentucky use some of his time?

Mr. FIELDS. Mr. Speaker, I yield two minutes to the gentleman from Arizona [Mr. HAYDEN].

The SPEAKER. The gentleman from Arizona is recognized for two minutes.

Mr. HAYDEN. Mr. Speaker, I want to ask another foolish question. I desire to inquire of the gentleman from California, the chairman of the Committee on Military Affairs, whether he has abandoned his plan for universal military service, or whether this resolution will interfere with that plan? Has the gentleman changed his mind on that question as he changed it on this?

Mr. KAHN. I have not changed my mind on this matter, and I decline to change my mind regarding the action of the Secretary of War. [Applause on the Republican side.]

Mr. HAYDEN. What action was that?

Mr. KAHN. On the vote on the appropriation bill.

Mr. HAYDEN. I would like to have an answer to my question relative to universal military service, if the gentleman please.

Mr. KAHN. The gentleman has not changed his views on that question, but the gentleman is not pressing his views on this House at this time. [Laughter.]

Mr. HAYDEN. It is very evident that the gentleman is not pressing his views either at this time or at any other time, because the question of universal military service is as dead as the question of African slavery.

Mr. KAHN. Oh, the gentleman's impressions are not always correct.

Mr. HAYDEN. Then am I to understand that the gentleman from California expects to report out a bill in favor of universal military service?

Mr. KAHN. The gentleman from Arizona knows that the gentleman from California does not expect to do anything of the kind at present.

Mr. HAYDEN. I am glad to get that admission from the gentleman, and the country will be glad to hear it, because the impression has gone broadcast that the gentleman from California was so enamored of the idea of universal military service that he intended to seriously press his old proposition before the Congress. The taxpayers of the country will be greatly relieved in these days of heavy taxation to know that that burden is not to be laid upon their shoulders.

Mr. KAHN. Will the gentleman yield?

Mr. HAYDEN. Yes.

Mr. KAHN. The gentleman from California realizes that this country may be attacked at any time.

Mr. HAYDEN. Is that the reason why the gentleman favors reducing the Army as provided in this resolution? [Laughter and applause.]

Mr. KAHN. But the gentleman from California knows that if anybody does attack this country we can pass laws through Congress that will give us the army that we require to defend it. [Applause.]

Mr. Speaker, I yield two minutes to the gentleman from Iowa [Mr. HULL].

Mr. HULL of Iowa. Mr. Speaker, in my opinion this resolution in its present form is pure camouflage and will not bring about the result that the House desires. I can not refrain from calling your attention to the fact that this joint resolution should prohibit a bonus being paid for reenlistments. If we are honest in trying to reduce the Army, I do not know why we permit the War Department to pay a bonus for reenlistments. I supposed that when this resolution was considered, which in reality is a resolution that I myself introduced, I would have an opportunity to offer an amendment; but I understand the motion has been brought up in such a way that I am prevented from offering an amendment prohibiting the bonus or for one-year enlistments; and I simply call attention to the fact that as long as you allow them to pay a bonus you will not reduce your Army as fast as you want to. It is dishonest to claim or pretend that you intend to have a smaller Army and in the same resolution permit the Army to pay $90 to every man that will reenlist for three years. If you do this, and then make an appropriation for an Army of 150,000, a Republican Secretary of War will have a larger deficiency to report than is reported by the present Democratic Secretary.

Mr. BARKLEY. Will the gentleman yield for a brief question?

Mr. HULL of Iowa. Yes.

Mr. BARKLEY. I understand the Senate has recently passed a resolution reducing the Army to 150,000 men. What is the hurry about putting through this resolution providing for 175,000, without waiting for the Senate resolution to come over so that we can vote on that?

Mr. HULL of Iowa. I know nothing at all about its being considered by the House.

Mr. ANTHONY. I understand the Senate has reconsidered that resolution.

UMI

Mr. HULL of Iowa. They are reconsidering it this afternoon. I do not know in what form it will come here, but that does not change our situation here.

Mr. KAHN. Has the gentleman on the other side used all of his time? I have only one more speech.

Mr. FIELDS. How much time have I remaining?

The SPEAKER. Four minutes.

Mr. FIELDS. I yield four minutes to the gentleman from Alabama [Mr. DENT]. [Applause.]

Mr. DENT. Mr. Speaker, I wish to congratulate my friends on the Republican side of the Chamber for their change of heart since last June, when we passed the Army reorganization bill.

Attention has been called to the fact that I offered an amendment limiting the strength of the Army. The Republican side of the House practically voted with unanimity against my motion to recommit.

I am sorry that I did not know that this resolution was to be called under a motion to suspend the rules. I should have liked to have some notice of it; not that I particularly object to the bill, because it is in consonance with my ideas on the subject.

I think an Army of 175,000 is sufficient for all purposes in this country. But the point I wish to make now, after these record facts have been called to the attention of the House, is that this bill coming up on a motion to suspend the rules is not subject to amendment. The other day in the hearings before the subcommittee on the Army bill, of which my good friend the gentleman from Kansas [Mr. ANTHONY] is acting as chairman, we had testimony to the effect that 50,000 officers could handle 1,000,000 men; in other words, that 1 officer for every 20 men was sufficient. I called attention to that fact when we were considering the Army reorganization bill. This resolution is not subject to amendment and should not be called under suspension. We will still have 17,000 officers even if the Army should be reduced to 175,000 men.

Mr. SISSON. If the gentleman will allow me, I do not understand that this bill limits the Army to 175,000 men, because the proviso will permit every man who has had one enlistment to reenlist in the Army, and we now have 220,000.

Mr. DENT. I was coming to that proposition, and am glad my friend from Mississippi has suggested it. To-day, according to the information I have, there are 225,000 men in the Army. Under the Army reorganization bill enlistments are authorized up to 280,000 men. We have actually 225,000 men to-day. If this resolution is passed, it by no means follows that the Army will be reduced to 175,000. Enlistments are for one and three years. The contract of enlistment can not be broken, and reenlistments are permitted. The only purpose the resolution can possibly serve is to discontinue such enlistments, without necessarily reducing the size of the Army.

Mr. KAHN. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

Mr. FIELDS. I make the same request.

The SPEAKER. The gentleman from California and the gentleman from Kentucky ask unanimous consent to extend their remarks in the RECORD. Is there objection?

There was no objection.

Mr. KAHN. Mr. Speaker, I yield the remainder of my time to the gentleman from Wyoming [Mr. MONDELL].

The SPEAKER. The gentleman from Wyoming is recognized for two and one-half minutes. [Applause.]

Mr. MONDELL. Mr. Speaker, when the House of Representatives passed the current military appropriation bill it appropriated for an Army of 175,000 men. In that form it became a law. The Secretary of War, like everyone else who was informed at all on the subject, understood the will, intent, and purpose of the Congress to limit the Army to 175,000 men for the current year. Instead of abiding by and following that will and purpose, as every other Secretary of War has done since the foundation of the Government, in a spirit of pique and willfulness, and in defiance of the will of Congress, the Secretary of War has, at great expense, recruited the Army up to about 225,000 men. The gentlemen on the other side, who are squirming under this resolution, but who will vote for it, ought to be thankful that it is not a resolution of censure on the Secretary of War for his unlawful acts and his willful waste of public money. [Applause.]

The Secretary has been engaged in a work of supererogation. He has been trying to justify the judgment and decision of the American people at the last election. It was not necessary. They were fully justified before he, following the example of other officers under this administration, defiantly violated the law and flaunted the will of the Congress of the United States.

Mr. Speaker, I hope that the Army appropriation bill, soon to be reported, will reduce the Army to be maintained the next fiscal year below 175,000 men, but for the present we can not logically call upon the Secretary of War to stop recruiting until he shall have reduced the Army below the number of men we authorized him to enlist when we passed the Army appropriation act. We are calling on him to keep within the appropriation we have made and the number appropriated for.

Mr. Speaker, in all the history of this Government we never before have had such an example as the present Secretary of War has given us of contemptuous disregard of the will of the people of the country as expressed by their Representatives in the Congress. He has cost the people upward of fifty millions above the appropriation by enlistments which were not authorized.

Mr. SISSON. Mr. Speaker, will the gentleman yield?

The SPEAKER. The time of the gentleman from Wyoming has expired. All time has expired. The question is on suspending the rules and passing the joint resolution.

Mr. FIELDS. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The Clerk called the roll; and there were—yeas 285, nays 4, not voting 141, as follows:

YEAS—285.

So, two-thirds having voted in favor thereof, the rules were suspended and the joint resolution was passed.

The Clerk announced the following pairs:

Until further notice:

Mr. GRAHAM of Pennsylvania with Mr. STEELE.

Mr. HUTCHINSON with Mr. DAVEY.

Mr. REED of West Virginia with Mr. RANDALL of California.

Mr. MCPHERSON with Mr. MAJOR.

Mr. SANDERS of Indiana with Mr. GRIFFIN.

Mr. WINSLOW with Mr. GALLIVAN.

Mr. BLAND of Indiana with Mr. BLAND of Missouri.

Mr. GREEN of Iowa with Mr. DONOVAN.

Mr. GREIST with Mr. DEWALT.

Mr. MORIN with Mr. CASEY.

Mr. JOHNSON of South Dakota with Mr. RUCKER.

Mr. ANDREWS of Maryland with Mr. WISE.

Mr. DAVIS of Minnesota with Mr. KITCHIN.

Mr. LAYTON with Mr. GODWIN of Arkansas.

Mr. TAYLOR of Tennessee with Mr. MAHER.

Mr. PERLMAN with Mr. BOOHER.

Mr. EMERSON with Mr. CULLEN.

Mr. REBER with Mr. NICHOLLS.

Mr. ZIHLMAN with Mr. ALMON.

Mr. RODENBERG with Mr. SIMS.

Mr. WALSH with Mr. SMALL.

Mr. MASON with Mr. FERRIS.

Mr. KENNEDY of Iowa with Mr. EAGAN.

Mr. BROWNE with Mr. THOMAS.

Mr. WHEELER with Mr. LESHER.

Mr. FREAR with Mr. LEA of California.

Mr. EDMONDS with Mr. CAMPBELL of Pennsylvania.

Mr. SCULLY with Mr. HUSTED.

Mr. STINESS with Mr. BELL.

Mr. HAWLEY with Mr. DOOLING.

Mr. MCCULLOCH with Mr. BABKA.

Mr. WOODYARD with Mr. MOONEY.

Mr. REED of New York with Mr. CALDWELL.

Mr. HILL with Mr. MANN of South Carolina.

Mr. WILSON of Illinois with Mr. ROWAN.

Mr. SELLS with Mr. CANDLER.

Mr. GOODALL with Mr. EVANS of Nevada.

Mr. WILLIAMS with Mr. OVERSTREET.

Mr. WATSON with Mr. PADGETT.

Mr. TEMPLE with Mr. EAGLE.

Mr. COSTELLO with Mr. MCLANE.

Mr. SMITH of Illinois with Mr. HAMILL.

Mr. IRELAND with Mr. JOHN W. RAINEY.

Mr. VOLK with Mr. SMITHWICK.

Mr. NELSON of Wisconsin with Mr. OLNEY.

Mr. WOOD of Indiana with Mr. SULLIVAN.

Mr. SNYDER with Mr. O'CONNELL.

Mr. CRAGO with Mr. RIORDAN.

Mr. MCKENZIE with Mr. SMITH of New York.

Mr. VARE with Mr. WELLING.

Mr. SANFORD with Mr. LONERGAN.

Mr. BRITTEN with Mr. GALLAGHER.

Mr. RIDDICK with Mr. PELL.

Mr. REAVIS with Mr. MONTAGUE.

Mr. FORDNEY with Mr. POU.

Mr. LAMPERT with Mr. RAINEY of Alabama.

Mr. FOSTER with Mr. DOUGHTON.

Mr. GOOD with Mr. CONNOLLY.

Mr. BURKE with Mr. GOLDFOGLE.

Mr. ELLSWORTH with Mr. MOONEY.

Mr. KREIDER with Mr. GANLY.

Mr. DEMPSEY with Mr. GODWIN of North Carolina.

Mr. ROWE with Mr. MANSFIELD.

Mr. JEFFERIS with Mr. MILLIGAN.

Mr. JONES of Pennsylvania with Mr. KINCHELOE.

Mr. KENDALL with Mr. JOHNSTON of New York.

Mr. JAMES of Michigan with Mr. MCGLENNON.

Mr. LEHLBACH with Mr. MOORE of Virginia.

Mr. BROOKS of Pennsylvania with Mr. MCKINIRY.

Mr. JONES of Pennsylvania. Mr. Speaker, I desire to vote.

The SPEAKER. Was the gentleman present and listening when his name was called?

Mr. JONES of Pennsylvania. No; I was not in the room.

The SPEAKER. The gentleman does not bring himself within the rule.

The result of the vote was announced as above recorded.

LEAVE OF ABSENCE.

By unanimous consent, Mr. LAMPERT was granted leave of absence indefinitely on account of sickness.

Mr. ALMON was granted leave of absence for one day on account of illness.

Mr. GOODWIN of Arkansas was granted indefinite leave of absence on account of important business.

Mr. KING was granted leave of absence for the afternoon to attend the funeral at Arlington of Lieut. William M. Ferris, of Galesburg, Ill., who died in the service of his country in the late war and whose body has just been returned from France.

EXTENSION OF REMARKS.

Mr. CRAMTON. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the joint resolution just passed.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. HASTINGS. Mr. Speaker, I make the same request.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. FIELDS. Mr. Speaker, I make the same request.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. ROMJUE. Mr. Speaker, I make the same request.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. GARNER. Mr. Speaker, I would like to have permission to extend my remarks in the RECORD by inserting a statement of the farm-loan bank of Houston, Tex.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. ACKERMAN. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing an article on world debts and paper currency.

The SPEAKER. By the gentleman himself?

Mr. ACKERMAN. No, sir.

The SPEAKER. Is there objection?

Mr. GARD. What is the subject?

Mr. ACKERMAN. It is on world debts and paper currency, a very comprehensive article.

Mr. GARD. The gentleman's own article?

Mr. ACKERMAN. No, sir; it is not.

Mr. GARD. I do not desire to object.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

MEMORIAL SERVICES.

Mr. FLOOD. Mr. Speaker, I wish to make a motion, to which I think there will be no objection, in reference to memorial services.

The SPEAKER. The Clerk will report the motion.

The Clerk read as follows:

On motion of Mr. FLOOD,

Ordered, That Sunday, February 13, 1921, at 12 o'clock noon, be set apart for addresses on the life, character, and public services of the Hon. THOMAS S. MARTIN, late a Senator from the State of Virginia.

The SPEAKER. Is there objection to the present consideration of the resolution? [After a pause.] The Chair hears none.

The question was taken, and the motion was agreed to.

Mr. FLOOD. Mr. Speaker, I desire to make the same motion in reference to the Hon. WALTER A. WATSON, late a Representative from the State of Virginia.

The SPEAKER. On the same day?

Mr. FLOOD. No, sir; on the 20th of February, one week later.

The SPEAKER. The Clerk will report the motion.

The Clerk read as follows:

Ordered, That Sunday, February 20, 1921, at 12 o'clock noon, be set apart for the addresses on the life, character, and public services of Hon. WALTER A. WATSON, late a Representative from the State of Virginia.

The question was taken, and the resolution was agreed to.

ADJOURNMENT.

Mr. MONDELL. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 16 minutes p. m.) the House adjourned until to-morrow, Tuesday, January 18, 1921, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

345. A letter from the Secretary of the Treasury, transmitting report of rents received from properties located on sites of proposed public buildings purchased by the United States Government in Washington, D. C.; to the Committee on Public Buildings and Grounds.

346. A letter from the Secretary of the Navy, transmitting a request for the amending of House bill 15614, to authorize the President of the United States to classify and name the vessels of the Navy; to the Committee on Naval Affairs.

347. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination of Lake Butte des Morts, Wis.; to the Committee on Rivers and Harbors.

348. A letter from the Secretary of War, transmitting reports of Chief of Engineers, Quartermaster General, Military Academy, and Chief of Supply Division, War Department, of typewriters, adding machines, and other labor-saving devices exchanged during fiscal year 1920. Also reports of the General Staff College and the Chief Signal Officer; to the Committee on Appropriations.

349. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination of Black Rock Channel, N. Y. (H. Doc. No. 981); to the Committee on Rivers and Harbors and ordered to be printed with illustration.

350. A letter from the Secretary of the Treasury, transmitting alternative estimate of appropriation required by the Postal Service for indemnities, domestic mail, fiscal year 1920 (H. Doc. No. 982); to the Committee on Appropriations and ordered to be printed.

351. A letter from the Secretary of the Treasury, transmitting supplemental estimate of appropriation required by the Bureau of Standards (Department of Commerce) for "Standardization of equipment," fiscal year 1921 (H. Doc. No. 983); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. BARKLEY, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 14259) for permit to construct a toll bridge across the Tennessee River, Marshall County, Ala., at a point one-half mile north of Guntersville, Ala., reported the same with amendments, accompanied by a report (No. 1198), which said bill and report were referred to the House Calendar.

Mr. TOWNER, from the Committee on Education, to which was referred the bill (H. R. 7) to create a department of education, to authorize appropriations for the conduct of said department, to authorize the appropriation of money to encourage the States in the promotion and support of education, and for other purposes, reported the same with amendments, accompanied by a report (No. 1201), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. CARTER, from the Committee on Indian Affairs, to which was referred the bill (H. R. 15085) to perpetuate the memory of the Chickasaw and Seminole Tribes of Indians in Oklahoma, reported the same with an amendment, accompanied by a report (No. 1202), which said bill and report were referred to the House Calendar.

Mr. VESTAL, from the Committee on Coinage, Weights, and Measures, to which was referred the bill (S. 3774) to authorize the coinage of a Roosevelt 2-cent coin, reported the same without amendment, accompanied by a report (No. 1204), which said bill and report were referred to the House Calendar.

Mr. HAYDEN, from the Committee on Irrigation of Arid Lands, to which was referred the bill (S. 2610) to provide for the disposal of certain waste and drainage water from the Yuma project, Arizona, reported the same with an amendment, accompanied by a report (No. 1203), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. EDMONDS, from the Committee on Claims, to which was referred the bill (H. R. 13762) for the relief of Robert G. Whitfield, reported the same without amendment, accompanied by a report (No. 1197), which said bill and report were referred to the Private Calendar.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Pensions was discharged from the consideration of the bill (H. R. 15537) granting a pension to Amanda Kenney, and the same was referred to the Committee on Invalid Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. POU: A bill (H. R. 15761) amendatory of the acts of July 2, 1917 (40 Stats., p. 241), and of April 11, 1918 (40 Stats., p. 518), in relation to condemnation proceedings; to the Committee on the Judiciary.

By Mr. NELSON of Wisconsin (by request): A bill (H. R. 15762) conferring jurisdiction upon the Court of Claims to hear, examine, consider, and adjudicate claims of Lake Superior Chippewa Indians against the United States, and for other purposes; to the Committee on Indian Affairs.

Also (by request), a bill (H. R. 15763) for the relief of persons claiming right of allotment on the Bad River Reservation in the State of Wisconsin, and for other purposes; to the Committee on Indian Affairs.

By Mr. SNYDER: A bill (H. R. 15764) for the enrollment and allotment of members of the Lac du Flambeau Band of Lake Superior Chippewas, in the State of Wisconsin, and for other purposes; to the Committee on Indian Affairs.

Also, a bill (H. R. 15765) promoting civilization and self-support among the Indians of the Mescalero Reservation in New Mexico; to the Committee on Indian Affairs.

By Mr. KELLY of Pennsylvania: A bill (H. R. 15766) to amend section 19 of the Criminal Code of the United States; to the Committee on the Judiciary.

By Mr. NELSON of Missouri: A bill (H. R. 15767) to authorize the coinage of a 50-cent piece in commemoration of the one hundredth anniversary of the admission of Missouri into the Union; to the Committee on Coinage, Weights, and Measures.

By Mr. KING: A bill (H. R. 15768) making appropriation for the improvement of Quincy (Ill.) Bay; to the Committee on Rivers and Harbors.

By Mr. HUDSPETH: A bill (H. R. 15769) to authorize the construction of a bridge over the Rio Grande River between the cities of Del Rio, Tex., and Las Vacas, Mexico; to the Committee on Interstate and Foreign Commerce.

By Mr. PURNELL: A bill (H. R. 15770) to authorize the more complete endowment of agricultural experiment stations, and for other purposes; to the Committee on Agriculture.

By Mr. HICKS: A bill (H. R. 15771) to provide for actual and necessary expenses of officers of the Navy when traveling by air; to the Committee on Naval Affairs.

Also, a bill (H. R. 15772) requesting railroads and transportation companies operating within or without the continental limits of the United States to grant reduced rates to persons in the military services; to the Committee on Interstate and Foreign Commerce.

By Mr. PETERS: A bill (H. R. 15773) limiting the payments of gratuities for enlistments in the Navy and Marine Corps; to the Committee on Naval Affairs.

Also, a bill (H. R. 15774) governing reenlistment gratuities for men reenlisting in the United States Navy; to the Committee on Naval Affairs.

By Mr. OLIVER: A bill (H. R. 15775) authorizing the Secretary of the Navy to check against the accounts of naval reservists for nonperformance of training duty; to the Committee on Naval Affairs.

By Mr. LUFKIN: A bill (H. R. 15776) to amend the act for the establishment of marine schools, and for other purposes, approved March 4, 1911; to the Committee on Naval Affairs.

By Mr. STEPHENS of Ohio: A bill (H. R. 15777) to authorize the Secretary of the Navy to remove the charge of desertion in certain cases; to the Committee on Naval Affairs.

By Mr. COADY: A bill (H. R. 15778) to amend and reenact the first paragraph of subdivision (a) of section 209 of the transportation act, 1920; to the Committee on Interstate and Foreign Commerce.

By Mr. LUFKIN: A bill (H. R. 15779) granting allowance to disbursing officers for payment for civilian outfits furnished enlisted men; to the Committee on Naval Affairs.

By Mr. HOWARD: A bill (H. R. 15780) to amend section 1 of the act of Congress approved March 2, 1895 (28 Stat. L., p. 907), and to extend restrictions against alienation of lands allotted to and inherited by certain Quapaw Indians, and for other purposes; to the Committee on Indian Affairs.

By Mr. BUTLER: Joint resolution (H. J. Res. 449) to provide a commission to inquire into and submit recommendations to Congress relative to the erection of a suitable memorial to the late Admiral George Dewey, United States Navy; to the Committee on the Library.

By Mr. MASON: Resolution (H. Res. 646) requesting the President to furnish information in connection with the sending of troops to Cuba; to the Committee on Foreign Affairs.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. CLEARY: A bill (H. R. 15781) for the relief of the Merritt & Chapman Derrick & Wrecking Co.; to the Committee on Claims.

By Mr. DRANE: A bill (H. R. 15782) granting an increase of pension to Lurany McClellan; to the Committee on Pensions.

By Mr. FLOOD: A bill (H. R. 15783) granting relief to Evarts Walton Opie; to the Committee on Military Affairs.

By Mr. HARDY of Texas: A bill (H. R. 15784) authorizing the President to reappoint and honorably discharge David J. Sawyer, second lieutenant National Army, as of May 11, 1919; to the Committee on Military Affairs.

By Mr. HILL: A bill (H. R. 15785) for the relief of James Gilroy; to the Committee on Military Affairs.

By Mr. KING: A bill (H. R. 15786) granting a pension to Harrison Lantz; to the Committee on Invalid Pensions.

By Mr. LANGLEY: A bill (H. R. 15787) granting a pension to Burnham Gibson; to the Committee on Pensions.

By Mr. RUBEY: A bill (H. R. 15788) granting a pension to Joseph Floyd; to the Committee on Invalid Pensions.

By Mr. VENABLE: A bill (H. R. 15789) to authorize the President to promote J. C. Lewis, a technical sergeant, Quartermaster Corps, to the rank of a first lieutenant, Quartermaster Corps, United States Army; to the Committee on Military Affairs.

By Mr. ZIHLMAN: A bill (H. R. 15790) granting an increase of pension to William Teeters; to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

5023. By Mr. CANNON: Petition of citizens of Kankakee County, Ill., favoring the immediate recognition of the republic of Ireland; to the Committee on Foreign Affairs.

5024. By Mr. CURRY of California: Petition of Sacramento Federated Trades and Labor Council of the city of Sacramento, Calif., opposing the enactment of the so-called blue laws and Sunday laws; to the Committee on the Judiciary.

5025. By Mr. DALE: Petition of Dr. Theodore Ellis, osteopath, proposing an amendment to the Fess bill; to the Committee on Education.

5026. By Mr. KLECZKA: Petition of Wisconsin State Conference, Near East Relief, requesting relief for stricken Armenians; to the Committee on Foreign Affairs.

5027. By Mr. O'CONNELL: Petition of Loose Wiles Biscuit Co., of Long Island, N. Y., favoring a gross sales tax; to the Committee on Ways and Means.

5028. By Mr. ROWAN: Petition of R. H. Macy & Co. (Inc.), of New York, favoring a daylight-saving law, to be operative within the eastern time zone from the last Sunday in April to the last Sunday in September of each year; to the Committee on Interstate and Foreign Commerce.

5029. Also, petition of M. J. Whittall, of New York, and J. J. Atkinson, of Hotel Lorraine, New York, favoring a daylight-saving law; to the Committee on Interstate and Foreign Commerce.

5030. Also, petition of the Commercial Telegraphers' Union, opposing the passage of House bill 14657; to the Committee on Agriculture.

5031. Also, petition of William Manger, of Manger Hotels, favoring a gross sales tax; to the Committee on Ways and Means.

5032. By Mr. SNYDER: Petition of Ilion (N. Y.) Chamber of Commerce, urging an appropriation for the purpose of erecting a post office at Ilion, N. Y.; to the Committee on Public Buildings and Grounds.

5033. By Mr. STEPHENS of Ohio: Protest of the Oskamp Nolting Co. against an additional tax of 5 per cent on jewelry; to the Committee on Ways and Means.

5034. Also, protest of the Richardson Co. and the Philip Carey Manufacturing Co., of Cincinnati, against import duty on wood pulp; to the Committee on Ways and Means.

5035. Also, petition of the John Hill Foundry Supply Co., the Isaac Joseph Iron Co., and the Edna Brass Manufacturing Co., favoring the Winslow bill amending sections 204 and 209 of the transportation act of 1920; to the Committee on Interstate and Foreign Commerce.

SENATE.

TUESDAY, *January 18, 1921.*

Rev. J. J. Muir, D. D., offered the following prayer:

Our Father, we thank Thee for the light of another day and for all the opportunities that it may bring to us of privilege of service in Thy name. Glorify Thyself through our lives, we humbly beseech Thee. For Christ's sake. Amen.

The reading clerk proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. CURTIS and by unanimous consent, the further reading was dispensed with and the Journal was approved.

MEDILL MCCORMICK, a Senator from the State of Illinois, appeared in his seat to-day.

REFUNDS BY BUREAU OF IMMIGRATION.

The VICE PRESIDENT laid before the Senate a communication from the Secretary of the Treasury, transmitting copy of a communication from the Secretary of Labor submitting estimates of appropriation in the sum of $410.50 for payment of refunds by the Bureau of Immigration, Department of Labor, which was referred to the Committee on Appropriations and ordered to be printed.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by D. K. Hempstead, its enrolling clerk, announced that the House had passed the following bills and joint resolution, in which the concurrence of the Senate was requested:

H. R. 397. An act to authorize a lieu selection by the State of South Dakota for 160 acres on Pine Ridge Indian Reservation, and for other purposes;

H. R. 8692. An act authorizing the exchange of lands within the Montezuma National Forest in Colorado;

H. R. 11841. An act to amend "An act granting additional quarantine powers and imposing additional duties upon the Marine Hospital Service," approved February 15, 1893;

H. R. 11851. An act authorizing the exchange of lands within the Rainier National Forest, in the State of Washington, and for other purposes;

H. R. 13051. An act to add certain lands to the Lemhi National Forest, Idaho;

H. R. 13225. An act providing for the allotment of lands within the Fort Belknap Indian Reservation, Mont., and for other purposes;

H. R. 14311. An act to authorize the improvement of Red Lake and Red Lake River, in the State of Minnesota, for navigation, drainage, and flood-control purposes; and

H. J. Res. 440. Joint resolution directing the Secretary of War to cease enlisting men in the Regular Army of the United States except in the case of those men who have already served one or more enlistments therein.

The message also announced that the House had passed the following bills of the Senate, each with amendments, in which it requested the concurrence of the Senate:

S. 793. An act authorizing the issuance of patent to the Milk River Valley Gun Club;

S. 2379. An act to provide for the disposition of certain public lands withdrawn and improved under the provisions of

the act of Congress approved June 25, 1910 (36 Stat. L., p. 847), as amended by the act of August 24, 1912 (37 Stat. L., p. 497), and which are no longer needed; and

S. 3994. An act validating certain applications for and entries of public lands, and for other purposes.

PETITIONS AND MEMORIALS.

Mr. JOHNSON of California presented a joint resolution adopted by the Legislature of the State of California relative to naturalization and property rights of aliens, which was ordered to be printed in the RECORD, as follows:

LEGISLATIVE DEPARTMENT, STATE OF CALIFORNIA,
FORTY-FOURTH SESSION,
Senate Chamber, January 11, 1921.

To the honorable President of the United States, the Secretary of State of the United States, to each of California's Senators and Representatives in Congress, and to each member of the Committee on Foreign Relations of the United States Senate:

Pursuant to the provisions of senate joint resolution No. 4, adopted by the Legislature of the State of California at the forty-fourth session, I am sending you herewith a copy thereof, reading as follows:

Chapter 3.—Senate joint resolution No. 4, by Senator Inman, of the seventh district, relative to naturalization and property rights of aliens.

Whereas at the general election held on the 2d day of November, 1920, the people of the State of California, in the exercise of their right reserved under the constitution, by an overwhelming majority, adopted the "alien land law," which, among other things, provides that all aliens ineligible to citizenship under the laws of the United States may acquire, possess, enjoy, and transfer real property or any interest therein in this State in the manner and to the extent and for the purposes prescribed by any treaty now existing between the Government of the United States and the nation or country of which such alien is a citizen or subject and not otherwise; and

Whereas the present treaty of commerce and navigation between the United States and Japan, proclaimed on the 5th day of April, 1911, in fixing the rights of the nationals of both contracting parties, provides that—

"The citizens or subjects of each of the high contracting parties shall have liberty to enter, travel, and reside in the territories of the other to carry on trade, wholesale and retail; to own or lease and occupy houses, manufactories, warehouses, and shops; to employ agents of their choice; to lease land for residential and commercial purposes; and generally to do anything incident to or necessary for trade upon the same terms as native citizens or subjects submitting themselves to the laws and regulations there established"; and

Whereas notwithstanding the aforesaid provision of the treaty limiting the purposes for which the subjects of Japan may enter, travel, and reside in the United States, approximately 100,000 Japanese are now residing in California, comparatively few of whom are engaged in trade, while the great majority are engaged in agriculture, owning, leasing, and farming lands, and now control one-eighth of the entire acreage of rich irrigated lands in the State, as shown by the official report of the State Board of Control; and

Whereas Japanese as well as American authorities concede the unassimilability of the two races and grant that a continuance of existing conditions may develop a racial question and grave international complications out of the present economic problem; and

Whereas the evidence before the House immigration committee in hearings held on the Pacific coast in July and August, 1920, clearly indicates the impracticability of making homogeneous American citizenship out of the material coming to us from Japan and the impossibility of a white community holding its own either in increase of numbers or in economic competition against the racial advantages and birth rate of the Japanese; and

Whereas preliminary negotiations are now pending between the State Department at Washington and representatives of the Empire of Japan with a view of entering into a treaty dealing with the subject of immigration; and

Whereas reports have come to us from our representatives in Congress that Japan insists that the proposed treaty shall grant the right of citizenship to the subjects of Japan now in the United States, and shall, in effect, nullify the aforesaid "alien land law": Now, therefore, be it

Resolved by the senate and assembly jointly, That the Legislature of the State of California protests against any treaty being made between the United States and Japan whereby the right to citizenship shall be extended to the subjects of Japan; and be it further

Resolved, That any attempt by the treaty-making power of the United States to nullify the aforesaid "alien land law" or to confer upon the subjects of Japan the right to acquire, own, or possess lands within this State, in violation of our State laws, should be opposed as destructive of State's rights reserved under the Constitution of the United States; and be it further

Resolved, That in any treaty hereafter made by the United States and Japan said "alien land law" be held inviolate and that the rights of the States of the Union to enact legislation respecting the acquisition and ownership of land by aliens within their respective borders be properly safeguarded; and be it further

Resolved, That in any such treaty provision be made prohibiting the further immigration of the subjects of Japan to the United States, save and except merchants, students, and teachers, their servants and employees; and be it further

Resolved, That a copy of these resolutions be forthwith dispatched to the President of the United States, the Secretary of State of the United States, to each of our Senators and Representatives in Congress, and to each member of the Committee on Foreign Relations of the United States Senate.

MARTIN C. MADSEN,
Private Secretary to the Governor.
C. C. YOUNG,
President of the Senate.
HENRY W. WRIGHT,
Speaker of the Assembly.
FRANK C. JORDAN,
Secretary of State.

And hereby certify that the same was duly filed with the secretary of state on January 11, 1921.

GRACE S. STOERMER,
Secretary of the Senate.

Mr. CAPPER presented a resolution adopted by the Linn County Pomona Grange, of Albany, Oreg., favoring the truth in fabric bill, which was referred to the Committee on Interstate Commerce.

Mr. HARRIS presented a resolution passed by the Gilmer County Good Roads Association, of Ellijay, Ga., favoring continued Federal aid to rural post roads in the respective States through the Bureau of Public Roads, which was referred to the Committee on Post Offices and Post Roads.

He also presented a telegram in the nature of a petition from the Brunswick Board of Trade, the Young Men's Club, and the County Commissioners, of Brunswick, Ga., praying for the enactment of legislation to continue distribution of Federal aid to rural post roads in the respective States through the Bureau of Public Roads, which was referred to the Committee on Post Offices and Post Roads.

Mr. PHELAN presented a joint resolution adopted by the Legislature of California relative to naturalization and property rights of aliens, which was referred to the Committee on Finance.

He also presented a joint resolution of the Legislature of California relating to the protection of the quicksilver mining industry, which was referred to the Committee on Mines and Mining and ordered to be printed in the RECORD, as follows:

LEGISLATIVE DEPARTMENT, STATE OF CALIFORNIA,
FORTY-FOURTH SESSION,
Senate Chamber, January 11, 1921.

To California's Senators and Representatives in Congress, to the members of the Committee on Mines and Mining of the Senate, and to the members of the Ways and Means Committee of the House of Representatives, and to the Members of the House of Representatives of the United States:

Pursuant to the provisions of senate joint resolution No. 3, adopted by the Legislature of the State of California at the forty-fourth session, I am sending you herewith a copy thereof, reading as follows:

Chapter 1.—Senate joint resolution No. 3, by Senator Rigdon, of the seventeenth district, relating to the protection of the quicksilver mining industry.

Whereas foreign competition is desperately seeking our unprotected markets; and

Whereas our country is becoming the dumping ground for the convict-produced quicksilver of Spain; and

Whereas the quicksilver industry of California, which is one of the oldest and most distinctive industries of the State, now faces extinction unless such protection is granted as will equalize the price of the convict-produced metal, and make it possible for American laborers to compete with this foreign product; and

Whereas at the present date all of the quicksilver mines of California are closed or in the hands of receivers; and

Whereas quicksilver is a basic metal, essential and indispensable to many industries of this country, both in time of peace and in time of war: Now, therefore, be it

Resolved by the senate and assembly, jointly, That the Legislature of the State of California hereby memorialize Congress to provide adequate protection to the quicksilver industry of this country, so as to equalize the price of that locally produced and the foreign product of convict labor; and be it further

Resolved, That our Senators and Representatives in Congress be, and they are hereby, requested to use all honorable means to secure the adoption of such measures; and be it further

Resolved, That the secretary of the senate be, and he is hereby, instructed to forward duly certified copies of these resolutions to each of our Senators and Representatives in Congress and to each of the members of the respective Committee of Mines and Mining of the Senate and of the Ways and Means Committee of the House of Representatives of the United States.

MARTIN C. MADSEN,
Private Secretary to the Governor.
C. C. YOUNG,
President of the Senate.
HENRY W. WRIGHT,
Speaker of the Assembly.
FRANK C. JORDAN,
Secretary of State.

And hereby certify that the same was duly filed with the secretary of state on January 11, 1921.

GRACE S. STOERMER,
Secretary of the Senate.

Mr. PHELAN presented a joint resolution of the Legislature of California relative to the protection of the poultry industry, which was referred to the Committee on Finance and ordered to be printed in the RECORD, as follows:

LEGISLATIVE DEPARTMENT, STATE OF CALIFORNIA,
FORTY-FOURTH SESSION,
Senate Chamber, January 11, 1921.

To each of California's Senators and Representatives in Congress, to each of the members of the Ways and Means Committee of the House of Representatives, and to the members of the United States Tariff Commission now meeting in Washington:

Pursuant to the provisions of senate joint resolution No. 7, adopted by the Legislature of the State of California at the forty-fourth session, I am sending you herewith a copy thereof, reading as follows:

Chapter 2.—Senate joint resolution No. 7, by Senator Slater, of the eighth district, relative to the protection of the poultry industry.

Whereas the poultry industry of California is one of the most important industries of the country and producing annually many millions of dollars; and

Whereas eggs are being imported in enormous quantities into our local markets; and

Whereas the poultry industry of California now faces a grave menace, which can not be avoided unless such protection is granted as will afford an adequate safeguard to the investments of American poultry men: Now, therefore, be it

Resolved by the senate and assembly jointly, That the Legislature of the State of California hereby memorializes Congress to adopt such measures as will afford adequate and proper protection to the poultry industry of this country; and be it further

Resolved, That our Senators and Representatives in Congress be, and they are hereby, urged and requested to use all honorable means to secure the adoption of such a tariff; and be it further

Resolved, That duly authenticated copies of these resolutions be transmitted to each of our Senators and Representatives in Congress, to each of the members of the Ways and Means Committee of the House of Representatives, and to the members of the United States Tariff Commission now meeting at Washington.

MARTIN C. MADSEN,
Private Secretary to the Governor.
C. C. YOUNG,
President of the Senate.
HENRY W. WRIGHT,
Speaker of the Assembly.
FRANK C. JORDAN,
Secretary of State.

And hereby certify that the same was duly filed with the secretary of state on January 11, 1921.

GRACE S. STOERMER,
Secretary of the Senate.

Mr. McNARY. I present a resolution, which I have received to-day from the Oregon State Legislature on the emergency tariff bill, and ask that it be placed in the RECORD.

The resolution was ordered to lie on the table. It is as follows:

SALEM, OREG., *January 18, 1921.*

Hon. CHARLES L. MCNARY,
United States Senate, Washington, D. C.:

By direction of the thirty-first legislative assembly, I herewith transmit senate joint memorial No. 1, as follows:

Senate joint memorial 1.

Whereas this country is being flooded with foreign products which are destroying the home markets for the produce from the American farm, thereby causing financial disaster to overtake our farmers and stock raisers and in this way destroy the very foundation of American prosperity: Therefore be it

Resolved by the Senate of the State of Oregon (the House of Representatives concurring), That the Congress of the United States be, and it is hereby, memorialized to pass at the earliest possible moment the Fordney emergency tariff bill; be it further

Resolved, That the Congress of the United States is hereby further memorialized to enact a comprehensive tariff bill protecting American labor, American products, and American industry.

Adopted January 13, 1921.

SAM A. KOZER,
Secretary of State.

Mr. CALDER. I have received a memorial from the New York City Thrift Committee calling attention to the fact that yesterday was the two hundred and fifteenth anniversary of the birthday of Benjamin Franklin, and the two hundredth anniversary of the beginning of his literary career. This memorial is in part addressed to Congress; it would occupy about one-fourth of a page of the CONGRESSIONAL RECORD, and I ask unanimous consent that it may be inserted in the RECORD.

Mr. SMOOT. I did not understand from whom the memorial comes.

Mr. CALDER. It is a memorial of the New York City Thrift Committee, as I stated, calling attention to the fact that yesterday was the anniversary of the birthday of Franklin.

Mr. SMOOT. I shall have to object to the paper being printed in the RECORD.

Mr. CALDER. Then, during the day I shall seek an opportunity to read the memorial.

Mr. BORAH. I desire to say that the petition reached here a day too late. It should have been here yesterday so that we should have had before us an example of thrift and economy. Franklin's idea of thrift was closely associated with economy in private and public affairs.

Mr. ROBINSON. I have been requested for and on behalf of the Senator from Oregon [Mr. CHAMBERLAIN] to have read to the Senate a brief memorial to the Senate from the Legislature of the State of Oregon. I ask that it may be read.

The Assistant Secretary read the telegram, and it was ordered to lie on the table.

REPORTS OF COMMITTEES.

Mr. CURTIS, from the Committee on Indian Affairs, to which was referred the bill (S. 684) for the payment of certain money to Albert H. Raynolds, reported it favorably with an amendment and submitted a report (No. 684) thereon.

Mr. OWEN, from the Committee on Indian Affairs, to which was referred the bill (S. 3737) to carry out the provisions of an act approved July 1, 1902, known as the act entitled "An act to accept, ratify, and confirm a proposed agreement submitted by the Kansas or Kaw Indians of Oklahoma, and for other purposes," and to provide for a settlement to Addie May Auld and Archie William Auld, who were enrolled as members of the said tribe after the lands and money of said tribe had been divided, reported it favorably with amendments and submitted a report (No. 685) thereon.

Mr. NEW, from the Committee on Claims, to which was referred the bill (H. R. 8881) for the relief of the First National Bank of New Carlisle, Ind., reported it favorably without amendment and submitted a report (No. 686) thereon.

Mr. SPENCER, from the Committee on Claims, to which were referred the following bills, reported them severally without amendment and submitted reports thereon:

A bill (H. R. 1034) for the relief of Jose Ramon Cordova (Rept. No. 687);

A bill (H. R. 1321) for the relief of Mrs. Annie M. Lepley (Rept. No. 688);

A bill (H. R. 1790) for the relief of John K. Ashley, jr. (Rept. No. 689);

A bill (H. R. 2740) for the relief of Maude H. Mosher (Rept. No. 690);

A bill (H. R. 3210) for the relief of Joseph A. Prat (Rept. No. 691);

A bill (H. R. 3522) for the relief of Lemuel Stokes (Rept. No. 692);

A bill (H. R. 7050) for the relief of the First State Bank of Kerrville, Kerr County, State of Texas (Rept. No. 693);

A bill (H. R. 9843) to carry into effect the findings of the Court of Claims in favor of Myron C. Bond, Guy M. Claflin, and Edwin A. Wells (Rept. No. 694);

A bill (H. R. 11066) for the relief of the Shipowners & Merchants Tugboat Co. (Rept. No. 695);

A bill (H. R. 11572) for the relief of John E. Moore Co. (Rept. No. 696);

A bill (H. R. 12333) for the relief of Albert T. Huso (Rept. No. 697);

A bill (H. R. 12441) for the relief of the Duluth, Winnipeg & Pacific Railroad (Rept. No. 698);

A bill (H. R. 12634) for the relief of Wilhelm Alexanderson (Rept. No. 699); and

A bill (H. R. 13600) for the relief of Mrs. William B. Ryan (Rept. No. 700).

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. ROBINSON:

A bill (S. 4875) transferring Fort Logan H. Roots to the Secretary of the Treasury for use of the United States Public Health Service, and for other purposes; to the Committee on Military Affairs.

By Mr. WADSWORTH:

A bill (S. 4876) for the relief of Oliver A. Campbell; to the Committee on Military Affairs.

By Mr. CURTIS:

A bill (S. 4877) granting an increase of pension to Maria Love (with accompanying papers); and

A bill (S. 4878) granting a pension to Sarah E. Spears (with accompanying papers); to the Committee on Pensions.

By Mr. OWEN:

A bill (S. 4879) to amend section 1 of the act of Congress approved March 2, 1895 (28 Stat. L., p. 907), and to extend restrictions against alienation of lands allotted to and inherited by certain Quapaw Indians, and for other purposes;

A bill (S. 4880) providing for the continuance of the Osage Indian School, Oklahoma, for a period of 10 years from July 1, 1921; and

A bill (S. 4881) to pay the Pawnee Tribe of Indians, of Oklahoma the sum found due by the Court of Claims; to the Committee on Indian Affairs.

By Mr. PHELAN:

A bill (S. 4882) granting a pension to George Teufel (with accompanying papers); and

A bill (S. 4883) granting a pension to Johanna Meyer (with accompanying papers); to the Committee on Pensions.

By Mr. KING:

A bill (S. 4884) providing for the payment of claims arising from damages sustained in connection with the leasing of irrigable Indian lands on the Uintah Reservation, Utah; to the Committee on Indian Affairs.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. OWEN submitted an amendment proposing to pay the Pawnee Tribe of Indians, of Oklahoma, in full and final settlement for the purchase by the United States of 170,333.37 acres of surplus lands belonging to said Pawnee Tribe under the act of Congress approved March 3, 1893 (27 Stat., pp. 612–644), the sum of $315,777.03, with interest thereon from September 3, 1920, at the rate of 5 per cent per annum, as provided

by law, intended to be proposed by him to the Indian appropriation bill, which was referred to the Committee on Indian Affairs and ordered to be printed.

Mr. HARRISON submitted an amendment proposing to increase the compensation of the clerk in charge of the CONGRESSIONAL RECORD at the Capitol from $2,500 to $3,000, intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. KELLOGG submitted an amendment proposing to increase the compensation of messenger, to act as librarian and crier, Circuit Court of Appeals, Eighth Circuit, from $3,000 to $4,500, intended to be proposed by him to the legislative, etc., appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

AMENDMENT TO EMERGENCY TARIFF BILL.

Mr. JOHNSON of California submitted an amendment intended to be proposed by him to House bill 15275, the emergency tariff bill, which was ordered to lie on the table and be printed.

REFUND OF INCOME TAXES.

Mr. SMOOT. Mr. President, I offer the following resolution and ask for its immediate consideration.

The VICE PRESIDENT. The resolution will be read.

The reading clerk read the resolution (S. Res. 425), as follows:

Resolved, That the Secretary of the Treasury be directed to furnish to the Senate the following information, namely:

The number of claims for refund, abatement, or credit against assessments of income (including surtax), excess-profits, and war-profits taxes for the years 1917, 1918, and 1919, now filed in the Treasury Department or any division thereof; the aggregate amount of such claims and an estimated proportion of said aggregate attributable to, first, erroneous assessment; second, stock dividends; third, obsolescence of war property; and fourth, obsolescence of property of those whose business was terminated by prohibition legislation; the policy and basis, together with methods of computation for allowances as to good will; and as to whether a proper allowance for the claims so filed was made in the financial reports of the Treasury Department.

The VICE PRESIDENT. Is there any objection?

Mr. ROBINSON. I ask that the resolution may go over under the rule.

Mr. SMOOT. The Senator objects to the present consideration of the resolution?

Mr. ROBINSON. I think it ought to go over. I can not understand the nature of it and it is quite a lengthy resolution.

Mr. SMOOT. I can explain it to the Senator in a very few moments.

Mr. ROBINSON. I will withhold the objection for the present if the Senator thinks it is so urgent that it ought to be considered to-day.

Mr. SMOOT. The object of the resolution is to find out the amount of abatements now filed in the Treasury Department. There are certain unsettled claims made for abatement on tax returns. I think legislation which we are undoubtedly going to pass in the near future should be based upon a knowledge of what the Treasury Department thinks these abatements will amount to. This is simply a resolution asking what, in the opinion of the department, the abatements will amount to in each of the four cases named.

Mr. McKELLAR. I did not hear the resolution read. May I ask the Senator if paper companies are included?

Mr. SMOOT. All companies; all the claims of all the industries of the United States.

Mr. McKELLAR. The paper companies, as we all know, realized very large profits, and I have understood that they have very large claims for abatements. Does the resolution introduced by the Senator call for information with reference to those companies?

Mr. SMOOT. It calls for that information. I think if there are claims for abatements to the amount of a billion dollars now pending, we ought to know what is the opinion of the Treasury Department as to what proportion of those abatements is going to be refunded. If there is to be a proportion of it refunded, then we ought to know it, because we will have to know how to raise the money to meet those refunds.

Mr. ROBINSON. I call the attention of the Senator from Utah to the fact that the concluding clause of the resolution is as follows:

And as to whether a proper allowance for the claims so filed was made in the financial reports of the Treasury Department.

That does not call for a statement of fact; it calls for an opinion as to whether the Secretary himself has made a proper allowance. I suggest to the Senator that he ought to modify the language so as not to require the Secretary of the Treasury to report on the question whether he has made a proper allowance on the claims.

Mr. SMOOT. I think the Senator has placed a wrong construction on the language.

Mr. ROBINSON. I am quoting the language used.

Mr. SMOOT. I am speaking of the construction on the language.

Mr. ROBINSON. It is not a question of construction; it is the plain expression itself that I am referring to. Let me read it to the Senator again:

That the Secretary of the Treasury be requested to furnish to the Senate the following information, namely—

The resolution then specifies a number of items, and the last is information—

as to whether a proper allowance for the claims so filed was made in the financial reports of the Treasury Department.

I am merely suggesting to the Senator that the implication in the language there is to the effect that proper allowances were not made, and that he ought to modify his language so as to remove that implication. If the Senator does that, I shall make no objection to the present consideration of the resolution. Unless he modifies the resolution I am constrained to object.

Mr. SMOOT. I wish to assure the Senator that there was no such intention on my part.

Mr. ROBINSON. I do not care what the intention is; I am assuming that the Senator is correct about it; but the plain language is as I have quoted it:

And as to whether a proper allowance—

I suggest to the Senator to strike out the word "proper."

Mr. SMOOT. Certainly; just let it read, "as to whether an allowance," and so forth.

Mr. ROBINSON. The implication of the language is so perfectly plain that I am astonished that I have to argue the matter with the Senator from Utah. With that modification, if the Senator chooses to make it, I shall make no objection to the resolution.

Mr. SMOOT. I shall be very glad to accept the amendment suggested by the Senator from Arkansas.

Mr. McKELLAR. Will the Senator read the resolution again? I did not get here in time to hear it read.

Mr. SMOOT. Let the reading clerk read it.

Mr. McKELLAR. All right.

The VICE PRESIDENT. It will be again read.

The reading clerk again read the resolution.

Mr. ROBINSON. I understand the Senator has agreed to strike out the word "proper." I wish to direct his attention to the fact that it is usual in resolutions of this kind, as he well knows, to use the word "direct" instead of "request" in addressing officers of the Government other than the President. Unless he has some reason for not changing it, I suggest that he follow the usual custom of the Senate.

Mr. SMOOT. I am perfectly willing to modify the resolution in that respect.

The VICE PRESIDENT. The resolution will be so modified.

Mr. UNDERWOOD. I understand the Senator desires to have the information sent the Congress by the Treasury Department.

Mr. SMOOT. I do.

Mr. UNDERWOOD. Can the Senator give us any information as to what it would cost and the time it would take?

Mr. SMOOT. I do not know that it will take any time. They have the information there, from what I understand. I think there is at least $1,000,000,000 in claims for abatements, and I simply wish by the resolution to find out how much is for erroneous assessment, how much for stock dividends, how much for obsolescence of war properties, and so forth. I will say to the Senator that we ought to have the information before we begin to change the revenue laws in order to raise money to maintain the Government. The resolution asks for the opinion of the Secretary of the Treasury as to the amount it would take in settlement of the claims. I think we ought to have that information.

Mr. UNDERWOOD. I have no objection to securing the information; and I recognize the fact that it would be useful; but unless we are prepared to increase the clerical force of the United States and give the officials an opportunity to work out details of this kind, I do not think we ought to send a resolution of this kind to the Treasury Department or any other department before we know whether they already have the information prepared to deliver to us.

If we send down the resolution in this shape, without anything further said about it, we require the department, if it can do so, to furnish the information. The result will be, and the Senator knows it as well as I do, that if the information has not been compiled it will take months of work.

Mr. SMOOT. I have seen statements in the press that they already have the information, and that it is worrying the Treas-

ury Department as to just what amount is going to be required to meet the abatements. I have not any doubt but that they have the information already collected.

Mr. UNDERWOOD. I would like to have the resolution amended so as to read that it shall be furnished where they have the information available. If we are not going to do that, I think a committee ought to investigate the question as to what it is going to cost, and we ought to furnish the department with a clerical force to obtain the information if we are going to require it in this way.

Mr. SMOOT. Let it read, "That the Secretary of the Treasury be directed to furnish the information available as to the number of claims for refund," and so forth.

Mr. UNDERWOOD. The information which is now available.

Mr. SMOOT. "Which is now available."

Mr. UNDERWOOD. I have no objection to that modification, because I think the Senate should have such information as the department may have, but I know from complaints of executive officers that have come to me in the past, when I was a member of the Committee on Appropriations of the House, they have repeatedly had to withdraw their clerks from the work of the department to compile data in response to resolutions Congress sent there. Of course this information would require a vast deal of research unless they already have it available.

Mr. SMOOT. The papers have published, as coming from the Treasury Department, a statement as to just the amount of the claims and I have not any doubt but that they have the information. I am perfectly willing to modify the resolution as suggested by the Senator from Alabama.

Mr. UNDERWOOD. If the Senator says "now available," I have no objection to the resolution.

Mr. SMOOT. I am willing to accept that amendment.

Mr. UNDERWOOD. The only question I have to raise is that I do not want to send a resolution there to which they can not respond and then charge them with a high crime and misdemeanor for not doing it.

Mr. SMOOT. I assure the Senator that neither do I desire to do that.

The resolution as modified was considered by unanimous consent and agreed to, as follows:

Resolved, That the Secretary of the Treasury be directed to furnish to the Senate the following information which is now available, namely: The number of claims for refund, abatement, or credit against assessments of income (including surtax), excess-profits and war-profits taxes for the years 1917, 1918, and 1919, now filed in the Treasury Department, or any division thereof; the aggregate amount of such claims and an estimated proportion of said aggregate attributable to, first, erroneous assessment; second, stock dividends; third, obsolescence of war property; and fourth, obsolescence of property of those whose business was terminated by prohibition legislation; the policy and basis, together with methods of computation, for allowances as to good will; and as to whether an allowance for the claims so filed was made in the financial reports of the Treasury Department.

ARMY STORES AND SURPLUS MILITARY SUPPLIES.

Mr. KING. I submit a resolution calling upon the Secretary of War to furnish certain information relative to Army stores and surplus military supplies on hand at the time of the armistice, their quantity and character; also what part of the same have been sold and the quantity on hand and the value of the same. I shall not now ask for the adoption of the resolution, but I shall ask its reference to the Committee on Military Affairs, for if it involves any considerable expense to furnish the information I recognize the pertinency of the remarks of the Senator from Alabama [Mr. UNDERWOOD]; but I feel that some action should be taken to compel the War Department to dispose of surplus military stores.

The Senator from New York [Mr. WADSWORTH] yesterday in advocating a standing Army of 175,000 men urged as one of the reasons for so doing that it required a large force of the Army to guard the surplus military stores of the United States. Senators will remember that not more than a year ago we appropriated $25,000 as the salary of a certain individual who was directed to sell the surplus military stores. I regret to say that the War Department has, in my opinion, failed to dispose of surplus stores. It has failed to pursue a proper course in dealing with these military supplies, as a result of which the Government has been put to millions of dollars of expense, and will sustain great losses because of the decline in values. I think when the information asked for in the resolution is furnished, the Senate will appreciate the necessity of directing some action by the War Department and will, in my opinion, join in a peremptory direction to the Secretary of War to make immediate disposition of those stores. I ask that the resolution be referred to the Committee on Military Affairs.

The resolution (S. Res. 426) was read and referred to the Committee on Military Affairs, as follows:

Resolved by the Senate, That the Secretary of War be, and he is hereby, directed to report to the Senate the description and quantity of quartermaster stores and all property and materials of a nonmilitary character under the control of the War Department, and the value thereof, at the armistice of November 11, 1918; the description and quantity of the surplus of such quartermaster stores, property, and materials not required for the uses of the Army and available for disposition at the armistice of November 11, 1918; the description and quantity of such surplus quartermaster stores, property, and materials which have been sold and disposed of since the armistice of November 11, 1918, together with a statement of the moneys obtained on account of such sales and dispositions; and the description and quantity of such surplus quartermaster stores, property, and materials, and the value thereof, on hand at this date.

CONDITIONS IN SIBERIA.

Mr. JOHNSON of California submitted the following resolution (S. Res. 427), which was read and referred to the Committee on Foreign Relations:

Resolved, That the Foreign Relations Committee, or any subcommittee thereof, be, and it is hereby, authorized to investigate the sending of United States soldiers to Siberia, the purposes of their presence there, their activities and accomplishments, if any, and also the condition and situation of citizens of the United States and the interests of citizens of the United States in Siberia.

HOUSE BILLS AND JOINT RESOLUTION REFERRED.

The following bills and joint resolution were severally read twice by their titles and referred as indicated below:

H. R. 397. An act to authorize a lieu selection by the State of South Dakota for 160 acres on Pine Ridge Indian Reservation, and for other purposes; to the Committee on Public Lands.

H. R. 8692. An act authorizing the exchange of lands within the Montezuma National Forest in Colorado; to the Committee on Public Lands.

H. R. 11841. An act to amend "An act granting additional quarantine powers and imposing additional duties upon the Marine Hospital Service," approved February 15, 1893; to the Committee on Commerce.

H. R. 11851. An act authorizing the exchange of lands within the Rainier National Forest, in the State of Washington, and for other purposes; to the Committee on Public Lands.

H. R. 13051. An act to add certain lands to the Lemhi National Forest, Idaho; to the Committee on Public Lands.

H. R. 13225. An act providing for the allotment of lands within the Fort Belknap Indian Reservation, Mont., and for other purposes; to the Committee on Indian Affairs.

H. R. 14311. An act to authorize the improvement of Red Lake and Red Lake River, in the State of Minnesota, for navigation, drainage, and flood-control purposes; to the Committee on Commerce.

H. J. Res. 440. Joint resolution directing the Secretary of War to cease enlisting men in the Regular Army of the United States, except in the case of those men who have already served one or more enlistments therein; to the Committee on Military Affairs.

APPOINTMENT OF EX-SERVICE MEN AS POSTMASTERS.

Mr. FLETCHER. Mr. President, is it now in order to take up resolutions coming over from yesterday?

The VICE PRESIDENT. It is.

Mr. FLETCHER. Then, I call up Senate resolution 424, coming over from yesterday, and ask that it may be laid before the Senate.

The VICE PRESIDENT. The Chair lays before the Senate a resolution coming over from the preceding day, which will be read.

The resolution (S. Res. 424) was read, as follows:

Resolved, That the Committee on Post Offices and Post Roads be directed to ascertain from the Postmaster General the names of all former service men, and the widows of such, recommended to the President for appointment as postmasters and by the President submitted to the Senate for confirmation and not acted upon; and that the committee be further directed to consider and report promptly to the Senate all such nominations submitted so that appropriate action may be taken.

Mr. FLETCHER. Mr. President, I do not know that it is necessary to discuss the resolution, and I shall not discuss it unless there is some opposition to it.

Mr. TOWNSEND. Mr. President, I, of course, have no objection if it should be of any benefit to the Senate to obtain from the Postmaster General all the names of ex-soldiers who have been recommended for post-office appointments, but I do seriously object to the latter part of the resolution, which provides that the committee be "directed to consider and report promptly" on the few nominations which have been made for such appointments. I do not think it lies with any Senator, on the other side of the Chamber at least, to complain of the treatment which has been accorded to nominees for post-office appointments who have served in the late war. It will not be useful for me to discuss the record in that respect which has been made during the last two years.

The Committee on Post Offices and Post Roads is willing at the proper time to consider all nominations which are pre-

sented—and none have been presented up to date—but the nominations ought to be considered under all the circumstances and all of them should be considered together. Therefore, Mr. President, I move that the resolution be referred to the Committee on Post Offices and Post Roads.

The VICE PRESIDENT. The question is on the motion of the Senator from Michigan to refer the resolution to the Committee on Post Offices and Post Roads.

Mr. FLETCHER. Mr. President——

The VICE PRESIDENT. The motion is not debatable.

Mr. ROBINSON. I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Glass	McKellar	Sherman
Beckham	Gooding	McLean	Simmons

Mr. UNDERWOOD. I was requested by the senior Senator from South Carolina [Mr. SMITH] to announce that he is detained from the Senate on account of important business, and that he is paired with the Senator from South Dakota [Mr. STERLING]. I wish this announcement to stand for the day.

Mr. GERRY. I have been requested to announce that the Senator from South Dakota [Mr. JOHNSON] and the Senator from Oregon [Mr. CHAMBERLAIN] are detained from the Senate by reason of illness.

The VICE PRESIDENT. Fifty-nine Senators have answered to the roll call. There is a quorum present. The pending question is the motion of the Senator from Michigan.

Mr. ROBINSON. I move that the Senate proceed to the consideration of executive business.

The VICE PRESIDENT. The question is on the motion of the Senator from Arkansas that the Senate proceed to the consideration of executive business.

Mr. ROBINSON. On that motion I demand the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. TOWNSEND. Mr. President, a parliamentary inquiry. What are we voting on now?

The VICE PRESIDENT. On the question as to whether the Senate will proceed to the consideration of executive business.

Mr. KNOX (when his name was called). I transfer my general pair with the senior Senator from Oregon [Mr. CHAMBERLAIN] to the junior Senator from West Virginia [Mr. ELKINS] and vote "nay."

The roll call was concluded.

Mr. OWEN. I transfer my pair with the Senator from New Jersey [Mr. EDGE] to the Senator from California [Mr. PHELAN] and vote "yea."

Mr. HENDERSON. I have a general pair with the Senator from Illinois [Mr. MCCORMICK]. In his absence I transfer that pair to the senior Senator from Missouri [Mr. REED] and vote "yea."

Mr. FLETCHER. I have a general pair with the Senator from Delaware [Mr. BALL]. In his absence I transfer that pair to the Senator from Arkansas [Mr. KIRBY] and vote "yea."

Mr. STERLING (after having voted in the negative). I have a general pair with the Senator from South Carolina [Mr. SMITH]. I find that that Senator has not voted and, not being able to obtain a transfer, I am obliged to withdraw my vote.

Mr. MCCUMBER (after having voted in the negative). I have a pair with the senior Senator from Colorado [Mr. THOMAS]. Being unable to obtain a transfer, I withdraw my vote.

Mr. DILLINGHAM (after having voted in the negative). Has the senior Senator from Maryland [Mr. SMITH] voted?

The VICE PRESIDENT. He has not.

Mr. DILLINGHAM. I transfer my pair with the senior Senator from Maryland to the junior Senator from Maryland [Mr. FRANCE] and will allow my vote to stand.

Mr. FERNALD (after having voted in the negative). I find that the junior Senator from South Dakota [Mr. JOHNSON], with whom I am paired, has not voted, and I shall therefore have to withdraw my vote.

Mr. CURTIS. I have been requested to announce that the Senator from Wisconsin [Mr. LENROOT] is paired with the Senator from Tennessee [Mr. SHIELDS], and that the Senator from Indiana [Mr. WATSON] is paired with the Senator from Delaware [Mr. WOLCOTT].

The result was announced—yeas 35, nays 36, as follows:

YEAS—35.

Ashurst	Harris	Norris	Smith, Ga.
Beckham	Harrison	Overman	Stanley

NOT VOTING—25.

Ball	Johnson, S. Dak.	Newberry	Sterling
Chamberlain	Kendrick	Phelan	Thomas
Cummins	Kirby	Pomerene	Watson
Edge	La Follette	Reed	Wolcott
Elkins	Lenroot	Shields	
Fernald	McCormick	Smith, Md.	
France	McCumber	Smith, S. C.	

So Mr. ROBINSON's motion that the Senate proceed to the consideration of executive business was rejected.

Mr. ROBINSON. Mr. President, I ask leave to make just a one-moment statement. The Senate will have an opportunity very frequently hereafter to vote on a motion to proceed to the consideration of executive business until these nominations, and particularly the Army nominations, have been disposed of.

Mr. TOWNSEND. Regular order!

Mr. UNDERWOOD obtained the floor.

Mr. REED. Mr. President, I was engaged in committee work, and have just entered the Chamber. I wish to inquire if the vote is closed?

The VICE PRESIDENT. It has been closed, and the result announced.

Mr. UNDERWOOD. Mr. President, if the Senate will pardon me a moment, it seems from this vote that it is not the desire of the majority party in the Senate to have an executive session.

Mr. TOWNSEND. Mr. President, I shall have to insist upon the regular order, as I understand that there is a motion before the Senate which is not debatable.

The VICE PRESIDENT. It is not debatable. The question is on the motion of the Senator from Michigan [Mr. TOWNSEND] to refer this resolution to the Committee on Post Offices and Post Roads. It is not debatable until the morning business is closed.

Mr. FLETCHER. I call for the yeas and nays on that motion. Of course everyone understands that if the motion is agreed to——

The VICE PRESIDENT. The Chair will have to enforce the rule. There is no reason for this. The Chair did not make the rules.

Mr. FLETCHER. I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. ROBINSON. Mr. President, a parliamentary inquiry. The question recurs on the motion of the Senator from Michigan [Mr. TOWNSEND] to refer the resolution of the Senator from Florida [Mr. FLETCHER] to the Committee on Post Offices and Post Roads, and that motion is not debatable?

The VICE PRESIDENT. That motion is not debatable before the morning business is closed. The yeas and nays have been ordered. The Secretary will call the roll.

The reading clerk proceeded to call the roll.

Mr. DILLINGHAM (when his name was called). In the absence from the Chamber of the senior Senator from Maryland [Mr. SMITH], I transfer my pair with that Senator to the junior Senator from Maryland [Mr. FRANCE], and vote. I vote "yea."

Mr. FERNALD (when his name was called). I have a general pair with the junior Senator from South Dakota [Mr. JOHNSON]. In his absence I withhold my vote. If permitted to vote, I should vote "yea."

Mr. FLETCHER (when his name was called). I make the same announcement as to my pair and its transfer as before, and vote "nay."

Mr. HENDERSON (when his name was called). I have a general pair with the junior Senator from Illinois [Mr. McCORMICK]. In his absence I withhold my vote.

Mr. KNOX (when his name was called). Repeating the announcement of my pair and its transfer that I made at the time of the last vote, I vote "yea."

Mr. McCUMBER (when his name was called). I have a general pair with the senior Senator from Colorado [Mr. THOMAS]. I transfer my pair to the senior Senator from Utah [Mr. SMOOT], and vote "yea."

Mr. OWEN (when his name was called). I transfer my pair with the Senator from New Jersey [Mr. EDGE] to the Senator from California [Mr. PHELAN], and vote "nay."

Mr. POMERENE (when his name was called). Again announcing my temporary general pair with the senior Senator from Iowa [Mr. CUMMINS], I withhold my vote. If I were permitted to vote, I would vote "nay."

Mr. STERLING (when his name was called). Announcing my pair as on the last vote, I withhold my vote.

The roll call was concluded.

Mr. FALL. I have a general pair with the junior Senator from Wyoming [Mr. KENDRICK], and I withhold my vote.

Mr. CURTIS. I desire to announce that the Senator from Wisconsin [Mr. LENROOT] is paired with the Senator from Tennessee [Mr. SHIELDS]; and that the Senator from Indiana [Mr. WATSON] is paired with the Senator from Delaware [Mr. WOLCOTT].

The result was announced—yeas 37, nays 34, as follows:

YEAS—37.

Borah	Hale	McLean	Sherman
Brandegee	Johnson, Calif.	McNary	Spencer
Calder	Jones, Wash.	Moses	Sutherland
Capper	Kellogg	Nelson	Townsend
Colt	Kenyon	New	Wadsworth

Fernald	McCormick	Smoot	

So Mr. FLETCHER's resolution was referred to the Committee on Post Offices and Post Roads.

PROPOSED EXECUTIVE SESSION.

Mr. ROBINSON. I move that the Senate proceed to the consideration of executive business, and on that motion I demand the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. DILLINGHAM (when his name was called). I transfer my general pair with the senior Senator from Maryland [Mr. SMITH] to the junior Senator from Maryland [Mr. FRANCE] and vote "nay."

Mr. FALL (when his name was called). I have a general pair with the junior Senator from Wyoming [Mr. KENDRICK] and I withhold my vote.

Mr. FERNALD (when his name was called). Making the same announcement of my pair as before, I withhold my vote.

Mr. FLETCHER (when his name was called). I make the same announcement as to my pair and transfer as before, and vote "yea."

Mr. HENDERSON (when his name was called). Making the same announcement of my pair as before, I withhold my vote.

Mr. KNOX (when his name was called). Repeating my previous announcement, I vote "nay."

Mr. McCUMBER (when his name was called). I transfer my general pair with the senior Senator from Colorado [Mr. THOMAS] to the senior Senator from Utah [Mr. SMOOT] and vote "nay."

Mr. POMERENE (when his name was called). Again announcing my pair with the senior Senator from Iowa [Mr. CUMMINS] I withhold my vote. If I were at liberty to vote I would vote "yea."

Mr. STERLING (when his name was called). Announcing my pair as on the previous roll call, I withhold my vote. If at liberty to vote, I would vote "nay."

The roll call was concluded.

Mr. OWEN (after having voted in the affirmative). I find that the Senator from New Jersey [Mr. EDGE], with whom I have a pair, is not present, and I therefore withdraw my vote.

Mr. FLETCHER (after having voted in the affirmative). I find that the Senator from Arkansas [Mr. KIRBY], to whom I transferred my pair, has entered the Chamber and voted. I therefore withdraw my vote.

The result was announced—yeas 34, nays 36, as follows:

YEAS—34.

Ashurst	Heflin	Phelan	Stanley
Beckham	Hitchcock	Pittman	Swanson
Culberson	Jones, N. Mex.	Ransdell	Trammell

Fall	Kendrick	Smith, Md.	
Fernald	Lenroot	Smith, S. C.	

So the Senate refused to proceed to the consideration of executive business.

NOMINATIONS OF MILITARY AND OTHER OFFICERS.

Mr. UNDERWOOD. Mr. President, I desire to prefer a unanimous-consent request. If the Senate will be patient with me a moment, it will not take long to state it. There are a number of military appointments pending before the Senate which have not been referred to the Committee on Military Affairs and can not be confirmed. I am not sure whether all the Senators have carefully analyzed the situation with reference to the nominations.

Mr. LODGE. Will the Senator allow me to ask him a question, because I have been away?

Mr. UNDERWOOD. I will.

Mr. LODGE. Have any nominations been referred?

Mr. UNDERWOOD. I do not think they have been, but I know that these have not.

Mr. FLETCHER. There has been no executive session held at all.

Mr. LODGE. That is what I understood.

Mr. UNDERWOOD. So they could not be referred.

Mr. LODGE. I only wished it understood that it was not the military nominations alone that were not referred.

Mr. UNDERWOOD. Without an executive session there is no way to refer any appointments except by unanimous consent. If the Senate will pardon me for a moment, I should like to state the case, because some Senators may not understand it.

There are a large number of military appointments now pending before the Senate, in the office of the Secretary of the Senate, which have not been referred to the Committee on Military Affairs. I think they involve the commission of every officer in the Army, practically speaking; but in the list of appointments there are in the neighborhood of 6,000 young men who were appointed from the reserve of the National Guard to commands in the United States Army under the Army reorganization act, who won their spurs on the battle fronts of Europe, and many of whom were appointed because of their gallantry on the field of action. They have been designated, they have stood their physical and mental examinations, they have been named and received recess appointments.

I understand the act was passed June 4 last. At any rate, these men have been commissioned and are serving with their regiments. Theirs are recess appointments, and they will continue to serve up to the 4th day of March next. When that hour comes, if the Senate of the United States does not confirm their appointment, the men will be in the streets, and we will have stricken the epaulets from their shoulders by the nonaction of the Senate.

More than that, as I understand the law, we will have to pass another bill before they will be eligible for appointment again. Then there will have to be reexaminations and new commissions issued. I say it would be but little short of a crime for the Senate of the United States to sit here idly and say that they will not have an executive session, so that these men can be considered by the Committee on Military Affairs and an opportunity be given for their confirmation.

Now, I know what is the trouble. We might as well look things in the face. I am not trying to play politics. I know that the majority party does not want to confirm civil nominations. That is not a question I wish to go into, but I say that it would be a crime to strike down these soldiers of the United States because of a personal political battle.

I therefore ask unanimous consent that the military appointments which are now pending before the Senate and which have been sent here by the President be referred as in open executive session to the Committee on Military Affairs——

Mr. SWANSON. And that the naval appointments be referred to the Committee on Naval Affairs.

Mr. UNDERWOOD. And the naval appointments the same. My request is that the naval and military appointments that are now pending before the Senate, having been sent by the President, by unanimous consent as in open executive session be referred respectively to the Committee on Military Affairs for military appointments and to the Committee on Naval Affairs for naval appointments.

Mr. LODGE. I should like to ask, for information, whether the appointments to which the Senator from Alabama has been referring—and we all appreciate the hardship that might be created by failure to act—can be separated from the other military appointments?

Mr. UNDERWOOD. My request was for officers in the United States Army and officers in the United States Navy. There are no civil appointments involved in the request.

Mr. LODGE. I care nothing about civil appointments. I am talking now about Army and Navy appointments, without any reference to politics. There are certain appointments in the Army and also in the Navy which, I think, ought to be very carefully considered by the Senate, which stand on a different footing entirely from those which the Senator from Alabama has been describing. If they should go over none of the officers would lose their places or their positions.

Mr. UNDERWOOD. I presume the Committee on Military Affairs, which is controlled by the Republican Party, and the Committee on Naval Affairs, which is likewise controlled by the Senator's party, are not going to report nominations back to the Senate that should not properly be reported, but I do believe the great bulk of the appointments to which I have referred will be reported back to the Senate from the respective committees; and if we can not do it otherwise, it may be that some day we can agree to their confirmation by unanimous consent after the report is made.

Mr. LODGE. My purpose was one which I think the Senator from Alabama will approve. I should like, if it were possible, to separate those whom he has described and have them confirmed and disposed of; but I, for one, do not propose to submit, without some opportunity of examination and discussion, to some of the nominations of the highest officers of the Army which have been sent in, nor do I propose, if in any way I can prevent it, to have the bureaus in the Navy Department filled up within less than 60 days before a new administration comes in, and have those bureaus packed for four years, preventing and hampering action by the new administration and the new Secretary of the Navy.

Mr. UNDERWOOD. I will say to the Senator from Massachusetts that I have no objection from his point of view. If the Democratic Party were coming into power, I think it should control the executive bureaus that do the thinking. I have no desire to resist the proposition that when his party comes in power the President whom his party has selected should select his own executive heads. I have no desire in that matter, but I assume that the Republican Party can trust its own committee, and that if the nominations are sent to the committee they will withhold the nominations that are not proper to come before the Senate.

All I am trying to do is to give an opportunity for the committee, without any partisan fight, without being mixed up in politics, to consider the nominations of deserving military men who won their epaulets on the battle field, and not let the Senate strike them off on the 4th of March by inaction.

Mr. LODGE. What I am seeking to do is, if it is possible, to come to some arrangement with the Senator from Alabama by which we can confirm the men he describes, whom we all desire to have confirmed. The division on the other appointments, which would not be affected if they went over, is not a political division at all.

Mr. UNDERWOOD. If my proposition does not suit the Senator from Massachusetts, may I ask him to suggest an amendment?

Mr. LODGE. I should like to come to some agreement by which we can confirm the four or five or six thousand men who, if not confirmed before the 4th of March, would be, as the Senator said, on the street and lose their epaulets, and it would then all have to be done over again.

Mr. ROBINSON. Mr. President, will the Senator from Alabama yield to me?

Mr. UNDERWOOD. Certainly.

Mr. ROBINSON. I understand the request of the Senator from Alabama to be that the military nominations and naval nominations, respectively, as in open executive session, be referred to the appropriate committees. If the request is agreed to, it will enable the Committee on Military Affairs and the Committee on Naval Affairs of the Senate to take any action respecting the nominations referred to them that the committees may see fit to take. The Senator from Massachusetts will then, of course, have an opportunity to effect an arrangement as to the elimination of officers whose promotion he does not approve of and the nominations of those whom he does not think should be confirmed. What I am trying to suggest is that an agreement to the suggestion made by the Senator from Alabama will facilitate compromise rather than prevent it.

Mr. LODGE. It seems to me we could make the agreement now, to select those whom the Senator wishes to have confirmed, and get those out of the way first before going on with others.

Mr. ROBINSON. If the Senator will pardon a further suggestion, he remarked a while ago that he thought certain of the nominations of the higher grades ought to be very carefully considered by the Senate before action is taken. I think the Senator will agree with me that the Senate ought not to reject the nominations or take action which will result in a prevention of their confirmation without a fair consideration of them. The Senate ought not to act arbitrarily in the matter. Opportunity ought to be afforded so that the committees, which are in control of the party of which the Senator from Massachusetts is leader, can and will give fair consideration to the respective nominations referred to them, and they in all probability would not report any nomination objected to by the Senator from Massachusetts.

Mr. NORRIS. Mr. President, will the Senator from Alabama yield to me?

Mr. UNDERWOOD. I yield.

Mr. NORRIS. I should like to suggest to the Senator from Alabama and also the Senator from Massachusetts, the two respective leaders, that the agreement ought not to be confined, if it is made, to men in the Navy or Army departments. I do not have here in the Chamber two letters that are on my desk in my office, but they explain very fully a disastrous condition which would exist in the Patent Office if Congress adjourns without confirming the nominations for Commissioner of Patents and First Assistant Commissioner of Patents.

The Commissioner of Patents, as all know, resigned, I think, last July, and the President has nominated the Assistant Commissioner of Patents to be Commissioner of Patents. He has nominated the First Assistant Commissioner as Assistant Commissioner, and so on down, so that he has, by his nominations, promoted men who are in the office. Under the law controlling the Patent Office, if some one or more of the officials mentioned are not confirmed before the 4th of March there will be nobody who will be qualified to sign a patent until the incoming President shall nominate and the Senate shall confirm some one who will have that authority. Under the law the result will be that thousands of patents will probably become invalid, and the validity of a great many others will be brought in doubt.

Now, I think that if there is going to be an agreement it ought to include such cases as those. There is not in the appointments, to which I have referred, any politics, but they are merely promotions in the office. Undoubtedly the incoming President would appoint the same men that President Wilson has appointed, but before the 4th of March they must either be confirmed or disaster will be the result in the Patent Office.

Mr. UNDERWOOD. Mr. President——

Mr. LODGE. Mr. President, if the Senator from Alabama will excuse me, I desire to say that the President could send in the Patent Office nominations at the same time he sends the nominations for his Cabinet. That presents an entirely different case from that involved in the nomination of Army officers.

Mr. UNDERWOOD. I will say to the Senator from Nebraska [Mr. NORRIS] that I am not complaining about the majority party in the Senate not confirming all civil appointees; I make no complaint about that. I should like to see confirmed the nominations of men who have been appointed from the Democratic Party, of course, but the side of the Senator from Massachusetts have the responsibility and I am not complaining about them exercising it.

I have no doubt that there are civil appointments which, for the good of the Government, ought to be confirmed before the 4th of March; and that is the reason we have moved an executive session. After two votes, however, it is clearly indicated that the party in control is not going to have an executive session. I think the Senator from Nebraska voted against the motion for an executive session, during which we could have referred the nominations referred to by him to the committee.

Mr. NORRIS. I should like to correct the statement of the Senator from Alabama. I voted for an executive session.

Mr. UNDERWOOD. I beg the Senator's pardon, and thank him for having done so. It was my mistake in supposing that he had voted against an executive session; but, at any rate, a majority of the Senate has voted the other way.

Now, I am trying to eliminate the question of party politics. I think the officers in the Army and in the Navy ought to stand above party politics; I do not think this disaster should happen to the country; and I am merely asking unanimous consent that the military appointments may go to a committee controlled by the party of the Senator from Massachusetts. It is not necessary for them to be reported to the Senate. I take it that the Senator from New York is not going to report back to the Senate for confirmation any of the military appointments which do not meet with his approval or with the approval of his party. Therefore, I can not see any reason why his committee should not have the right to exercise its judgment and discretion and act upon the appointments. I think the request is reasonable. There is no party politics in the matter and no party offices are involved. So I think the majority party ought to consent to the proposal.

We on this side of the Chamber are not asking those on the other side to go into an executive session where we might insist on the confirmation of civil appointments; I am asking it in a way in which the other side are committed to nothing except a consideration of military appointments by unanimous consent. I think if you fail to grant that request, on you must rest the responsibility of striking down these Army officers.

Mr. WADSWORTH. Mr. President, will the Senator from Alabama yield to me?

Mr. UNDERWOOD. I yield.

Mr. WADSWORTH. The question was asked a moment ago by the Senator from Massachusetts [Mr. LODGE] whether or not it would be possible to separate the nominations for promotions in the Army from the nominations to fill original vacancies or vacancies created by the act of Congress; in other words, could the officers who are nominated merely for promotion be separated from the class of officers to which the Senator from Alabama has referred. I think I ought to say that can be done.

The officers to whom the Senator from Alabama has referred are officers who have been nominated to fill original vacancies, created by the act of Congress. Those original vacancies have to be filled in a certain way under the law. The law reads that at least 50 per cent of those vacancies must be filled by the appointment of men who saw service during the World War, to put it briefly, and that the remaining vacancies shall be filled in the ordinary way by the promotion of officers already in the service prior to that time. It would, therefore, be entirely possible to separate the 5,500 or 6,000 officers who have been nominated to fill original vacancies in the service from all the others.

Mr. FLETCHER. Why should not the committee do that?

Mr. UNDERWOOD. I think, Mr. President, that the committee should do it, but I think our duty to the men who won those commissions on the firing line is such that we ought to give them a chance to be confirmed. If the members of the majority party are not willing to confirm them and refer the nomination of the other officers of the United States Army to the committee, so that their nominations may be acted on, then I am willing to consent to a modification of my request to refer to the committee by unanimous consent as in executive session the original appointments of officers who were not in the Regular Army heretofore. I will be glad if the Senator from New York [Mr. WADSWORTH] will frame the language so that it will cover the case, as he is more familiar with the matter than am I.

Mr. LODGE. Then, the request would be to refer to the committee the nominations of officers who have been appointed to fill original vacancies.

Mr. UNDERWOOD. Will that cover the class of officers I have indicated?

Mr. WADSWORTH. "Nominations for original appointments in the Army" will cover it.

Mr. ROBINSON. I think, if the Senator pleases, that the War Department uses the term "new appointments." I think that is the correct language.

Mr. WADSWORTH. The phrase "new appointments" covers it.

Mr. LODGE. "New appointments to original vacancies."

Mr. UNDERWOOD. I think that will cover it.

Mr. LODGE. Mr. President, let us get the language correct. I understand that the chairman of the committee says the term "original appointments" will cover it.

Mr. UNDERWOOD. "New appointments."

Mr. WADSWORTH. "Original appointments in the Army."

Mr. LODGE. Then, let the request read "that the original appointments in the Army——"

Mr. UNDERWOOD. "Now pending before the Senate——"

Mr. LODGE. "Now pending before the Senate be referred to the Committee on Military Affairs."

Mr. UNDERWOOD. "As in open executive session."

Mr. LODGE. "As in open executive session." To that I have no objection, Mr. President.

Mr. ROBINSON. Of course, I shall not object to the request, but I wish to make a brief statement, and to lay before the Senate——

Mr. WILLIAMS. Does this proposition include appointments in the Navy?

Mr. LODGE. It does not touch the Navy at all. There are no original appointments of this kind in the Navy.

Mr. ROBINSON. Mr. President, I still think that the request as originally submitted by the Senator from Alabama [Mr. UNDERWOOD] would conserve every interest and would be a fairer proposition than as modified.

There are 9,783 nominations in the Army pending before the Senate. Of that number, 964 are nominated for transfer from one arm of the service to another in accordance with the law which authorizes such transfer, and it is very important that those 964 nominations be considered, for the reason that a number of comparatively new arms of the service have been created, of which, I have no doubt, the Senator from Massachusetts approves.

Mr. LODGE. The nominations referred to by the Senator from Arkansas are for bureau appointments.

Mr. ROBINSON. Those new arms of the service include especially the Aerial Service and the Chemical Warfare Service. The only way these services can receive the necessary men is by transfer, and I do not think there can be any objection to those 964 nominations going along with the others.

Mr. LODGE. Mr. President, those are the nominations in which I personally have very strong objection. They embrace the transfer of officers to fill bureau positions, which would put the whole machinery of the War Department, within 60 days of the advent of the new administration, in the hands of men already picked out by somebody else; I do not think that would be fair.

Mr. ROBINSON. If the Senator will pardon me, the transfers are made in accordance with law and for the purpose I have already stated, of filling the new services, being in that respect something in the nature of emergency appointments.

In the next class there are 3,285 of the total number of pending nominations, all of which, except the nominations for major general and brigadier general, are strict seniority promotions.

I hope the Senator from Massachusetts will give his attention to the statement I am making, because it contains detailed information regarding the character of these nominations. I have referred to the 964 nominations which are in the class of transfers to which the Senator says he objects.

The next class are promotions in the Army, of which there are 3,285, and all of these, except the promotions to the rank of brigadier general and to the rank of major general—and of the class of major general there are 11, and of the class of brigadier general there are 22—are made strictly in accordance with the rules of seniority and according to law. I apprehend that the Senator from Massachusetts would not object to those nominations, which are made according to the rule of seniority, going to the committee.

Mr. LODGE. Mr. President, will the Senator allow me to interrupt him?

Mr. ROBINSON. I yield.

Mr. LODGE. In this matter we have got to provide for promotions in the higher rank before we can act upon the promotions in the lower rank, and the promotions in the higher rank are the ones to which I object.

Mr. ROBINSON. I understand that within the grades of major general, and perhaps brigadier general, there are some nominations to which the Senator from Massachusetts objects. Let me speak about that for a moment briefly.

Mr. LODGE. We can not promote those below unless we promote the ones above.

Mr. ROBINSON. The whole 3,285 perhaps do not depend upon the higher grade nominations. If, however, the Senator's statement is correct, all these nominations should be confirmed.

I wish to call the attention of the Senate briefly to the nominations for major general, of which there are 11. In that number are comprised the following officers:

Maj. Gen. James W. McAndrew, chief of staff of the American Expeditionary Forces in France.

There is no one who would object to the distinction that it is sought to confer upon him.

Maj. Gen. Henry T. Allen, now commanding the American Forces in Germany.

Maj. Gen. David C. Shanks, corps commander First Corps Area, and during the period of active hostilities commanding general of the port of embarkation at New York.

Maj. Gens. Adelbert Cronkhite, George W. Read, Omar Bundy, William M. Wright, Charles H. Muir, Charles T. Menoher, and William G. Haan.

That comprises the list of major generals.

All of the men in this list, with the exceptions of Gen. McAndrew and Gen. Shanks, were corps commanders in the Army in France; that is to say, having distinguished themselves as division commanders they were selected by Gen. Pershing for higher command, and the armistice found them each in command of from 60,000 to 100,000 or more men.

The list of brigadier generals nominated comprises 22. That list was selected by a board from a list of eligibles prepared under the provisions of the act of June 5, 1920, which I believe is the Army reorganization act, by a committee consisting of Gens. Liggett, Dickman, Bullard, Harbord, and Summerall. All the remainder of the Regular Army promotion nominations are automatic and in due course of law.

The remainder of the pending nominations—and this refers now to the class specifically in the mind of the Senator from Alabama and the class whose nominations would be referred to the Committee on Military Affairs—the remainder of the pending nominations, numbering 5,534, cover officers in all grades from colonel to second lieutenant, which are new appointments in the Army. All of them were in the emergency Army and they were selected by a board of which Gen. Pershing was chairman, in strict accordance with the Army reorganization act of June 5, 1920. Applications were limited to those who had held emergency commissions and seen service during the World War. Each applicant was examined physically and mentally, and his service record was also made an essential part of the basis of selection. The Army reorganization act further provides that the Pershing Board could not select any emergency officer for permanent appointment without the approval of the chief of the arm in which the applicant desired to serve.

In all probability that provision is responsible for the rejection of many applicants who in the minds of Members of the Senate deserved promotion. I refer to the provision forbidding the commission of men except with the approval of the chief of the arm in which the applicant desires to serve.

So that as to each of these 5,534 men all of these requirements have been gone through. Neither the President nor the Secretary of War has had any right to interfere nor has attempted to exercise any such right. The whole list is the direct product of a mode of selection set out in the Army reorganization act passed by the Republican Senate and House, committing the selection of officers for permanent appointment in the Army to a board of Army officers with Gen. Pershing as its head.

These 5,534 officers, upon their selection, were given recess commissions, and their names sent to the Senate for permanent appointment. The law required all emergency commissions to terminate on or before December 31, 1920. These 5,534 men were therefore given recess commissions and permanent offices and distributed throughout the Army, where they are now doing duty and exercising command. They are scattered all over the world, being in the Philippine Islands, Hawaii, Panama, Porto Rico, Coblenz, and in every part of the United States. They have, of course, completely separated themselves from their former civilian pursuits, given up their professional and business relations, and moved with their families to military reservations and posts. If the pending nominations are not confirmed before the adjournment of the Senate on March 4, all Regular Army officers whose promotional appointments are pending will revert to their former Regular Army status, with consequent loss of pay and rank. The entire 5,534 officers whose permanent appointments from civil life have been recommended by the Pershing Board and are now pending will cease to be members of the Army and become civilians; that is to say, their pay will stop and they will be left with their families wherever they are, without even the right to draw mileage to return to the place of their former residence. As they have given up their civilian connections in reliance upon the appointments offered them in the Army, they will be wholly without means of support unless they have independent incomes.

It has been suggested that after the inauguration President Harding could take up the list of recommendations from the Pershing Board, make certain changes in it, and send it into an extra session of the Senate called for the purpose of confirming executive nominations. This is legally true. Any attempt, however, to remake this list would necessarily involve delay, and if it became known that it was the intention of the Executive to change the list from the recommendations as made by the Pershing Board, pressure of all sorts would undoubtedly be brought on the President and the Secretary of War, which would require a considerable amount of time to meet. During all this time these officers would be out of the service, the Army would be without officers in many important commands, vast quantities of public property under the control and in the custody of these officers would be without proper protection, and undoubtedly many of the men thus defeated of their expectation of confirmation would at once seek to establish themselves in some civilian pursuit and become unavailable for further consideration.

It thus appears that all of the nominations now pending before the Senate, with the exception of those to the office of major general and brigadier general, are the direct fruit of processes established in the Army reorganization act which was, of course, passed by the Republican Senate and House; that they in no case represent any Executive action by the President or the Secretary of War, and that the inconvenience resulting from nonconfirmation threatens serious disorganization in the Army, the exposure of vast public property to inadequate control and custody, and, in many instances, tragic consequences to men who served in the Army in France and who have given up all opportunities in civil life in reliance upon appointments tendered them strictly in accordance with the Army reorganization act.

While I shall not object to the suggestion for unanimous consent as modified, I do think it ought to embrace all nominations, and that the appropriate committees of the Senate ought to have an opportunity to pass upon those nominations. If all the promotions are dependent upon nominations to the higher grades, then let us confirm all the nominations rather than cause confusion and injustice.

Mr. UNDERWOOD. Mr. President, I am in thorough accord with what the Senator from Arkansas [Mr. ROBINSON] has just said. I think that all these nominations ought to go to the committees, and at a later date I shall be glad to join with the Senator from Arkansas and try to secure action; but these cases are so important, because these are the men that will go to the street if their nominations are not acted on, that I am going to renew the request, and in this language:

That as in open executive session all nominations for original appointments in the Army now held in the executive office of the Senate be, and the same are hereby, referred to the Committee on Military Affairs; and that all nominations for original appointments in the Navy thus held be, in like manner, referred to the Committee on Naval Affairs.

Mr. ROBINSON. Perhaps there will be no objection to confirming those nominations. I merely make that suggestion.

Mr. LODGE. I do not object to the request as offered.

Mr. NORRIS. I should like to have the Senator include in his request that the nominations for Commissioner of Patents, Assistant Commissioner of Patents, and First Assistant Commisioner of Patents be referred to the Committee on Patents in the same way.

I want to read to the Senate, as I said when I interrupted the Senator a while ago, a couple of letters.

Mr. FLETCHER. May I ask the Senator if he will not make that as a separate request, and let this stand as it is now, and then bring up that matter subsequently?

Mr. NORRIS. All right. If this is going through without any objection, I will make my request separately. I want, however, to be heard long enough to read these letters.

The PRESIDING OFFICER (Mr. PHIPPS in the chair). Is there any objection to the request for unanimous consent submitted by the Senator from Alabama [Mr. UNDERWOOD]? The Chair hears none, and it is so ordered.

The order as agreed to is as follows:

Ordered, That as in open executive session all nominations for original appointments in the Army now held in the executive office of the Senate be, and the same are hereby, referred to the Committee on Military Affairs; and that all nominations for original appointments in the Navy thus held be, in like manner, referred to the Committee on Naval Affairs.

Mr. NORRIS. Now, Mr. President, I ask unanimous consent that, as in open executive session, the nominations made by the President for Commissioner of Patents, Assistant Commissioner of Patents, and First Assistant Commissioner of Patents be referred to the Committee on Patents; and in that connection I should like the attention of the Senate.

I want to say that the condition in the Patent Office was called to my attention by the ex-Commissioner of Patents and a committee representing the bar of patent attorneys in the city of Washington, and I asked them to submit in writing the proposition that they wanted me to take up with the Senate. It is in answer to that request of mine that these two letters were written.

The first one is from ex-Commissioner of Patents Newton, who writes me in a letter dated January 12, 1921, as follows:

Hon. GEORGE W. NORRIS,
United States Senate, Washington, D. C.

MY DEAR SENATOR NORRIS: In response to your request I am making the following statement with respect to the conditions in the Patent Office:

I resigned as Commissioner of Patents in July, 1920. In August the first assistant commissioner was appointed commissioner and the assistant commissioner was appointed first assistant commissioner. Subsequently a new assistant commissioner was appointed. As these were all recess appointments the appointees can hold thereunder no longer than the end of the present session of the Senate. These gentlemen were subsequently nominated, but the nominations have not been confirmed. If none of these are confirmed before March 4 there will, therefore, after March 5 be no commissioner or assistant commissioner in the Patent Office until their successors can be appointed and confirmed.

The statutes require (sec. 4883, R. S.) that all patents be signed by the Commissioner of Patents and that (sec. 4885, R. S.) every patent shall issue within three months from the date of the payment of the final fee. Under the rules of the Patent Office patents are issued on each Tuesday. As it is necessary to make a photolithographic copy of the drawing, print the specification, which copies form part of the patent, and to put a cut taken from the drawing in the Official Gazette, there is about a 4-weeks' interval between the payment of the final fee and the issuance of the patent. It thus appears that patents are all the time in the course of preparation.

March 1 is an issue date, and the patents which will have been prepared and dated as of that day can be signed by one of the present officials.

If none of the present officials are confirmed, there will be no one who will be authorized to sign the patents which have been prepared and dated as of the issue of March 8, 15, etc., until a new commissioner has been appointed and confirmed. It would seem to be highly improbable that he would be so appointed and confirmed by March 8. If there were no one authorized to sign the patents thus prepared, it would necessitate either signing these patents subsequently or destroying these papers and reprinting them. The first alternative would raise a very serious question as to the validity of the patents, and the second would involve the Government in a very great expense, since there are something like 800 patents issued each week. The second alternative will also raise the question of the validity of many of the patents, either because the issuance had been delayed by request until the end of the three months after the payment of the final fee or because of the issuance between the date originally prepared for issue and the date on which the patent is actually issued of the corresponding foreign patent on an application filed more than 12 months before the application was filed in this country.

The statutes also provide (sec. 892, R. S.) that copies of the records of the Patent Office certified to by the Commissioner of Patents or the acting commissioner shall be evidence in all cases in which the originals would have been evidence. The delay in furnishing such certified copies might be very prejudicial in cases where it is necessary to file such copies in the foreign countries, and in cases in the Federal courts and appeals from the Patent Office to the Court of Appeals of the District of Columbia.

It is hoped that either the commissioner or an assistant commissioner may be confirmed and this threatened irremediable injury to a large number of patentees be prevented.

Very sincerely, yours, J. T. NEWTON.

Mr. President, the bar association of patent attorneys in Washington, as I said, were requested by me to submit in writing their statement of the conditions, and on January 12 Mr. Browne, as chairman of the committee of the bar association, sent me this communication:

Referring to the recent interview had with you by a number of gentlemen interested in the work of the Patent Office—

I want to say that a delegation of 10 or 12 men waited on me, calling my attention to what they thought was a very serious condition that might occur—

I wish to call your attention to the present situation as to the commissioner and the two assistant commissioners of that office. These gentlemen were nominated by the President in the interval between the first and second sessions of the present Congress and have not been confirmed. If not confirmed, their tenure of office will cease and determine at noon on March 4, 1921. This will leave the Patent Office without an official head, a condition which will, temporarily at least, paralyze that office, there being no one in authority to sign the patents, which under the law are required to be issued weekly, or to sign certificates certifying to the correctness of copies, or to do any of the numerous acts daily required by an authorized head of the said office.

I should like to have the Senate pay particular attention to this:

The appointees referred to are all men who have come up through the various minor positions of the office, and who owe their appointments to ability and not to political favor or as reward for party service. Their commissions run during the pleasure of the President and are not under the tenure-of-office act. So far as the writer knows, they do not expect to remain in office during the incoming administration, but if confirmed, will hold their offices subject to the pleasure of the new Executive.

The writer can not close this communication without an additional note relative to Mr. Whitehead, the present commissioner. He has known him for many years—in fact, since his appointment as assistant examiner—and after an experience of 35 years and a knowledge of the various Commissioners of Patents who have held office during that period, can certify to the fact that he is one of the most intelligent, industrious, faithful, and competent officials who have ever held that office.

There has never been a time in the history of the Patent Office when it has been more essential that it should have as its head a man who by long experience therein is conversant with the patent practice and skilled in the patent law, and unless the question of patronage is to engage the attention of the incoming administration to the exclusion of far more important domestic matters and far less important foreign matters, the public service could not, in the judgment of the writer, be better served than by permitting the present incumbent to remain as head of the Patent Office until such time at least as the incoming Executive shall have time to carefully consider the selection of a proper successor.

In view of the existing conditions, the writer has been authorized to present this communication to you, and to ask that you urge the confirmation of the present Commissioner and Assistant Commissioners of the Patent Office, in order that the hiatus which will otherwise occur on March 4, 1921, with the resulting confusion and cessation of the executive duties of the Patent Office may be avoided.

Very respectfully,

F. L. BROWNE,
Chairman Committee on Affairs within the Patent Office, American Patent Law Association.

Mr. LODGE. Mr. President, I would like to ask the Senator if he would not be willing to allow this matter to go over, because there are some other cases of a similar character, one in the Pension Office, and one that I know about myself, the case of an Assistant Secretary in the State Department. If there is such necessity in offices of that character, they ought to be brought before the Senate for decision; but I should like to have an opportunity myself to look at them, with the others of which I know.

Mr. NORRIS. I very gladly accede to the Senator's request. I realize that it will be some time yet before the 4th of March; but I wanted to call the attention of the Senate to this particular instance. I have no doubt but that these gentlemen have correctly outlined the situation. I am not a patent lawyer, and am not familiar with these statutes; but these men called on me, and I was impressed with the fact that, as far as I was able to see, they were not moved by any selfish motive whatever. They are patent attorneys, it is true, except one of them, the ex-commissioner, and they are of course interested; but they have a knowledge of the conditions there, and at my request they put their statement in writing.

Mr. POMERENE. Mr. President——

The PRESIDING OFFICER (Mr. BRANDEGEE in the chair). Does the Senator from Nebraska yield to the Senator from Ohio?

Mr. NORRIS. In just a moment. I want to finish this while I am on my feet. My own personal idea is that the Senate of the United States ought to proceed with nominations which President Wilson has sent here, just the same as though President Wilson had been reelected to office. If his nominations are good they should be confirmed; if not they should be rejected. I realize that I am in the minority, both on this side and on the other side, probably the only Senator who thinks that way. I am not trying to urge my view, but I wanted to take this opportunity to state fairly what I believed was right. The only objection to this viewpoint I have heard has been that eight years ago the Democrats did what the Republicans are doing now, and that is given as a precedent. That may be a sufficient precedent, but to me it has no appealing force whatever. I am not willing to base my action as a Republican upon an action taken by the Democratic Party, which I condemned myself eight years ago; and as far as I know, nearly all Republicans, and a good many Democrats, condemned it. I thought it was ill-advised, and that they were doing a silly thing, and I do not want to put myself in a position now of doing the same thing myself which I condemned in somebody else. That is all I care to say. I realize, as I said, that I am very much in the minority and I may be entirely wrong, but that is my view.

Regardless of that, however, there are some instances like this one; and, as the Senator from Massachusetts has said, there may be a great many others which ought to be taken up, and the country will suffer if we do not take them up.

Now I yield to the Senator from Ohio.

Mr. POMERENE. Mr. President, I do not know the nominees for Patent Commissioner and for first and second assistant

commissioners. I do not know whether they are Republicans or Democrats.

Mr. NORRIS. Neither do I, I will say to the Senator.

Mr. POMERENE. But it seems to me that the writers of the letters which the Senator has just read have made out their case, and I wanted to make this suggestion, coming, as I do, from an industrial State, that I am constantly having letters speaking of delays and other troubles in the Patent Office. I can not pass judgment upon those things, but I am familiar enough with them to say that if having men confirmed is going to expedite the business, at least let our course be such that there will be no vacancy there. I am convinced that in the interest of industrial America this ought to be done. I have no interest whatever in these candidates.

Mr. NORRIS. I would like to say to the Senator that it will not expedite matters in the Patent Office, excepting in so far as it will prevent congestion and confusion. There is another bill, which is now in conference—which the conferees will probably report, if they can agree—which will expedite the business, and I want to call the Senator's attention to it. I would like to have his prayerful consideration of it when it comes up.

Mr. POMERENE. It seems from the letters which the Senator has read that if the men are not confirmed it will result in delay. That is why I am making these observations.

Mr. NORRIS. If we do not confirm them, it will result in delay, confusion, and much damage.

Mr. FLETCHER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Florida?

Mr. NORRIS. I yield.

Mr. FLETCHER. I want to correct the Senator from Nebraska in regard to the precedent which I think he rather too broadly claims was set by the Democrats in 1913. I hold in my hand the index to the Executive Journal. I find that the Senate on March 1, 1913, confirmed various appointments. I think all of the nominations in the Public Health Service, the Treasury Department, the Diplomatic and Consular Service, and in the Army and the Navy were confirmed. Those were all confirmed in 1913, before the new administration went in.

Mr. NORRIS. Mr. President, I want to say that I do not think I have stated it too broadly. The Democrats in the Senate filibustered against appointments in the short session when President Taft was President. I was elected to the Senate eight years ago, and I came over from the House several times, and when a motion was made from the Republican side to go into executive session I saw the Democrats scurrying through the Senate doors like a lot of frightened quails. Later a lot of confirmations were had; but they were had by an agreement with the Democratic Senators on the other side of the Chamber, and nobody was confirmed, as I understand it, unless he did get the O. K. of the Democrats. So, while I stated it correctly, to my mind that does not affect me or my vote. I am not going to do what I believe to be wrong because the Democratic Party has done a similar thing. If I did, I would be doing wrong all the time.

Mr. FLETCHER. I am simply trying to prevent the Senator from putting the Democratic Party in an erroneous position. That is not the record. The record is that every one of the nominations in the Public Health Service, in the Consular Service, and in the Army and the Navy was confirmed.

Mr. NORRIS. But that was because the Democrats did not object to those particular confirmations.

Mr. FLETCHER. Of course they did not object to them.

Mr. NORRIS. There were not any postmasters confirmed.

Mr. FLETCHER. They could have confirmed them if they had seen fit to do so.

Mr. NORRIS. Although I was not a Member of the Senate at that time, on several occasions when I came over here and was in the Chamber, when a motion was made to go into executive session I saw what happened. Anybody could see what was going on. There was a filibuster on. There is no other name for it.

Mr. LODGE. Mr. President——

The PRESIDING OFFICER. Does the Senator yield to the Senator from Massachusetts?

Mr. NORRIS. I yield.

Mr. LODGE. Mr. President, I happened to be alive and in the Senate in 1913, when the Democrats declined to allow any nominations of any consequence to be passed. We confirmed certain routine appointments, both in the Army and the Navy. They were trifling in number; they were not in number anything like what we have now. We confirmed some others. There were a certain number confirmed. It was done by agreement. The Democrats took the ground, which I think they had a right to take, that they were not going to permit the confirmation of any appointees to hold office through the incoming administration or hamper that administration in any way by forestalling the right of the President elect to fill certain offices. I think they had a good argument. I think they perhaps carried it rather far, and there is always danger of such things being carried too far. We have already made an exception to-day, which I think a very sensible one, and I dare say others will be made.

But the real reason for this is that no party, if it can help it, is going to permit a new administration to come into power and find all the bureaus in the War and Navy Departments, for instance, occupied for the next four years. The new administration is entitled to have assistants of its own selection and who are in sympathy with it. If there are great masses of appointments to routine offices which can be gotten out of the way, I think it highly probable we can find some method of doing it. As for the filibustering, of course, there was enough filibustering to show that we could not confirm anyone, and then it was abandoned.

Mr. NORRIS. That is, the attempt to confirm was abandoned.

Mr. LODGE. The attempt to confirm was abandoned.

Mr. NORRIS. The filibuster was not abandoned.

Mr. LODGE. The filibuster was not abandoned.

Mr. DIAL. Mr. President——

The PRESIDING OFFICER. Does the Senator from Massachusetts yield to the Senator from South Carolina?

Mr. LODGE. I do.

Mr. DIAL. The Senator from Massachusetts has spoken of routine offices. I would suggest that the Senate consider letting the nominations for postmasters go before the proper committee. The committee probably would not report all of them back, but possibly a great number of them could be confirmed.

Mr. LODGE. I think we shall be able to follow with entire safety the Democratic precedent in the matter of post offices.

Mr. FLETCHER. If the Senator will allow me, he said only a few unimportant appointments were confirmed by agreement. I can not quite reconcile that with the document I hold in my hand.

Mr. LODGE. We confirmed the very ones the Senator speaks of. We confirmed consuls, for instance, moved from one grade to another, as I remember. I do not recall that we confirmed any new consuls.

Mr. FLETCHER. We confirmed appointments in the Public Health Service.

Mr. LODGE. I do not think we did. Those, again, were routine appointments, in due course of promotion, to be made under any administration at any time. There were none of them political, none of them outside legal arrangements, as far as I remember, unless some few by unanimous consent.

Mr. FLETCHER. That may be true. I am not saying they were political; but I am claiming that these nominations which were sent in—for instance, here is the list——

Mr. LODGE. Certainly, they were sent in. I just said so.

Mr. FLETCHER. Were confirmed on March 1. Here is a list covering page after page.

Mr. LODGE. I know it. I was there. I saw it done. I talked with Senators on the other side and tried to make an arrangement for confirmation, as we have arranged to-day to confirm some five or six thousand officers in the Army. I am aware it was done. I was stating the reason for the action of the Democrats at that time, which I did not think as empty and without force as the Senator from Nebraska thought.

Mr. GERRY. Mr. President——

The PRESIDING OFFICER. Does the Senator from Massachusetts yield to the Senator from Rhode Island?

Mr. LODGE. I do.

Mr. GERRY. The Senator said just now that he thought we would be safe in following the precedent set by the Democrats in regard to post offices.

Mr. LODGE. I have not looked that up, but——

Mr. GERRY. I hope very much he will do that in Rhode Island, because the Senate confirmed a Republican postmaster in the biggest post office, namely, the city of Providence, in 1913.

Mr. TOWNSEND. Was not that the home of a Senator?

Mr. LODGE. That was the home of a Senator.

Mr. GERRY. No.

Mr. LODGE. Yes, Mr. President.

Mr. GERRY. As I understand, it was not the home of a Senator. My recollection is that Senator Lippitt claimed Cumberland as his home.

Mr. LODGE. There was another Senator here from Rhode Island at that time.

Mr. TOWNSEND. My understanding is that we did vary the rule, and in many instances we permitted the confirmation of the postmaster in the home town or city of a Senator.

Mr. GERRY. And you intend to follow that precedent now?

Mr. TOWNSEND. The committee has not had time to act upon it.

Mr. GERRY. Exactly.

Mr. NORRIS. Mr. President, I have not formally withdrawn the request that I have pending for unanimous consent. I want to say that at the request of the Senator from Massachusetts I shall withdraw it, and I want to notify the Senator that at some future date, before the 4th of March, if some other course is not pursued by the Senate I shall renew the request. I would like to have Senators who have heard the letters read remember them when the request is renewed. I understand that there are some other places in the public service which are in practically the same condition the Patent Office is in, and there probably will be other requests for similar action.

The PRESIDING OFFICER. The hour of 2 o'clock having arrived the Chair lays before the Senate the unfinished business, which will be stated.

The ASSISTANT SECRETARY. A bill (H. R. 15130) making appropriations for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1922, and for other purposes.

Mr. POINDEXTER. Mr. President, referring for a moment to the subject which has just been under discussion with regard to the confirmation of appointments, I agree in general with the position taken by the Senator from Massachusetts [Mr. LODGE] that appointments which involve policies of the Government should be most carefully scrutinized, at least before any action is taken upon them at the close of an administration. There are some exceptions, however; for instance, the nomination for the position of commandant of marines.

There is no trace of political character in that office. There has been nominated for it a very distinguished officer of the marines, Gen. John J. Lejeune, and with the discrimination which the Senate should exercise in performing its constitutional function of advice and consent to nominations made by the President of the United States it seems to me that some recognition ought to be given to the war services rendered by this officer.

As I am informed, Gen. Lejeune is a purely military man and is immersed in his profession. He rendered brilliant service in the war at the front in command of one of the divisions of the American Army. He ought not to be subjected to the humiliation of having a nomination for an important post defeated merely because of some general policy which has been adopted by the majority in the Senate.

From July 29, 1918, to August 9, 1919, he commanded the Second Division of the American Expeditionary Forces, which included the marines. During August, 1918, his division held the front-line sector south of Metz. In September, 1918, he participated in the battle of St. Mihiel, Thiaucourt, Jaulny, and Vammes, capturing 3,300 prisoners, 120 cannon, 2 railroad trains loaded with supplies, and vast quantities of military stores.

In October, 1918, he participated in battle with the Fourth French Army in the Champagne, broke the Hindenberg line, captured Blanc Mont Ridge, Medeah Farm, St. Etienne, 2,300 prisoners, and 40 cannon. This victory caused the retreat of the German Army to the Aisne, 12 miles. He was commended by Gen. Gourand and awarded the croix de guerre. All regiments were cited in the orders.

November 1 to 11, 1918, he participated in the battle of Meuse-Argonne, broke the Hindenberg line, led the advance to the Meuse, cross the Meuse, captured seven fortified towns, 1,800 prisoners, and 100 cannon. He was commended by Gens. Liggett and Summerall, of the United States Army. He marched to the Rhine, crossed the Rhine, and occupied the bridgehead at Coblenz until July 15, 1919. He was awarded the Army distinguished service medal, the Navy distinguished service medal, and the insignia of Commander of the Legion of Honor, a French decoration.

I wish to read an extract from a letter of the commander in chief of the American Expeditionary Forces published in the Second Division General Orders, No. 31, March 30, 1919:

[Excerpts from letter from commander in chief, American Expeditionary Forces, to commanding general Second Division, American Expeditionary Forces. Published in Second Division General Orders, No. 31, Mar. 30, 1919.]

It was with great satisfaction that I observe the splendid condition of the officers and men of the Second Division upon the occasion of the review at Vallendar, Germany, March 14. Nothing revealed more clearly the high morale of the troops under your command than the pride in their personal appearance which was evident at that time. The transportation and artillery of the division also showed careful and intelligent attention.

* * * * * * *

During the march into Germany and the subsequent occupation of the bridgehead, the conduct of the Second Division has been most praiseworthy. I desire every member of the division to know the pride with which it is regarded by the entire expeditionary force and to feel assured of my personal thanks and gratitude.

I read now from order No. 12059D, as it is designated, where Gen. Lejeune was cited, as follows:

CITATION.

GENERAL HEADQUARTERS OF THE FRENCH ARMIES OF THE EAST.
GENERAL STAFF,
BUREAU OF PERSONNEL (DECORATIONS).

Order No. 12059D. (Extract.)

With the approval of the commander in chief of the American Expeditionary Forces, the Marshal of France, commander in chief of the French Armies of the East, cites in the order of the Army:

* * * * * * *

Maj. Gen. John A. Lejeune, United States Marine Corps, commanding the Second Division.

He commanded his division with great ability in the attack on Blanc Mont (3–7 October, 1918), seizing in a few hours a position of vital importance and capturing 1,800 prisoners and a large quantity of military material.

* * * * * * *

At general headquarters, 30 November, 1918.

PETAIN,
Marshal of France,
Commander in Chief of the French Armies of the East.

As to the award of the distinguished Army service medal, the following extract is made from the RECORD:

Maj. Gen. John A. Lejeune.

For exceptionally meritorious and distinguished services.

He commanded the Second Division in the successful operations of Thiaucourt, Massif Blanc Mont, St. Mihiel, and on the west bank of the Meuse. In the Argonne-Meuse offensive his division was directed with such sound military judgment and ability that it broke and held by the vigor and rapidity of execution of its attack enemy lines which had hitherto been considered impregnable.

I ask to include in the RECORD as a part of my remarks, without reading, a letter from the commanding general of the First Army to the commander in chief American Expeditionary Forces, recommending the Second Division for citation in general orders American Expeditionary Forces for excellent work in attack on November 1–11, 1918, Meuse-Argonne operations; also a letter from Maj. Gen. C. P. Summerall, headquarters Fifth Army Corps, American Expeditionary Forces, to the commanding general of the Second Division, in which he characterizes and compliments the conduct of that division.

The PRESIDING OFFICER (Mr. WILLIS in the chair). Without objection, permission is granted.

The matter referred to is as follows:

JANUARY 16, 1919.

From: Commanding General First Army.
To: Commander in Chief, G. H. Q., A. E. F.
Subject: Citation for Second Division.

1. It is recommended that the Second Division be cited in G. H. Q. orders for its excellent work in the attack of November 1–11, 1918, Meuse-Argonne operations.

2. After the St. Mihiel operation the Second Division participated in the attacks of the Fourth French Army during the period October 2–7. The remarkable success achieved by this division in these operations has already been referred to in French communications.

3. After a short rest the Second Division was again placed in battle, for the purpose of taking part in the First Army attack of November 1.

4. In the First Army attack of November 1, the Second Division was selected and so placed in the battle line that its known ability might be used to overcome the critical part of the enemy's defense. The salient feature of the plan of attack was to drive a wedge through Landres et St. Georges to the vicinity of Fosse. It was realized that if the foregoing could be accomplished the backbone of the hostile resistance west of the Meuse would be broken and the enemy would have to retreat to the east of the Meuse. Success in this plan would immediately loosen the flanks of the First Army. The Second Division was selected to carry out this main blow.

5. The Second Division accomplished the results desired in every particular on the first day of the attack, not only clearing the hostile defenses of Landres et St. Georges and the Bois de Hazois but continuing its advance to the vicinity of Fosse, i. e., about 9 kilometers. This decisive blow broke the enemy's defense and opened the way for the rapid advance of the Army.

6. Attached hereto is a copy of a letter furnished the Second Division by the commanding general Fifth Corps, which is self-explanatory.

7. In view of the excellent results achieved by this division and the decisiveness of the attack on November 1 it is recommended that the division be mentioned in orders by the commander in chief.

H. LIGGETT,
Lieutenant General, United States Army.

HEADQUARTERS FIFTH ARMY CORPS,
AMERICAN EXPEDITIONARY FORCES,
France, November 2, 1918.

From: Commanding general Fifth Army Corps.
To: Commanding general Second Division.
Subject: Commendation.

I desire to add to my telephone message the assurance of my deep appreciation and profound admiration for the manner in which the Second Division executed the missions allotted to it on November 1.

The division's brilliant advance of more than 9 kilometers, destroying the last stronghold on the Hindenburg line, capturing the Freya Stellung, and going more than 9 kilometers against not only the permanent but the relieving forces in their front, may justly be regarded as one of the most remarkable achievements made by any troops in this war. For the first time, perhaps, in our experience the losses inflicted

by your division upon the enemy in the offensive greatly exceeded the casualties of the division. The reports indicate, moreover, that in a single day the division has captured more artillery and machine guns than usually falls to the lot of a command during several days of hard fighting. These results must be attributed to the great dash and speed of the troops and to the irresistible force with which they struck and overcame the enemy.

The division has more than justified the distinguished confidence placed in it by the Commander in Chief when it was selected to take the lead in the advance, from which such great results are expected. It is an honor to command such troops, and they have richly deserved a place in history and in the affection of their countrymen which is not exceeded or perhaps paralleled in the life of our Nation.

I desire that you convey these sentiments to the officers and soldiers of the Second Division and that you assure them of my abiding wishes for their continued success in the campaigns that lie before it.

C. P. SUMMERALL,
Major General, Commanding.

Mr. POINDEXTER. On account of this record, at some appropriate time I shall make a motion, if some one else does not do so, that the nomination be excepted from the general order of nominations and be confirmed in executive session.

WATER-POWER DEVELOPMENT.

Mr. JONES of Washington. Mr. President, I had hoped that during the morning hour I might be able to call up the bill (S. 4554) to amend an act entitled "An act to create a Federal power commission; to provide for the improvement of navigation; the development of water power; the use of the public lands in relation thereto; and to repeal section 18 of the river and harbor appropriation act, approved August 8, 1917, and for other purposes," approved June 10, 1920.

I had no opportunity to do that. I wish to give notice that at the first opportunity I shall call up the bill, and I hope to have it considered by the Senate.

ARCHIVES BUILDING.

Mr. POINDEXTER. Mr. President, I ask leave to have printed in the RECORD a brief editorial from this morning's Washington Post, in which there is a very good statement of the importance and necessity of the building of an archives building in this city. In connection with that I desire to print a brief statement with reference to an advertisement which shows that the public records of the Government are being hawked about the country and sold to libraries and collectors for whatever may be paid for them, having been, I suppose, abandoned in times past and picked up by collectors and now being distributed in this way, particular reference in this connection being made to a collection of port papers relative to shipping, revenue-cutter service, list of vessels built, letters from S. D. Ingham, Secretary of the Treasury, and other papers, covering the years 1830 to 1831; also port papers covering the years 1795–1800, 1801–1889, 1824–1873, 1845, and various other years.

The PRESIDING OFFICER. Without objection, permission is granted.

The matter referred to is as follows:

AN ARCHIVES BUILDING.

If Congress really wants an archives building, an archives building can be had in the shortest possible time. The location has been fixed by a committee of Congress. The Secretary of the Treasury has the land under option at the valuation which the District of Columbia assesses it for purposes of taxation. Both the location and the plans have been approved by a commission created by Congress.

The Secretary of the Treasury has repeatedly recommended to the Appropriations Committee the inclusion in the sundry civil bill of an item covering the cost of the site and working drawings. All these preparations have been made in pursuance of an act of Congress passed 13 years ago. The act specifically gives authority to the Secretary of the Treasury to purchase the land necessary for the site and to report a deficiency item to Congress.

A short time ago a fire burned up 50 years of lighthouse records. To-day the records of various departments are being hustled about from one temporary building to another. Even if all the employees of the Government were to cut out smoking in office hours, there would still be danger from fire. Congress seems wedded to the theory, "Happy is the country that has no history." So the sources of United States history as well as the documents on which the Government relies as a defense against all sorts and conditions of claims continue to be destroyed from time to time. Such "economy" is sheer waste.

The American Art Association, Madison Square South, New York City, advertises an unrestricted public sale on February 1 and 2, 1921, of documents, among which are shipping papers of John Lasher, surveyor of the port of New York, and other papers, covering the years 1784 to 1905.

Port papers, being a collection of papers relative to shipping, Revenue-Cutter Service, lists of vessels built, letters from S. D. Ingham, Secretary of the Treasury, and other papers, covering the years 1830–31.

Also port papers covering the years 1795–1800, 1801–1889, 1824–1873, 1845, and various other papers.

In all, these papers cover about a century of Federal history and are of high value to all students of American history and especially of the economic history of this country.

All of these papers are public records of the United States and probably they could be recovered by the Department of Justice, instead of which they are offered for sale to private collectors and to Government depositories. This traffic in Government documents is going on continually, and many libraries in this country are bidding against each other for documents which should be in a Government archives building in the city of Washington, accessible to all students and to Government officials as well.

Mr. POINDEXTER. In connection with the proposed amendment that has been offered, I again call attention to the fact that the building, the necessity for which is emphasized by the fact which I have just cited, has been authorized. In 1913 Congress passed an act in which the building was authorized, and the authorization was made clear and more definite in a subsequent amendment to the act, and preparation of the plans was authorized and the preliminary appropriation made. A commission was designated, consisting of the President of the Senate, the Speaker of the House of Representatives, and several members of the Cabinet, who were authorized to approve the plans and to approve the selection of the site. The Secretary of the Treasury was directed to acquire the site when the selection of the site was approved by the commission. The commission have performed the functions which devolved upon them under the act. They have approved the plans which were presented to them by the Secretary of the Treasury. The Secretary of the Treasury has selected the site and the commission to which I have referred, which was created by the act, have approved the site.

The obligation of the Government, it seems, now is complete under the law to appropriate the money for the consummation of the purposes cited in the act. It is for that reason that I have introduced the amendment to the pending sundry civil bill.

Mr. WARREN. Mr. President, I wish to inquire if the site has been reserved for the archives building or has it been reserved for some other purpose?

Mr. POINDEXTER. It has not been actually purchased. It has been selected and an option has been taken on it, and that option is now held. I understand the price at which they have obtained the option is approximately the amount at which the property is assessed for purposes of taxation, being evidently a very reasonable price. The approval of the selection designated of the particular piece of ground, part of which is already owned by the Government by reason of the vacation of a certain street, is all set out in the official papers acted upon by the commission.

Mr. FLETCHER. May I ask the Senator the specific building to which he has reference?

Mr. POINDEXTER. The archives building authorized by act of Congress of 1913.

LOANS TO FOREIGN GOVERNMENTS.

Mr. McKELLAR. Mr. President, some days ago I made some remarks on the collection of interest on our loans to foreign Governments. In that connection I ask unanimous consent to print in the RECORD an editorial from the Washington Post of January 9, 1921, and several shorter ones from other papers bearing on the subject.

These articles all suggest the great public interest in this question, and some of them indicate that Great Britain will in all probability continue to delay settlement, and probably will maneuver to keep from paying her debt altogether. It is unfortunate that the visit of her financial agent to confer and settle this business has been postponed. She should settle and settle speedily, and hereafter pay her interest promptly.

There being no objection, the matter referred to was ordered to be printed in the record, as follows:

"THE WAR DEBTS.

"Before the administration concludes any arrangement with British or other foreign Government agents regarding the terms for refunding the war debts due the United States, it would be well to give the proposals publicity and obtain the opinion of the people concerning them.

"The people are entitled to know what is proposed by foreign Governments, and what is proposed by the United States Government in regard to the disposition of the enormous debt due this country. The chief debtor nation, Great Britain, is about to engage in negotiations with the United States, and it is reported that efforts will be made to have the negotiations closed before the expiration of the present administration, so that President Harding's administration will not be able to set aside any agreements reached. It is said that the British Government believes it can obtain more liberal concessions from the Wilson than from the Harding administration.

"The United States went into the war with a debt of less than $1,000,000,000, and came out of the war owing a debt of over $24,000,000,000. About $10,000,000,000 of this debt represents money loaned to allied Governments. Not one dollar of principal or interest on these loans has been paid. The United States, however, has not defaulted in interest payments upon its Liberty bonds, and it is therefore in the position of as-

suming the burden of its debtors. It has been able to do this by imposing heavy taxes upon the people.

"If the United States had expended all of the money raised by bonds, the people would ungrudgingly pay their taxes and recoup a portion of them by collecting interest on their Liberty bonds. But two-fifths of the debt ought to be lifted off the people and placed where it belongs, upon the shoulders of the borrowers. There is no fair play in requiring Americans to pay taxes upon $10,000,000,000 to make up for the default of interest payments by foreign borrowers. This is equivalent to compelling American taxpayers to contribute to the support of Great Britain, France, Italy, and the other allied countries. Americans are quite willing to be patient in collecting the loan, but they can not be expected to waive all interest and assume the burden themselves.

"When foreign Governments owing money to the United States are in the attitude of defaulting in their interest payments while at the same time spending large sums for armies, navies, air fleets, forts, oil fields, commercial enterprises, etc., it is inevitable that Americans should question the wisdom of postponing indefinitely the adjustment of the loans. Time works to the disadvantage of the lender when there is a lack of clear agreements. In some allied countries there is a suggestion that 'the slate should be wiped clean,' meaning that all debts owed among and between allied nations should be canceled, including debts owed to the United States. Behind this agitation stands the League of Nations, which has been manipulated already into a position adverse to American interests. If the League of Nations is not to become a powerful advocate of universal repudiation, it will not be the fault of the astute politicians who are controlling it.

"One of the skillful maneuvers of British economists who seek to relieve their country of the heavy burden of debt to the United States is the proposal for an issue of 'League of Nations bonds.' Briefly, the plan contemplates the issuance of bonds under the authority of the League of Nations, to take up all outstanding debts. The league bonds are to be underwritten by the league, and the league is to be secured by the German indemnity, when and if paid.

"This is only one of several schemes having for their central idea the hope that the United States can somehow be persuaded to turn from the allied nations and look to Germany for repayment of the sums advanced during the war. Inasmuch as the nations at Germany's door have not collected a dollar of indemnity, there does not appear to be any reason why the United States should take up the work of squeezing blood out of a turnip. If Germany can wriggle out of the agreement to pay for havoc wrought in France she can avoid paying money to the United States, up to the point of physical compulsion. Does the United States care to go to war for the collection of the war debts? If so, it will agree to look to Germany for the payment of the debts.

"The public debt of the United States should be refunded, to cover a period of 50 years, with a low interest rate and a moderate annual amortization fund. The debt owed to the United States by the allied Governments should be adjusted on the same basis of long-term bonds. All the people of all countries lately at war should have time in which to pay off their debts—but the debts should be paid."

—

"THE 'MOVEMENT ON FOOT.'

"Sir Robert Horne, president of the British Board of Trade, is making the suggestion in a published interview that the United States cancel its war loans to Great Britain on condition that that country shall cancel its loans to France and other European allies. He would have a 'forgiveness of debts all around.'

"This seems to give to the proposition the sanction of the British Government and the fact is of interest at this end of the line of forgiveness. But even more interesting is Sir Robert's further statement in the London Daily Graphic that 'the attitude of America is strictly self-contained, but there is a movement on foot which I hope may lead to something.'

"There is evidently such a movement on foot and it is located in America, as indicated. It began with the Home Market Club some months ago, and it maintained a lively if whispered existence in high-tariff circles all through the presidential campaign. It is now finding expression in concrete forms. These are first the farmers' emergency tariff or bunco bill, and next Senator PENROSE'S sudden conversion to its support, which implies the striking of a pious bargain as old as the sacred schedules themselves—farm support in turn for the application of real and liberal doses of tariff protection to the manufacturing interests of Pennsylvania and the East.

"These European war debts to the United States must be paid, if at all, mostly in goods which would compete with those of the manufacturing interests aforesaid and keep down their prices to the American people. Their cancellation is, therefore, as imperative a protective necessity for monopoly to these interests as high tariff itself. Sir Robert Horne is clearly well advised in seeing a 'movement on foot' which 'may lead to something.'"

—

"WOULD SHIFT BRITAIN'S EUROPEAN DEBT HERE—ECONOMIST SUGGESTS SQUARING ACCOUNTS BY ALLIES' NOTES TO RESTORE EXCHANGE.

"[Copyright, 1921, by the Chicago Tribune Co.]

"LONDON, *January 6.*

"Sir J. C. Stamp, a famous British economist and formerly chief of the inland revenue service, writing in the Times to-day suggests a plan for stabilizing world finance by which America would take over Europe's debts to Great Britain.

"He pointed out that Great Britain owes the United States £867,000,000 (normally about $4,395,000,000), while the allied European nations owe Great Britain £1,731,000,000 (about $8,655,000,000). In other words, Great Britain borrowed from the United States to lend to the Allies before America entered the war, partly because England was better security than the others. The British economist believes that if America had entered the war earlier she would probably have lent direct.

"He also declares that America would have a better chance in getting collections than Great Britain, because she would be less amenable to political and other considerations affecting Europe. He says such an arrangement would also restore dollar-pound exchange, thus reestablishing trade on a sound and permanent basis."

—

"FRANCE'S INCOME INCREASES—RECEIVES 16 PER CENT ABOVE THE BUDGET ESTIMATES FOR 1920.

"PARIS, *January 12.*

"Taxation and monopolies in France yielded in 1920 a little more than 12,059,000,000 francs, which was 16 per cent above the budget estimates and more than 4,000,000 francs, or 52 per cent, above the yield in 1919.

"Registration duties were the chief contributions to the increase, especially those on the sale of houses and taxes on transports and amusements. The sale of matches and tobacco showed a strong advance.

"The customs receipts were 10,000,000 francs below the estimates, but 7 per cent above those of 1919. This increase was due to new taxation, imports having slightly decreased, as compared with 1919. The new tax on the business turnover in December yielded the same as in November, 203,000,000 francs. This was under the estimates, but over the monthly average realized since the tax was created, which was 184,000,000 francs."

—

[From the Washington Post, Jan. 18, 1921. By the Associated Press.]

"LONDON, *January 17.*

"Government officials are displaying unusual reticence concerning both the visit of Sir Auckland Geddes, the British ambassador at Washington, and Lord Chalmers's mission to the United States, which has been postponed. The coincidence of the ambassdor's return with the postponement points to the likelihood that the question of the Anglo-American debt will be the chief subject of his conferences with the Government."

DISTRICT OF COLUMBIA APPROPRIATIONS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 15130) making appropriations for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1922, and for other purposes.

Mr. CURTIS. I should like to have the amendment reported which was passed over yesterday.

The PRESIDING OFFICER. The amendment will be stated.

The ASSISTANT SECRETARY. The pending amendment passed over will be found on page 53 of the bill where, after line 8, the committee propose to insert:

For payment of necessary expenses connected with the organization and conducting of community forums and civic centers in school buildings, including equipment, fixtures, and supplies for lighting and equipping the buildings, payment of janitor service, secretaries, teachers, organizers, and clerks, and employees of the day schools may also be employees of the community forums and civic centers, including maintenance of automobile, $25,000: *Provided*, That not more than 60 per cent of this sum shall be expended for payment of secretaries, teachers, organizers, and clerks.

Mr. FLETCHER. I will say merely a word or two in reference to the pending amendment. I am in favor of the amendment as it is, although I did not quite understand the purpose of the provision which it contains in regard to an automobile.

I do not know for what automobiles are to be used; but I do sympathize with the effort to establish civic centers. I know that such meeting places are for the purpose of providing accommodations for civic organizations and various societies, social in their character, which really accomplish very much of good, which are useful institutions, and ought to have accommodations for their meetings.

Mr. CURTIS. I desire to say to the Senator from Florida that the automobile referred to is a small Ford, which is used to go from one center to another.

Mr. FLETCHER. I suppose it could not have been a very extravagant machine, since $25,000 is to cover the whole expense connected with the organization and conduct of the community forums. I know something of the work that is provided for in the amendment, and I am cordially in favor of taking care of the situation and making the appropriation.

Now, in reference to a matter which was not quite finished this morning. The motion to refer the resolution which I had offered, of course, shut off debate, and I was unable to make any statement with reference to it, and I shall not now indulge in any extended observations on the subject other than to give an idea about what the situation is. Of course, I realized that there would be brought up to some extent the precedent established by the Democrats in 1913. I believe at that time the Democrats did prevent the confirmation of postmasters, with the single exception of those who were appointed from the cities and towns where Senators, respectively, may have resided. In those instances there were no objections to confirmation and such appointments were confirmed. There may have been a few other exceptions; I do not recall as to that; but, generally speaking, with those exceptions the postmasters appointed by President Taft were not confirmed. That situation, however, did not obtain as to numerous other appointments, such as I have recently mentioned, in the Consular Service, in the Public Health Service, in the Treasury Department, for instance, and also in the Army and the Navy. There were confirmations, especially in the Army and Navy and Public Health Service and Consular Service, up to March 1, 1913, and the RECORD so shows, not merely incidental or unobjected to appointments, but practically all such appointments, as I gather from the RECORD.

The situation as to postmasters to-day is quite different from what it was in 1913. Under Executive orders and under rules and regulations now in existence such appointments are founded upon civil-service examinations, and the regulation provides that preference in such appointments shall be given to ex-service men and to the widows of ex-service men. That is a very laudable preference, I think, and that is a matter upon which, it seems to me, we should not draw any partisan line.

As I have said, under the present existing law and regulations appointments to postmasterships are based upon competitive examinations, those receiving the highest mark receiving the recommendation of the Postmaster General to the President and the President's nomination to the Senate. I repeat, that preference is given in the grading of applicants for such positions to ex-service men and to the widows of ex-service men. There is no politics in a situation of that kind; there is no ground and no room for any partisanship. So there ought to be a perfect willingness on the part of political opponents with respect to other matters to agree that action shall be taken in respect of the appointments which have been made of men who have served the country in its great crisis and who have returned to their homes again to resume civil duties, and the same preference should be accorded to the nominations of the widows of men who have lost their lives in the service of their country.

All told, 1,867 nominations for postmasterships in all classes have been submitted to the Senate, and are yet lying on the Secretary's desk, not having been referred to the Committee on Post Offices and Post Roads at all. Among this number are the nominations of ex-service men and widows of ex-service men, upon whose confirmation I am sure the Senate, without regard to any political differences or any other question, ought at once eagerly to insist.

It is for that purpose that I have offered the resolution which has been referred to the Committee on Post Offices and Post Roads and which will sleep there; that is the end of that resolution; I realize that perfectly well; but I say the information called for by the resolution is necessary to enable the Senate to act upon these exceptions to the rule which, in my judgment, ought to be made and which I believe the Senate is willing to make in favor of the ex-service men and the widows of ex-service men whose nominations have been sent to the Senate. We must secure the information so as to separate them from all others nominated to be postmasters. I believe they can be separated and that if the list of them is submitted the Senate will, by unanimous consent, have those nominations referred to the Committee on Post Offices and Post Roads for a report. I am not able to say out of the 1,867 nominations for postmaster in all classes how many are ex-service men or are the widows of ex-service men. That is the information we ought to have, but we will not get it, because the resolution has gone to the committee with the purpose unquestionably of not reporting it back to the Senate for action. However, I am going to ask the Senate to have that information furnished with a view eventually of asking unanimous consent to have the nominations of ex-service men and the widows of ex-service men referred to the committee as in open executive session, if we can not have a closed executive session. I believe that the promptings of the Senate would incline them in favor of making this exception to any rule that the majority may lay down as governing the general situation.

If the committee does not promptly report as the resolution requires, then I shall offer another resolution in the effort to obtain the desired information, and then lay it before the Senate and ascertain whether they are willing to draw party lines against the men who have served their country in its desperation and need, and against the widows of the soldiers who gave their lives in the hour of their country's peril.

I conclude simply by saying that I am in favor of the amendment offered by the committee to this bill and hope that it will be adopted.

Mr. HARRISON. Mr. President, the Senator from Illinois [Mr. SHERMAN] served notice some days ago that he intended to discuss a very important question this afternoon. Before he proceeds I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Hale	Moses	Smith, Ariz.
Beckham	Harris	Myers	Spencer
Borah	Harrison	Nelson	Stanley
Brandegee	Heflin	Norris	Sterling
Calder	Johnson, Calif.	Overman	Swanson
Capper	Jones, Wash.	Page	Townsend
Curtis	Kellogg	Phelan	Underwood
Dial	Keyes	Phipps	Wadsworth
Dillingham	King	Poindexter	Walsh, Mass.
Fletcher	Kirby	Pomerene	Walsh, Mont.
Frelinghuysen	Knox	Robinson	Warren
Gerry	McKellar	Sheppard	Willis
Glass	McNary	Sherman	

Mr. CURTIS. Mr. President, I have been requested to announce the absence of the Senator from Indiana [Mr. NEW] on official business. I ask that this announcement may stand for the afternoon.

Mr. WALSH of Massachusetts. I desire to announce that the Senator from Wisconsin [Mr. LA FOLLETTE], the Senator from Missouri [Mr. REED], the Senator from New Mexico [Mr. JONES], the Senator from Iowa [Mr. KENYON], and the Senator from North Dakota [Mr. GRONNA] are in attendance upon the Senate Committee on Manufactures.

The PRESIDING OFFICER. Fifty-one Senators having answered to their names, a quorum of the Senate is present.

Mr. SHERMAN. Mr. President, I do not wish to delay the District appropriation bill. I had given notice that to-day, in the morning hour, I should talk on the packers' bill; but the course of affairs was such that no time could be devoted to that purpose. I now postpone until to-morrow the remarks I have to submit on the bill, hoping that conditions then will be more favorable, in order that the District bill may be expedited.

The PRESIDING OFFICER. The question is on the amendment of the committee.

Mr. KING. Mr. President, the other day, when this bill was first presented to the Senate, I submitted a few observations with respect to some of its provisions. I was called from the Chamber before concluding what I desired to state, in a general way, with respect to some of the features of the bill. I may say, in passing, that the amendment which I purposed offering, based upon the letter to which I referred and other information obtained, would not be in order under the rule of procedure until the amendments offered by the committee have been disposed of. I shall, therefore, be compelled to pretermit some of the observations I was about to make until after the committee amendments have been disposed of.

As I understand, the amendment now before the Senate is the one found on page 53, and embraced within lines 9 to 18, inclusive.

Mr. CURTIS. That is correct.

Mr. KING. I offer a substitute for the committee amendment, and ask that it be stated.

The PRESIDING OFFICER. The Secretary will state the proposed substitute.

UMI

Mr. KING. Mr. President, I understand that the Senator from Wyoming [Mr. WARREN] desires to offer an amendment, and I yield the floor to him for that purpose.

Mr. WARREN. Mr. President, we very properly have in this District a drastic law about the carrying of firearms, and we have a permit provided for that can be obtained, but it must be renewed once a month. The National Rifle Association of America, which has a large membership, which is in training, and makes a very good showing, has asked us to have the law amended so that its members may have six months' permission instead of one month's permission. Therefore I am offering the amendment which I send to the desk, and which I hope may be adopted.

The PRESIDING OFFICER. The amendment will be stated.

The READING CLERK. On page 93, after line 7, it is proposed to insert as a separate paragraph the following:

For the purpose of facilitating small-arm target practice by reputable persons who are members of national or local associations for the encouragement of such practice, or who are engaged in scientific investigation for the Government, any judge of the police court of the District of Columbia issuing permits to such persons under section 855 of the Code of Law for said District may hereafter, in his discretion, and with the approval of the superintendent of police, issue such permits to such persons for periods of not to exceed six months, without bond therefor, but subject to revocation at any time by such judge.

Mr. CURTIS. Mr. President, that amendment was proposed to the committee, but so late that the subcommittee did not have time to look into it. If the only purpose of the amendment is, as suggested by the chairman of the Committee on Appropriations, to provide that this permit may be issued for six months instead of one, so far as I am personally concerned I have no objection to it, at least to taking it to conference.

Mr. HARRISON. Mr. President, will not the Senator from Wyoming explain his amendment briefly, so that we can catch just what it is?

Mr. WARREN. I might read a few lines from the law as it stands now. It is rather long:

Any person who shall within the District of Columbia have concealed about his person any deadly or dangerous weapon, or who shall carry openly any such weapon, with the intent to unlawfully use the same—

Shall be punished as provided in the act. Then it follows along down and says:

Provided further, That nothing contained in this section shall be so construed as to prevent any person from keeping or carrying about his place of business, dwelling house, or premises any such deadly or dangerous weapon, or from carrying the same from place of purchase to his dwelling house or place of business, or from his dwelling house or place of business to any place where repairing is done to have the same repaired and back again: *Provided further*, That nothing contained in this section shall be so construed as to apply to any person who shall have been granted a written permit to carry such weapon or weapons by any judge of the police court of the District of Columbia; and authority is hereby given to any such judge to grant such permit for a period of not more than one month at any one time, upon satisfactory proof to him of the necessity for the granting thereof—

And so forth. This makes the time six months instead of one month.

Mr. CURTIS. Mr. President, may I ask the Senator a question? As I understand the Senator's statement, this amendment is intended to cover the case of the organization here that is engaged in target practice. Its members want to be relieved from the duty of requesting a permit every 30 days, and have the permit run for 6 months instead of 30 days?

Mr. WARREN. Washington is the headquarters of the National Rifle Association of America. I happen to be a life member of it. The only purpose of that association or club is to instill the knowledge of correct rifle firing amongst young men, for purposes, incidentally, of course, of sport, but more particularly in case they are called into the service of the Army. Those men who went into the Army in the World War and who were members of this association were able not only to do close firing themselves but to instruct others, and it was considered of great consequence to the Army.

Mr. JONES of Washington. Mr. President, I want to ask the Senator if his understanding of the amendment is the same as mine. As I understand the amendment from hearing it read at the desk, a person applying for this six months' permit must show not only that he is a member of this organization but that he is asking the permit to carry these arms for the purposes of the organization.

Mr. WARREN. That is the intention.

Mr. KING. Mr. President, may I inquire of the Senator whether he regards it as quite logical to amend a general law of the District of Columbia—and I understand there is a general law here on the subject—in the manner proposed by this amendment?

Mr. WARREN. It is hardly a general law. It is a special law relating to this particular matter, and is a law which is called into action here in the District, and before the police justice. It struck me as being entirely pertinent.

Mr. KING. Let me make a further inquiry of the Senator. There is a law, independent of some appropriation bill, which deals with this subject, as I understand; and this amendment seeks, by incorporating the amendment upon the appropriation bill, to amend a general statute of the District—not general in the sense that it applies to the entire United States, but general in the sense that it applies to the District?

Mr. WARREN. It applies to the District only.

Mr. KING. We are so in the habit of legislating, indeed, generally upon appropriation bills that I shall make no objection to the consideration of the amendment.

The PRESIDING OFFICER (Mr. MYERS in the chair). The question is on agreeing to the amendment offered by the Senator from Wyoming [Mr. WARREN].

The amendment was agreed to.

Mr. KING. Mr. President, I ask the Secretary to state the amendment which I sent to the desk a few moments ago, and to which I ask the attention of the chairman of the committee.

The PRESIDING OFFICER. The amendment will be stated.

The READING CLERK. It is proposed to strike out, on page 53, all of lines 9 to 18, inclusive, and to insert in lieu thereof the following:

For payment of necessary expenses in conducting community forums and civic centers in school buildings, including equipment, fixtures, and supplies for lighting and equipping the buildings, paying for the cost of light and heat, payment of janitor service and employees to aid in the work of said forums and centers, $15,000: *Provided*, That the work of said forums and centers shall be of an entirely educational character, and such as shall be prescribed by the board of education: *And provided further*, That not more than 50 per cent of the same shall be expended for payment of teachers and employees.

Mr. KING. May I inquire of the chairman of the subcommittee whether he will accept that amendment?

Mr. CURTIS. I could not accept it, because the item, as it appears here, was reported from the House committee and went out in the House on a point of order, and the subcommittee, after a full and complete hearing, which is reported in our hearings, adopted the amendment. Of course, I shall have to oppose the substitute. I may state in this connection that I am afraid if we make the amount only $15,000 it would be a waste of money. We might as well not appropriate anything as to appropriate $15,000.

Mr. KING. May I inquire of the Senator why the appropriation of that amount would be a waste of money?

Mr. CURTIS. The estimate sent in was for $35,000, and your committee, after thoroughly going into the situation, thought that $25,000 would be sufficient. But they did not feel that they could cut the amount any lower, if the service is to be carried on at all. The House committee, the Senator will remember, for I know the Senator has read the report of the hearings, recommended $35,000. There are some 19 community centers, 10 of them for white and 9 for colored, and in some of them there is a daily attendance. Others are open twice a week and others every other day. I think it would be a very serious mistake to reduce the amount to $15,000.

Mr. KING. Mr. President, the contrariety of opinion upon the part of the residents of Washington respecting the propriety of continuing community centers makes it difficult for Senators to determine what course should be pursued. I am always sympathetic in behalf of movements that call for higher education and aim at moral development. I have always been a strong advocate of the public-school system, and have earnestly sought to give to teachers in our schools adequate compensation. I have believed that public funds expended for educational purposes would bring rich rewards to the State. Too little attention has been paid to educational development and the adoption of rational and progressive educational policies. In too many instances faddists have obtained control of schools within municipalities or States. The intellectual crotchets and intellectual idiosyncrasies of individuals have often marred school systems and impaired the educational work which came within the limit of their authority and activity. Herbert Spencer and other writers who have given to the world profound thoughts upon the subject of education have been wholly disregarded, and oftentimes irrational and hysterical policies have been adopted.

I do not mean to argue that the views of Spencer, or Locke, or Rousseau, or the great German writers upon education should be blindly followed. Education, of course, is progressive, and the policies of one generation may not prove sound for succeeding ones, and yet there are certain fundamental principles which are available for application in all ages. There are certain moral and spiritual principles that are immortal, and the hand of time and the mutations of life do not mar or impair them. Education is a science; and to apply it is a most difficult undertaking. We need not only the profound scholars, the scientists, and the philosophers to open before the minds of the

young men and women of our land the treasure houses of knowledge and the rich inheritance of nature, but it is indispensable that there shall be employed in our schools and colleges and universities men and women of culture and refinement, of broad and comprehensive views respecting life and its duties and responsibilities, and who understand, in part at least, the practical concerns of life and the steps necessary to be taken to equip them for useful service and to develop within their hearts a love of law and order and growth and progress and an appreciation of the responsibilities of citizenship and the obligations imposed by the social organism.

There must be sanity and good common sense employed in our schools and in the development of our educational system. There has been too much hysteria and frippery and dilettantism in some of our schools, and there have been educators who lacked proper perspective and were unable to adjust themselves to what might be called the elementary problems of life and the certitudes which are ever before us.

It is conceded that imagination is an important factor in human development. Thousands who dream dreams and have visions have an important place in this materialistic world of ours; but in projecting an educational system that is adequate to meet the needs of the people there must be a large stock of common sense and sound philosophy employed, as well as a proper appreciation of the things in life which have value and which will endure. These general observations are related, perhaps only remotely, to the question now before the Senate.

It has been urged that the community centers in this city are ancillary to and, indeed, a part of the accepted or adopted educational plan approved by the board of education; in other words, the contention is made that this appropriation is sought for educational purposes. Support has been urged by proponents of appropriations to the community centers upon the theory that the work of the schoolroom proper was being supplemented and that the activities of these organizations proper could be comprised within the subject of education and tied to the public school system.

As I have indicated, the conflicting views respecting the propriety of appropriations for use by the community centers are not reassuring to those upon whom the responsibility rests of expending moneys wrung from the people by taxation. I have been solicited by a number of residents of the District to oppose any appropriation to be expended by the community center organizations.

A number of persons, many of whom are men and women of standing, have urged that I support the demands of the community centers for Federal appropriations. The opponents of these organizations greatly outnumber the supporters of the plan, if I am to judge from those who have addressed me in regard to the subject, and I might say that the majority of those who have supported the movement have either been beneficiaries, that is, have been the recipients of salaries and compensation, or persons who have been requested by the former to intercede with Congress for the purpose of obtaining congressional aid. Those who have opposed the plan have insisted that much of the work done was of no value, that some was possibly harmful, and that none was educational. It is true that a number of clubs and Boy Scout organizations have been drawn under the mantle of the community center organizations, and they have assumed that such clubs and other organizations and activities were directly the result of the community center work. My information is that such a claim is unfounded and that the work of organizations conducted by public-spirited men and women, and which have been in existence for many years, would be continued regardless of whether the community centers continued or were abolished; in other words, the claim is made that useful and wholesome organizations which have done fine work in the community and which would continue to function are taken over in a bodily fashion by the community centers, and the latter assume a sort of overlordship or proprietary interest in the same and ascribe the work and achievement of such organizations to the community centers themselves.

Other citizens of the District have complained to me that in some instances faddists and persons who have rather quixotic and erratic views have either controlled the community centers or greatly influenced them, as a result of which their work has been uncertain, irregular, rather "neurotic," if I am permitted the term, and devoid of educational and social value. Still others have insisted that radical and revolutionary views were expounded and that encouragement was given to attacks upon the Constitution and upon our form of government.

Some time ago a number of committees waited upon me and charged that these organizations at that time were seeking to become commercial bodies and trade centers. They sought to establish markets and organize to purchase agricultural and other products and to dispose of them to the residents of the District. I made some investigation and reached the conclusion that there were persons connected with the organizations who had rather wild and visionary views and who were seeking to try all sorts of experiments concerning municipal activities and socialistic programs. I called attention to some of those who were connected with the community centers, and they conceded that they were extending the work of these organizations far beyond any legitimate or proper scope and that some of the work which had been done was calculated to bring upon the system the condemnation of an overwhelming majority of the people of the District. I feel sure that some of those practices have been abandoned and the evils eliminated.

Mr. CURTIS. Mr. President, I hate to interrupt the Senator, but as I understand, the organization now is carried on for the purpose of gathering together the boys and girls in the summer time, and the young men and women while school is in session, so that they may have entertainments. I do not understand they are engaged in business of any kind. There was a good deal of complaint at first, as the Senator has suggested, with reference to dances they had lasting so long, carried on late at night. But that has been changed, I understand, and now dances are closed at half past 10. They have musical programs and regular entertainments for the younger people, and I understand, of course, they are also attended by the parents and others of the older people.

Mr. KING. Did the Senator make any investigation among the parents and among the people generally with reference to determining whether this was a proper movement?

Mr. CURTIS. I will say frankly to the Senator, yes; and some have spoken very highly of it, and some agree with what the Senator has said and are very strongly opposed to it. I will frankly state that, and if I stated the numbers, I think I should have to say that more had appealed to me as chairman of the subcommittee in behalf of the amendment than had appealed to me against the amendment. But there has been very strong protest; there is no doubt about that. But the subcommittee had an investigation which lasted all one morning. We went into the question very thoroughly, and, in addition to that, the hearings which were taken on the House side were read by your subcommittee, and after the hearings on the House side and after the hearings on this side your subcommittee recommended $25,000 instead of $35,000.

Mr. KING. Mr. President, I believe that reforms have been adopted by this organization. My information is that many of the evils complained of have been eliminated and that a higher grade of service has been rendered of late, and that some of those connected with the work of these organizations are sincerely desirous of making them of benefit to the young men and women of Washington. Let me say to the Senator that I have read the hearings, and the testimony submitted comes almost entirely, if not wholly, from interested parties, parties who desire the perpetuation of the organization, parties who receive salaries, or will receive salaries if the organization shall be continued.

In nearly every instance those who have asked me to support this appropriation have stated, when I interrogated them, that they came at the request of some person who was drawing a salary or they were themselves receiving compensation for their work in the community centers. There are perhaps 100 persons who are paid for their work in that organization, and all are eloquent advocates of appropriations which will continue, if they do not increase, their compensation.

Mr. CURTIS. Mr. President, I do not want to interrupt the Senator, but I will state that the committee took into consideration the salaries that were paid, and thought that the salaries were too large, and for that reason the amount was reduced from $35,000 to $25,000. If the Senator will recall what he read in the hearings, he will remember that they asked for a greater amount than $35,000 in order that they could increase the salaries. They asked for $35,000 so that they could maintain the present salaries. Your committee was satisfied that they were paying salaries which were too high; did not believe it was necessary to keep secretaries on full pay for full time at these centers, and therefore reduced the amount so that the salaries would have to be reduced.

Mr. KING. Mr. President, there has been a very active propaganda by persons who were receiving compensation for community center work in favor of an appropriation of $35,000. That propaganda was carried to the House, and it has been active for the purpose of securing affirmative action by the Senate.

UMI

Mr. President, if the work of the community centers is as important as its champions assert, I am somewhat at a loss to understand the reason for the violent opposition to it which manifests itself not intermittently or in a sectional manner in the District but is constant and universal, so far as the extent or area is concerned. Of course, I appreciate that there will be criticism of the most meritorious undertakings and achievements the value of which can not fairly be denied. I would not expect this movement, even if it were free from fault or were attended with benefits, to absolutely escape opposition; but the nature of the opposition indicates that there must be something inherently wrong in some parts of the work of this organization or that its purposes are wholly misapprehended.

I have not had an opportunity to make personal investigation as to its present operations or its policies and accomplishments within the past year.

The complaint is still made that there are those connected with the work, directly or indirectly, who do not have those ideals which are entertained by genuine Americans and by those who believe in the moral and spiritual values of Christianity. I do not wish to be understood as arguing that the work of the community centers should be the propagation or the protection of the Christian religion; but the complaint is that the influences which have concerned these organizations, at least at times, have been not only rationalistic, but have been a negation of the spiritual and moral forces which must persist if civilization endures. Still others assert that the organizations seek to supplant parental authority, to take the place of the home and to assume duties and responsibilities which among a free and independent people must be discharged by the individuals themselves or by the families as distinct and separate units.

One individual who visited me insisted that some of the centers were doing that which the churches, social organizations, and clubs of various kinds were not only willing to do, but were actually doing, and that these centers were expanding because of the ambitions of some connected with them, so as to usurp the field occupied, and which legitimately should be occupied by organizations and individuals and citizens themselves.

Of course, I need not direct the attention of the Senate to the fact that we daily encounter the efforts of officials of the Government, and of employees in bureaus and executive agencies, who encourage the people to appeal for and to accept governmental aid in the discharge of responsibilities and duties which the individuals and local communities had been in the habit of performing, and, until they were led to believe that the Government could and would help, they would have been perfectly willing to continue to perform. It is unfortunate, but it is nevertheless true, that thousands of employees of the Government become missionaries to convert the people to a belief in their own impotency and incompetency and to the false faith, one which is destructive of individuality and true American character, that the National Government is their parent and in its generosity and omnipotence will extend its power to relieve them of duties which they should perform.

It is contended by some that these community centers in Washington are exponents of this modern cult, which is pernicious and deadly, which seeks to devitalize the people, sap their individualism, wither and destroy those virtues and independence and courage which have resulted in the upbuilding of great Commonwealths and the establishment of a Nation which carries the flag of progress and freedom throughout the world. There are thousands in our midst who believe that the State should assert greater power and assume complete guardianship over the individuals. It should educate the children, care for them when they have reached their majority, determine their occupations, prescribe limitations upon their conduct and activities, fix their wages, supply pensions, provide them with amusements and recreation, minister to all of their wants, and indeed exercise the powers of a guardian and a complete supervision of their lives. Those of this faith insist that the State should not only assume the control over and guardianship of children from and after birth, but they would have the State assert authority over the mothers and control prenatal conditions, fix the environment of the home life, and assert a paternalistic control in all things.

But recently a bill was before the Senate which sought to have the Federal Government go into the States and furnish nurses, doctors, and medical supplies in all maternity cases. Hospitals were also to be provided, and the Government, in connection with the State, was to assume control over the hygiene of the mother and the child and extend aid along the lines to which I have just referred.

Unfortunately we are accepting this unsound view that the people are incapable of looking after their own affairs, that they have become so enervated and devitalized that Government officials and Government flunkies and Government bureaus are needed for their guidance and protection. There is an effort to apotheosize the Federal Government, to degrade the States, and to destroy the confidence of the people in themselves, in their own powers, and in their capacity for self-government. Individuals under this meretricious doctrine lose their identity in the general mass. There is to be a compounding of the people and the formation of a huge and protoplasmic mass, in which individual activity is impossible, and which can only be controlled by a powerful and ever-present Government.

The picture is not overdrawn. It is before us, and it is painted in such attractive colors as to allure from the paths of safety many of the people of our land.

We need, Mr. President, apostles who will preach the doctrine that animated the founders of this Republic, that inspired the Declaration of Independence and fired the hearts of the men and women who crossed the Atlantic and battled with powerful forces and menacing foes to establish liberty and the right of conscience and local self-government and self-determination in the New World. It is time that the American people should awaken to the fact that it is not coddling by the Federal Government that is needed, but that the future rests with the people themselves. The future will be glorious if the genius of the fathers and the spirit which guided their mighty achievements inspires this generation and those who shall follow. This Republic will continue to guide the world if the American people shall maintain those high qualities and that spirit of manhood and womanhood that makes of each a leader and a teacher and a powerful factor in the great world movement. Theodore Roosevelt preached the doctrine of the strenuous life as against the sloth and ease and lassitude which will result from the substitution of the Government for the individual. It were well if his stirring words and virile example were remembered by the people and that the qualities of self-reliance and energy and courage were more vigorously asserted by the people everywhere.

There is nothing that so enervates the people as persistent governmental interposition in their individual affairs. We find a multitude of very intelligent men and women who clamor at the doors of State legislatures, and particularly at the doors of Congress, demanding that the Federal Government shall assume those responsibilities and duties which belong to individuals or to the family or to the State. I am not sure that the measure before us is not founded upon the theory that it is the duty of the Federal Government to care for the individuals beyond the school life or beyond the school age, and to furnish them amusements, to indicate the character of education, if they shall pursue any educative course, which shall be adopted by them in their mature years, and to become an overlord to direct them in those concerns which relate to their individual lives.

I had occasion a few days ago to advert to the fact that character was weakened just in proportion to Government surveillance and control of the lives of the people. If the Federal Government may dictate what men shall think and do, control by sumptuary and other legislation their appetites and domestic relations, and direct the manner in which they shall work out the problems of life, then it will only be a short time when the splendid qualities and the genius which have made this the greatest Nation in the world and has given it primacy in morality, in religion, in finance, and in all the elements of greatness and progress, will be lost, and individual and national decadence will follow. Our greatness depends upon the assertion of a true and rational individualism, upon the recognition of the fact that the people themselves have the capacity for self-government and for evolutionary development.

Individual and national growth will not result from Federal rules and regulations and "cut-and-dried" policies based upon bureaucratic formula.

No attempt must be made to place the American people upon a Procrustean bed, built by national authority, and to commit to Federal officials the right to determine whether we are too long or too short, whether our views conform to a uniform plan and a fixed and inexorable scheme, prepared by governmental authority. A static situation usually is the desire of officialdom.

Uniformity is regarded as the goal of excellence and perfection by some, and they would rejoice to see all individuals and nations cast in the same mold. To those of this mind peace and harmony and placidity and stagnation are the objects of life. The mountains and the crested waves mean motion, action,

UMI

storm, and, perchance, revolution; they are therefore evils to be avoided. There are too many educators and teachers who want to throttle our educational growth by forcing a system of uniformity; and we encounter the narrow and dogmatic who seek unanimity and harmony in political thought and in the social and all other relations of life. They want uniform laws and customs and practices; uniformity in our system of education, uniformity in our lives and thoughts and purposes.

The idea seems to be that uniformity is an evidence of progress and growth. Growth is the result of differentiation, not uniformity. It is heterogeneity not homogeneity that is needed in the social organism. What is wanted among the American people to-day is not uniformity but dissimilarity, those minute differentiations which are the basis of progress and mark in their progressive manifestations the upward march of society. In the biological field a departure from protoplasmic or cellular uniformity foreshadows the growth of higher forms of life. We find some of our citizens insisting that we shall have a uniform standard of education in all parts of the United States; that the schools of Maine shall be conducted exactly as the schools of California are conducted; that the same curriculum shall be adopted in the schools of Massachusetts and Florida. I was pleased to note a few days ago that a great educator had raised his voice in protest against this fallacy.

He adverted to the fact that the progress of the people educationally as well as in every other department of mental and human activity rests upon dissimilarity, upon a lack of uniformity, upon an appreciation of the value of those differences, and Buckle in his great work seeks to establish a relationship between man and his physical environments. Nature's variations find expression in the thoughts and lives of men, and their characters are in part determined by the somber shadows or the sunshine in which they live.

Mr. President, nature furnishes us a rather safe guide, and her voice should be heeded and her lessons applied. Darwin has pointed out in his exhaustive researches that by reason of differentiation nature, seizing upon a physical difference, develops a superior physical organism. A few hundred thousand years ago the ancestors of the majestic animal that has won the Derby race were small and unsightly things roaming over the steppes of Asia, but nature seized upon the differentiations, upon a slightly exaggerated characteristic in one animal, and added to that in its immediate progeny, and that was accentuated and exaggerated until the perfected and superb horse has been evolved.

I said nature is a good guide. We want not uniformity in our schools, in our social organism, in our political institutions. We want opportunity for change, for differences of opinion, for strenuous rivalry, in a word, for success. It is true all will not succeed, but, what is more important, all will have a chance to succeed. The iconoclasts and thinkers, those who broke shackles, have held the world in their hands and have carried the torch that has guided the world. Breaking away from uniformity resulted in discoveries, inventions, education, and enlightened nations. We are making this the golden age of the world, because we have not been shackled by chains forged in the darkness of superstition and oppression.

I am very glad to see rivalries among the States and between sections and cities. There should be rivalry among schools and communities and States, each in a firm and chivalrous manner striving to reach the higher standards and contribute most to the cause of liberty and enlightenment. I oppose the persistent efforts to bring the Federal Government into the lives and activities of the States and the people, to the end that there may be uniformity in everything which we shall do.

We are to-day witnessing a nation-wide propaganda, having for its object the bringing of the schools of the States and our educational system under the control of officials who hold Federal commissions. Washington is to be another Rome, and it is to send out to all the provinces—and the States are to be mere provinces—the edicts, the orders, the commands of Federal officials and bureaus and executive departments and the myriad agencies of the Federal organization. Already in some of our States the Federal officials are almost as numerous as the State officials. They are there to direct the people in the minutiæ of life, to tell them how to farm, how to plow the land, how to build their barns, how to make cottage cheese. They are there to teach them how to educate their children, how to care for the sick, and, as one of the Senators sotto voce says, how "to kill bugs." The people of the United States are becoming so incompetent, so enervated, so devitalized, by the persistent efforts of the Federal Government that Senators' mail is burdened with petitions and demands and complaints and prayers for Federal aid and Federal interposition in almost every concern of life.

I marvel when we are talking so much about self-determination and the right of peoples to govern themselves and are preaching so much about the divine right of small peoples to govern themselves and to determine their own destinies how we can support measures, which are constantly before us, which destroy the right of self-determination and deny to the States of the Union the control of their own domestic affairs.

During the debates on the Versailles treaty we exhibited much concern about Egypt. We loudly proclaimed that the Egyptians must have independence and the unlimited right of local self-government. We declared it to be an international crime for Great Britain to participate in the control of that nation and insisted that Egypt should be free. And yet, while these eloquent appeals for local self-government for Egypt were being made, we did not hesitate to countenance measures which strike at the rights of the States and restrict the exercise of the powers reserved by the people to the States and to themselves, respectively.

Mr. President, these generalizations may not be deemed relevant to the question now before the Senate, but if the complaints which are made to me by a multitude of good men and women in this city are founded in fact this appropriation seeks for its object the accomplishment of some of the evils of which I have been speaking. The theory seems to be that the people can not take care of themselves. There must be some Federal official at every door, whether we are sleeping or waking. The form of the Government meets our waking eyes when the sun of day arises, and its shadow hovers over us when our eyes close in nightly slumber. We do not see any longer the individual as the dominant force of the Nation. It is the Government that is the dominant and paramount force.

Mr. President, the important thing in this world is the individual. In him are the forces which determine the future. The devout Novalis said that he who lays his hand upon the human body lays his hand upon God. What he sought to emphasize was that the individual had the potentialities of majesty and the godhood within him; that he was the important factor in the world which made for advancement, for growth, and development. Subdue the individual, compress him into the regulation box of uniformity provided by Government, and his progress is arrested; in the end he becomes an inert and helpless form, and his tragic end is reflected in the political and social life of which he constitutes a part.

Mr. President, the power of growth is from within rather than from without. Of course, there must be the proper environment. The State has its duties, but the important thing is to afford the individual a free field in the great race of life. Senators will remember the statement of President Garfield when somebody asked him which was the greatest university in the world. His reply was "To sit upon one end of a log with Dr. Hopkins sitting upon the other end."

The provision which has been offered by the committee seeks, according to the view of its proponents, rather to supplement, as I understand, the activities of the churches and the activities of the individuals in furnishing amusement and recreation, and possibly to supplement the work of the schools in an educative way. If it is for educational purposes, as a proper adjunct to the schools, then I have no objection to it; but if it goes further, if it is to be controlled by fads and faddists, by a number of hysterical people and these who are more interested in drawing salary than in promoting the welfare of the people, then I am opposed to it.

I am not able to determine whether or not it is absolutely devoid of merit. I am inclined to think that it does have some merit and that there are a number of men and women connected with these organizations who are sincerely desirous of rendering service to the community and are willing to give their services for this legitimate and praiseworthy end.

I am not satisfied, however, that all who pretend to evince so much interest in this scheme are actuated by the same high motives. I find that those who have been most insistent upon the measure are the beneficiaries of it. There are too many salaried individuals and too great a proportion of the appropriation is given to those who profess great loyalty to education and a consuming desire to benefit the people.

Mr. MYERS. Mr. President, may I ask the Senator a question?

Mr. KING. I yield to the Senator.

Mr. MYERS. If, as the Senator from Utah says, one of the objects of the provision may be to bring about improvement in the people by those who are bent upon making that improvement, why not let those who are so actuated and those who are to be improved pay for it themselves? Why should the taxpayers of the United States pay for it? Why not let them im-

prove themselves at their own expense and not at the expense of the people of the United States?

Mr. KING. Mr. President, the observations of the Senator are very pertinent, and I shall not undertake an adequate reply.

Mr. MYERS. I agree substantially with all the Senator has said, but I can not see, after his able argument, why he should waver as to how he shall vote on the pending amendment—as to whether he shall vote for it or against it. I can not see, in view of his argument, how he could consider for an instant voting for the amendment.

Mr. KING. Mr. President, I shall vote against the amendment. I have offered a substitute which seeks to limit it; but if my substitute is adopted, I shall not vote for it, unless there are further limitations upon the use of the appropriation.

Mr. MYERS. Has the Senator's substitute been acted upon?

Mr. KING. No; it is pending now. I pass the substitute to the Senator from Montana, and ask that he shall do me the honor to read it.

Mr. MYERS. I shall be pleased to do so.

Mr. KING. Mr. President, I have read the testimony which was taken before the Senate committee, and, as I recall, there were some 15 or 18 secretaries, so called, who were to receive compensation of a thousand dollars each under the provision as it was presented. My experience is that the people of the United States are willing and ready to do the work, which it is claimed by those who are advocating this provision and who seem to desire the public welfare without making it a charge upon the Government. There are thousands of good men and women in the United States interested in social welfare of their communities. Our churches are filled with splendid men and women, and those churches are doing—and could do much more—a great deal of good along the line of social welfare and proper and rational recreation and amusement. Much of the work which is to be performed by the community center is being performed by the churches, and substantially all of it could be performed by the churches and private organizations, clubs, education and other societies, and social organizations.

Mr. MYERS. Mr. President, is not part of the money called for by the amendment proposed by the Senator from Utah to be used in providing dances for the people in the District?

Mr. KING. I think that is correct.

Mr. MYERS. I have had the honor of reading the Senator's proposed substitute, and I think it is only less objectionable in degree than the original provision. I think the substitute is objectionable to some extent; the original amendment is even more objectionable; and I do not think we ought to adopt either.

Mr. KING. Mr. President, the criticism of the Senator as directed to the amendment which I have offered is pertinent and well founded. It modifies the original amendment offered by the committee and reduces the appropriation, but in principle it rests upon the same basis as the committee amendment, and therefore would be subject to the same objection.

I hope, Mr. President, that the Senator having in charge the bill will accept the amendment, and that the board of education having this matter in charge will investigate the entire situation and obtain such data as will enable the next Congress to act intelligently upon the matter. I do not wish to do an injustice. If the work of these organizations is educational and within the proper province of governmental authority, I shall abate my opposition to a reasonable appropriation. But with the information now in my possession I can not approve the committee amendment.

Mr. GERRY. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The roll was called, and the following Senators answered to their names:

Capper	Heflin	Nelson	Smith, Ariz.
Curtis	Johnson, Calif.	New	Sterling
Dial	Jones, Wash.	Norris	Swanson
Dillingham	Kellogg	Overman	Trammell
Fletcher	Keyes	Page	Underwood
Frelinghuysen	King	Phipps	Wadsworth
Gerry	Knox	Pittman	Walsh, Mass.
Gronna	McKellar	Poindexter	Willis
Hale	McNary	Pomerene	
Harris	Moses	Robinson	
Harrison	Myers	Sheppard	

Mr. GRONNA. I desire to announce that the Senator from Wisconsin [Mr. LA FOLLETTE], the Senator from Missouri [Mr. REED], and the Senator from New Mexico [Mr. JONES] are engaged on important business of the Senate.

The VICE PRESIDENT. Forty-one Senators have answered to the roll call. There is not a quorum present. The Secretary will call the names of the absentees.

The reading clerk called the names of the absent Senators, and Mr. GLASS, Mr. KIRBY, Mr. SPENCER, Mr. STANLEY, and Mr. TOWNSEND answered to their names when called.

Mr. CALDER, Mr. PENROSE, Mr. FRANCE, Mr. WALSH of Montana, and Mr. GOODING entered the Chamber and answered to their names.

The VICE PRESIDENT. Fifty-one Senators have answered to the roll call. There is a quorum present. The pending amendment is the substitute offered by the Senator from Utah [Mr. KING] for the committee amendment.

Mr. ROBINSON. Mr. President, with some of the suggestions made by the Senator from Utah [Mr. KING] I am in hearty sympathy. I think it is of the very greatest importance that the activities conducted at these community centers be carefully and properly supervised. With that in mind, however, I believe with the Committee on Appropriations that they should be continued and adequately provided for.

Notwithstanding the fact that in the experimental stages of this subject occasion has been found by some good citizens to criticize the work of these community centers, on the whole they have accomplished good. Let me bring to the attention of the Senate some of the things that are or have been conducted at these centers.

During last year, for instance, meetings were held that were attended by 500,000 persons, in round numbers. That is, the total number of persons attending meetings held at community centers under the provisions of the act then in force aggregated 500,000. There was an average weekly attendance in the city of Washington—for all the centers provided for in this bill are in the city of Washington, and the meetings are held here—of 11,000, or over, for the 11 months that the centers were open. Over 270 clubs and other organizations met regularly every week in the 20 white and colored schools. That is the total number of centers that have been opened.

Mr. KING. Mr. President——

Mr. ROBINSON. I yield to the Senator from Utah.

Mr. KING. Do the clubs to which the Senator refers belong to the civic centers, or might they not function independently of them?

Mr. ROBINSON. Some of the clubs might function, but they have no meeting places, and some of them have no supervision, as I shall proceed to explain a little more in detail.

Aside from the civic, educational, social, and recreational activities of the adults, the boys' and girls' clubs for athletic work form a very important phase of this work.

At the present time there are meeting regularly each week in the centers 15 boy scout troops, 23 boys' athletic clubs, and a total of 38 boys' clubs. Including girl scout troops and athletic clubs, there are in all 59 scout troops and athletic clubs for boys and girls.

Mr. President, in the hearings before the committee at the other end of the Capitol the subject was discussed at very great length. A statement was furnished that committee by Miss Norton, showing where these centers are kept open, and the regular and special activities conducted at the various centers, and it occurs to me, from a cursory examination of that statement, that it might be very well to place some limitation upon the activities which are to be conducted at these various centers.

The Senator from Utah [Mr. KING] has offered a substitute for the committee amendment, and the substitute is the pending question before the Senate. The limitation of $15,000 carried in the amendment offered by the Senator from Utah is an inadequate sum to meet the proper requirements of this work. As stated before, I do not believe that the work should be abandoned or discontinued. It is being conducted not alone in the city of Washington, but in various cities of the United States. There, of course, the expenses of the work are provided by local authority; but since the Congress of the United States is the local authority that must provide for activities of this nature in the District of Columbia, Congress is the only governmental authority which can provide the necessary appropriations.

I have referred to the fact that community centers are maintained at public expense in various cities. I want to mention just a few of them.

In Salt Lake City, which is in the Senator's own State, it has been found necessary to appropriate public funds for community work. This work embraces orchestral service and dancing. Over 50 cities in this country are now developing this work. Large appropriations are made for it in many of the important and larger cities. It is apparently true that in the city of Washington such work is justified quite as strongly as in any city of the Union.

A committee of the United States Senate investigating the schools of Washington, I believe a year ago, of which the Senator from Mississippi [Mr. HARRISON] was a member, went into the subject very fully. It looked into what was being done, what activities were being carried on at these centers, and it made a report, which I wish to bring to the attention of the Senate, and which, I think, is very pertinent in this connection.

The Senate committee said:

> The use of school property as community centers for entertainments, meetings, and educational movements is approved. Your committee believes, however, that the use of such property ought to be under strict supervision, both as to the care of the same and the character of the entertainments and proceedings conducted therein. * * * The committee found that many of the school buildings were being used for community activities many of which were highly educational and recreational * * * in all instances the very strictest supervision and regulation should be observed.

I think perhaps if the Senator from Utah [Mr. KING] would modify his substitute so as to provide the sum carried in the amendment of the Committee on Appropriations, $25,000, and further modify it with reference to the limitation on the activities which shall be carried on, so as to provide that educational and reasonable recreational activities, other than dancing but including athletic sports, may be conducted, and that other work shall not be done; that dancing, for instance, shall be eliminated, I see no objection to the substitute offered by the Senator from Utah with those amendments. I do not believe, after a brief conference with the chairman of the subcommittee in charge of the bill, the Senator from Kansas [Mr. CURTIS], that he would object to the acceptance of the substitute in that form.

It is very gravely doubtful whether these activities should be continued as broad as they are. The people of the United States ought not to be expected to pay for dancing or instruction in dancing. There is quite a broad field which can be occupied by those engaged in this work, which will develop particularly the young people of the District of Columbia, tend to make them better men and better women, stronger men and stronger women, and the Government will be conserving its strength and its resources when it expends reasonable amounts for that purpose. But the Government ought not to be asked to expend funds for the conduct of schools in socialism or in bolshevism.

A statement was made by the Senator from Utah that charges have been submitted to him to the effect that in the past bolshevism has been taught at these meetings. That ought not to be permitted. This entire matter must be conducted under the board of education, and if the board of education sees fit to expend Government funds, provided for a necessary and justifiable purpose, to permit assaults on this Government itself, then I would be the last man in this Chamber to ask the Senate of the United States to appropriate a dollar for those community centers.

Some language ought to be written into this amendment, language broader than that comprehended by the terms of the amendment offered by the Senator from Utah, which will give those in charge of this work to understand that the Government does not propose to pay for the conduct of propaganda against the Government. In making this statement, I do not know, of course, whether the charge made to the Senator from Utah is correct or not. I know that the statement was made to him; otherwise he would not have repeated it in the Senate of the United States.

Mr. KING. Mr. President——

The VICE PRESIDENT. Does the Senator yield to the Senator from Utah?

Mr. ROBINSON. I yield with pleasure to the Senator from Utah.

Mr. KING. I have a letter here, which reached me within the past week, which repeats charges as to the broad radical and socialistic teachings which have quite recently been made. I do not know anything about the character of the teachings, and I am dependent entirely upon the information furnished me by residents of the District.

Mr. ROBINSON. Mr. President, the language of the report of the Senate committee which investigated this, with other subjects connected with the schools of Washington, justifies the inference that at sometimes since these community centers have been open something has been occurring there which ought not to have occurred, and that these centers have lacked proper and necessary supervision. What I want to do is to give Washington City, and the people whom these community centers are designed to benefit, the advantages of reasonable opportunities for recreation and for education; but I am unwilling to leave the matter open so that the money of this Government may be expended in the conduct of questionable propaganda, and in making that statement I again say that I do not assume the charges made by the Senator from Utah to be true. I merely say it is the duty of Congress to see that the money of the Government of the United States is not spent for such purposes.

Mr. CURTIS. I will state to the Senator that so far as I am concerned, as chairman of the subcommittee, and I know I speak the sentiments of the members of the subcommittee, we believe the activities of these centers should be limited. The complaints that have come to us have been more about dances which were being carried on in the centers than about other activities. I will state to the Senator, so that we may save time, that so far as I am individually concerned I am perfectly willing to accept the amendment if the amount is fixed at $25,000, and the other words are added, so that athletics and recreational exercises may be carried on.

Mr. ROBINSON. That suggestion meets with my approval, and I would also suggest to the Senator from Utah that, in addition to the amendments made, in order that there may be no misunderstanding about it, a proviso be added to the effect that no portion of this fund shall be expended for instruction in connection with dancing. If the Senator from Utah sees fit to modify his amendment in that particular, I shall be very glad to have him do so.

Mr. KING. May I say to the chairman of the subcommittee that I think if the chairman of the subcommittee and myself could get together we could phrase the amendment in such a manner as to meet the suggestion of the Senator from Arkansas [Mr. ROBINSON].

Mr. CURTIS. I want to get through with this bill to-day if possible. I will state to the Senator that if the amendment goes into the bill, it will be considered in conference, and perhaps the conferees can, without enlarging it and going beyond our jurisdiction, fix the bill so that it will be satisfactory to the Senator from Utah.

Mr. KING. I ask unanimous consent that we may pass over the amendment for the present.

Mr. CURTIS. Temporarily?

Mr. KING. Temporarily.

Mr. CURTIS. This is the last committee amendment. Of course, if we could take up other amendments, I am perfectly willing to pass it over for the time being, until the Senator can perfect his amendment. We can then take up amendments which may be offered by individual Senators.

Mr. MYERS. Mr. President, I ask the Senator from Kansas [Mr. CURTIS], who is in charge of the bill, how long it has been the practice of Congress to put in the annual appropriation bill for the District of Columbia such an item as this amendment provides for?

Mr. CURTIS. It is my recollection that four years ago it was provided for. It was stricken out once by the Senate and reinserted in conference. At the next session of Congress the item was put in by the House and very materially reduced in the Senate. I think this is the fourth time the item has appeared, but I would not be sure about that. It is the third or fourth time the item has appeared in an appropriation bill.

Mr. MYERS. I know it is comparatively a new departure. I ask the Senator for what purpose the appropriation of $25,000 provided in the amendment, or any other sum that may be appropriated by the amendment, is to be used? For what is the money to be paid? To whom does it go and for what service?

Mr. CURTIS. Last year there was paid to secretaries, organizers, teachers, and clerks, a total of 30—10 full time and 20 part time—covering the central office and 18 community centers, $20,770. There was paid to janitors, including engineers, foremen, and laborers, $10,770; $1,000 for supplies, $1,800 for repairs of buildings and lighting, and $600 for automobile; making a total of $35,000.

Mr. MYERS. Who uses the automobile and for what purpose?

Mr. CURTIS. The secretaries who go from one community center to the other. The centers are in different parts of the city, scattered all over the city, and the Ford is used in going from one part of the city to another. In addition to the paid people there are 523 volunteers. These were supervisors, who received no pay, 104; chaperons, who received no pay, 219; clerks and accountants, 16; teachers, 26; leaders, 83; purchasing agents, 14; and musicians, 61.

Mr. MYERS. What services do the secretaries, organizers, and others who draw the $20,000 perform? What work do they do for the money?

Mr. CURTIS. They direct the activities of the different centers, send out the notices, arrange for entertainments, and so forth. Some of them are teachers in swimming and some are teachers in dancing; others are music teachers. There are

various things they do, and many of them are paid for whatever they do, except those who, as I have stated, have volunteered their services.

Mr. MYERS. I thank the Senator from Kansas.

Now, Mr. President, I am opposed to the pending committee amendment, and also opposed to the substitute for it offered by the Senator from Utah [Mr. KING]. From the illuminating information given me by the Senator in charge of the bill in answer to my inquiries, from what I have learned from other sources on the floor during the debate, from what I have learned from the newspapers and other reports that have come to me, it seems that the schoolhouses are used in this connection for dances and concerts and singing societies, social meetings and gatherings, for debating societies and open forums, where everybody with any peculiar idea about how the Government should be conducted, about social reforms and social uplift and the betterment of mankind, the conduct of Congress and the conduct of all departments of the Government and the conduct of mankind in every relation to life, may have opportunity to exploit their ideas and to discuss them. People who hold peculiar views, it appears, utilize these occasions and places and opportunities for giving vent to the public of their ideas about how the world should be conducted and how the District of Columbia should be governed and what Congress should do and what it should not do. It has even been indicated here that it is reported that some of the utterances tend to teach socialism and even bolshevism and are very radical and extreme.

Mr. CURTIS. I may state to the Senator that nothing of that kind was brought to the attention of the committee. We have had no charges of that kind whatever.

Mr. MYERS. I am judging from what the Senator from Utah said.

Mr. CURTIS. The only thing we have heard about it is what has occurred here to-day.

Mr. MYERS. I do not charge the committee with knowledge of those things or sympathy with them, if they exist, but I have heard such rumors and I think I have gleaned some of them from newspaper articles. I have had some complaints about these meetings brought to my attention by residents of the District. It seems that a very large proportion of the people, if not quite half the people, at least a very large and respectable proportion of the people, of the District are opposed to these appropriations and vigorously opposed to the use of the schoolhouses for these purposes.

So far as these various and multifarious objects are concerned, and so far as are concerned the ideas of the people of the District who think they know how the universe should be conducted, and how the Government should be conducted, and how Congress should be conducted, and how mankind should be uplifted, and how society should be reconstructed and renovated—so far as all that is concerned, it is all right, except any possible utterances made in defense of bolshevism, if there have been any. I believe in free speech. I believe in the right of free speech. I believe in people with ideas being allowed to impart their wisdom to an eager and expectant world. But let them go and hire a hall and pay the rent for it, and impart their wisdom to an expectant and eagerly waiting public at their own expense. If we are to furnish free halls and free meeting places for every extremist and every radical who thinks he knows how to run the universe better than everyone else, and some of them better even than God Almighty—just furnish a hall at the expense of the people of the United States, let Congress appropriate the money to foot the bills, and we will find plenty of speakers, plenty of people who will be there to teach an expectant and eager world about all that should be done, and we will find plenty of listeners and plenty of sympathizers with them who think that everything that is done is wrong and ought to be torn down and done over.

I believe in allowing that privilege within constitutional limits. I would not curtail any such privilege. I believe in allowing people the right to express their views. But why encourage them to do it, why provide for their doing it at the expense of the taxpayers of the United States. Let them go and hire halls at their own expense and talk all they want to every night in the week if they can get people to listen to them; but I am opposed to taking the money of the taxpayers of the country and devoting it to that purpose and to the holding of dances and singing bees and social meetings and such as that for the people of the District of Columbia.

There is much amusement and benefit in some of these things. I believe in dancing, under proper conditions and within proper limits, and in singing societies and in social gatherings, but I think the people who indulge in these things should pay for them and not expect the taxpayers of the United States to pay for them. I think that is radically wrong. Let those who dance pay the fiddler.

I am opposed to the amendment; I am opposed to the substitute offered by the Senator from Utah; and I am opposed to any other substitute that can be gotten up or agreed upon or offered on the subject. I am opposed to the whole thing, root and branch. I think the principle is wrong. It is a fact that in recent years there has crept into the Congress an idea that we should provide such facilities and make such appropriations, and Congress has been doing it, but it is wrong. It is a modern theory in legislation that everybody ought to have everything they want. If a certain class or element of people want something, the idea is to get up a propaganda for it and bombard Congress for it. They ought to have it because they want it, is the idea. Congress ought to give everybody everything they want. If we do not give it to them, then the people will organize a propaganda and assail Members of Congress and communicate with their constituents back at home and publish their records and oppose them for reelection. That seems to be the modern tendency. If anybody wants anything, give it to him; it is a free country, and he ought to have whatever he wants.

I do not believe it is a common practice in a majority of the States to provide dances and community meetings for people at public expense. As the Senator from Arkansas [Mr. ROBINSON] has said, it appears to be indulged in in some of the larger cities of the country and in some, judging from one instance he cited, that are not so large. That is all right, in a way. If the board of aldermen of a city wants to take tax money paid in by the people of that particular city and devote some part of it to community recreation and amusement, it is their business; but I do not believe the people of a whole State should pay for such amusement for the people of a particular city, and I do not believe the people of the whole United States ought to be required to foot the bill for that sort of thing for the people of the District of Columbia.

I do not believe the practice prevails in the large majority of the States of the Union.

The Legislature of Montana does not appropriate money for the people of Montana to hold dances and singing societies and debating clubs in the schoolhouses of the State of Montana, and I doubt if it is done in Arkansas; I doubt if it is done in Mississippi; I doubt if it is done in Kansas. I do not believe we ought to treat the people of the District of Columbia better than the people of our own States are treated. I do not believe they are entitled to any more consideration. The people of the District of Columbia are not poverty stricken. Most of them are fairly well to do and seem to be comfortable and get a good living; and if they want to hire halls to have dances, I say all right, let them hire the halls and have their dances. If they want to have instruction in dancing and have dancing masters teach their children how to dance, all right; that is their business, and I say let them do it. If they want to have concerts and singing societies and debating clubs, all right; those things are to some extent beneficial. But I say let them put up the money for those things. They get the benefit. It is for their benefit, their diversion, their amusement, their instruction, and so I say let them furnish the money. I believe it is wrong to call upon the people of the United States to foot the bills for these things.

I think, from what I have learned here on the floor of the Senate during the debate, and from what I have learned from some other sources, that a good part of the time spent at these meeting places is spent in advancing all sorts of vagaries and ideas by people having peculiar views about every conceivable subject under the sun. It seems it is reported that there have been some whose utterances have broached the teaching of socialism and even bolshevism. It has been stated here that anything of that kind should be prohibited. I think we all agree on prohibiting the teaching of bolshevism at the expense of the public at any time or place.

It has been said that the conduct of these meetings should be put under the school board of the District. That depends very much on who constitutes the membership of the school board. If the school board of the District of Columbia were constituted like it was about a year ago I do not think any teaching of socialism or bolshevism would be likely to receive a very severe rebuke or check at the hands of the school board.

I am not at all in accord with the principle of this sort of an appropriation, which appropriates public money for private enjoyment. I believe in public education. I believe in adequately maintaining the schools of the District of Columbia in the regular way, but when that is done, I think, in an educational way Congress does its full duty to the District. To furnish amusement at public expense would be going too far. So far as is con-

cerned the furnishing of amusement and opportunity for social gatherings and diversion and recreation, I think it is carrying the functions of government entirely too far to ask the Federal Government to furnish the money for those purposes for the people of the District of Columbia, whether the sum involved be $25,000 or 25 cents. It is carrying the functions of the Government to an unwarranted extreme; it is carrying out an extremely socialistic idea to furnish the people of a part of the country a little section of the country, living in the District of Columbia, with those things at the expense of all the people of the United States. I think that is socialism run riot. It seems there is a very sharp division of sentiment about this matter amongst the people of the District, and it looks to me as though, if we adopt the amendment, we shall be forcing on the people of the District of Columbia something which about one-half of them do not want at all and to which they are actually opposed. Therefore I am utterly opposed to the whole innovation.

We hear a great deal of talk about economy and retrenchment of expenses and cutting down appropriations, and I was highly gratified when I learned that the House of Representatives had failed to incorporate in the bill any item appropriating money for this purpose.

Mr. CURTIS. Mr. President, the Senator from Montana, I know, wishes to be fair. The committee of the other House recommended the appropriation and it was reported to the House, but it went out in the House on a point of order.

Mr. MYERS. Certainly I want the facts; I do not wish to be unfair to anyone. I did not know why the provision was not put in the bill by the House. Has it been estimated for?

Mr. CURTIS. Yes; the estimate was for $35,000; an item was reported by the committee in the House carrying $35,000; and the committee of the Senate has reduced it to $25,000.

Mr. MYERS. I did not know how it came about, but I was gratified when I learned the bill passed the House without this item in it, and I was disappointed when the Senate committee recommended that the item be inserted. I believe we can well get along without this item of expense. I think the amendment is radically wrong in principle; I think it is violative of the true functions of Government; I think it is productive of more harm than good; I think it is totally unfair in principle and in fact to the taxpayers of the country; and I believe it would be altogether an unwise and unjustifiable act to adopt it. Therefore, I shall oppose the amendment or any substitute for it. It might be all right to allow the use of the schoolhouses for those purposes, provided the people enjoying them would pay the expense. To that I would make no objection, but I do object most emphatically to taking money from the taxpayers of the whole United States with which to pay for dances, lectures, and social enjoyment for the people of the District of Columbia. It is radically wrong. Let them pay for their own enjoyment.

Mr. HALE. Mr. President, there has been considerable discussion in regard to the bolshevistic ideas which are propagated in the community forums. If those forums are hotbeds of bolshevism we do not want them, but I have never seen any evidence to show that they are. Senators have been making allusions to such practices, but I should like to have some proof of the assertion that anything of the kind has been carried on in these forums. So far as I know, they are conducted by earnest, high-minded citizens, who should be encouraged.

Mr. MYERS. If the Senator will yield, I will merely say that the Senator from Utah [Mr. KING], who has just left the Chamber, claims that he has the proof in reference to the matter. The Senator from Maine was not present when the Senator from Utah spoke quite at length on the subject.

Mr. HALE. I beg the Senator's pardon. I was here, but I did not hear any such proof presented.

Mr. MYERS. I am sorry the Senator from Utah is not present. I can not produce the proof which that Senator from Utah claims to have in letters on the subject.

Mr. HARRISON. Mr. President, when the select committee of the Senate investigated the school affairs of this District last year they went into the matter pretty fully, and I do not think it ever appeared that in any of the community centers bolshevism was preached or taught or advocated. As the Senator from Montana [Mr. MYERS] will probably remember, one of the teachers of the public schools here was alleged to have taught bolshevism. I never thought that she was properly reprimanded, and the school board in the end practically exonerated her, for that is what the action of the board amounted to.

However, getting back to the matter of the community-center work, I wish to read to the Senate, since this discussion has gone thus far, the act of Congress which was passed March 4, 1915, touching community-center work. It is as follows:

That the control of the public schools in the District of Columbia by the board of education shall extend to, include, and comprise the use of the public-school buildings and grounds by pupils of the public schools, other children and adults, for supplementary educational purposes, civic meetings for the free discussion of public questions, social centers, centers of recreation, playgrounds. The privilege of using said buildings and grounds for any of said purposes may be granted by the board upon such terms and conditions and under such rules and regulations as the board may prescribe.

SEC. 2. That the board of education is authorized to accept, upon written recommendation of the superintendent of schools, free and voluntary services of the teachers of the public schools, other educators, lecturers, and social workers and public officers of the United States and the District of Columbia: *Provided*, That teachers of the public schools shall not be required or compelled to perform any such services or solicited to make any contribution for such purposes: *Provided further*, That the public-school buildings and grounds of the District of Columbia shall be used for no purpose whatsoever other than those directly connected with the public-school system and as further provided for in this act.

SEC. 3. That all laws or parts of laws in conflict with this act be, and the same are hereby, repealed.

So since 1915 the community centers have been operated and appropriations have been made for them.

Mr. CURTIS. Mr. President, no appropriation was made until 1918.

Mr. HARRISON. As I understand, they obtained part of their running expenses from private sources and voluntary contributions.

In reference to the cities which have community centers, I notice in the hearings that the following cities are mentioned:

New York; Boston; Chicago; Milwaukee; Kansas City, Mo.; Cincinnati; Cleveland; Akron, Ohio; Detroit; Grand Rapids; Lincoln, Nebr.; Omaha; Kenosha, Wis.; Indianapolis; South Bend; Minneapolis; Duluth, Minn.; New Bedford, Conn.; Jersey City; Bayonne, N. J.; Bridgeport; Berkeley, Calif.; Los Angeles; Oakland, Calif.; San Francisco; New Haven, Conn.; St. Paul, Minn.; St. Louis; Rochester; Newark, N. J.; Portland, Oreg.; Philadelphia; Paterson, N. J.; Dayton, Ohio; Sacramento; Pueblo, Colo.; Meriden, Conn.; Peoria, Ill.; Des Moines, Iowa; Elmira, N. Y.; Jamestown, N. Y.; Schenectady, N. Y.; Yonkers, N. Y.; Hamilton, Ohio; Allentown, Pa.; Alameda, Calif.; Alton, Ill.; Evanston, Ill.; Burlington, Iowa; Ottumwa, Iowa; Leavenworth, Kans.; Battle Creek, Mich.; Virginia, Minn.; Montclair, N. J.; Newburgh, N. Y.; Burlington, Vt.

Mr. MYERS. Mr. President, will the Senator yield to me for a moment?

Mr. HARRISON. Yes.

Mr. MYERS. I presume it will be conceded that in each instance referred to, if there has been any expense connected with the community forum, it has been paid out of the taxes of the particular city for the benefit of whose people the community forum is conducted?

Mr. HARRISON. Yes.

Mr. MYERS. And that the people of an entire State are not taxed to provide amusement for the people of one particular city, whereas in this instance it would be taxing the people of the entire United States for the benefit of the people of the city of Washington?

Mr. HARRISON. I think the Senator is absolutely correct about that.

Mr. MYERS. I should like to say in that connection, if the Senator will permit me, it seems to me that if Congress would grant the use of the schoolhouses for community centers in the District of Columbia to the people who desire to use them that would be doing enough, and that any expenses connected with them ought to be borne by the people who participate in the meetings.

Mr. HARRISON. Here is what Commissioner Claxton, of the Bureau of Education, says about community-center work:

The value of community centers may be briefly stated as acquaintance, education, discussion, entertainment, cooperation.

There is a letter in the hearings from the Secretary of War, Mr. Baker, who indorses community-center work. Mr. Baker addressed a letter to the superintendent of schools February 9, 1918, in which he said:

HON. ERNEST L. THURSTON,
Superintendent of Schools, District of Columbia,
Washington, D. C.

DEAR SIR: I have been keenly alive to the lack of wholesome recreation facilities for the thousands of Government clerks who have come here for war work. I am informed, moreover, that on account of this and the difficulty the clerks have had in securing suitable housing accommodations, many have refused appointments here, or after having come have returned home.

As far as the provision of suitable recreation is concerned, it has seemed to me that the schoolhouses offer facilities of the very finest sort, especially inasmuch as they are already in a limited way being used as community centers.

You may rest assured that any program to open them up in a larger way as recreation centers for these war workers meets with my hearty approval.

Very respectfully,

NEWTON D. BAKER,
Secretary of War.

So the Secretary of War in part, as I judge from his letter, based his approval on the fact that community centers should be maintained in the city of Washington because of the great army of war workers here who needed some place for recreation, some center where they might have educational discussions and where civic improvement could be advanced. I do not find it in the hearings, but I think that the President of the United States has indorsed the community centers.

Mr. MYERS. Mr. President, if the Senator will permit me further, I would rather take the opinion of the Secretary of War as to what should be the size of the Army rather than as to amusements and diversions. He is Secretary of War and not secretary of amusements for the people of the country.

Mr. HARRISON. I agree with the Senator, but the trouble about the Senator and myself is that we do not always take the opinion of the Secretary of War as to the size of the Army, and I am glad that we did not do so in connection with the joint resolution which was recently before us. However, as I was going to remark, I had a prejudice against community centers when I first began the investigation of the subject, and such prejudice naturally arises in the breast of anyone against the use of school buildings for dancing purposes. I can not grow enthusiastic about that proposition, although I know that in some sections certain conditions are prevalent which are not found in other sections; people do certain things in cities that are not done in the country. Some things are perfectly proper in certain parts of the United States that would in another part of the United States meet the condemnation of the people. On that account, as to community centers in the Senator's State and my State and no doubt in the State of Kansas and in every other State in the Union, if they should try to have dances in the public schools in a particular community the people would rise up and hold an indignation meeting; they would not stand for it; but the people in Washington do not think just as they do down in Skull Fork in Kansas, or at Pleasant Hill in Montana, or at Meadow Ridge in Maine. They have different ideas about such matters. A large percentage of the people of this city believe in dancing in public places. A great many of them believe in dancing in the schoolhouses, and evidently the board of education here believe in dancing in the schoolhouses, as do the Secretary of War and various others. I will say to the Senator from Montana, however, that I am not very enthusiastic about that proposition.

Mr. MYERS. Mr. President, if the Senator will yield, I do not object to dancing in schoolhouses if those who dance will pay the fiddler and not ask the people of the United States to pay the bill. Let them dance all they want to if they will pay for it.

Mr. KING. And let them also pay for the wear and tear on the buildings.

Mr. HARRISON. And so these initial appropriations were made, and they have been augmented by voluntary subscriptions and contributions. The way the proposition works, as I understand, is that each one of these communities organizes a center. It elects a president, a vice president, and a board of directors. It is a great honor that is thrust upon the citizens in these various localities to be elected president or vice president of a community center.

The VICE PRESIDENT. What does the vice president do?

Mr. HARRISON. I notice in the hearings at one place that at the Dunbar High School they had "The Crushers," an organization that gave a dance on one particular occasion. I do not know who "The Crushers" are. We never found out. They got out a very elaborate program and invitation. I think they did say that these people were called "Crushers" because of the fact that they crushed their hats in some particular way; but one of the members of the school board to which tribute was just paid by the Senator from Montana [Mr. MYERS], one J. Hayden Johnson—who is still a member of the school board, I think, and who ought to be fired—I do not think he held the office of vice president of the school board, but he was a member of the board of education of the District of Columbia, and he chaperoned this particular dance of "Crushers." I will say, however, that that was the only instance where the committee—which went into this matter pretty fully and investigated it—thought the dancing was not held properly. That is, they did have the "jazz," I think, on that particular occasion; they probably had the "bunny hug," or the various new-fangled dances the names of which I do not know; but ordinarily the dances are under the supervision of the various secretaries and the parents of the younger people who attend these community centers.

It is argued by the proponents of this movement that it is much better for children, boys and girls, to go to a dance in a community center, where they are chaperoned by parents, than to go to some public dance hall where there are no chaperons, and where they indulge in any kind of dancing that they want to. And so the proponents of the community centers who advocate dancing in them believe that dancing ought to be held there because of the strict supervision of the parents and the secretaries of these various communities.

That, however, is the least part of the work that these community centers do. They organize, not for dancing—that is the recreational feature—but they organize these community centers to let the people in the community centers hear a discussion of great educational questions, great scientific questions, questions of every kind. I had the pleasure last Saturday night of attending the meeting of the Mississippi Society. It was held, I think, in the Franklin School. They had a very elaborate program there. One of the distinguished scientists of the city of Washington for an hour discussed great scientific questions, and I understand that various State societies have their meetings under the supervision of the community centers. They sometimes have motion pictures, educational work, in these centers.

Here are the rules of the board of education governing the use of public-school buildings and community centers. I want to read these rules so that the Senate may be thoroughly advised about them, and then, if there are enough Members of the Senate who want to knock out this appropriation, let it go. I think that the community centers here are run on as high a plane as they are run in any city in the United States. The supervisor of the centers is a person of splendid character and understands her work. Everybody compliments her. And so I think, if they are going to be held anywhere, they are held here on as high a plane as anywhere else. Whether or not it is right for the Government to appropriate $25,000 to maintain them here because of the great army of clerks who are here from all over the United States is another question; but I want to read the rules.

These are the rules of the board of education governing the use of public-school buildings as community centers. They were promulgated June 29, 1917:

1. The use of buildings for community or civic center purposes shall be granted as required under the general statutes by the board of education on the written recommendation of the superintendent of schools.
2. The forum and civic center organizations to which the use of buildings is granted shall be held responsible for loss or damage to school buildings and property from such use other than ordinary wear and tear.
3. The general regulation of the board forbidding smoking shall be considered as in force in these special organizations.

So they do not allow smoking in these centers.

4. The use of special equipment within the buildings shall be determined by agreement with the principal of the building, except in the case of cooking and manual-training centers. The use of cooking and manual-training center equipment shall be granted only by the superintendent on recommendation of the director of the special subjects.
5. Routine activities of the community centers shall be planned to close not later than 10.30 p. m.

I do not know whether the Senator from Kansas is aware that these community centers must close at 10.30.

Mr. CURTIS. I made a statement to that effect about half an hour ago.

Mr. HARRISON. I did not know. Of course, they make exceptions from the rules sometimes, because I know the other night they kept open later than 10.30. There are exceptions, then, to that rule.

6. The board of education shall not attempt to regulate the activities carried on in civic centers, except in so far as may be necessary to protect school property and to safeguard the use of the buildings for their proper educational functions in connection with the children of the community.
7. So far as possible the civic center activities shall be conducted in rooms other than regular classrooms. The use of classrooms shall be a matter of agreement between the principal of the building and the secretary of the civic center.
8. Appeals in all matters affecting the use of buildings coming from the principal of the building and from the community through its local secretary shall be through the general secretary to the superintendent of schools.
9. Local secretaries shall be nominated annually, by vote, by the civic center or forum to the superintendent of schools, who shall present such nominations with his recommendation to the board of education, after conference with the general secretary and the principal of the building. The terms of secretaries shall coincide with the school year.

That is about the only instance I know where any part of the people of the District of Columbia have a right to vote. They have a right to select the secretaries of these community centers.

Mr. MYERS rose.

Mr. HARRISON. Does the Senator from Montana want to ask me a question?

Mr. MYERS. Is the Senator through reading the rules?

Mr. HARRISON. No; not quite. I will answer any question the Senator desires to ask, however.

Mr. MYERS. I just want to say that I think the rules are all right. I have no objection to them, if you will just add one more

rule—that those who participate in these meetings shall pay the expenses involved and not ask the people of the United States to pay for their amusement. With that rule added, the meetings would be all right.

Mr. HARRISON. This is such an important point that I really think these rules should be incorporated in the RECORD, so that posterity may see them.

Mr. MYERS. The Senator may be reading for posterity. I have no objection to the rules at all.

Mr. HARRISON. I was reading partly for the benefit of posterity.

Mr. MYERS. I ask to be exculpated from that. I am satisfied with the rules. It is the expense to which I object.

Mr. HARRISON. The Senator knew that the secretary was elected in a democratic way at these community centers—the only instance I know of, as I was saying, where that is the case in this District?

Mr. MYERS. I have made no objection to anything about the whole thing except the money; that is all—the people paying the money.

Mr. HARRISON (reading)—

Assistant secretaries where needed shall be nominated by the superintendent of schools after conference with the local secretary, the general secretary, and the principal of the building.

10. Local secretaries of the civic centers or forums shall not be nominated for appointment by the board of education and for payment from public funds until the organizations they are to represent are established on a firm basis satisfactory to the superintendent and to the board of education.

Mr. CURTIS. Mr. President, I suggest to the Senator that if he just wants to get the rules in the RECORD, I should be perfectly willing to have them printed in the RECORD.

Mr. HARRISON. No; the senior Senator from Utah [Mr. SMOOT], if he were here, would object. I do not want to take advantage of him in his absence.

11. The general secretary who shall be appointed shall serve as an officer under the superintendent of schools to handle matters involving the use of school plants and questions growing out of the schools in their relations to the centers which may be established. He shall act as the general officer to whom the local secretary shall report. He shall be at the service of any individual community as an adviser in connection with the organization and development of civic centers and forums, and shall have such other duties with relation to his general field of activity as may be assigned to him from time to time by the superintendent of schools.

The Senator from Montana was inquiring about the salaries of these secretaries:

14. The salary of local secretaries of civic centers and forums shall not exceed $420 per year, and where arranged for a specific number of nights shall not exceed $4 per night. The salary of assistant secretaries of local centers shall not exceed $210 per year, or $2 per night.

There is a note to these rules in that connection, which says that—

Because of the greatly extended work, secretaries in several of the large centers have been appointed at salaries as high as $1,200 a year for full-time service.

15. The salary of janitors shall be fixed by special recommendation of the superintendent, based upon the size of the plant and on the amount of work the janitor is required to do.

Again:

The board of education authorizes the following regulations governing community centers in the public schools—

This is the board of education speaking on the question—

1. The granting of a permit for the use of a public-school building for community-center purposes shall carry with it, without charge, heat and light, and so far as public appropriation shall permit, regular janitor and engineer service, the service of the community secretaries, and the service of such other assistants as may be specifically approved by the board of education.

2. Extra or unusual services required of the janitor or engineer force shall be paid for by the community center concerned.

3. Admission fees for entrance to public schools when used as community centers shall not be permitted.

4. Club dues or the equivalent for the expense of specific clubs or organizations within a community center or for the support of proper community activities the expense of which is not met from public funds are permitted to be charged, provided the local community center exercises proper control over rates, receipts, and expenditures, and provided further, that private funds are not handled by paid school employees. The board of education shall not be responsible for these funds nor for the disbursement thereof.

5. Rates of club dues or the equivalent shall be kept as low as is consistent with the proper support of the community activity.

6. Organizations which meet under the auspices of a community center and which are not directly a part of it shall limit any specific assessment for a particular meeting to the approximate amount necessary for the legitimate expense of the meeting.

7. The appointment of employees by the local community centers paid from private funds shall be subject to the approval of the general community secretary and the superintendent of schools. So far as possible the private rates of payment for similar services shall be uniform in the various centers.

8. The Central High School is recognized as a general civic and community center under the immediate supervision of the general community secretary. Club dues or the equivalent are authorized, as in the case of local centers.

9. For the control of private funds at this center and as an advisory council for community activities, the board of education will recognize an organization consisting of delegates from the regularly established local white community centers and of delegates from each organized class or club in the Central High School community and civic center in connection with which charges or dues are established.

I wanted to read to the Senator from Montana [Mr. MYERS] some of the programs showing the work in these community centers. They are very interesting programs. But the Senator is not here. So I will place it where the Senator can read it—in the RECORD. Take the Thompson School as an example to show the activities of these centers:

Monday, Criterion Club, dancing, 8 p. m.
Tuesday, Spanish, advanced, 7.30 p. m.
Wednesday, Big Sisters, dances first, third, fourth, and fifth Wednesdays, 8 p. m.

Then the program continues:

Second Tuesday, West Virginia State Society.
Second Wednesday, Spanish Dramatic Club play.
Third Wednesday, Oklahoma State Society.
First Thursday, Washington State and Alaska Society.
Second Thursday, California State Society.
Third Thursday, Colorado State Society.

It may be that the Senator from Colorado [Mr. PHIPPS] has spoken on some occasion when his State society held sway under the supervision of the community center.

Fourth Thursday, Kentucky State Society.

Then the following State societies hold their meetings under the supervision of the community-center work: The Alabama State Society—I have no doubt but that the Senator from Alabama [Mr. HEFLIN] has spoken at the meetings of not only the Alabama State Society, but at the meetings of many other State societies, and of course he always speaks well.

Mr. PHIPPS. Mr. President, having looked over my engagement record I regret to find that I have a date for the third Thursday of this month, and I hope that the Senator will conclude in sufficient time to enable me to keep it.

Mr. HARRISON. It is not the Colorado State Society meeting?

Mr. PHIPPS. No; not for this particular third Thursday.

Mr. HARRISON. The Arkansas State Society has its meetings under the supervision of this community center, the California State Society, the Delaware State Society, the Florida State Society, the Illinois State Society, the Iowa State Society, the Kentucky State Society, the Maryland State Society, the Massachusetts State Society, the Michigan State Society, the Mississippi State Society, the Nebraska State Society, and the Ohio Girls Club.

Then follow the Oklahoma State Society, the Pennsylvania State Society, the Washington State and Alaska Society, the Utah State Society, the Wisconsin State Society, and the South Dakota State Society.

Mr. McKELLAR. I wonder why Tennessee was left out?

Mr. HARRISON. I do not think Tennessee has a State society here.

Mr. McKELLAR. Oh, yes; it has.

Mr. HARRISON. I have read this merely for the purpose of having the RECORD show the activities of the community centers and that Senators might be informed before they vote on this appropriation.

I believe that the community centers, when they permit dancing in the public schools, should supervise them rigidly. I can not grow enthusiastic about having dances in the public schools; but so far as the educational features carried on by the community center are concerned, it is doing wonderful good, large numbers of people attend, and during the war it gave great amusement for the boys of the Army and the Navy who were stationed here and the great army of war workers who were here.

I do not care whether the substitute, which I understand has been agreed upon, or the original proposition is adopted.

The VICE PRESIDENT. The question is on the amendment offered by the Senator from Utah [Mr. KING] in the nature of a substitute for the amendment of the committee.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to, as follows:

Strike out on page 53 all of lines 9 to 18, inclusive, and insert the following:

"For payment of necessary expenses in conducting community forums and civic centers in school buildings, including equipment, fixtures, and supplies for lighting and equipping the buildings, paying for the cost of light and heat, payment of janitor services and employees, to aid in the work of said forums and centers, $15,000: *Provided*, That the work of said forums and centers shall be of an entirely educational character and such as shall be prescribed by the board of education: *And provided further*, That not more than 50 per cent of this appropriation shall be expended for payment of teachers and employees."

RECESS.

Mr. CURTIS. I understand the Senator from Mississippi has some amendments to offer but does not care to offer them

to-day. I move that the Senate take a recess until 12 o'clock to-morrow.

The motion was agreed to; and (at 4 o'clock and 55 minutes p. m.) the Senate took a recess until to-morrow, Wednesday, January 19, 1921, at 12 o'clock meridian.

NOMINATIONS.

Executive nominations received by the Senate January 18, 1921.

REAPPOINTMENTS IN THE REGULAR ARMY OF THE UNITED STATES.

ADJUTANT GENERAL'S DEPARTMENT.

To be colonel with rank from July 1, 1920.

Col. James Taggart Kerr, United States Army, retired.

JUDGE ADVOCATE GENERAL'S DEPARTMENT.

To be captains with rank from July 1, 1920.

Clifford Michael Ollivetti, late first lieutenant, Infantry, United States Army.

Franklin Prague Shaw, late first lieutenant, Infantry, United States Army.

QUARTERMASTER CORPS.

To be majors with rank from July 1, 1920.

Maj. John Henry Mellom, Philippine Scouts.

Capt. John Albert Paegelow, Philippine Scouts, retired.

Alfred McCalmont Wilson, late lieutenant colonel, Quartermaster Corps, United States Army.

To be second lieutenant with rank from July 1, 1920.

Second Lieut. Charles William Dietz, Philippine Scouts.

FINANCE DEPARTMENT.

To be captain with rank from July 1, 1920.

Maj. Harry F. Wilson, Philippine Scouts, retired.

ORDNANCE DEPARTMENT.

To be major with rank from July 1, 1920.

Charles Macon Wesson, late colonel, Ordnance Department, United States Army.

SIGNAL CORPS.

To be lieutenant colonel with rank from July 1, 1920.

Maj. Consuelo Andrew Seoane, Signal Corps, United States Army.

To be major with rank from July 1, 1920.

Consuelo Andrew Seoane, late captain, Cavalry, United States Army.

AIR SERVICE.

To be majors with rank from July 1, 1920.

Maj. Jenner Young Chisum, Philippine Scouts.

Capt. Raymond Sidney Bamberger, United States Army, retired.

To be major with rank from January 18, 1921.

Fred Hughes Coleman, late first lieutenant of Cavalry, Regular Army, with rank from date of nomination.

To be captain with rank from July 1, 1920.

Capt. Archie Wright Barry, Philippine Scouts, retired.

To be first lieutenant with rank from July 1, 1920.

Oliver Grant Brush, late first lieutenant, Field Artillery, Regular Army.

CORPS OF ENGINEERS.

To be first lieutenant with rank from July 1, 1920.

Edward Hayward Raymond, late first lieutenant, Coast Artillery Corps, Regular Army.

CHEMICAL WARFARE SERVICE.

To be first lieutenant with rank from July 1, 1920.

Crawford McMann Kellogg, late first lieutenant (temporary captain), Cavalry, Regular Army.

CAVALRY.

To be majors with rank from July 1, 1920.

Elkin Leland Franklin, late captain, Infantry, United States Army.

Cuthbert Powell Stearns, late captain, Cavalry (temporary lieutenant colonel, Air Service), United States Army.

To be captain with rank from July 1, 1920.

Capt. Frederic Waldo Whitney, Philippine Scouts.

To be first lieutenants with rank from July 1, 1920.

Vance Whiting Batchelor, late first lieutenant, Cavalry (temporary captain), United States Army.

Erle Fletcher Cress, late second lieutenant, Cavalry (temporary first lieutenant), United States Army.

William Tecumseh Haldeman, late first lieutenant, Cavalry (temporary captain), United States Army.

Joseph Idus Lambert, late first lieutenant, Cavalry (temporary captain), United States Army.

Charlie Campbell McCall, late second lieutenant, Cavalry (temporary first lieutenant), United States Army.

Woodbury Freeman Pride, late first lieutenant, Cavalry (temporary captain), United States Army.

Robert Oney Wright, late second lieutenant, Cavalry (temporary first lieutenant), United States Army.

Loren Francis Parmley, late second lieutenant (temporary first lieutenant), Cavalry, Regular Army.

To be second lieutenants with rank from July 1, 1920.

Second Lieut. Arthur Burton Clark, Philippine Scouts.

Second Lieut. Robert Lowry Freeman, Philippine Scouts.

FIELD ARTILLERY.

To be majors with rank from July 1, 1920.

Maj. Benjamin Lafayette Carroll, Philippine Scouts.

Maj. Clifford Mitchell Tuteur, Philippine Scouts.

Edmund Louis Gruber, late captain (temporary lieutenant colonel), Field Artillery, Regular Army.

To be captain with rank from July 1, 1920.

Solomon Foote Clark, late captain, Field Artillery, United States Army.

George Peterson Winton, late first lieutenant (temporary captain), Field Artillery, Regular Army.

To be first lieutenants with rank from July 1, 1920.

First Lieut. Dover Bell, Philippine Scouts.

First Lieut. Charles Allen Easterbrook, Philippine Scouts.

First Lieut. Grant Heniger, Philippine Scouts.

Fred Bidwell Lyle, late first lieutenant, Field Artillery, United States Army.

First Lieut. Ray Locke McDonald, Philippine Scouts.

First Lieut. Earle Starr Neilond, Philippine Scouts.

First Lieut. Calvin Sutton Richards, Philippine Scouts.

Kenneth Smith Wallace, late first lieutenant, Field Artillery, United States Army.

Irvin Henry Zeliff, late first lieutenant, Field Artillery, United States Army.

Paul Clarence Boylan, late second lieutenant (temporary first lieutenant), Cavalry, Regular Army.

Stewart Franklin Miller, late second lieutenant (temporary first lieutenant), Field Artillery, Regular Army.

To be second lieutenants with rank from July 1, 1920.

Second Lieut. Chester Arthur Horne, Philippine Scouts.

Paul Robert Menzies Miller, late second lieutenant, Coast Artillery Corps, Regular Army.

COAST ARTILLERY CORPS.

To be majors with rank from July 1, 1920.

Raymond Hope Fenner, late captain, Coast Artillery Corps, United States Army.

Graham Parker, late captain, Coast Artillery Corps (temporary major), United States Army.

Robert Ross Welshimer, late captain, Coast Artillery Corps, United States Army.

To be first lieutenants with rank from July 1, 1920.

Lloyd William Goeppert, late first lieutenant, Coast Artillery Corps (temporary captain), United States Army.

Charles Sydney Hammond, late first lieutenant, Coast Artillery Corps, United States Army.

George Curtis McFarland, late second lieutenant, Coast Artillery Corps (temporary first lieutenant), United States Army.

John Wesley Orcutt, late first lieutenant (temporary captain), Coast Artillery Corps, Regular Army.

To be second lieutenant with rank from July 1, 1920.

Second Lieut. Lynn Packard Vane, Philippine Scouts.

INFANTRY.

To be lieutenant colonel with rank from November 27, 1920.

Wilson Bryant Burtt, late major, Infantry, Regular Army.

To be majors with rank from July 1, 1920.

Maj. Frederick Martin Armstrong, Philippine Scouts.

Capt. Alfred Ballin, Philippine Scouts, retired.

Maj. Lloyd Baxter Bennett, Philippine Scouts.

Maj. Burton Ebenezer Bowen, Philippine Scouts.

Maj. Boltos Elder Brewer, Philippine Scouts.

Maj. William Buerkle, Philippine Scouts, retired.

Maj. Harry Jackson Castles, Philippine Scouts.

Louis Bernard Chandler, late major, Tank Corps, United States Army.

Maj. William Patrick Kelleher, Philippine Scouts.
Maj. Frank Theodore McCabe, Philippine Scouts.
Max S. Murray, late captain, Infantry, United States Army.
Maj. Isaac Joshua Nichol, Philippine Scouts.
Maj. Frank Leslie Pyle, Philippine Scouts.
Maj. Per Ramee, Philippine Scouts.
Maj. Chester Cordwell Staples, Philippine Scouts.
Maj. Joseph Cumming Thomas, Philippine Scouts.
Maj. James Henry Tierney, Philippine Scouts.
Maj. Albert Tucker, Philippine Scouts.
Maj. Seth Lathrop Weld, Philippine Scouts.
Maj. James Madison White, Philippine Scouts.
Charles Lawrence Byrne, late captain (temporary major), Field Artillery, Regular Army.
Bradford Grethen Chynoweth, late captain, Corps of Engineers, Regular Army.
William McCleave, late captain (temporary colonel), Field Artillery, Regular Army.
Frederick Willis Manley, late captain, Infantry, Regular Army.
Maj. Albert Tucker, Philippine Scouts.

To be captains with rank from July 1, 1920.

Capt. Marvin Randolph Baer, Philippine Scouts.
Capt. Carl Archibald Bishop, Philippine Scouts.
Capt. John Lloyd Burg, Philippine Scouts.
Maj. Sidney Erickson, Philippine Scouts.
Capt. Mahlen Augustus Joyce, Philippine Scouts.
Capt. Robert Louis Moseley, Philippine Scouts, retired.
Capt. John Harry Neff, Philippine Scouts.
Capt. George Washington Price, Philippine Scouts.
Capt. George Lamberton Smith, Philippine Scouts.
Capt. Benjamin Seymour Stocker, Philippine Scouts.

To be captains with rank from July 1, 1920.

Capt. George Cornelius Charlton, Philippine Scouts, United States Army, retired.
Charles Harrison Corlett, late captain, Infantry (temporary lieutenant colonel, Signal Corps), Regular Army.
Capt. Edson Irwin Small, Philippine Scouts, United States Army, retired.
Norman Paul Williams, late first lieutenant (temporary captain), Infantry, Regular Army.

To be first lieutenants with rank from July 1, 1920.

First Lieut. Lewis Russel Armstrong, Philippine Scouts.
First Lieut. Ernest Clifford Ayer, Philippine Scouts.
First Lieut. Roy Judson Caperton, Philippine Scouts.
First Lieut. Ernst Esser, Philippine Scouts.
First Lieut. Charles Campbell Holliday, Philippine Scouts.
First Lieut. Paul Kellam, Philippine Scouts.
First Lieut. Joseph William McIntyre, Philippine Scouts.
First Lieut. John Francis Pahlke, Philippine Scouts.
First Lieut. Walter Raymond Peck, Philippine Scouts.
First Lieut. Peter Paul Salgado, Philippine Scouts.
First Lieut. Joseph Ware Whitney, Philippine Scouts.
Joseph Bartholomew Conmy, late first lieutenant, Infantry, Regular Army.
Eugene Joseph Minarelli FitzGerald, late first lieutenant, Infantry, Regular Army.
William Frederick Gent, late first lieutenant (temporary captain), Infantry, Regular Army.
Clarence Ronald Peck, late first lieutenant, Infantry, Regular Army.
First Lieut. Michael Al Quinn, Philippine Scouts.
Francis Dundas Ross, late first lieutenant, Infantry, Regular Army.
First Lieut. Frank Emil Stoner, Philippine Scouts.
Lester Austin Webb, late first lieutenant, Infantry, Regular Army.
Norris Adron Wimberley, late first lieutenant (temporary captain), Infantry, Regular Army.
William Burbridge Yancey, late first lieutenant, Infantry, Regular Army.
George Francis Wooley, jr., late first lieutenant (temporary captain), Infantry, Regular Army.
Sterling Clifton Robertson, late first lieutenant of Infantry, Regular Army.
Edward Watson Kelley, late second lieutenant of Infantry, Regular Army.

To be second lieutenants with rank from July 1, 1920.

Second Lieut. Homer Bobo Battenberg, Philippine Scouts.
Second Lieut. Henry William Brandhorst, Philippine Scouts.
Second Lieut. William Ernest Donegan, Philippine Scouts.
Second Lieut. Hugh Tom Edwards, Philippine Scouts.
Second Lieut. Harold Lester Egan, Philippine Scouts.
Second Lieut. Frederick Brodie Forbes, Philippine Scouts.
Second Lieut. Carley Lawrence Marshall, Philippine Scouts.
Second Lieut. William Augustus Weinberger, Philippine Scouts.
Second Lieut. Carl Cooley Burgess, Philippine Scouts.
Charles Ream Jackson, late second lieutenant, Infantry, Regular Army.
Albert Smith Rice, late second lieutenant, Infantry, Regular Army.
Robert Robinson, late first lieutenant, Infantry, Regular Army.
Charles Linton Williams, late second lieutenant, Infantry, Regular Army.

APPOINTMENTS IN THE REGULAR ARMY OF THE UNITED STATES.

JUDGE ADVOCATE GENERAL'S DEPARTMENT.

To be colonels with rank from July 1, 1920.

Lieut. Col. Frederick Melvin Brown, Judge Advocate General's Department, United States Army.
Lieut. Col. Nathan Dana Ely, Judge Advocate General's Department, United States Army.
Col. William Oscar Gilbert, Judge Advocate General's Department, United States Army.
Lieut. Col. Sherman Moreland, Judge Advocate General's Department, United States Army.

To be lieutenant colonels with rank from July 1, 1920.

Lieut. Col. William Alexander Graham, Judge Advocate General's Department, United States Army.
Charles Loring, late major, Judge Advocate General's Department, United States Army.
Lieut. Col. George Lemuel McKeeby, Infantry, United States Army.
Lieut. Col. William Burton Pistole, Judge Advocate General's Department, United States Army.
Lieut. Col. William Cattron Rigby, Judge Advocate General's Department, United States Army.
Hugh Carnes Smith, late major, Judge Advocate General's Department, United States Army.
Lieut. Col. Amos Robert Stallings, Judge Advocate General's Department, United States Army.
Grant Taylor Trent, late lieutenant colonel, Judge Advocate General's Department, United States Army.

To be majors with rank from July 1, 1920.

First Lieut. Albert Charles Arnold, Infantry, United States Army.
Maj. Harry Anton Auer, Judge Advocate General's Department, United States Army.
Henry Roy Bitzing, late lieutenant colonel, Judge Advocate General's Department, United States Army.
Col. Edward James Boughton, Judge Advocate General's Department, United States Army.
Russell Henry Brennan, late major, Infantry, United States Army.
Maj. William Foster Burns, Judge Advocate General's Department, United States Army.
Maj. Walter Dew Cline, Ordnance Department, United States Army.
Lieut. Col. William Mellard Connor, jr., Judge Advocate General's Department, United States Army.
Myron Cady Cramer, late lieutenant colonel, Infantry, United States Army.
Lieut. Col. Charles Clement Cresson, Judge Advocate General's Department, United States Army.
Maj. Jason Fremont Defandorf, Judge Advocate General's Department, United States Army.
Lieut. Col. John Putman Dinsmore, Judge Advocate General's Department, United States Army.
Second Lieut. Albert Francis Drake, Infantry, United States Army.
Maj. Joseph Marcus Dreyer, Judge Advocate General's Department, United States Army.
Maj. Gordon Louis Finley, Infantry, United States Army.
Lieut. Col. Mark Emmet Guerin, Judge Advocate General's Department, United States Army.
Maj. Frank Wade Halliday, Judge Advocate General's Department, United States Army.
Lieut. Col. Lawrence Hyskell Hedrick, Field Artillery, United States Army.
Maj. George Place Hill, Infantry, United States Army.
Maj. Lester Seneca Hill, jr., Judge Advocate General's Department, United States Army.
Maj. Elza Charles Johnson, Infantry, United States Army.
Maj. Archibald King, Judge Advocate General's Department, United States Army.

Maj. Walter Michael Krimbill, Judge Advocate General's Department, United States Army.
Lieut. Col. William Walter Lemmond, Judge Advocate General's Department, United States Army.
Lieut. Col. Charles Milton McCorkle, Judge Advocate General's Department, United States Army.
Charles Henry McDonald, late major, Judge Advocate General's Department, United States Army.
Maj. John Marshall Markley, Judge Advocate General's Department, United States Army.
Maj. Frederic Granville Munson, Coast Artillery Corps, United States Army.
John Archibald Parker, late captain, Infantry, United States Army.
Maj. LeRoy Reeves, Judge Advocate General's Department, United States Army.
Maj. John Abdiel Smith, Judge Advocate General's Department, United States Army.
Maj. Lucius Meriwether Smith, Judge Advocate General's Department, United States Army.
Lieut. Col. James Howard Stansfield, Infantry, United States Army.
Maj. William Arthur Turnbull, Infantry, United States Army.
Maj. Rembert Gary Watson, Infantry, United States Army.
Lieut. Col. George Pentzer Whitsett, Judge Advocate General's Department, United States Army.

Cadet William Weston Bessell, jr.
Cadet Charles George Holle.
Cadet Charles Sheafe Joslyn.
Cadet Arthur Martin Andrews.
Cadet Edward Crosby Harwood.
Cadet John Wylie Moreland.
Cadet Wayne Stewart Moore.
Cadet Henry Franklin Hannis.
Cadet Arthur Lee McCullough.
Cadet Arthur Vinton Linwood James.

FIELD ARTILLERY.

Cadet Edward Albert Routheau.
Cadet Theodore Temple Knappen.
Cadet Godfrey Douglas Adamson.
Cadet Albert Newell Tanner, jr.
Cadet William Alter Watson.
Cadet Harold Frank Handy.
Cadet Richard Clare Partridge.
Cadet Edward John McGaw.
Cadet John Charles Felli.
Cadet Tyree Rivers Horn.
Cadet James Woodrow Clark.
Cadet Joseph Leo Langevin.
Cadet Willard Pierce Larner.
Cadet William Hardy Hill.
Cadet Louis Jacob Claterbos.
Cadet Herbert Ralph Pierce.
Cadet Carl Victor Erickson.
Cadet Auguste Rhu Taylor.
Cadet Frank Andrew Henning.
Cadet James Malcolm Lewis.
Cadet Donald Eddy Cummings.
Cadet Bernard Linn Robinson.
Cadet John Robert Culleton.
Cadet Charles Steinhart Whitmore.
Cadet James Hobson Stratton.
Cadet Edward Haviland Lastayo.
Cadet George DeGraaf.
Cadet James Alexander Samouce.
Cadet William Wallace Ford.
Cadet George Dewey Vanture.
Cadet Charles Barney Harding.
Cadet Harry Earl Fisher.
Cadet Donald Sylvester Burns.
Cadet Donald James Leehey.
Cadet Carl Edwin Berg.
Cadet William Squires Wood, jr.
Cadet Thomas Arnett Roberts, jr.
Cadet Francis Henry Morse.
Cadet Edward Macon Edmonson.
Cadet Ben Miller Campbell.
Cadet Leslie Burgess Downing.
Cadet William Ignatius Brady.
Cadet Eugene Martin Link.
Cadet John Simpson Hastings.
Cadet Cornelius Garrison.
Cadet William Harry Bartlett.
Cadet Edward Clinton Gillette, jr.
Cadet Russell Owen Smith.
Cadet Freeman Grant Cross.
Cadet Rex Van Den Corput, jr.
Cadet Homer Watson Kiefer.
Cadet Joseph Harris.
Cadet John George Howard.
Cadet Ford Trimble.

COAST ARTILLERY CORPS.

Cadet Wilson Burnett Higgins.
Cadet Frederic Lord Hayden.
Cadet Warren Cressman Rutter.
Cadet Harold Thomas Miller.
Cadet Volney Archer Poulson.
Cadet William Chamberlaine Coe.
Cadet Robert Henry Vickery Stackhouse.
Cadet James Goodrich Renno.
Cadet Loper Bailey Lowry.
Cadet Lee Armstead Denson, jr.
Cadet Ewart Gladstone Plank.
Cadet Alexander Romeyn MacMillan.
Cadet James Vincent Walsh.
Cadet Lathrop Ray Bullene.
Cadet Joseph Eugene Harriman.
Cadet Coleman Romain.
Cadet George Joseph Loupret.
Cadet Morrison Page Chitterling.
Cadet John Loren Goff.
Cadet Robert Barrett Donnelly.
Cadet William Gordon Holder.
Cadet Halstead Clotworthy Fowler.
Cadet Lyman Louis Lemnitzer.
Cadet Charles Himmler.
Cadet John States Seybold.
Cadet Donald Breen Herron.
Cadet James Myron McMillin.
Cadet Robert Hugh Kreuter.
Cadet Laurence Wood Bartlett.
Cadet Donald Frank Stace.
Cadet Reynolds Johnston Burt, jr.
Cadet John Dickerson Mitchell.
Cadet Clarence Henry Schabacker.
Cadet Ewart Jackson Strickland.
Cadet Robert Snyder Trimble, jr.
Cadet John Francis Cassidy.
Cadet John Foxhall Sturman, jr.
Cadet George Leo Doolittle.
Cadet Hugh Whitaker Winslow.
Cadet Russell Vance Eastman.
Cadet Francis Henry Lanahan, jr.
Cadet Courtney Parker Young.
Cadet John Donald Robertson.

CAVALRY.

Cadet Willis McDonald, 3d.
Cadet James Kenneth Mitchell.
Cadet Lawrence Granger Smith.
Cadet Bertram Wright Randles.
Cadet Verne Donald Mudge.
Cadet Joseph R. Stauffer.
Cadet Earl Henry Blaik.
Cadet Edgar Allan Gilbert, jr.
Cadet Fred Lebbeus Hamilton.
Cadet Gainer Brown Jones.
Cadet Wilbert Engdahl Shallene.
Cadet Clarence Clemens Clendenen.
Cadet Eugene Collum Johnston.
Cadet James Ludwell Lake, jr.
Cadet James Hess Walker.
Cadet Lyman Lincoln Judge.
Cadet Lawrence Edward Schick.
Cadet Henry Chester Hine, jr.
Cadet Elias Sanford Gregory.
Cadet William Price Withers.
Cadet Frederick Robert Pitts.
Cadet Arthur Kenley Hammond.
Cadet Martin Charles Casey.
Cadet William Wallace McMillan.
Cadet Kenneth Gilpin Hoge.
Cadet James Frederick Wahl.
Cadet Robert Edwards.
Cadet Lawrence Joseph Carr.
Cadet Robert Dickerson Durst.
Cadet Clovis Ethelbert Byers.
Cadet George Andrew Rehm.
Cadet Edward Carl Engelhart.

INFANTRY.

Cadet Roy Winne Barhydt.
Cadet Leslie Emmett Mabus.
Cadet Joseph Jacob Billo.
Cadet Robert Francis Watt.
Cadet William Carleton McFadden.
Cadet Claude Eugene Haswell.
Cadet Frank Needham Roberts.
Cadet Charles Frederick Beattie.
Cadet Sherman Vitus Hasbrouck.
Cadet Crump Garvin.
Cadet Hamilton Peyton Ellis.

Cadet Thomas Dresser White.
Cadet Frederick Mixon Harris.
Cadet Dwight Acker Rosebaum.
Cadet Donald Robert Van Sickler.
Cadet Richard Candler Singer.
Cadet John Henry Hoffecker Hall.
Cadet Aladin James Hart.
Cadet Powell Paxton Applewhite.
Cadet Jefferson Denman Box.
Cadet William Richter Tomey.
Cadet Joseph Honore Rousseau, jr.
Cadet Frederick Seymour Dixon.
Cadet Maurice Wiley Daniel.
Cadet Alexander Hamilton Perwein.
Cadet Tracy Enfield Davis.
Cadet Oscar Raymond Johnston.
Cadet Charles Whitney West.
Cadet Park Brown Herrick.
Cadet Herbert Carl Reuter.
Cadet Helmer William Lystad.
Cadet Harold Edward Smyser.
Cadet Esher Claflin Burkart.
Cadet Thomas Eginton Whitehead.
Cadet Alexander George.
Cadet Charles Kenon Gailey, jr.
Cadet Mortimer Frederick Wakefield.
Cadet Francis William Farrell.
Cadet Wilmer Brinton Merritt.
Cadet Harry Clark Wisehart.
Cadet Harold Julius Chapman.
Cadet John Irvin Gregg, jr.
Cadet John Russell, jr.
Cadet Charles Merton Adams, jr.
Cadet Frank Hoben Blodgett.
Cadet John Ferral McBlain.
Cadet Richard Meade Costigan.
Cadet Gustave Harold Vogel.
Cadet Basil Girard Thayer.
Cadet Edward Joseph Sullivan.
Cadet James Perrine Barney, jr.
Cadet Wilbur Sturtevant Nye.
Cadet Charles Harlan Swartz.
Cadet Leland Stuart Smith.
Cadet Wayne Latta Barker.
Cadet Francis Selwyn Gay.
Cadet Carl Frederick Duffner.
Cadet Wilburn Vastine Lunn.
Cadet Millard Pierson.
Cadet Francis Ward Walker.
Cadet Harold Oliver Sand.
Cadet Cyril Drew Pearson.
Cadet Raymond Henry Reece.
Cadet Harlan Thurston McCormick.
Cadet Henry Peter Burgard, 2d.
Cadet Alexander Gilbert Sand.
Cadet Ray Olander Welch.
Cadet George William Richard Wilson.
Cadet John Lamont Davidson.
Cadet Julian Erskine Raymond.
Cadet Abraham Sheridan Abel.
Cadet George Honnen.
Cadet Charles Porter Amazeen.
Cadet Edward Thomas Williams.
Cadet Frank Thweatt Searcy.
Cadet George William Bailey, jr.
Cadet Henry Kirk Williams, jr.
Cadet Alan Lockhart Fulton.
Cadet Terrence John Tully.
Cadet William McKinley Laumeister.
Cadet Paul Clarence Kelly.
Cadet Sidney Ginsberg.
Cadet James Miller Rudolph.
Cadet William Earl Crist.
Cadet William Roe Brewster.
Cadet Claude Monroe McQuarrie.
Cadet Charles William Smith.
Cadet William Lemuel Mitchell.
Cadet Harrison Guinther Travis.
Cadet Escalus Emmert Elliott.
Cadet Milton Cogswell Shattuck.
Cadet Joseph Vincent de Paul Dillon.
Cadet Francis James Starr.
Cadet William Edward Ryan.
Cadet Hayden Adriance Sears.
Cadet Newton Nevada Jacobs.
Cadet John Thomas Lynch.
Cadet John Black Reybold.
Cadet John Raoul Guiteras.
Cadet William Dickey Long.
Cadet Henry Irving Hodes.
Cadet Clifford Augustine Taney, jr.
Cadet Paul Earl Tombaugh.
Cadet Harvey Kenneth Greenlaw.
Cadet William Joel Tudor Yancey.
Cadet Leon Eugene Lichtenwalter.
Cadet Sidney Rae Hinds.
Cadet John Aloysius McNulty.
Cadet Halley Grey Maddox.
Cadet Snowden Ager.
Cadet John English Nelson.
Cadet Randolph Burt Wilkinson.
Cadet Dean LeRoy Sharrar.
Cadet John Talbot Curtis.
Cadet George Hasbrouck Krause.
Cadet Harold Todd Turnbull.
Cadet Hugo Peoples Rush.
Cadet John William Wofford.
Cadet Wray Bertrand Avera.
Cadet Charles Fox Ivins.
Cadet Walter Daniel Buie.
Cadet John Taylor Ward.
Cadet John Elmer Reierson.
Cadet Edward Maurice Flexner, jr.
Cadet Henry Jackson Hunt, jr.

To be second lieutenant with rank from September 4, 1920:

INFANTRY.

Cadet George Huston Bare.

John Francis O'Ryan, late major general, United States Army, from December 15, 1920.

TO BE BRIGADIER GENERAL.

Frank Thomas Hines, late brigadier general, United States Army, from September 7, 1920.

HOUSE OF REPRESENTATIVES.

TUESDAY, *January 18, 1921.*

The House met at 12 o'clock noon.

Rev. John Brittan Clark, D. D., of the First Presbyterian Church, Washington, D. C., offered the following prayer:

Almighty God, who in infinite grace doth permit us to call Thee our Heavenly Father and who doth call us from out our manifold need unto Thee for help, hear us in our prayer, make real to us Thy promise that if any man lack wisdom let him ask of God, who giveth to all men liberally and upbraideth not, and it shall be given him. We thank Thee for the revelation through Jesus Christ that the ministry of God is not confined to sacred precinct, with censer and bell and song, but is wherever man, forgetting himself, tries to serve his fellow men. Grant us this inspiration and blessing, for Christ's sake. Amen.

The Journal of the proceedings of yesterday was read and approved.

REREFERENCE OF BILL H. R. 2712.

Mr. KAHN. Mr. Speaker, by direction of the Committee on Military Affairs, I ask that the bill H. R. 2712 be rereferred to the Committee on Claims.

The SPEAKER. Without objection, the rereference will be made. [After a pause.] The Chair hears no objection.

CALENDAR WEDNESDAY.

Mr. MONDELL. Mr. Speaker, I ask unanimous consent that the House dispense with business under the Calendar Wednesday call to-morrow.

UMI

The SPEAKER. The gentleman from Wyoming asks unanimous consent that the House dispense with Calendar Wednesday business to-morrow. Is there objection?

Mr. BLANTON. Mr. Speaker, reserving the right to object, will the gentleman from Wyoming indicate whether we will get a vote to-day on the apportionment bill?

Mr. MONDELL. I doubt if we will. I had hoped that the general debate would be closed.

The SPEAKER. Is there objection to the request of the gentleman from Wyoming? [After a pause.] The Chair hears none, and it is so ordered.

APPORTIONMENT OF REPRESENTATIVES.

Mr. SIEGEL. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the purpose of considering the bill H. R. 14498, commonly known as the reapportionment bill, and pending that I ask for unanimous consent that the debate be limited to five hours, to be equally divided into four parts, under the control, namely, of the gentleman from Louisiana [Mr. ASWELL], the gentleman from Georgia [Mr. LARSEN], the gentleman from Indiana [Mr. FAIRFIELD], and myself.

Mr. ANDREWS of Nebraska. Mr. Speaker, I make the point of no quorum.

The SPEAKER. The gentleman makes the point of no quorum.

Mr. ANDREWS of Nebraska. I withhold it until we finish this agreement.

The SPEAKER. The gentleman from New York [Mr. SIEGEL] asks unanimous consent that general debate be limited to five hours and be divided into four parts.

Mr. ASWELL. The intention is, Mr. Speaker, that the gentleman from Georgia [Mr. LARSEN] will recognize gentlemen on this side who are opposed to the bill and I will recognize those who are in favor of the bill; that the gentleman from Indiana [Mr. FAIRFIELD] will recognize gentlemen on his side who are opposed to the bill and the gentleman from New York [Mr. SIEGEL] will recognize those in favor of the bill.

Mr. WINGO. Does the request include limiting the general debate to the bill?

The SPEAKER. It does; and that the five hours be divided into four parts, one-quarter to be controlled by the gentleman from New York [Mr. SIEGEL], one-quarter by the gentleman from Indiana [Mr. FAIRFIELD], one-quarter by the gentleman from Louisiana [Mr. ASWELL], and one-quarter by the gentleman from Georgia [Mr. LARSEN]. Is there objection? [After a pause.] The Chair hears none. The question is on the House resolving itself into the Committee of the Whole House on the state of the Union.

Mr. GARD. Mr. Speaker, I make the point of order there is no quorum present.

The SPEAKER. The gentleman from Ohio makes the point of no quorum, and it is clear there is no quorum present. The Doorkeeper will close the doors, the Sergeant at Arms will notify the absentees. Those in favor of the House resolving itself into the Committee of the Whole House on the state of the Union for the consideration of the apportionment bill will, as their names are called, answer "yea," those opposed will answer "nay," and the Clerk will call the roll.

The question was taken; and there were—yeas 308, not voting 122, as follows:

YEAS—308.

So the motion was agreed to.

The Clerk announced the following pairs:

Mr. GRAHAM of Pennsylvania with Mr. STEELE.

Mr. SUMMERS of Washington with Mr. RANDALL of California.

Mr. PERLMAN with Mr. BABKA.

Mr. WINSLOW with Mr. GOODWIN of Arkansas.

Mr. EMERSON with Mr. BELL.

Mr. MCPHERSON with Mr. MAJOR.

Mr. WALSH with Mr. SMALL.

Mr. FREAR with Mr. CONNALLY.

Mr. SANFORD with Mr. WELTY.

Mr. LAMPERT with Mr. HUDSPETH.

Mr. SMITH of Michigan with Mr. MAHER.

Mr. HOUGHTON with Mr. GANDY.

Mr. WILSON of Illinois with Mr. MCANDREWS.

Mr. REED of West Virginia with Mr. GRIFFIN.

Mr. TAYLOR of Tennessee with Mr. THOMAS.

Mr. FRENCH with Mr. WOODS of Virginia.

Mr. KENNEDY of Iowa with Mr. EAGAN.

Mr. LEHLBACH with Mr. KITCHIN.

Mr. WATSON with Mr. JOHN W. RAINEY.

Mr. GRIEST with Mr. GODWIN of North Carolina.

Mr. WARD with Mr. SULLIVAN.

Mr. HAMILTON with Mr. RIORDAN.
Mr. SNYDER with Mr. CLARK of Florida.
Mr. FOCHT with Mr. DUPRÉ.
Mr. BAER with Mr. SMITH of New York.
Mr. SMITH of Illinois with Mr. WISE.
Mr. MUDD with Mr. BRUMBAUGH.
Mr. MCCULLOCH with Mr. ROWAN.
Mr. NELSON of Wisconsin with Mr. POU.
Mr. SANDERS of Indiana with Mr. SANDERS of Louisiana.
Mr. SELLS with Mr. CANTRILL.
Mr. BROOKS of Pennsylvania with Mr. MCKINLEY.
Mr. MERRITT with Mr. MOONEY.
Mr. MANN of Illinois with Mr. MOORE of Virginia.
Mr. ANDREWS of Maryland with Mr. CULLEN.
Mr. JEFFERIS with Mr. KINCHELOE.
Mr. PORTER with Mr. JOHNSTON of New York.
Mr. GOULD with Mr. BLAND of Missouri.
Mr. EDMONDS with Mr. FERRIS.
Mr. MORIN with Mr. EVANS of Nevada.
Mr. BOWERS with Mr. GALLIVAN.
Mr. KREIDER with Mr. MARTIN.
Mr. COSTELLO with Mr. MOON.
Mr. LAYTON with Mr. OVERSTREET.
Mr. JAMES of Michigan with Mr. O'CONNELL.
Mr. CRAGO with Mr. LEA of California.
Mr. FOSTER with Mr. COLLIER.
Mr. HULINGS with Mr. MCGLENNON.
Mr. ELLSWORTH with Mr. MCLANE.

The result of the vote was announced as above recorded.

The SPEAKER. A quorum is present. The Doorkeeper will open the doors. The House votes to resolve itself into Committee of the Whole House on the state of the Union for the consideration of the redistricting bill, and the gentleman from Kansas [Mr. CAMPBELL] will please take the chair.

Thereupon the House resolved itself into Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 14498, with Mr. CAMPBELL of Kansas in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 14498, being a bill for the apportionment of Representatives in Congress amongst the several States, which the Clerk will report.

The Clerk read as follows:

A bill (H. R. 14498) for the apportionment of Representatives in Congress amongst the several States under the Fourteenth Census.

Mr. SIEGEL. Mr. Chairman, I move that the first reading of the bill be dispensed with.

The CHAIRMAN. The gentleman from New York moves that the first reading of the bill be dispensed with. The question is on agreeing to that motion.

The motion was agreed to.

Mr. SIEGEL. Mr. Chairman, every 10 years the same problem which we are about to discuss to-day presents itself here, namely, that of determining the number of Members of the House for the 10 years then to follow.

The committee recognized that fact. For the purpose of settling that vitally important question once and for all time, it recommended that a constitutional amendment be passed making the House membership 500, and directed me as its chairman to introduce such a resolution providing for such an amendment. Such a resolution has been introduced by me, and I will say at this time that it is my purpose and my intention to push such resolution, so that Congress may act upon it, and, if it sees fit to pass it, that the several States of the Union, through their legislatures, may determine whether American public sentiment demands that the number of Members of the House shall be limited to 500.

Ten years have elapsed since the last reapportionment took place. At that time we fixed the number of inhabitants for each district at 211,877, which was seven times the number of inhabitants for each congressional district the framers of the Constitution deemed the proper number for a Representative; and now, in 1921, when the population of the country has grown to close to 106,000,000 people, when during the past 10 years woman suffrage has come, with its increased number of voters, when approximately 4,600,000 men who saw service in the recent war are properly demanding not only individual attention but action by Congress as a body, and at a time when the whole Nation is turning to Congress repeatedly for action upon an increasingly large number of matters, the committee felt that increasing this House to 483 was a proper step in order that this representative body may be truly representative of the people of the entire country. Keeping that in mind, let us see what the ratio under the several apportionments has been.

Apportionment.	Year.	Members.	Ratio.
Constitution	1789	65	30,000
First Census	1793	106	33,000
Second Census	1803	142	33,000
Third Census	1813	186	35,000
Fourth Census	1823	213	40,000
Fifth Census	1833	242	47,700
Sixth Census	1843	232	70,680
Seventh Census	1853	237	93,423
Eighth Census	1863	243	127,381
Ninth Census	1873	293	131,425
Tenth Census	1883	332	151,911
Eleventh Census	1893	357	173,901
Twelfth Census	1901	391	194,182
Thirteenth Census	1911	435	211,877

The ratio adopted by the committee is 218,986 for each Representative. I have read the debates which have been held in previous discussions upon the reapportionment measures. They are to the effect that the House is too large, and that the House can not transact business in a so-called dignified way because of the size of the membership. There is not a single European legislative body which is called a representative body of any European Government which has not more representatives for population than what even 500 would be, and if we turn to our sister Republic, France, on the other side, we find the other day, when they demanded a new cabinet, there were over 680 members of the House of Deputies who voted. For the information of the House the following table is taken from the Statesman's Yearbook for 1920 and shows the census upon which the calculations were made:

Countries.	Census year.	Number of members in lower house.	Ratio of members to population.	Population on which ratio is based.
United Kingdom	1911	707		45,516,253
England and Wales	1911	528	70,000	
Scotland	1911	74	70,000	
Ireland	1911	105	43,000	
Belgium	1918	189	40,000	7,555,576
Denmark	1916	140	21,000	2,940,000
France	1919	626	66,255	41,475,523
Germany	1919	423	130,227	55,086,000
Greece	1913	316	16,000	4,744,725
Italy	1911	508	71,000	36,740,000
Jugo-Slavia (Serbia)	1919	166	86,238	14,316,459
Netherlands	1918	100	66,787	6,678,699
Norway	1910	126	18,982	2,391,782
Portugal	1911	164	36,329	5,957,985
Rumania	1919	347	50,124	17,393,149
Spain	1910	417	47,844	19,950,817
Sweden	1918	230	25,278	5,813,850
Switzerland	1916	189	26,127	3,937,000

The remedy is not in reducing or keeping the number where we are, but by the establishment of rules by which this body could guide its own legislation. There is no logical reason in the world why, when in Committee of the Whole a point of no quorum is raised, that when 100 Members appear we could not stop then and there, the required number being present, and proceed to transact our business. The country is not interested in knowing who the Members are who are away at that time. The same is true when a call of no quorum is raised in the House and a majority appears. We could stop then and there without taking a list of absentees. Of course when the question of voting upon a bill came up, that would be another story. Then we would have a roll call, and then we would know how men have voted, one way or another. It is the demagogue who, when on the stump, points to the fact that such and such a Member was absent so many times. He knows in his heart and soul that the Member may have been away at committee work, or down at the departments. The American people have commenced to learn about these things, and since the war they have been getting closer and closer and more familiar with the methods of Congress and what its Members are constantly doing.

I want you gentlemen to realize that this committee worked hard, that it had no easy problem before it. Under our bill there would be no reduction in the number of the Members of the House from any State. Under any other proposition, you must reduce the representation of those States, some of them dating from the beginning of the Government up to now, which in times of war and at other times have more than done their duty to our country. In other words, you strike at those States

where the farmers predominate, and where the great labor of the United States is performed in the production of foodstuffs.

I have read this minority report. With the usual fever which has seized this House of late, regarding statistics, and with the lack of thought of taking pencil and paper and accurately figuring what is going into a report, they have stated here that 48 Members would expend for mileage $240,000. I did not know that we had any Member in this House who received $5,000 as mileage per annum. If there be any, I would like to see him. There is not a single district where that is true. The average New Yorker takes $92 per session as mileage, and I understand the gentlemen from California receive about $1,200 at the utmost, and even Alaska does not run much above that. This report says—and the newspapers have picked it up as being true—that the average Member receives $5,000 for mileage; and when it contains that statement, it says something which the members of the committee might have known was not true if they had made inquiry.

When they said that the average Member expends for franking purposes and telegraphing $5,000 a year, that was a statement that was highly inaccurate; because we all know that this House is not spending $2,000,000 for telegraphing and for franking purposes annually, and we all know that we are not spending $2,000,000 for mileage. Yet that statement is contained in the report, and the newspaper editorials of the country have seized it as showing the expenditure by Congress of money for its own Members. Coming from New York, which has nothing to gain in percentage of its House membership under any bill which may be produced here, I have looked at this big question with no personal view as far as my own State is concerned. We shall have the same percentage of membership under any bill which will pass Congress. I have looked at it from the broad standpoint of what is best for the entire Nation. What benefits one part of America helps to benefit all our citizens, regardless of where they reside.

Mr. LARSEN. If the gentleman will allow me, the figures as to mileage should be $24,000 instead of $240,000.

Mr. SIEGEL. I am very glad the gentleman from Georgia makes that correction, and the same correction should be made about the expense of franking.

Mr. SIMS. Mileage is not a constitutionally vested right. We need not give any mileage, rather than deprive the people of proper representation.

Mr. SIEGEL. I agree with the gentleman on that, and I will say that as far as I am personally concerned I lose about $1,200 or $1,300 a year per annum on railroad fare. I receive $92 a year. The same is true of every member of New York City; but each constituency demands of its own Representatives its own manner of representation; and because I have looked at this matter in the broad, national aspect, I feel that this measure should be considered calmly, coolly, and deliberately, and with the one purpose in view of giving to our country legislation such as will directly represent the will of the people and bring the Members of Congress closer to them.

I will say this in behalf of the committee that we have not received one letter from any individual protesting against the number which long ago the committee suggested would be the number that it would recommend to this House, and not one individual appeared before the committee in opposition to that number, with the exception of one gentleman who desired to reduce the House to 304.

I feel that the best interests of our Republic and its future growth will be aided by the passage of this bill and the adoption of the constitutional amendment to which I have made reference before. [Applause.]

I reserve the remainder of my time.

Mr. FAIRFIELD. Mr. Chairman, I desire to be notified when I have used 10 minutes.

There is no reason why the size of this House should be increased. [Applause.] There may be causes operating that would incline Members to vote for an increase. Representing the minority views upon the committee, I shall endeavor to try to see to it that the membership is retained at 435. [Applause.] In due time the gentleman from California [Mr. BARBOUR] will present an amendment carefully and properly drawn, should the House decide to retain its present membership.

The opportunity has arisen to increase the size of the House. This opportunity comes at this time because of the taking of the census. Had not the taking of the census made the opportunity, no Member of this House would for a moment consider the necessity of any increase. A majority of the Committee on the Census have reported a bill proposing to increase the House by adding to it 48 Members. At the same time one may be quite sure that while the majority of the committee reported such a bill they were conscious of the unwisdom of it, by their recommending the limiting of the size of the House by a constitutional amendment. One is impressed by the fact that because of such a recommendation the majority of the committee itself feels that the increase is not justified. Rather is this action due to expediency than to principle, for the same majority recommends that the size of the House be permanently fixed at 500. In time we shall have 150,000,000 of people in this country. In that event each Representative would have a constituency numbering 300,000. Later no doubt we shall have 200,000,000 people in this country. In that event the constituency of each Member would be 400,000. The men who have signed the majority report are perfectly willing that in the future each Member of Congress shall have a constituency numbering 300,000.

The membership proposed by the minority report provides that the number of people in the congressional districts shall not be more than 242,415. On the basis of the present census there is no probability that in the next 10 years the population would be great enough to even approximate the 300,000 which the members who have signed the majority report are perfectly willing should be the basis for future representation. As a matter of fact, there are districts now ably and efficiently represented in which the population is much beyond 300,000. There is evidence then that the majority members of the committee do not believe that an increase is necessary for proper representation. If there is any justification for the number of Members to be permanently fixed at 500 there can be no possible justification for the increase to 483 at this time. That would be within 17 of the ultimate size of the House. In other words, the majority members of the committee to secure certain ends are willing now to increase the House by half a hundred and say to all future Congresses, "You can never enlarge your membership by more than 17."

What are the reasons that impel the majority of the committee to recommend two things at this time diametrically opposed in principle? There are two assigned reasons which, acting as causes, are not really logical and reasonable. The first reason assigned is that some Members of the House may lose their seats if the House be not enlarged. This is an unfortunate circumstance which, I think, every Member of the House would be glad to avoid, for I take it that no one of us is indifferent to the legitimate personal interest of any Member of the House. That legislation, however, should be based on such consideration is not at all in keeping with the responsibility that rests upon Congress. The fortunes of any man in political life are not important enough to justify legislation having such far-reaching consequences upon the country.

There is a second cause that is assigned as a reason, and that is that no State should be humiliated by having its membership in the House reduced. I fully feel the force of that as a cause, though I am unwilling to concede that it is a legitimate reason, for the State of Indiana, one of whose districts I am privileged to represent, will, on the basis of 435 in this House, be reduced to 12 Representatives. Convinced that this thing is what ought to be done, I was willing to take my chances with the people in my own State. Thus far I am pleased to know that the newspapers of the State, both Democratic and Republican, have approved the position that would keep the House at its present size. Not only that but many of the members of the State legislature have written me favorably, stating that it is the consensus of opinion of the people that the House is now not only large enough but that a reduction would be a good thing. This morning I received the following telegram, which speaks for itself:

INDIANAPOLIS, IND., *January 17, 1921.*

LOUIS W. FAIRFIELD, M. C.,
Washington, D. C.:

Senate adopted concurrent resolution and house passed it, calling upon Congress not to pass bill to increase size of House of Representatives, the vote in both houses overwhelming. Give this information to other Members.

LEE J. HARTZELL.

There are just two things to be secured in a parliamentary body; first, adequate representation; second, efficient legislation.

The representation of the people in this House is now adequate. Whatever limitation there may be upon adequate representation, it does not grow out of the limited membership, but rather is the result of the unwieldiness of the House in the shaping of legislation. Representation is adequate only when each legislator counts in shaping the course of legislation. When the size of a representative body increases to the point that the legislator is compelled to choose a representative to represent him in the framing of legislation the real representation is twice removed from the voter. There is no need now for an increase. The people do not want the size of the House

increased. They are satisfied with the manner in which the number of Representatives now take care of the business of the country.

Of course, everyone knows that the relative influence of a State would be exactly the same under 435 and the proposed 483. Each State would still have the same voting strength in this House. It would still have the same electoral strength in the selection of the President and Vice President.

It is argued that relatively we are a small parliamentary body; that much smaller countries have relatively larger membership in their legislatures. The United States differs fundamentally from every other country in the world. No other Government has a dual government such as we have—State and Nation. On all matters of local interest each State has its own legislative body consisting of a Senate and House, its own executive department, its own department of justice. Indeed, the various States of the Union stand out clearly with governments of their own taking care of much that in foreign Governments has to be passed upon by the national assembly. As the House is now constituted, it is unwieldy, difficult to organize for purposes of efficient legislation. There is still hope that with the same size House as we now have the wisdom of Congress will be able to so order legislation that each Member will have a chance to exercise fully his functions as a Member of this body.

An enlargement of the House at this time is a needless expense. We witnessed during the progress of the war a sudden expansion of every department of the Government. We are trying now to go back as nearly as may be to the prewar basis. There were increased duties for each Congressman during the war. To take care of that we provided an extra clerk for every Congressman. That, no doubt, will remain as a permanent expense upon the Government. This extra clerkship, however, is now costing the Government $616,400 per annum. The people will be patient, for every well-informed man knows that this added expense is really necessary that the interest of the constituency of the various Congressmen may be properly taken care of.

The proposed bill of the majority members of the committee is to retain that added expense permanently, and then add to it 48 more men at a cost approximating a million dollars a year. It would mean an enlargement of the seating capacity of this House, the expense of which I do not know. It would mean building an addition to the House Office Building costing approximately $4,000,000. This addition is absolutely needless and therefore absolutely inexcusable. We are talking much of challenging every dollar needlessly expended. Let us prove by our votes the sincerity of our words. [Applause.]

The CHAIRMAN. The gentleman from Indiana has used 10 minutes.

Mr. ASWELL. Mr. Chairman and gentlemen of the committee, dealing with a population of 105,708,771 people, based upon a ratio of 218,986 for each Member, this reapportionment bill provides for a membership of 483, which is the smallest possible number for no State to lose a Member. With one exception, in 1843, when a Whig Senate overruled the action of a Democratic House, this has been the policy of the Congress since the adoption of the Constitution.

Under this bill 23 States retain their present number of Members and 25 States gain in membership. States now Republican gain 37 Members, while States now Democratic gain 11, according to the vote in the last national election. With a House of 460 Members, 30 States would not be affected, 16 States would gain, and 2 States, Maine and Missouri, would lose 1 Member each in representation.

If the House membership were to remain 435 in number, each Member would have to represent 242,415 people, as against 211,877, the present ratio, and 11 States would lose representation, Missouri losing 2 Members. An increase of 2 Members here would save my own State from losing a Member, but I believe at this time, when women are voting for the first time, it would be a crime against the American people for the Congress to force any State to lose representation. [Applause.]

Mr. KENNEDY of Rhode Island. Will the gentleman yield?

Mr. ASWELL. Yes.

Mr. KENNEDY of Rhode Island. I will ask if an increase of one Member would not save the State of Rhode Island its present membership, making the membership of the House 436?

Mr. ASWELL. It would.

Mr. KENNEDY of Rhode Island. And the gentleman's argument applies to Rhode Island also?

Mr. ASWELL. Without question. I am willing to give it to you. I want every State to retain at least its present representation.

Mr. KENNEDY of Rhode Island. And I join with the gentleman, and with Members from every State who will lose membership if the present number is retained.

Mr. ASWELL. Thank you, sir.

Your committee recognized two dominant ideas: First, the most efficient individual representation of the people at home in this body, and, second, justice to each State.

If this is to continue a representative Government, 218,986 people is clearly a number large enough for one Member of Congress to represent efficiently. If there were ever a time when representation should not be reduced, that time is now when women are beginning to vote and when the individual demands upon the Member are soon to be practically doubled. The tendency of the time is for better personal representation at the National Capital. He who opposes that demand fails to respond to the manifest wishes of the American people who earnestly believe more and more that this should be really a representative Government, with each Representative living close to his people.

This demand is universal throughout the world. The United Kingdom has a population of 45,516,259 and has 707 members of the lower house, based upon a ratio to each member of 70,000 in Scotland, England, and Wales, and 43,000 in Ireland. France, with a population of 41,475,523, has 626 members in the lower house, with a ratio of 66,255. Italy, with a population of 36,740,000, has 508 members, with a ratio of 71,000.

Mr. BLACK. Will the gentleman yield?

Mr. ASWELL. Yes.

Mr. BLACK. It is true, is it not, that those kingdoms and the Republic of France have no State governments, and the members of the lower houses of their parliaments represent the people in a sense in the same way as our State legislatures represent them?

Mr. ASWELL. Not fully.

Mr. BLACK. I say in a sense.

Mr. ASWELL. Not fully.

Spain, with a population of 19,950,817, has 417 members, with a ratio of 47,844. The average ratio to each member in the four countries is 63,000; their total population is 143,000,000 people, and their total membership 2,258. These countries, excepting France, are not republics; hence all the more reason that in our form of government the ratio for each Member should not be too large.

Mr. BARKLEY. Will the gentleman yield?

Mr. ASWELL. Yes.

Mr. BARKLEY. Has the gentleman the information as to what compensation is received by the members of various legislative bodies?

Mr. ASWELL. I have. A member of the lower house in the United Kingdom receives a salary of £400 and many privileges as to transportation by reason of his membership. A member of the House of Deputies in France receives 15,000 francs per annum. A member of the House of Deputies in Italy receives 15,000 lire. The membership in the lower house of Spain is limited to the very wealthy or to the nobility. No one else is admitted. They receive no salaries.

Mr. LAZARO. Will the gentleman yield?

Mr. ASWELL. I will.

Mr. LAZARO. It seems that there is a good deal of opposition to this bill on account of the increased cost to the people. I did not hear anything said about the trouble of redistricting. What is the gentleman's information about that?

Mr. ASWELL. The probability is you will not hear that on the floor, but in the hearts of Members it might be located. It is likely that the question of redistricting is one of the main arguments if gentlemen said in this debate all that they really feel and believe. The opposition to this bill is largely selfish.

The United States has a population of 105,708,771 people, seven-tenths the population of these four countries with 2,258 members, and yet this bill proposes only 483 Members, with each Member required to represent 218,986 people. Each Member here represents three and one-half times as many people as the average in the four countries just mentioned. A vote against this bill, which is a vote to reduce the proposed membership in this House, is a vote against the evident popular demand for better personal representation at this Capital; it is a vote in favor of further centralizing power here and in favor of less efficient individual representation of the people at home. [Applause.]

Some gentlemen claim the House is too large and unwieldy, but every experienced Member here knows that whether the membership be 300 or 500, it will not affect the efficiency of this body, for about 40 Members do most of the talking anyway.

Mr. JOHNSON of Mississippi. Mr. Chairman, will the gentleman yield?

Mr. ASWELL. Yes.

Mr. JOHNSON of Mississippi. I concur in the last remark made by the gentleman, and I call his attention to the fact that in the House of Parliament 40 members constitute a quorum

UMI

and can do business, while in this House 7 Members, composing a steering committee, shape all of the legislation, practically, that is enacted, and since the adoption of the plan to turn over all matters of appropriation to one committee some 40 Members transact practically all of the business in this House.

Mr. ASWELL. That is correct.

Mr. DUNBAR. Mr. Chairman, will the gentleman yield?

Mr. ASWELL. Yes.

Mr. DUNBAR. Does the gentleman believe that the House should be unwieldy?

Mr. ASWELL. I do not, and 300 or 500 Members has no effect on that question.

Mr. JOHNSON of Mississippi. Mr. Chairman, I wish to add this to my statement, that I heartily concur in the gentleman's statement and I am in favor of an increase to 483 Members. [Applause.]

Mr. ASWELL. It is also well known that those who talk most do not always have the greatest influence upon legislation. Some gentlemen do not talk unless they have something to say. Then they say it and sit down.

I wonder what the people at home think if this body quibbles over giving them reasonable and proper representation in the Congress. Of course, each Member in a larger sense represents the Nation, but he serves best when he is in touch with his constituents individually. The larger the number of constituents, of course, the more difficult the task.

Mr. RAKER. Mr. Chairman, will the gentleman yield?

Mr. ASWELL. Yes.

Mr. RAKER. Fearing that the gentleman's statement may be misunderstood, in answer to the gentleman from Mississippi [Mr. JOHNSON], I would suggest that the gentleman from Mississippi stated that the Committee on Appropriations did the business of the House.

Mr. ASWELL. Would do. He did not say that it does.

Mr. RAKER. Is it not fair to the country to know that under the rules as they are now the Committee on Appropriations enacts no legislation, but only appropriates, and that it follows the judgment and will of the House and all of the other committees on legislation?

Mr. ASWELL. I understood the gentleman from Mississippi not to discuss the question of legislation at all, but that he was merely speaking of the power that the Appropriations Committee will in the future possess.

Mr. JOHNSON of Mississippi. That is correct.

Mr. ASWELL. If a small number is what you are driving at, why not make the membership 65, as the Constitution originally did? Why not make it 100, the present required quorum in committee? No Congress in the history of the Government has failed to increase the membership here in response to the increase of the population, except one, in 1843, when a Whig Senate failed to respond.

Mr. CLARK of Missouri. Mr. Chairman, will the gentleman yield?

Mr. ASWELL. Yes.

Mr. CLARK of Missouri. The way that reduction happened, as is stated by John Quincy Adams in his diary, was that it gave greater power to the South and the West, and he was in favor of retaining all of the power possessed by New England.

Mr. ASWELL. The same spirit exists to-day, and I might add that at that time the House was Democratic and the Senate Whig, and there was one single solitary Tyler man in the Congress, namely, Mr. Wise, of Virginia.

Some gentlemen place it on the ground of economy. So do the American people insist upon sane economy in governmental expenditures. That means they oppose waste and needless expenditures existing now in many directions, even in this Congress, pledged to rigid economy, but the people are more seriously concerned with service here than they are with the additional petty expense of giving them reasonably efficient representation in the Congress.

This principle is well illustrated by their open opposition to petty economies in the Postal Service during the past eight years. It will again be illustrated if the Congress fails to continue the road-building program among the States or fails to provide liberally for our disabled soldiers. [Applause.] The American people are willing to pay provided they get really efficient service, but it is service they rightly demand. Do not misjudge that fact in the consideration of this bill.

Does any Member from any of the 25 States affected who votes against this bill really please or represent his people when he votes to reduce their representation here? This is a solemn question. If we fail to answer rightly, the people will in the next congressional elections.

Mr. HUSTED. Mr. Chairman, will the gentleman yield?

Mr. ASWELL. Yes.

Mr. HUSTED. If the gentleman thinks that the size of the House should be increased with our growth and population in order to give the representation, why does he favor the enactment of a constitutional provision limiting the number to 500?

Mr. ASWELL. I have expressed no personal opinion upon that. That matter is not at issue at this time.

Mr. HUSTED. I understood that the majority of the committee were unanimously in favor of that.

Mr. ASWELL. I have expressed no opinion, and I did not make any fight against it. It is not in issue now.

Mr. HUSTED. It is in issue, if the gentleman's supposition is correct.

Mr. ASWELL. Mr. Chairman, an argument against this bill is an argument to reduce the representation of 11 agricultural States; it is an argument for the pernicious lobbyist here, against the will of the people; it is an argument for special privilege against the average citizen; it is an argument for the rich and the mighty against the poor and the weak; it is an argument for the reactionary against the progressive; it is an argument for autocracy and centralization against democracy and popular government. Let each Member decide for himself and let the country now know on which side he stands. If we still believe in a republican form of government, in popular government, this bill will be enacted into law. [Applause.]

Mr. LARSEN. Mr. Chairman, I yield 10 minutes to the gentleman from North Carolina [Mr. BRINSON].

Mr. BRINSON. Mr. Chairman, the importance which attaches to the decennial apportionment of the membership of this House does not arise so much from any action the House or Congress may take, as its power is limited to fixing the total membership of the House.

The most important matter in relation to it is the relative numerical strength of the different States and a simple mathematical calculation according to rules fixed in the Constitution determines this, the most important feature of the apportionment.

This Congress determines what the number of Representatives shall be and how the additional ones shall be selected in default of State action in the way of redistricting. This is nothing more than adopting a ratio of a given number of citizens to one Member.

Each decennial census disturbs the relative strength of the States in the matter of representation. The States of slow population growth must of necessity and in fairness lose relatively to the States of larger growth. The numerical strength of the States will be proportionally the same whether the membership of the House be small or large.

Such being the case, it is wise to give careful consideration to this matter before final action is taken.

I do not see any advantage to the country from the larger House.

The increase of business which comes to the Congressman's office now will not be appreciably relieved by the addition of 48 Members to the roll. Only an increase of clerical help will afford the relief sought.

The majority report, rather in the way of an intimation, calls attention to the fact that the women are now voting. An inference that their representation will be better and surer with an increase of Members, and that representation has been lacking to them in the past, will not appeal to us who believe that the Members of Congress have through all these years represented the women as well as the men, and guarded the interest of the women without the ballot with the same fidelity as they will now that she has it. Representation is not legally or morally wrapped up in the question of voting population.

The fact that certain other nations have a larger membership in their national legislative bodies than the present House of Representatives should add no weight to the argument for a larger House when the facts are ascertained.

The British Parliament legislates not only upon national questions in the sense that the American Congress does, but it is also charged with the local legislation, which under our system is left to the various State legislatures. It is obvious then that the governing body of Great Britain, if it shall be reflective of the sentiment of all the people in local as well as national matters, must be very large. It is, however, quite well known that members of Parliament do not in large numbers remain in London during Parliament sitting, and that a large proportion of that large membership are only found there when matters of special importance to them are considered. A small quorum permits legislative action, and a large part of the membership follow their ordinary pursuits, save when a call comes to repair to Parliament House.

The argument for increase of the House which really gives to it serious consideration is that the policy in the past has been

to fix the membership sufficiently large as to save the States of slow growth from loss of Representatives.

To continue this policy means a material increase of the House membership every 10 years to save the slow States from a loss of Members. The loss sustained by the slow States is not greater relatively in a small House than a large House, because its relative strength in population must be reflected in its representation. If its representation remains the same, then additional Representatives must be given the States of larger growth in order that the vital matter of proportion shall be maintained.

I desire to suggest just here some of the disadvantages attaching to the proposed increase:

The House already is unwieldy and more Members will make it more cumbersome still. Deliberate consideration of matters of legislation is had only in the committees. Committee action has of necessity largely supplanted the old system, when mature deliberation was had by the House itself on all matters of public interest. It is common knowledge to us that more mature thought is given to public matters in the other body of this Congress than upon this floor, and it is due to the fact that the membership of the smaller body finds itself more generally interested in matters before it and more impressed with the feeling of individual responsibility than in this very large body, where so much of authority must be delegated to committees.

There is, too, an element of cost which, it seems to me, should be of compelling influence at this time in the determination of the matter. Perhaps it would not weigh so heavily if the advantages to be derived from an increase of 48 Members were great and clearly manifest. When these advantages claimed for the larger House are at least open to question and are of doubtful force, and when the financial condition of the country is calling for curtailment and all practical economies—the need for this being accentuated by the wise action of the President elect in asking an abandonment of the usual expense of arrangements for inauguration—is it not unwise to put upon the Government and the people this large burden to cover the costs of the increased membership proposed?

The annual cost to the Government of the 48 new Congressmen provided in the committee bill, including salaries, clerk hire, mileage, stationery, and so forth, will be more than a million dollars a year.

In addition to this, offices as convenient, as comfortable, and as well furnished as those now provided for Members must be provided for the new ones, and a conservative estimate of the cost of such a building is $4,000,000.

Is this the time for such an outlay of funds? If there is need of enlarged membership, is that need so urgent that this burden should be put upon the country, now in the midst of financial depression, when the business of the country and citizens generally are feeling the effects of the tremendous loss sustained by the farmers of the country?

Mr. LANGLEY. Mr. Chairman, will the gentleman yield?

Mr. BRINSON. Yes.

Mr. LANGLEY. The gentleman's estimate of $4,000,000 presumes that a building for 48 Members would have to be made as large as a building for 435 Members?

Mr. BRINSON. Oh, no.

Mr. LANGLEY. How does the gentleman arrive at the statement of $4,000,000?

Mr. BRINSON. The figures were arrived at by the ranking Member of the minority on the committee after mature consideration.

Mr. LANGLEY. I would suggest that that gentleman is wrong.

Mr. BRINSON. And after inviting and receiving suggestions from architects.

Mr. LANGLEY. The present building cost only a little over $3,000,000.

Mr. BRINSON. That was quite a number of years ago.

Mr. LANGLEY. I can not understand how the gentleman arrives at the fact that 48 Members would require an expenditure in a building of $4,000,000.

Mr. BRINSON. I have not the figures here, but I will be glad to get them for the gentleman in time.

Mr. CLARK of Missouri. That estimate of $4,000,000 is to build another building, taking up two whole blocks, and would give the 48 Members 15 rooms each.

Mr. BRINSON. Not at all. It is to build another building of the same architecture as the present one, and provide quarters as comfortable and as conveniently located and with the same character of furnishing as the present building. As to the accuracy of those figures I shall leave another Member of the minority to furnish them, because I got them from him, and he got them from architects here in the city of Washington.

In normal times I think this increase unwise. At this time I feel that it would prove us singularly unresponsive to the solemn demands of this serious hour in the world's history.

For these reasons I can not agree with the findings of a majority of the committee. In the committee meeting I voted for the smallest number proposed—435—and then for the next highest, and finally for the increase proposed in the bill, but with the statement to the committee that I would support a minority report if offered, and held myself free to advocate and vote for a smaller number if opportunity offered in its consideration in the House.

North Carolina will gain one new Member if the membership of the House remains the same—435. This State will gain an additional Member if the membership is fixed as the majority report recommends—483. I do not feel that the addition of this one new Member to the delegation of my State should control my vote, when, along with that 1, 47 other names are added to the roll and this very great expense, which I have referred to, is put upon the Government and the people.

I also find myself not in thorough harmony with the declarations of the majority report bearing upon the Tinkham resolution. There was no evidence presented to the committee, valid in a court of law, to show that Negroes in the South had been denied the right to vote because of their race. Unsupported statements of colored people charging that the white people of the South have denied the colored people their constitutional rights ought not to be placed in the record and referred to in the report with the mild comment that brevity of time will prevent the committee from investigating these matters with the thoroughness which Congress has a right to order or provide.

The Tinkham resolution seeks to curtail the South's representation in Congress because of the practical operation of the educational test as practiced there. The unfairness of this proposition is shown when a contrast is made between the laws governing suffrage in Massachusetts and North Carolina, and also a contrast made of the conditions in the two States. There is no material difference, no legal distinction, between the constitutional provisions regarding educational qualifications for suffrage.

Article 20 of the Massachusetts constitution reads as follows:

No person shall have the right to vote or be eligible to office under the constitution of this Commonwealth who shall not be able to read the constitution in the English language and write his name: *Provided, however*, That the provisions of this amendment shall not apply to any person prevented by a physical disability from complying with its requisitions, nor to any person who now has the right to vote, nor to any person who shall be 60 years of age or upward at the time this amendment shall take effect.

Article 6, section 4, of the North Carolina constitution reads as follows:

Every person presenting himself for registration shall be able to read and write any section of the constitution in the English language. But no male person who was on January 1, 1867, or at any time prior thereto entitled to vote under the laws of any State in the United States wherein he then resided, and no lineal descendant of any such person, shall be denied the right to register and vote at any election in this State by reason of his failure to possess the educational qualifications herein prescribed, provided he shall have registered in accordance with the terms of this section prior to December 1, 1908. The general assembly shall provide for the registration of all persons entitled to vote without the educational qualifications herein prescribed, and shall, on or before November 1, 1908, provide for the making of a permanent record of such registration, and all persons so registered shall forever thereafter have the right to vote in all elections by the people in this State, unless disqualified under section 2 of this article.

Even the clause in the North Carolina constitution known as the "grandfather clause" has its counterpart in the Massachusetts constitution, a part of which, referring to this disqualification because of illiteracy, says:

This amendment shall not apply to any person who now has the right to vote, nor to any persons who shall be 60 years of age or upward at the time this amendment shall take effect.

The statement of the gentleman from Massachusetts that he wants his State to have the same treatment accorded it under the Constitution of the United States (which he is now invoking to curtail southern representation) that will be accorded the Southern States, if his resolution shall prevail, seems fair upon its face and would impress the uninformed with the broad and statesmanlike qualities of the distinguished gentleman, but when you take into account the splendid educational system his State has had for many years and the scant funds and inferior systems of the Southern States through these years you can understand and correctly appraise his fairness and generosity.

With abundant funds and the stimulus of an educational qualification, Massachusetts has been able to educate its citizens generally, so that none practically would be debarred by an application of the same educational test which would cut out thou-

sands of citizens in the South, who through all these years have been denied adequate educational facilities because of the poverty which came to us as a heritage of the Civil War.

The debates in the constitutional convention of Massachusetts at the time of the adoption of the educational qualification for suffrage indicate its purpose to eliminate from the electorate foreigners, who were then in the State in large numbers. If, as it is charged, the educational test applied in the South has as its purpose the elimination of the Negro vote, what claim has the gentleman from Massachusetts to sit in judgment upon his sister States of the South?

Mr. UPSHAW. Mr. Chairman, will the gentleman yield?

Mr. BRINSON. Yes.

Mr. UPSHAW. Allow me to state in this connection that about 2,000 Negroes registered and voted without interference in my home city, Atlanta, in the last general election, and if 2,000 were allowed to vote, it is manifestly unfair to my section to charge that four or five thousand might not have done so if they had cared to qualify.

Mr. BRINSON. There is not a Southern State, Mr. Speaker, which does not annually spend much more on the Negro's education than he himself contributes.

Out of a poverty, dire and distressful, which the close of the Civil War found us in we have through sacrifice and toil builded a great industrial as well as agricultural civilization, and we have done this, too, with the weight about our shoulders of an alien race, at times embittered and made vicious by outside interference.

We have tutored this race and found pride in its development along wholesome lines. We have sought to train him along the lines which his racial qualities fit him for and to make of him a good citizen.

We have placed safeguards about our civilization and taken measures to preserve our social integrity. These things we shall continue to do. That policy will not be reversed. The intelligent Negro, the good citizen, will be permitted to have a voice in public affairs. The ignorant and the vicious will not.

The gentleman from Massachusetts [Mr. TINKHAM] may hold any views he cares respecting the South's treatment of the Negro. He may, up here, preach and practice such doctrines as his judgment and his taste may prompt. We in the South with the solemn responsibility under God for the benevolent guardianship of a weak race will discharge that trust in such fashion as will inure to the good of the Negro race, but at the same time we shall keep inviolate and guard with jealous care the integrity of the white race, which through all the past has carried the torch of civilization, and upon whose shoulders must rest the burden of maintaining a pure social order through all the coming years.

The good men of both races in the South are impressed with the seriousness and the solemnity of the problems we are facing, and together, in full sympathy with each other and in the fear of God, we shall solve the problem and give to the world the first example of two races radically different in many qualities living together in peace and harmony, with racial lines intact, but with a common love for the Nation and a common faith in its divinely ordered path and ministry. [Applause.]

Mr. LARSEN. Mr. Chairman, I yield five minutes to the gentleman from Virginia [Mr. MONTAGUE].

Mr. MONTAGUE. Mr. Chairman, if it were not necessary for me to leave the city within a few minutes, I should not attempt to submit at this time any remarks upon the pending bill. I do not think the argument that the decennial growth of our population should find a corresponding numerical representation in this House is either a sound argument or a controlling consideration. In this conclusion the report of the majority of the committee concurs, for this committee declares that the membership of this House should never exceed 500, and proposes a constitutional amendment that this number shall be rigidly prescribed. Why should 500 be the danger line and not 483? What danger lurks in the number 500 that does not lurk in the number 483 as fixed by the pending bill? What logic supports this arbitrary mathematical differential?

The conclusion in the report as to limitation of the membership to 500 necessarily admits, inexorably imports, what the country knows, what this House in its heart of hearts knows, that a House of this great number is necessarily extravagant, clumsy, and unwieldy in operation. Realizing this obvious and deplorable fact, the committee seems to think that the country can bear the load of 483 Members. Should we now impose a further load upon the American people, a load of immense and continuing maintenance charge and of top-heavy and inefficient legislative operation? It will be unwise and wasteful to do so, and the people will not approve of our action in so doing.

But, Mr. Chairman, the orderly, expeditious, dignified, and efficient functioning of this House as a legislative organ of government is the supreme consideration that should determine our positions upon this question. [Applause.] A very brilliant and distinguished Member of this House some years ago observed that the House had ceased to be a deliberative body. Shall we now contribute further to its weakness by making it a functionless body?

Mr. ASWELL. Mr. Chairman, will the gentleman yield?

Mr. MONTAGUE. I can not yield as I have only five minutes.

Mr. Chairman, there are two results that confront this House, as I view the question, results that arise out of our present numerical membership, to say nothing as to the enlargement of that membership, namely, that we must function more and more through committees and less and less through the House itself. We must of necessity go almost wholly to committee government, the House functioning in a formal way of recognition—not of negation or of modification—of what is recommended to it by its committees.

To gain the maximum efficiency we must either reduce our membership or enlarge the jurisdiction of some central committee of the House, and this through the line of least resistance this House has almost accomplished. We have already practically surrendered our deliberative function to a great committee of this House. Of this action I make no criticism, for our present great size inexorably brought forth such a result. But in this hour of demoralization I beg to ask why should we now seek to multiply such results?

To my mind the argument is untenable that it is essential to the maintenance and vigor of democracy that it find an increased numerical representation in the membership of this House. That was not the faith of the founders of the Republic. They knew, as you and I know, that a very large House ceases to be representative of the real democracy of the Nation. [Applause.] Why? Because—and I make this without criticism of the House, but rather in recognition of the infirmities of human nature—the larger the House the more opportunity for the successful activities of organizations within and without in defeating or overreaching the interest of the people.

Mr. Chairman, I shall vote against this bill, although it gives one additional Representative to my own State. I shall vote for the present ratio of representation; but a well-considered bill for a decrease of the representation would meet my better judgment, as it would meet the best interests of the country. [Applause.] I would open rather than hide the processes of government. Therefore I would remove the necessity for more and more committee government and would provide a necessity for more and more House government. The latter can best be obtained by reducing the number of Representatives of the Congress.

Mr. ASWELL. Mr. Chairman, I yield 15 minutes to the gentleman from Texas [Mr. BEE], a member of the committee. [Applause.]

Mr. BEE. Mr. Chairman and gentlemen of the committee, I am not going to attempt any oratorical effort on this occasion. I am going to undertake to present to you calmly and collectively the reasons that actuate me in sustaining the majority report on this bill. If I may be permitted to say it, I approach its consideration without any personal interest whatever. The god of fortune has dealt harshly with me. My future is in the lap of the gods and I have no personal interest upon the face of the earth in this matter, but I am looking at it from the broad standpoint of the best interest of the American people when I declare to you that no greater or more fatal error against true democracy can be dealt by this House than to refuse to adopt the majority report on this bill. I was very much interested in the statement of my distinguished friend from Virginia [Mr. MONTAGUE], for whom I have very deep and abiding affection and respect, when he stated that democracy is better represented by a small representation, that the interests of the people are better served by less representation. That is a new doctrine to me. I have always understood that pure democracy as practiced in the olden days in Greece proved itself impractical and unwieldly, and out of this doctrine of pure democracy the founders of this Government established the doctrine of a representative Government of the people speaking through their chosen Representatives. In 1833, 87 years ago, 242 Members constituted the membership of the House of Representatives. Since that time the great inventions of the world, with increased activity, have come in. Since that time men and women have grown to regard our Government as something personal to themselves. I remember when I was a boy that a Member of Congress came to Washington for

three or four months in the year and the remainder of his time he remained at home in the practice of his profession or carrying on his business. The Members of Congress now who attend to their business have not time to do anything else. You talk about the body being unwieldy with 435 or 483 Members! No one knows better than a new Member that the least part of our function as Members of Congress is the legislative one. The steering committee of the House—and I question not the wisdom of the majority in so adopting—the great committee of 35 and the other great committees that run this Government, they are the ones that carry along the legislation of this body.

My distinguished colleague from Texas who sits before me [Mr. BLANTON] often and often has called the attention of this House to the fact that the Government's business is being transacted by a mere handful of Members. Why? Because the Members of Congress—and I say it in great respect—are departmental agents; they are errand boys; they are information furnishers; they are trouble bearers. It used to be that the average citizen cared nothing whatever about what the Government was doing; the Government was a thing far removed from him. Under the present arrangement, and especially since the war, the Government has become a living, breathing, moving force in the life of every man and woman in this country.

Mr. LANGLEY. Will the gentleman yield?

Mr. BEE. Yes, sir.

Mr. LANGLEY. Is it not a fact that there are now over 200 vacant seats on this floor when one of the great problems of this Government is being discussed, a complete answer to the unwieldy proposition?

Mr. BEE. I would say to the gentleman from Kentucky that is true, and astonishingly so in view of the fact it was generally known that I was going to make a speech on this occasion. [Applause.] I had supposed it would have filled the Chamber to hear me, but it did not bring Members to the House, because Members are in their offices attending to the business. They are at the departments attending to departmental business. But let me carry out my thought further. The granting of suffrage to women has brought into governmental activity and governmental interest thousands and thousands of women who want to be informed, who want their Congressman's advice; they want their Congressman's information upon a great many subjects. Oh, they say, give us good and efficient clerical help. God spare the day in this Republic when Members of Congress are going to submit to a clerk in their office the carrying on of their business.

That is a matter intrusted to the Members of Congress themselves. Let me call to your attention—and I do it in no sectional pride, because I am looking at this bill from a broad standpoint—I do not know anything about this amendment for 500 Members, and the members of the committee will bear me witness that it was suggested by the distinguished gentleman from Iowa [Mr. TOWNER], and I heard no objection to it in the committee. The first I knew that the members of the committee were so deadly opposed to that proposition was when I read the majority views. I think everybody acquiesced in the views of the gentleman from Iowa [Mr. TOWNER], however. I do not care whether or not it is 500. I take the position before this House that one Congressman representing 220,000 people is not too much. I differ with the gentleman from Virginia [Mr. MONTAGUE]. I say you have no right to deprive the people of individual representation. I say to you in all solemnity that by defeating this bill you are taking a measurable control of this Government away from the rural districts and throwing it into the congested districts, and doing it unfairly.

Why do I say that? You take the population in many of the great agricultural States, and why do they lose? Because following the exigencies of the war these men have gone to the great cities. Just as certain as God reigns, in the economical readjustment of this country they must go back to the farms. You can not maintain a Government where the producers are leaving for the city and leaving a very small minority to sustain the great masses in the cities. Do you know that the statistics show that the average age of the man upon the farm is to-day 45 years? In other words, the old man, with his back bent, is carrying the burden of producing the foodstuffs and the products for the people of this great Nation. It can not continue. Read the ancient history of the world. Go back to Babylon, and you see Babylon with its beautifully irrigated farms. You see Babylon built up in its marvelous and wondrous beauty. You see the men leaving the farms and going to the marvelous beauties of Babylon. And Babylon fell. History repeats itself with Rome, and Rome fell. This country can not exist if you are going to maintain the great bulk of the people in the cities. But to carry out the idea I had in mind, the loss in this representation comes from the rural districts. Who gains it? The congested districts. The readjustment takes place. People go back to the congested districts, and who maintains the power in the face of the population?

Mr. JOHNSON of Mississippi. Will the gentleman yield?

Mr. BEE. For a short question.

Mr. JOHNSON of Mississippi. Under this bill, if you would have 483 Members the States would maintain their present representation?

Mr. BEE. Yes, sir.

Mr. JOHNSON of Mississippi. If the bill does not pass and we retain 435 Members in the House, my State will lose one. By that means it will not be represented proportionately, for this reason: For the last two years there have been special trains carrying thousands of Negroes and a great many white people to the northern cities, and since this financial condition has come about in the country hundreds and thousands of those same people are trying to return to the South. I have seen numbers of letters, and I have known of numbers of post-office orders and checks being sent to these people to enable them to return. So six months before this law would go into effect there would be hundreds of thousands of people returned to my State who would be unrepresented.

Mr. SUMNERS of Texas. Will the gentleman yield?

Mr. BEE. I will.

Mr. SUMNERS of Texas. Is it not a fact that, regardless of how many Members of Congress you have here, each State will have the same percentage of representation, whether the membership is 340 or 500?

Mr. BEE. You can not avoid that, of course.

Mr. SUMNERS of Texas. What difference does it make, and how does any State lose any representation, relatively and proportionately, if you pass a bill with the present number?

Mr. BEE. I will tell you how the State loses. It loses it because you destroy the dignity and pride and power of the State. You say to the State of Missouri, that has in this Congress to-day 16 Members—I do not recall the exact number—"When they come back the next time you will have but 14 Members." And some other State has made the increase. I have nothing to conceal about it. I do not think, if it is possible, any State ought to lose representation in the American Congress.

Mr. MONDELL. Will the gentleman yield?

Mr. BEE. Yes.

Mr. MONDELL. Does not the gentleman think that the good people of Missouri are intelligent enough to know that their proportion of representation is not going to be increased?

Mr. BEE. I had a good deal of confidence in the intelligence of the good people of Missouri until the 2d of November last. [Laughter.] I still believe in the intelligence of those who live in the district represented by Mr. RUCKER.

Mr. MONDELL. The people of Missouri were rational.

Mr. BEE. They were very irrational.

That is a fallacious argument. It does not meet the facts. If you adopt the present representation, you have a representation for every 240,000 people. If you adopt the bill of the committee, you have a representation for every 220,000 people. And I say to you, from my limited experience here, that one Congressman for 220,000 people, with the multitude of duties that confront him, is not too much of a representation. But the principal point I sought to stress, and to stress again, is the proposition that the decreases in the power in this House have gone against the rural States in this Union and the power has been transferred into the congested urban districts of this country. And it is not fair. It is upon a false premise. It is not fair for you to take away the power in this House from the State of Kentucky, from the State of Mississippi, from the State of Iowa, from the State of Indiana, or the State of Kansas, and transfer it to the great congested centers. I say it is a false premise, because just as certain, as I said a minute ago—and I repeat it again with all emphasis—as God reigns, this proportion will drift back to the States that are now being sacrificed; that are being crucified upon a presumption that the House is too unwieldy now, and they will find themselves with a larger population, but without representation, because this Congress has reduced it.

Now, I am not discussing this thing from a partisan point of view. I care nothing how it affects matters from a sectional point of view. I do not care anything about sectional points of view in the administration of the Government of my country, but I do care about giving the people of this country the largest measure of representation. I want a man to feel that his Member of Congress is his Member of Congress and that he is not a mere machine.

Mr. BRITTEN. Will the gentleman yield?

Mr. BEE. I would rather not.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. ASWELL. I yield five minutes more to the gentleman.

The CHAIRMAN. The gentleman from Texas is recognized for five minutes more.

Mr. FAIRFIELD and Mr. BRITTEN rose.

The CHAIRMAN. Does the gentleman yield; and if so, to whom?

Mr. BEE. I will yield to my friend from Illinois, but I will say to my good friend from Indiana that I can not yield any more. I have only five minutes.

Mr. BRITTEN. I merely desired to suggest to the gentleman that the States which just now have the least population have each two representatives in the Senate.

Mr. BEE. Oh, the gentleman is not going to contend in this House that there is any comparison under our form of government between the representation in this House and the representation in the Senate, so far as it concerns the people, because if there was any such comparison Texas ought to have 25 Representatives and Rhode Island none. [Laughter.] You can not contend with that doctrine. The representation in the Senate of the United States proves that. I do not mean to reflect on Rhode Island, although you can step across it. But if they would select my distinguished friend over there [Mr. KENNEDY], I would take it back entirely. We have founded our form of government on the theory of the English House of Commons and the House of Lords. But our House of Commons, every time anything comes up, throws itself at the feet of the House of Lords. What does that mean? It means that the House of Commons comes from the people and is the representative of the people, and you ought to lodge the largest representation in each individual Member of Congress.

As I stated a moment ago, the Member of Congress has become a living, breathing force in this country, and as to personal relationship a man feels his association with his Member of Congress in the daily correspondence, in the calls upon him, which comprise and cover every method of human activity. It is not fair to centralize power. You are centralizing it now too much.

We have got to bring back to the people their sense of responsibility, and we ought not in this day and time, when the battle between the reactionary and the progressive forces of this country is impending, and both sides are drawn in battle array, take the power and the voice and the government away from the rural States and center it in the congested urban centers of this country.

And let me say to my good friends who are going to vote against this bill that that is exactly what you are doing. You are depriving the States that produce the foodstuffs not only of the individual representation of the people of those States, but you are depriving them of their power in government.

Mr. MONDELL. Mr. Chairman, will the gentleman yield?

Mr. BEE. I yield to the gentleman.

Mr. MONDELL. The gentleman realizes that whatever may be the size of the House, the proportionate representation of the various sections remains the same.

Mr. BEE. I will state to the gentleman that that is aside from the record.

Mr. ASWELL. Mr. Chairman, will the gentleman yield?

Mr. BEE. Yes.

Mr. ASWELL. That does not apply to the State represented by the gentleman from Wyoming. He is only here by constitutional provision.

Mr. BEE. Yes. I did not say anything about the gentleman from Wyoming, but it is only the Constitution that saves that State. [Laughter.]

Mr. WINGO. Mr. Chairman, will the gentleman yield?

Mr. BEE. If I have the time; yes.

Mr. WINGO. Will the gentleman state what public necessity and what public demand based on that necessity requires an increased membership of this body?

Mr. BEE. I thought I had been stating that. [Laughter.] The public necessity was based upon two considerations: First, that unless you increase this membership you are going to take away the strength and the power and the control of the Government from the rural districts of this country and center it in the congested districts. I have no selfish motives; Texas gains one Member, anyway. You can not prevent Texas from getting one Member. I will say to my friends from Texas whose districts will be redistricted that you have got to redistrict in Texas, anyway, whether you have three or four. If I were personally interested I would rather carve three apples than carve one, but I have no personal interest in the matter. [Applause.]

The CHAIRMAN. The time of the gentleman from Texas has again expired.

MESSAGE FROM THE SENATE.

The committee informally rose; and the Speaker having resumed the chair, a message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had passed joint resolution of the following title, in which the concurrence of the House of Representatives was requested:

Joint resolution (S. J. Res. 236) directing the Secretary of War to cease enlisting men in the Regular Army of the United States until the number of enlisted men shall not exceed 150,000.

The message also announced that the Senate had passed without amendment the bill (H. R. 12469) to authorize the award of a medal of honor to Chief Gunner Robert Edward Cox, United States Navy.

APPORTIONMENT OF REPRESENTATIVES.

The committee resumed its session.

Mr. SIEGEL. Mr. Chairman, I yield four minutes to the gentleman from Michigan [Mr. McLEOD].

The CHAIRMAN. The gentleman from Michigan is recognized for four minutes.

Mr. McLEOD. Mr. Chairman and gentlemen, I am in favor of this bill as reported by the committee, which will give as a total membership in the House 483 Members, for this reason, that the ex-service man's needs are constantly growing and will continue to grow in years to come and, I believe, that added Representatives in Congress is the only way the above-stated needs of these men can be properly taken care of.

I can speak from experience of my short time down here that the time of a Member of Congress is not adequate for him to intercede in the proper way in behalf of the ex-service man whose claims are being neglected by the various soldier relief bureaus. I have been forced to spend the biggest part of my time at the bureaus trying to straighten out the above-stated man's troubles, which have been hanging fire for months. The opponents of this bill would increase the number of people in the districts, and a Member, if he conscientiously looked after the needs of the ex-service men of his district alone, would not have any time to attend legislative sessions.

It is true that we are all sympathizers with the sick, maimed, and insane soldiers; but so far we have not taken proper steps to furnish the remedy. The way the matter now stands is:

First. If an ex-service man is ill, or his partly healed wounds give way, his only remedy is to throw himself at the mercy of the Public Health Service.

Second. If he needs employment his only access is to throw himself at the mercy of the Federal Vocational Board to do what they can for him.

Third. If he becomes helpless through sickness and is penniless he must start down the long road of red tape in the War Risk Bureau, which, as a rule, proves very unsatisfactory.

The remedy for all this is to place these several departments under one head so that men finding difficulty in their particular needs might get immediate and satisfactory attention. I would also like to call your attention to insane soldiers—they are increasing daily. Time develops past war illnesses to insanity. Statistics prove that as these cases increase there is no place for the above-named men to be cared for, and they are placed in poorhouses, and time is the measurement which can estimate the great increase of insanity cases due to effects of the past war.

So, in conclusion, increased Representatives is the one present remedy to care for these men, until Congress can put through appropriate hospitals.

I thank you, gentlemen, for your attention, and I yield back the remainder of my time, if there is any. [Applause.]

Mr. FAIRFIELD. Mr. Chairman, I yield 10 minutes to the gentleman from California [Mr. BARBOUR].

The CHAIRMAN. The gentleman from California is recognized for 10 minutes.

Mr. BARBOUR. Mr. Chairman and gentlemen of the committee, I am opposed to this bill that has been reported to the House by the majority of the Committee on the Census. I am opposed to increasing the membership of the House. I voted against the bill in the committee. I felt there that——

Mr. SIEGEL. Mr. Chairman, I rise to a point of order.

The CHAIRMAN. The gentleman will state it.

Mr. SIEGEL. It is that no member of a committee can disclose what was said or done inside the committee.

Mr. BARBOUR. My name is signed to the minority report, I will say to the gentleman from New York.

Mr. SIEGEL. The gentleman proposes to tell what all the members of the committee did inside.

Mr. BARBOUR. I am not proposing to do any such thing. I am only accounting for my own action. I am ready to do that at any time and in any place.

Mr. SIEGEL. I withdraw the point of order.

The CHAIRMAN. The gentleman from California will proceed.

Mr. BARBOUR. I signed the minority report, and I propose to offer here on the floor at the proper time an amendment which will limit the membership of the House to 435, the present number.

I am going to do this because I do not believe there is any public demand whatsoever for any increase in the membership of this House.

Mr. ASWELL. Will the gentleman yield?

Mr. BARBOUR. I had rather not yield at this time. I have not received a single communication from any person advocating an increase in the membership of the House.

Mr. BEE. Will the gentleman from California yield?

Mr. BARBOUR. Not at this time. I have received communications protesting against the bill that has been reported here, and every newspaper that has come to my attention that has discussed this proposition, every magazine that has considered this question, has taken a decided and a determined stand against increasing the membership of this House. The amendment, retaining the present membership, if adopted, will deprive no State of any representation whatsoever. It will deprive a few States of some Members of Congress, but it will not deprive any State of representation. We all know that this body at this time is more or less unwieldy. It is brought home to us here every day. We know that if the membership of this House is increased, the time required for general debate will have to be extended. The time taken in calling the roll and on points of no quorum, with 48 Members added to the roll, will have to be increased. We know that the committees will have to be larger. Practically all of the committees of the House will have to be increased in size. In every activity of this House more time will be required than at present, and we all know that more time than ought to be is required now.

But to my mind the controlling reason against increasing the size of the House is that it will mean added and useless expense. Members of this House on both sides are continually declaring for a policy of economy. Members on both sides of this House made their campaigns in the last election on the platform of economy. President elect Harding declared not long ago that one of his first acts would be to reduce the number of employees in the Government service by at least 200,000. We have heard it stated here time and again that we should cut down the number of useless Government employees in the interest of economy. Yet it is proposed by this bill to add to the pay roll of the United States Government 48 useless Congressmen. Each new Member will mean an added cost of $7,500 per year for salary, $3,200 for clerk hire, and $125 for stationery. Forty-eight new Members will create an added personal expense of $519,400. When you add to that the expense for mileage, the additional expense for postage, franking and telegrams, and the additional employees that will be necessary for these Members of Congress, you will run the annual expenditure for these 48 additional Members up to $1,000,000 a year.

Nor does this take into consideration the additional expense that will be necessary to provide these new Members with office quarters. We know that at this time the House Office Building is crowded. There are no quarters available there. Nor does it take into consideration the additional space needed on the floor of this House.

The statement has been made here that this is a representative government, and that by increasing the number of Representatives in this body you bring the Government nearer to the people of the country. If that argument is logical and you follow it out logically, then we should have 1,000 or 5,000 Representatives in this House. It would then be more of a representative government than it is at the present time; but my idea of representation does not imply merely numbers. It does imply equality. It makes no difference at what figure you place the membership of this House, whether at 200 or 500, the fact is that the proportional representation will be equal and the same. No State, even though it may lose a Member of Congress if this amendment is adopted, will be deprived of any of its representation.

It has been said here that the work and duties of the Members have materially increased, and that therefore we must have this additional membership. With 435 Members of the House the ratio of representation is 242,415. With 483 Members the ratio of representation is 218,986, a difference of 23,429. If we adopt the committee bill providing for 483 Members, it will mean that each Member is representing only 23,429 fewer persons than he will be representing if we adopt the amendment which will be proposed. In order to save this small amount of work for each individual Representative, it is proposed to add to this House 48 additional and useless Members.

The gentleman from Texas [Mr. BEE] in discussing this matter said that one great objection to reducing the size of the House, or even maintaining it at its present membership, is that you destroy the dignity and the power of each State which has a Member taken from its representation. In reply to that I want to say that there is plenty of precedent for reducing the membership of the various States in apportionment legislation. The records show that 18 States have heretofore at various times had their representation reduced. In 9 out of the 13 apportionments heretofore had the representation of at least one State has been reduced.

In 1860 Alabama suffered a reduction in its representation.

Connecticut had its representation reduced in 1820 and again in 1840.

Delaware was reduced from three to one in 1820.

Georgia has been reduced three times, once in 1790, again in 1840, and again in 1860.

Kentucky was reduced in 1840 and again in 1860.

The representation of Maine has already been reduced four times, in 1840, 1850, 1860, and 1880.

Maryland has twice been reduced, Massachusetts four times, New Hampshire four times, New Jersey once, New York three times, North Carolina three times, Ohio once, Pennsylvania twice, South Carolina three times, Tennessee three times, and Vermont four times. The State of Virginia has six times had its representation in this House reduced. That is certainly precedent enough to sustain our position and shows that heretofore no State has suffered in its dignity and power. It is my position that we should eliminate politics and local considerations and settle this matter as the people want it settled, by refusing to increase the membership of this House.

Mr. ASWELL. I yield 15 minutes to the gentleman from Tennessee [Mr. SIMS].

Mr. SIMS. Mr. Chairman and gentlemen of the House, I am not here with the slightest personal interest to subserve, I am not here with the slightest question on my mind of whether one State loses or another State gains. If we get down to interpreting and carrying out the spirit of the Constitution entirely with regard to whether I come to Congress or stay out or whether you come to Congress or stay out, it is about time for us to have nothing to say and no vote to cast.

It has been said that this House has become unwieldy. How? We have passed more bills and resolutions in the same length of time than we ever did since I have been a Member, now 24 years. We have rules by which we obtain a vote. There is a legislative body that can have a vote only by unanimous consent. It is that legislative body that has the smallest number of Members, and which by the Constitution can never be increased.

According to arguments made by some Republicans, who have increased the membership at every apportionment since I have been here, they now admit that the more Republicans we have in the House the less efficient it becomes and the less service is rendered. I came here when we had but 357 Members, when Thomas B. Reed was Speaker of the House, the Fifty-fifth Congress—one of the ablest Republican Congresses that ever sat in this House. That Congress functioned. Have Republicans with a larger number and with more experience and with longer sessions ceased to be efficient on account of numbers?

The House has been increased in membership every 10 years since the Government existed, except once, but at the same time the number of population that it takes to elect a Member has also increased. So there is the balanced condition. We have an increased number of people that it takes to elect a Member, and we have decreased the membership relatively but have increased it numerically. In the first apportionment bill population was 30,000 to the Member, but now it is over 200,000 to the Member. It is all bosh and nonsense to talk about the body that more directly represents the individual voter becoming unwieldy. That means that as Republics increase in population and representation they cease to function and must eventually fall. On which side are you, my friends? Shall the people rule or shall the corporate and special interests rule this country? We know and everyone knows that executive power is concentrative and that legislative power is diffusive; that the individual citizen should have the greatest opportunity to present his interests and views to his immediate Representative, and the only way to enable him to do it is to have representation somewhat in proportion to population.

Members talk about economy. When did economy strike this House? What is the matter with it? We will sit here and vote away hundreds of millions of dollars to corporate interests and greed, and then say that we can not increase the membership of this House by 48 Members on account of the expense

it entails! If 48 will destroy the efficiency of the House, then it must be more or less already desperately impaired. Why not reduce your present membership by 48? Why not reduce it to 357 and put it back to where a great Congress composed of great men, measured by the bills and resolutions it passed, was a failure compared with this Congress? That Congress did not pass anything like the number of bills that this Congress has passed.

The gentleman from Indiana [Mr. FAIRFIELD] says that we have given away the whole case by admitting that we are willing to amend the Constitution and limit the number to 500. I do not give away the case; I am not in favor of any such amendment. I would come much nearer supporting an amendment that 250,000 people should never be deprived of direct representation in this House and by at least one Member than I would that you should limit the number of Members so as to increase the number of people above that figure in order to have a Representative in this body. Rigid constitutional provisions are not always conducive to perpetuity of government and the prevention of revolution. Let the people now decide for themselves, and let the people of the future decide for themselves. Do not let a lot of machine politicians that run conventions, State legislatures, boards of aldermen, or other legislative bodies say that this House is getting too big for their complete and perfect individual boss control and domination. That is what it means. I do not care whether Tennessee gets a vote or does not get a vote, so far as my stand on this matter is concerned. The people ought to rule, the people ought to have the best opportunity to hold their Representatives responsible, and to come in personal contact with them.

Mr. ROSE. Mr. Chairman, will the gentleman yield?

Mr. SIMS. Yes.

Mr. ROSE. What has the gentleman to say about so many municipalities throughout the United States getting away from the idea of a large aldermanic representation and adopting what is known as a commission form of government? At one time 40 or 42 men would represent a municipality, and to-day but 5 do. The people had it within their own control. What is the answer?

Mr. SIMS. My answer is that the boards of aldermen have acted as an executive body and have been functioning in that way, not merely as a legislative body, and they have been dispensed with in some cities because it was necessary to do it in order to have the executive functions of city government carried out. Gentlemen no doubt are unconsciously and unknowingly yielding to special interests and corporate power, which desire to reduce the number they have to help elect and deal with after they get them elected. This is a poor argument for you Republicans. You have the power and that is the reason I am addressing myself to you. Self-interest usually controls political and financial action. Why did not you find out that the Fifty-fifth Congress had reached the peak of the number of Members that could efficiently function? Why did you increase that number by 40 or more in 1900 and again by 40 or more in 1910 when the House was Republican?

Mr. ESCH. Mr. Chairman, will the gentleman yield?

Mr. SIMS. Yes.

Mr. ESCH. The apportionment act of 1911 was reported out by the gentleman's colleague, Mr. Houston, and was passed by a Democratic House.

Mr. SIMS. But if we did, we increased the number as I have stated.

Mr. ESCH. Oh, yes.

Mr. SIMS. Of course we did; but we have Democrats now who are tired of being Democrats measured by our action then, when we were working in the interest of the greatest good to the greatest number, as we then believed. I am not questioning any man's motives, but this is the wrong time to reduce confidence, even in a psychological way, in the power of the people to control legislation. Of course, the Federal Government activities are increasing, and Members of Congress are called to go to departments and you have to go in person, for if you do not our constituents think we have not attended to their business in the way we should. But, after all, we have the best Government in the world, and why tinker with it; why come to a standstill? Why stop progressing? Some gentlemen say that we have to have a quorum to enact business in Committee of the Whole; so we have, but that is only a matter of rules, which we can change at any time. What did we do in this House in the time of Mr. Speaker CANNON? We rose up, Republicans and Democrats alike, against what they called autocratic rule and czarism and we abolished the Committee of Rules of 5 and established one of 15 members, as I now recall.

Now, look at our committees in the House. Do they function? Twenty-one Members on a committee, 35 Members on the Committee on Appropriations! Why do not we practice with ourselves what you preach to the people? Do you consider our committees as being unwieldy on account of the numbers? But I will tell you, my friends, you are going to find out, in my opinion, what the poor people of this country think, who can not come here and put up at the Willard Hotel or some other fine hostelry and talk to Members and Senators and have a chance to express their views to them while the corporations that have fear either of legislation that they do not want or favor of some legislation that they do want keep a regular paid coterie of men here to represent them. Why not stand by the people by giving them the greatest and best opportunity to see their Representatives and depend as far as possible upon those who have a seat in this House. Why, the mileage expense has been presented as an argument against an increase. Great heavens, would you impair the public service on account of mileage? I am not in favor of the abolishing of mileage, not a bit of it; but you have brought it up as a solemn argument. Why, we can cut off mileage if that is going in the slightest to get in the way of the people's rule in the only way they can rule in legislation. The greatest power that any free man can have is political power and the opportunity to exercise it. Now, my friends, I have got, as I have said, no personal ax to grind, either in the way of voting to give Tennessee another Member or to keep her from having another Member, but I say limit the increase in the number of population that is required to send a Member. More than half of the population of the United States are in our cities and towns that exceed 2,500 in population. In a little while the cities which are boss ridden, boss ruled, and ring controlled will have a large majority of the membership of this House——

Mr. JOHNSON of Mississippi. Will the gentleman yield?

Mr. SIMS. Yes, sir.

Mr. JOHNSON of Mississippi. Considerable argument has been made here against this bill on account of economy. I want to call the attention of the gentleman to the fact that we have recently voted hundreds of millions of dollars to guarantee 6 per cent dividends on the watered stock of railway companies, and at this time the same people, the railroad people, are knocking at the door of this Congress asking hundreds of millions more, and that bill is under consideration now——

Mr. SIMS. Does not the gentleman know and does not everybody know that those special interests that expect the most of Congress want the fewest number of Members?

Mr. JOHNSON of Mississippi. Surely; and I agree very much in what the gentleman says.

Mr. SIMS. That is natural. They are the ones who are crying out, "Reduce the membership; it is becoming unwieldy."

Mr. MASON. Will the gentleman yield?

Mr. SIMS. I will.

Mr. MASON. How many voters have we increased by this amendment? How many more voters does this Congress represent——

Mr. SIEGEL. Two hundred and nineteen thousand——

Mr. SIMS. What is it now?

Mr. SIEGEL. Two hundred and eleven thousand.

Mr. SIMS. It has increased from 211,000 to 219,000?

Mr. MASON. That is not the question. By the amendment known as the Susan B. Anthony amendment we have increased the electorate. Now, how many millions did we increase it?

Mr. SIMS. I do not know; but I should judge by as many votes as we already had. In other words, we have admitted as many women to enjoy the franchise as there are men.

Mr. MASON. And there are that many voters which the gentleman and myself have to deal with?

Mr. SIMS. Yes; there are that many more. That does not please the corporations. The corporations do not want to have to look after the men sent here by the women's vote. They say women are too impulsive, are too temperamental, are too much in favor of justice for justice's sake; they know too little of what the stock market shows from day to day. I hope women will never become commercialized like men have.

The CHAIRMAN. The time of the gentleman has expired.

Mr. SIMS. Mr. Chairman, I ask unanimous consent to revise and extend my remarks if needed.

The CHAIRMAN. The gentleman from Tennessee asks unanimous consent to revise and extend his remarks. Is there objection? [After a pause.] The Chair hears none.

Mr. SIEGEL. Mr. Chairman, I yield five minutes to the gentleman from Kansas [Mr. TINCHER].

Mr. TINCHER. Mr. Chairman and gentlemen of the committee, I would not take part in this discussion at all except for the fact that I am regular. I am tired of being regular on Monday and irregular on Tuesday. As I say, I would not take

part in this discussion were it not for the fact that the steering committee which steers a committee legislation through the House on Monday is here doing something else to a committee's legislation on Tuesday. [Applause.] I am a Republican and a good party man, and I do not know, but I thought it had been settled that the proper way for Congress to function was through committees. This committee seems to have displeased those who are willing to admit that they figure our Government should be run by those living north of the Ohio and east of the Mississippi. [Applause.] It takes a great statesman, one as great as my friend from California, to admit candidly that he is perfectly willing to have a reapportionment that would take a Congressman away from Kansas and give it to California. It is something like a distinguished gentleman I heard speak here last spring who stood upon this floor and proclaimed to the people he stood for a square deal at the risk of losing his election if he stood for a square deal.

We are all statesmen, but if we will analyze the purpose behind the speeches, the purpose behind the statesmanship, we will find some local cause working. Why should Kansas, which has only eight Congressmen now, surrender one of them to California and one of them to New York? Oh, the gentleman says they can give up a Congressman all right and not lose any representation. I expect that is true. California might get four or five more Congressmen and not gain in representation. [Laughter.] I am against this steering committee proposition to govern this country with a few north of the Ohio and east of the Mississippi. [Applause.] I do not think that the minority report will ever find a place in the archives of our Government as a State document. I realize that the gentleman that presented that did it from his motives as a statesman. The other members of his delegation are not in accord with him. He is doing it because of conviction. I think if you will read the document itself it ought to convict him. [Laughter.] There is not any reason why Iowa and Kansas and Nebraska and Missouri should surrender some of their Congressmen to California and New York and some of these other States because by an inaccurate Democratic census, catching most of the fighting men away from home, they have some figures here that temporarily would warrant such a transaction. [Applause.]

I am for the committee on Tuesday the same as I am for the committee on Monday. Now, there is another name for it besides "steering committee." I do not like to call it that. When they are steering the legislation through it is proper to call it a "steering committee," but sometimes the committee operates in such a way that it would be termed in the grain market a "bulling committee."

I hope Members will not be scared because some newspaper in their district has said that Congress is unwieldy. Unwieldy to whom? May the day never come when it will cease to be unwieldy to some of the men who like to wield it on all occasions. [Applause.] I thank you.

The CHAIRMAN. The time of the gentleman from Kansas has expired.

Mr. LARSEN. Mr. Chairman, I yield three minutes to the gentleman from Texas [Mr. BLANTON].

Mr. BLANTON. Mr. Chairman, I am against the Siegel bill. I am not only against increasing the present membership of the House but I am in favor of decreasing its size.

The present membership of the House is 435, being one Member for each 211,000 people, under the 1910 census. The Siegel bill proposes to increase the membership to 483, apportioned as follows: Alabama, 11; Arizona, 1; Arkansas, 8; California, 16; Colorado, 4; Connecticut, 6; Delaware, 1; Florida, 4; Georgia, 13; Idaho, 2; Illinois, 30; Indiana, 13; Iowa, 11; Kansas, 8; Kentucky, 11; Louisiana, 8; Maine, 4; Maryland, 7; Massachusetts, 18; Michigan, 17; Minnesota, 11; Mississippi, 8; Missouri, 16; Montana, 2; Nebraska, 6; Nevada, 1; New Hampshire, 2; New Jersey, 14; New Mexico, 2; New York, 47; North Carolina, 12; North Dakota, 3; Ohio, 26; Oklahoma, 9; Oregon, 4; Pennsylvania, 40; Rhode Island, 3; South Carolina, 8; South Dakota, 3; Tennessee, 11; Texas, 21; Utah, 2; Vermont, 2; Virginia, 11; Washington, 6; West Virginia, 7; Wisconsin, 12; Wyoming, 1.

As soon as the question of increasing the membership arose in this Congress I introduced in the House a bill to decrease the membership to 304 Members, which would be 131 less than the present size of the House. The following is my bill:

[H. R. 15158, 66th Cong., 3d sess.]

A bill for the apportionment of Representatives in Congress among the several States under the Fourteenth Census.

Be it enacted, etc., That after the 3d day of March, 1923, the House of Representatives shall be composed of 304 Members, to be apportioned among the several States as follows:

Alabama, 7; Arizona, 1; Arkansas, 5; California, 10; Colorado, 3; Connecticut, 4; Delaware, 1; Florida, 3; Georgia, 8; Idaho, 1; Illinois, 19; Indiana, 8; Iowa, 7; Kansas, 5; Kentucky, 7; Louisiana, 5; Maine, 2; Maryland, 4; Massachusetts, 11; Michigan, 10; Minnesota, 7; Mississippi, 5; Missouri, 10; Montana, 2; Nebraska, 4; Nevada, 1; New Hampshire, 1; New Jersey, 9; New Mexico, 1; New York, 30; North Carolina, 7; North Dakota, 2; Ohio, 16; Oklahoma, 6; Oregon, 2; Pennsylvania, 25; Rhode Island, 2; South Carolina, 5; South Dakota, 2; Tennessee, 7; Texas, 13; Utah, 1; Vermont, 1; Virginia, 7; Washington, 4; West Virginia, 4; Wisconsin, 8; Wyoming, 1.

SEC. 2. That in each State entitled under this apportionment to more than one Representative, the Representatives to the Sixty-eighth and each subsequent Congress shall be elected by districts composed of a contiguous and compact territory, and containing as nearly as practicable an equal number of inhabitants. The said districts shall be equal to the number of Representatives to which such State may be entitled in Congress, no district electing more than one Representative.

SEC. 3. That in all States in which the present number of Representatives has been changed under this apportionment, until such States shall be redistricted in the manner provided by the laws thereof, and in accordance with the provisions of section 3 of this act, the Representatives from each State not so redistricted shall be elected by the State at large; and if there be no change in the number of Representatives from a State, the Representatives thereof shall be elected from the districts now prescribed by law until such State shall be redistricted as herein prescribed.

SEC. 4. That candidates for Representative or Representatives to be elected at large in any State shall be nominated in the same manner as candidates for governor, unless otherwise provided by the laws of such State.

I appeared before the Census Committee and urged the same facts I am going to present now in favor of reducing the size of the House. I have no selfish motive, for at present the State of Texas has 18 Congressmen, while under the Siegel bill Texas would have 21, and under my own bill Texas would have only 13. I am considering only the good of the whole people of the United States.

About a month ago the newspapers asserted that in the caucus held by the Republicans in Congress it was agreed to pass the Siegel bill increasing the membership to 483.

I want to say to the country that if this Siegel bill is passed, placing this immense burden of increased expenses upon the already overburdened people, the responsibility for its passage will rest upon the gentleman from Wyoming [Mr. MONDELL] and his Republican Party, for he is the leader of the majority in this House and has it in his power to control legislation. The Republican Party has a majority of 46 Members in this present House, and its steering committee has the power to decree what is good and what is not good for the country and to pass or kill any piece of legislation proposed. The party whips its members into line on some bills, and it can not escape responsibility now by passively permitting this increase to become a law.

Mr. MONDELL. Will the gentleman yield?

Mr. BLANTON. I regret that I can not. If the gentleman will get me more time, I will yield to every colleague in the House.

Besides the latent, personal interest that is involved in this question, the only argument that I have heard presented on this floor in favor of this Siegel bill is the assertion that to increase the basis of representation would make it impossible for us to render efficient service to our constituents.

If my bill seeking to reduce the membership to 304 were passed, the basis of representation would be one Congressman for each 350,000 people or major fractional half thereof.

I assert that a Member of Congress can render efficient service to that many people if he will only work and earn his salary. In the Sixty-fifth Congress I had the honor of representing the old "Jumbo" sixteenth district of Texas, which embraced 59 counties, running 556 miles east and west, from Mineral Wells to El Paso, and about 400 miles north and south, from Lubbock to Rock Springs, and it had over 350,000 people in it. I went into every county and spoke not only in the county seats, but also in many small towns and some country schoolhouses, and got personally acquainted with many of the people. Such district embraced the following:

Sixteenth district.—Counties: Andrews, Borden, Brewster, Callahan, Cochran, Coke, Concho, Crane, Crockett, Crosby, Culberson, Dawson, Eastland, Ector, Edwards, El Paso, Fisher, Gaines, Garza, Glasscock, Haskell, Hockley, Howard, Irion, Jeff Davis, Jones, Kent, Kimble, King, Loving, Lubbock, Lynn, Martin, Menard, Midland, Mitchell, Nolan, Palo Pinto, Pecos, Presidio, Reagan, Real, Reeves, Runnels, Schleicher, Scurry, Shackelford, Stephens, Sterling, Stonewall, Sutton, Taylor, Terry, Tom Green, Upton, Ward, Winkler, Yoakum, and Hudspeth (59 counties). Population (1910), 369,696.

When the Legislature of Texas redistricted the State in 1917 it took from me 49 counties, leaving me only 10 counties of my old district, to which it added 9 new ones, constituting the present seventeenth district of Texas, which I now have the honor to represent, and which under the 1920 census has about 315,000 people in it.

Every letter coming to my office ever since I have been in Congress has been answered, and such answer made under my own personal dictation. No proper appeal has been turned down or ignored, for every person who has requested a bulletin has received it. Every person who has requested garden seed has received it. Every person who has requested Government fish, or documents, or information, has had such requests promptly

attended to. Every person who has required business to be attended to at our various departments knows that I have made such trips and given personal attention to their business. And I am not overworked. At least I am able to stand it and fatten on it. But sometimes I have to put in from 12 to 14 hours a day, but I take a pleasure in doing it. I find time to carefully scrutinize almost every matter that is brought before this Congress before a final vote is taken on it. And I mention these facts to show that a man can represent over 300,000 people if he will only work.

There are 63 newspapers, besides college publications, that are published in my present district, and I believe that every single one of them favors decreasing the membership rather than increasing it. I do not know of a person in my district who wants to increase the membership.

As I said before, if this bill passes the people should hold the Republican Party responsible for it.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. BLANTON. Mr. Chairman, I ask unanimous consent to revise and extend my remarks.

The CHAIRMAN. The gentleman from Texas asks unanimous consent to revise and extend his remarks. Is there objection? [After a pause.] The Chair hears none.

Mr. STEPHENS of Mississippi. Mr. Chairman, at the end of each 10-year period and following the taking of the census of the population of the Nation the Congress enacts a bill providing for the apportionment of Representatives in the House among the several States.

The pending bill proposes to fix the membership of the House at 483 Members. The present membership is 435; therefore, it will increase the number, if the bill is passed, by 48 Members. The bill is sponsored by eight members of the committee which reported the bill, and six members of that committee filed a minority report and favor retaining the present membership, 435.

The thought that prompts this effort to increase the number of Members is based on an unwillingness to reduce the number of Congressmen from any State; and it will require an increase of 48 Members to prevent such a reduction.

This same proposition arises every time a reapportionment bill comes up for consideration. Naturally, the increase of population is not uniform in the various States. As the representation of each bears the same relation to the representation of the entire Nation that the population of the State bears to the population of the Nation, there will be an increase in numbers in the House every 10 years unless, at some time, some State or States shall have their number of Representatives reduced.

If the proposed increase shall be made, it will mean that in the past 20 years the membership of this body has been increased 124 Members. At the same rate it would not require many years until there would be 800 or 1,000 Members.

I recall very distinctly that when the last reapportionment bill was passed that there was an increase from 391 to 435 in order to save certain sitting Members their seats in Congress. The same arguments are made now that were made then. They will continue to be made as the occasion arises.

There is not a Member of this body that I want to legislate out of office. That some may be adversely affected if the number of Representatives is not increased is probably true. This is a matter of personal regret to me, but I feel that the membership is large enough now, and that it will be to the best interest of the country not to increase the size of this body. To make the increase will lessen the efficiency of the House, and it will also increase the expenses of the Government several millions of dollars, when we consider the salaries and expenditures for quarters, and so forth.

There is unquestionably a limit beyond which this or any other legislative body can not go without lessening its capacity to function effectively and efficiently. It occurs to me that that limit has been reached, if it has not already been passed.

Therefore I am opposed to this bill and shall vote to retain the membership at 435, the present number. Of course, if that shall be the figure agreed upon, it will mean that some State will not have as many Members in the Sixty-eighth Congress as they have now. My own State will have seven instead of eight Members. Other States will have reductions in numbers. This may result in unpleasant situations for individuals, but no State will suffer any injustice.

STATES TREATED FAIRLY AND EQUALLY.

The Constitution of the United States provides that—

Representatives shall be apportioned among the several States according to their respective numbers, counting the whole number of persons in each State.

Under the constitutional provision it is required that the population of each State be considered in relation to the population of the entire Nation. This will be done whether the number of Members be fixed at 300, 435, or 483. If a State shall not have as many Members as it has now, the relative voting strength will be the same. The reduction will be general and no injustice will result, because the representation will be based on population.

Some gentlemen who come from States that will not have as many Congressmen as the States now have, if there be no increase, complain that it is unfair to take away a Congressman from one State and give a Congressman to another. There is no warrant for any such statement. That will not be done. Nothing is being taken, or proposed to be taken, from any State. Gentlemen who make that argument seem to feel that the State has an inalienable right to retain the present membership from that State. No State loses anything that it has an absolute right to have, nor does any State gain anything that it is not entitled to. If a State loses a Representative, it is simply because its population has not increased in the same ratio with the general increase of population; if any State gains in representation, it is because of its gain in population.

RURAL VERSUS URBAN REPRESENTATION.

Some gentlemen argue that the agricultural States are being discriminated against to the advantage of States that are not classed as agricultural States. That is not true. What I said just a few minutes ago applies to this argument with equal force.

It is true that some agricultural States will not have as many Representatives as they now have if the number is kept at 435. But the proportion is just the same; the relative voting strength will be unchanged. This is true, for the reason that if the agricultural State is allowed to retain its present voting strength the voting strength of the nonagricultural States will be proportionately increased, because the largest increase in population is in these latter States. There is no escape from this conclusion when we remember the provisions of the Constitution referred to. Mississippi, whether she retain the present membership of eight or is reduced to seven, will have the same relative voting strength and influence. The same is true, of course, of every other State.

It is suggested that there will soon be a drift from the cities back to the country. That is simply speculative. It may happen, or it may not happen. We can not legislate on speculation. The census has been taken. The Constitution makes it, and not speculation, the factor that shall guide and control us in the legislation.

No State can be adversely affected, whether it lose one or more Members, so long as its rightful proportion of representation is not denied it; and no one will contend that the constitutional provision is not strictly followed.

It is unfortunately true that the last census shows that there are more people in the cities than there are in the rural districts. That is not a healthy state of affairs for the Nation. No matter how much we may deplore it, it is the fact. Because it is true, it necessarily follows that the rural sections will have fewer Representatives than the urban sections. But it is a condition that can not be escaped. The basis of representation must be the same for every district, whether it be rural or urban.

REPRESENTATION IN FOREIGN COUNTRIES.

It is proposed by those of us who want the membership to remain at 435 that the basis of representation be fixed at 242,415 of population for each Congressman. It is argued that this figure is too high, and the gentlemen who are supporting the bill want to fix the basis at 218,896. It has been strongly contended that in England, France, Germany, and other foreign countries the basis of representation is very much less—in some countries it is as low as 30,000.

That is no reason why we should reduce our basic figures. They seem to forget that in those countries their form of government is very different from ours. They do not have State legislatures, as we do. They have one general legislative body. We have 48 State legislatures and the Congress of the United States. When we consider this fact, I have no doubt that it will develop that our basis of representation is much lower than theirs.

HOW IT AFFECTS THE SOUTH.

I have said that neither will a State nor the rural sections be affected adversely if there is loss of some Members, because the relative proportion of representation will be preserved. The same thing is true of the South as well as every other section of the country. If the membership is fixed at 435, Louisiana and Mississippi will each have one less Member, but North Carolina and Texas will each have an additional Member.

This is due to the fact that the latter States have gained in population, while the two former States have not gained, one at least having lost population.

From this it will be readily seen that the South has not lost anything in voting strength. She will have the same number of votes in this House and in the electoral college, as she now has, despite the fact that the number of Members is kept at 435.

There has been a lot of agitation over the Tinkham resolution, the purpose of which is to cut down representation in the South because it is alleged that negroes are not allowed to vote. I shall not discuss that proposition, because it is not now before the House and is not, therefore, a proper subject for discussion. I simply want to say that that resolution is in no way related to the matter now before us. We are simply attempting to follow the Constitution by seeing that each State has its due proportion of Congressmen; and also to determine what number of Members can best serve the interests of the Nation.

Careful consideration has convinced me that the membership should not be increased. I do not agree to the argument that it will be impossible for a Member of Congress to properly look after the additional people that will be added to his district. The proposed basic figures are 242,415. There are many Members of the body who now have many more than that number in the districts they represent at present.

That gallant old Confederate soldier, the gentleman from North Carolina, Maj. STEDMAN, has a population of about 350,000 in his district. Evidently he looks after their interests in a satisfactory manner, for he is always reelected by a large majority.

The most efficient legislator in the House is the gentleman from Illinois [Mr. MANN]. He has more than 300,000 people in his district.

Mr. MADDEN. He represents 500,000.

Mr. STEPHENS of Mississippi. That may be true. He seems to be able to give them ample attention, for he keeps returning here.

So you may look over the Congressional Directory and you will find that there are perhaps dozens of Members who now represent more than 242,415.

Mr. Chairman, I do not believe that any State will complain because of a decrease in the number of its Representatives when it is made clear that every State is treated like every other State and that the provisions of the Constitution have been adhered to. I know, at any rate, that there will be no just ground for complaint or criticism if the membership is kept at 435. The cause of a reduction in membership will result from the failure to grow in population. This may be a matter for regret; but no one can justly complain because the result of this is that representation is decreased.

In the interest of orderly procedure and efficiency in the House, in the interest of economy, in the interest of the country in many ways, having first satisfied myself that every State will be receiving all its rights under the law and the Constitution, I am compelled to vote against the Siegel bill. [Applause.]

Mr. SIEGEL. Mr. Chairman, I yield 15 minutes to the gentleman from Maine [Mr. HERSEY].

The CHAIRMAN. The gentleman from Maine is recognized for 15 minutes.

Mr. HERSEY. Mr. Chairman, in the 15 minutes given me it is almost impossible to cover the very serious and important question that is now before the House. I ask that I be not interrupted during that time and that I may have your kind attention.

At the outset I want to clear the air of certain false theories, so to speak, certain fallacious arguments, that have been made this morning by the opponents of this bill. One is that the present House of Representatives is unwieldy. Nearly everybody in opposition to the committee bill has said that, and yet everyone making that statement says we ought to keep the House at its present membership. Ten years ago that same argument was made—that the House was then unwieldy—and some of these same Members were fighting the increase of 10 years ago in the House. The same arguments were used then that are used now. You increased the House then by 44 Members. Was it a mistake? No; everybody admits that it was not a mistake. They now approve it and will not stand to reduce the total of the present membership, because they say it was a valuable and wise piece of legislation. The same arguments, however, that were made 10 years ago are made to-day against an increase of membership.

Mr. DALE. Mr. Chairman, will the gentleman yield right there?

Mr. HERSEY. Yes.

Mr. DALE. Were not those same arguments made 20 years ago?

Mr. HERSEY. Yes. They have always been made, for 80 years.

Mr. MASON. And a 300 House was just as unwieldy?

Mr. HERSEY. Yes; my friend from Illinois reminds me that a 300 House was just as unwieldy as this.

I wish to remind the gentleman from Illinois that when this House had only one-third of the present membership it took them four months to elect a Speaker, and in the meantime they could transact no business, showing that the smaller the House the more it is controlled by a few obstructionists.

I wish also to call his attention to the fact that when we had only one-half our present membership the House drifted into the hands of a few self-appointed leaders composed of the Speaker and chairman of committees of what might then be called a "steering committee," and the House ceased to function and a revolution came from the people who cut the power of the Speaker and dethroned certain leaders and restored the House back to a representative body.

Some one in speaking in opposition to this bill a few moments ago said that a Member of the House on the floor of Congress some years ago said that the House then had ceased to be a deliberative body. That was said by Tom Reed of my State 30 years ago. Under what circumstances? Why, the House had become unwieldy with a membership of 332 Members and was not functioning as a deliberative body, because of the rules that put the House of Representatives in the hands of a half-dozen men. Reed broke up that system, and when he did so the House functioned, and ever since it has been adding to its membership, and ever since then it has been more efficient than ever before.

Some one said that the Census Committee has been inconsistent in its recommendation that the House be limited to a membership of 500, the limit fixed by another bill. We do not fix it. We merely submit a constitutional amendment, a referendum of the people. We leave it to them to say what shall be the limit. The committee can not fix it. Would you like to hear from the people? Do you want to know how many they consider should represent them here? The people are not bound by the committee. That is not an argument that should be advanced here, but it is on a par with most of the arguments against the bill.

Another argument advanced by the last speaker was that the gentleman from Illinois [Mr. MANN], the leader so to speak on the Republican side, a man whom we all respect for his great learning, ability, and experience, has been able to take care of a big city district that has grown up in the last 10 years. How has he been able to look after the interests of that district? Only because he has refused to be a member of any committee. You and I know that the business of the House is done by the great committees, and the gentleman from Illinois [Mr. MANN] can not find time to work in a committee and do the necessary work for his constituents in his office and on the floor of the House.

The principal work of the House, as I have said, is done in committees. There are to-day 851 committee appointments to be divided among the 435 Members. These committee hearings consume the morning hour. Those Members who can be spared from the committee attend the meetings of the House. Most of these important committees, as you well know, have permission to sit during the sessions of the House and they do so, and it is no argument to say that the House is inefficient because of its small attendance when Members who can not be in both places are looking after the interests of their constituents just as faithfully in committees as they are on the floor of the House.

When the fathers ordained and established the Constitution for the United States of America they wisely provided that all legislative powers should be vested in the Congress of the United States, which should consist of a Senate and a House of Representatives.

They provided, further, that the House of Representatives, to be true to its name, should be composed of Members chosen every second year by the people of the several States; that a census of population should be made every 10 years, and that Representatives to Congress should be equally apportioned every 10 years among the several States according to that census.

They provided, further, that the number of Representatives should not exceed 1 for every 30,000, but that each State should have at least one Representative.

Under the terms of the Constitution and in accordance with its spirit and intent the House of Representatives early established the policy of increasing the membership every 10 years in accordance and in harmony with the increase of population and the progress of the Republic, so that no State should lose

by such apportionment a Representative in order that the people should never be removed further from personal contact with their Representatives.

In keeping with this wise policy this House has grown to be the greatest representative legislative body on the earth. It has increased its membership every 10 years, following the march of progress, the growth of the Nation, and the demands of the age.

From 1 Representative to every 30,000 inhabitants it has grown to have 1 Representative to every 211,000—from 65 Members to 435 Members—all to keep pace with the Nation that has grown from a population of 200,000 to over 107,000,000.

Since 1880, for a period of 40 years, no State in the Union in any apportionment has lost a Representative. The House has been increased every 10 years, as follows:

Eighteen hundred and seventy, increased 50 Members; 1880, increased 39 Members; 1890, increased 25 Members; 1900, increased 34 Members; 1910, increased 44 Members; and the committee recommend for 1920 an increase of 48 Members.

The people have been contented and satisfied to leave the size of the House to the Members of the House. The people have always insisted, and still insist more and more, that they shall be represented by congressional districts that once established shall not be enlarged so as to remove their Representative further and further away from the people.

They still insist that each Member of the House of Representatives shall keep himself always in personal contact with his people, and they do not desire, on the ground of economy, to give him any unnecessary burdens so as to deprive him of that personal contact, and thus deny him that proper personal consideration of their greatly increasing demands.

The late census of population of the United States has disclosed that during the last 10 years we have increased from about 90,000,000 to over 107,000,000, and in addition to this our insular possessions add to us some 14,000,000 more.

The Committee on the Census, having in charge the bill for the apportionment of Representatives in Congress among the several States under the Fourteenth Census, has reported a bill increasing the membership of the House 48—from 435 Members to 483. Under this apportionment no State will lose a Representative and every Congressman elected under this new apportionment for the next 10 years must represent over 7,000 more people than were represented 10 years ago. In other words, the basis or ratio for the membership of the present House was a little over 211,000, and the basis or ratio for the next 10 years under the committee bill is nearly 219,000.

A majority of the Committee on the Census has been forced to recommend this increase in the new apportionment by the very logic of the situation, by the progress of legislation, and by the desire thereby to keep the House of Representatives still a great and progressive body and in step with the increase of population and progress of this mighty Nation.

To leave the membership of the House as it is at present and as recommended by the minority report of the committee would, it seems to us, not only weaken and destroy the efficiency of the House of Representatives as a working body but would greatly lessen its influence in the minds of the people who have hitherto looked upon the House of Representatives as "the court of the people."

To leave the House at its present membership would deprive 11 States of the Union of a Member and 1 State of two Members. It would take away from 11 States 12 representative districts and transfer those districts to large cities in other States—new districts made up mainly by reason of the increase in large alien populations.

To illustrate the unfair condition that would be brought about by leaving the membership as it is you have only to glance at the facts: The agricultural State of Maine would lose a Representative; where it now has four it would then have only three; Vermont that now has two would only have one to represent the whole State, while California would gain three new Members and three new electoral votes by reason of the fact that during the past 10 years there has been forced upon her native people a great influx of undesirable and alien people who are counted in the census, but who have no vote, and never will have. Michigan would gain two representative districts by reason of the fact that during the last 10 years her automobile industry and other manufacturing industries in her large cities have brought to her large centers a great foreign population. Ohio would gain two new districts for the same reason.

The Washington Post of last Sunday said this editorially:

THE TREND OF POPULATION.

The tendency of the inhabitants of the United States to gravitate from the country to the city or town, which of late years has been so generally remarked and so universally deplored, is proved in no uncertain fashion in a report recently issued by the Census Bureau. Of the total population, 51,394,295 are living in rural districts and 54,314,476 in urban territory.

With a population which is ever on the increase, there will be more and more need of those food supplies which the country districts produce, and therefore the problem is to change the trend of residence and make it go the other way. It is true that in a not very remote past country life, and especially life on the farm, was extremely dull, dreary, and monotonous, and just because of that the gayety, amusement, and social attractions provided by the town proved an irresistible lure alike to the younger members of the farmer's family and to his hired help, with a consequent inevitable loss, both of rural population and of producing power. Indeed, even now there are certain preeminently agricultural States in which the inducements to stay on the farm are surprisingly meager.

It will be the part of enlightened statesmanship—local, State, and Federal—to help along these processes of modern development, to the end that an increasing and contented population may find duty and pleasure happily linked together in the rural homes of America.

One of the greatest dangers that confront the Republic to-day is the tendency of the large cities to control the American Congress under the plausible plea that the consumer should control the Congress and that the producer should have no voice in its proceedings. Every 10 years the attempt is made to change the House from a representative body to a small number who have removed themselves far away from a people that they do not attempt to represent.

To deny an increase in the membership of this House would greatly enlarge the districts of the Congressmen in the agricultural and food-producing sections of the country. It would impose upon the Members who represent the country districts a burden that they could not possibly carry with efficiency. They must, in the first place, under such a new apportionment, represent 32,000 more people. It would be an utter impossibility for them to visit or come in personal contact with many of their constituents. The progress of America and the events in the world have forced upon the House of Representatives of this Nation new and greater problems than ever before.

The dean of the Democratic side of this House, a man whom we all love and whom all regret will not be returned to the next Congress, the Hon. CHAMP CLARK, of Missouri, speaking 10 years ago upon this same question, whether the House then should be increased 44 Members, and meeting then the same arguments made here to-day by the opposition, said:

Mr. CLARK of Missouri. Mr. Speaker, the House of Representatives has the smallest number of men in it of any great legislative body in the world in proportion to the population represented. The proposition of the gentleman from Massachusetts [Mr. GILLETT] is not tenable. His proposition was that the theory of the Republic is that people are not fit to govern themselves. He did not say that precisely, but that is exactly what it leads to, and that they select a superior class of men who come here to legislate for them, and it is the business of this superior class of men to educate these fellows at home. It is the business of a man here—that is my theory and always has been—to represent the will of his constituents [applause] on every important question. Of course on minor questions you have to guess at it, but on these great questions there is no doubt about it. Just in proportion as your constituency is small you can represent them here. The truth is when you increase the ratio by 25,000 or 30,000 it is increasing the work of the Congressman that much in answering letters and all those things which have to be done except the business on this floor. The real legislation in this House is done in the committees. Everybody knows it, and it is only on dress-parade occasions like this when we have a debate here that everybody takes a part, and you know that some of the most important business is transacted here by a very few Members.

These new duties ought to be met by efficiency; they ought to be met by due study and consideration. Congressmen of the future should have time and opportunity to investigate and settle these great new problems.

Ten years ago the chairman of the Census Committee, Mr. Crumpacker, of Indiana, in defense of his bill to increase the House membership 44, and in answer to the same kind of criticism we have heard here to-day, said:

Mr. CRUMPACKER. Much has been said, and will be said, in the course of this debate against the increase in membership; much has been said, and will be said, in the course of this debate, against even maintaining the present membership of 391, on the ground that the House is already an unwieldy body and on the ground that the individual importance of the Representative is diminished unduly and his power and responsibility correspondingly lessened. But it must be kept in mind, Mr. Chairman, that this is a representative body. It always has been, and it is the hope of those who believe in free institutions that it always will be.

The Members of the House are supposed to reflect, in some degree at least, the feelings and the mature convictions of their constituents. This country is vast in area, diversified in climate and in resources, and substantially all general legislation is the result of the composite will of the whole people. It is the result of compromises and concessions whenever interests and ideals may come in conflict. The House is not intended as a forum simply for the development of orators or the exploitation of genius.

Everybody who has given any consideration to the character of legislative bodies knows that a legislature whose members stand close to the people and who meet them face to face and feel directly accountable to them as neighbors and friends is a great deal more careful in the use of the public funds than is a legislature whose members represent constituencies so large that personal contact is impracticable and that sense of personal responsibility is absent. We have an illustration of this truth in the two bodies that compose the Congress of

the United States. Where is the argument of economy most potent? In this body or in the other? Where is public money expended with an appearance of reckless extravagance—here or in the other body? You all know. And why? Because this body represents the people. Every two years every Member of the House must return to his constituents and give an account of his stewardship. He will be questioned about expenditures and about taxation and kindred subjects, and the smaller his constituency may be and the closer his contact with the people personally, the more economical will he be in disposing of public funds. This is human nature.

The economy argument is not the only one involved in the proposed measure. I am submitting these observations as an answer to the argument that this bill would involve the payment of salaries, mileage, and clerk hire to 42 additional Congressmen. I think solely from the standpoint of economy it would be a good investment, for more would be saved in appropriations than the additional salaries would amounut to. There may be reasons why this increase ought not to be made, but the argument of economy is not one of them.

There has been recently added to this Nation the women's vote, doubling the franchise, and woman seeing her opportunities has taken a most lively interest in public affairs. She is studying public questions as never before. She is watching the proceedings in the House of Representatives. She is demanding more and more the attention and services of her Congressman. The burdens of responsibility will be daily increased and the House must increase in membership with these new responsibilities or our duties will be most imperfectly performed.

The committee reporting this bill does so under peculiar conditions. We are fixing the membership of the Congress that shall be elected two years hence. We are now proceeding to fix that membership without the aid, assistance, or opinion of the new Members of Congress elected last November, and who take their seats after March 4. If the House membership remains as it is now—435—we are saying to those new Members that there are 12 Members of the Sixty-seventh Congress that can never come back, no matter how efficiently they represent their people here, no matter how much they may strive to be reelected or their constituents may desire them to be returned, we have deprived them of any future service in this House and have handed over their districts to cities in some of the other States.

The committee reporting this increase of membership is confronted with another unfortunate condition. Yesterday morning's press contains the following:

[Special dispatch to the North American.]

REPUBLICAN LEADERS AGAINST INCREASING HOUSE MEMBERSHIP.

WASHINGTON, *January 16.*

As an economy measure, Republican leaders in Congress have decided to prevent an increase in the size of the House in the reapportionment legislation required every 10 years to conform to the increase in population.

The House steering committee in session yesterday went on record as against any increase over the present House membership, 435.

Pennsylvania and New York Republicans, and some Ohio Members, are in favor of keeping the membership as at present. Speaker GILLETT, ex-Speaker CANNON, and all the important Republican leaders are opposed to the pending bill. If the present membership is retained the ratio will be 242,415 inhabitants, and many States will lose in their representation. Missouri will lose two, and Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Mississippi, Nebraska, Rhode Island, and Vermont will each lose one.

On last Friday, January 14, in this House in the discussion of the legislative bill, which, by the way, had nothing to do with this apportionment bill, the gentleman from Texas [Mr. BLANTON], as it appears in the RECORD, addressed the House as follows:

Mr. BLANTON. Mr. Chairman, I rise in opposition to the pro forma amendment. I desire to ask the gentleman from Wyoming a question as to whether this great party now in power is going to permit the representation of Congress to be increased to 483 Members?

Mr. MONDELL. That will depend to some extent on whether or no the minority does its duty.

Mr. BLANTON. Good.

This bill, which never ought to be made a party measure, is to be opposed by the majority leaders on the ground of economy, and these leaders are depending upon the gentleman from Texas and those who follow him to cut down the Representatives of 11 States. The gentleman from Texas came before our committee with a bill to reduce the present House 131 Members. He said he did it on the ground of economy. He is ready, no doubt, to vote with the Republican leaders to keep the House at its present membership, thereby reducing the representation of Texas one. As there was a Republican Congressman elected in Texas at the last election, and the Texas Legislature is Democratic and consequently will attend to the carving up of the districts to fit the new conditions, it will be an easy matter to see that the Republican district is obliterated and his district given over to enlarge the territory of the gentleman from Texas on the ground of economy.

The people have left this matter of increase of membership to the House of Representatives to decide. They have expressed no opinion. They will look upon the House of Representatives with the same confidence, pride, and respect that the House has for itself. If we say that any increase in membership will only add to the number of incompetents and result in nothing but inefficiency, the people will take us at our word, and the House of Representatives will thereby lose the respect and confidence of the American people. I greatly regret the tendency on the part of the leaders in this House to disregard the people and pass responsibility to the Senate. It has almost become a maxim that you must go to the Senate if you would secure or protect the rights of the common people.

When I came to this House four years ago I made the acquaintance of a Democrat for whom I had a great deal of respect and for whose opinion I had supreme confidence. I allude to the gentleman from Virginia, Judge Saunders, who has served in this House some 15 years and who has recently resigned to accept an appointment upon the supreme bench of his State.

Judge Saunders was a great parliamentarian and efficiently represented his people in the House of Representatives. He approached every question from the standpoint of a statesman and not a demagogue. Ten years ago he answered the same arguments that are made here to-day against an increase in membership. His remarks then apply now with such force and conviction that I quote them in answer to the opposition to this bill. He said:

Mr. SAUNDERS. Mr. Chairman, I desire to call attention to a few of the fallacies in the arguments of the gentlemen who are opposed to an enlargement of the membership of this body. On the part of some participants in this debate it is suggested that in a smaller body, a larger proportion of the Members elect will attend its routine sessions for the purpose of legislative work. Now this is not a matter to be determined by theorizing, but should be referred to the test of actual experience. If anyone considers that in a smaller assembly a better proportion of its Members will attend its daily sessions, he need only stroll across the lobby that intervenes between us and the Hall of our cognate body and watch the progress of its deliberations. He will not find that its proportion of attendance is larger than that which prevails in this House. The old theory that a smaller body means better work dies hard, though it is at war with the experience of everyone who has served in what is known as the popular branch of a general assembly.

Again, it is suggested that an increase in the population of the constituencies will result in a better personnel in this House and a higher class of service on the part of its Members. We have heard a great deal about the wisdom of our forefathers in the course of this debate, and if this intimation of superior wisdom on their part holds good it suggests a reduction rather than an increase of population in the constituencies. In the conception of the fathers the House of Representatives was to be the popular branch of Congress and at all times in direct and immediate touch with the people.

Hence should we fail at this time to increase the membership of the House in measurable proportion to the increase in our population, we will do more violence to the theory of the fathers than at any time of our history, since the constituencies in the event of this failure will be larger than in any decade during that history. As the size of the constituencies are increased, the effective ability of the Members to serve their constituents will be diminished. In modern times the volume of detail work not properly representative is something enormous, and taxes the time of a Representative to the utmost. That tax, or burden, is of course increased in the proportion that you increase the number of people to be served by an individual Representative. The increase of annual expense involved in enlarging the House to a membership of 433 will be insignificant compared to the better service that will be afforded to the public by a proportionate increase in the number of public servants in the legislative body.

The fewer the people to be served by an individual Representative, the more immediately in touch with and the more immediately responsive to the wishes and interests of that constituency will that Representative be. There is no great parliamentary body in the world which contains as few members as our House of Representatives, and no one in which the constituencies are not much smaller than our present constituencies.

All the arguments against increase rest either upon an actual misconception of the situation or else upon the mistaken theory advanced by the gentleman from Massachusetts that a larger constituency will remove the Representative from the influence of his constituents to such an extent that he will be able to substitute his better judgment on public questions for their mistaken views and disregard their indicated wishes. Now, I do not subscribe to this latter view at all. A Representative should endeavor to ascertain the wishes and attitude of his constituents on questions of policy affecting their interests. On these questions of legislative and administrative policy, the true Representative should seek to reflect the will and advance the interests of the people whom he serves. In the unlikely event that his constituency requires him to take any action that will afflict his conscience or moral sense, he should decline to do so and return his commission to the electors. The smaller the constituency the closer and more personal will be the relations that will exist between the people and their Representatives. Hence, on this ground alone, the action of this House will be supported in public opinion if it increases our membership as proposed by the Crumpacker or committee bill.

I think the House of Representatives should have a greater regard for its importance and dignity as representatives of the people and should turn away from the reaction in the air which disregards the interests of labor and the country people. Retain the House of Representatives as a dignified and representative body. I do not want to see the House dwindle to another Senate. I do not want this House to drift into the hands of a few men who have removed themselves far away from the interests of the common people—the hope of the future. [Applause.]

Mr. SIEGEL. I ask unanimous consent that all gentlemen who have spoken or who may speak here to-day may extend their remarks in the RECORD.

The CHAIRMAN. That is a request that can not be acted upon in Committee of the Whole. The committee can grant leave to one Member, but no general leave.

Mr. SIEGEL. I ask unanimous consent that I may extend my own remarks.

The CHAIRMAN. The gentleman from New York asks unanimous consent that he may extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. ASWELL. Mr. Chairman, may I ask how much time I have remaining?

The CHAIRMAN. The gentleman from Louisiana has 20 minutes.

Mr. ASWELL. May I yield five minutes of that time now to the gentleman from Texas [Mr. HARDY]?

Mr. BARBOUR. We have used only about 20 minutes on this side, and if the gentleman from Louisiana has no objection I would like to yield five minutes at this time to the gentleman from Oregon [Mr. MCARTHUR].

Mr. MCARTHUR. Mr. Chairman, I am against any and all proposals to add to the membership of this House. Our present membership of 435 is, in my judgment, altogether too large for real deliberative work, and even the most casual observer must admit that this body is unwieldly and that much of its business is transacted amid scenes of disorder and confusion. The pending measure proposes to add 48 Members, and if it should become a law the orderly transaction of legislative business will be beset with even more difficulties than at present.

Another point which we should consider in connection with this legislation is the constantly growing tendency to shirk individual responsibility and to centralize power in the hands of a few leaders. The larger the lawmaking body the less the individual Member feels his responsibility and the more he is tempted to pass it along to the leaders. By adding 48 Members to the already large and unwieldly House we will simply take another step in the direction of centralized authority and removal of representative government from contact with the people.

Mr. ASWELL. Will the gentleman yield?

Mr. MCARTHUR. I regret that I can not.

Mr. ASWELL. Does the gentleman lose any Members from his State?

Mr. MCARTHUR. The question of economy should also be given consideration before we vote on this bill. The present Congress is now in the process of restoring many departments of the Government to a prewar basis, and by limiting appropriations to the various departments will force them to drop thousands of clerks and other employees from the rolls at the beginning of the next fiscal year. Most of these clerks and employees draw comparatively small salaries. The country applauds the action of Congress in thus reducing expenditures, but what will the country say if Congress, after discharging these thousands of low-salaried clerks, proceeds to cast economy to the four winds by creating 48 offices that pay $7,500 per year?

The salaries, mileage, clerk hire, and stationery accounts of 48 additional Members would cost the Government over $500,000 annually, and, in addition to these charges, there would be printing, franking, and other incidentals, and the increased cost to the people of the States in the matter of conducting elections. It is safe to assume that this proposed increase of 48 Members would cost the American people more than $1,000,000 annually, not to mention the cost of providing an additional office building or annex. With our country struggling under its great war debt, Congress should hesitate about incurring additional financial obligations except in matters of absolute necessity, and no such necessity exists in this instance.

I have heard the partisan argument that the pending bill, should it become a law, will automatically give the Republican Party a gain of 19 votes in the Electoral College, and that, therefore, all good Republicans should support the measure. I do not concur in this argument, because it is not sound in principle. We are here to legislate in the interests of the whole of the American people, and the question of the people's representation in one of the branches of their National Congress should not be settled in any spirit of partisanship. [Applause.] Political parties may come and go, but those which place their own selfish partisanship above the general welfare of the American people are the ones whose existence is usually of brief duration.

The pending bill proposed to increase the membership of this House from 435 to 483 Members in order that no State will lose in the reapportionment under the 1920 census. This is the crux of the matter, and it is useless for gentlemen to deny it. The States of Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Mississippi, Nebraska, Rhode Island, and Vermont will each lose one seat and Missouri two unless the membership of the House is increased, and some of the Representatives from these States in the Sixty-seventh Congress will automatically be legislated out of office at the end of their terms. This will undoubtedly deprive the country of the services of a number of excellent legislators, but other States will gain in their representation, even though the total House membership remain at 435. I dislike to vote for any plan that will, in effect, legislate out of office men with whom I have been privileged to serve in this body, but I can not vote to increase the size of the House merely to save their seats. Furthermore, I can not subscribe to the theory advanced in this bill; that is, that the basis of congressional reapportionment is to be made upon the population of the States that have shown the least growth since the last census. Such a theory is not in the line of progressive government or sound business principles.

It has been argued that my own State of Oregon will gain one Member if the pending bill becomes a law. This argument is a shallow one, for Oregon would not profit at all by gaining one Member in a total gain of 48. Oregon and other far western States will grow more rapidly than other sections of the country in the years to come and will gain in their representation, but these gains will be of no value to them unless there are corresponding losses in representation from those States whose growth in population fails to keep pace with the general growth of the country.

At the proper time a member of the Census Committee will offer a substitute which will propose reapportionment upon the basis of 242,415 population or a major fraction thereof—an increase of 30,538 over the present ratio. By the terms of this substitute, the membership of the House will remain at 435, and the States which I have indicated will lose a total of 12 Members, but there will necessarily be a gain of 12, which will be distributed as follows: California, 3; Michigan, 2; Ohio, 2; Connecticut, New Jersey, North Carolina, Texas, and Washington, 1 each. I feel that the best interests of the country demand the adoption and passage of this substitute and shall accordingly support it. [Applause.]

Mr. ASWELL. I now yield five minutes to the gentleman from Texas [Mr. HARDY].

Mr. HARDY of Texas. Mr. Chairman, it seems to me that most of this argument has consisted of "chewing the rag" over infinitesimal considerations.

The first argument is that the House will be unwieldy if we add 48 Members. I heard that same argument 10 years ago. I was in the House before we increased the number from 395 to 435. It was just as unwieldly then as it is now, no more and no less. No visitor in the gallery could possibly see any difference in the method of procedure or the dispatch of business. I might add that the House is smaller in number than any other legislative body in the world in proportion to the population and wealth they legislate for. Every State in the Union has a larger legislative body proportionately.

The second argument, which I say is an infinitesimal matter, is the question of expense. If you place the cost of each Member at $12,000 and his constituency is composed of 220,000 persons, that is 5½ cents apiece for each constituent.

If you take the same cost per Member, and let there be 435 Members, then there will be 243,000 persons for each Member, and the cost will be 5 cents apiece, so that there is a difference between 5 cents and 5½ cents in the cost per citizen between the apportionment proposed by the bill and an apportionment which would give us only the number of Members we now have.

Mr. MASON. It would cost our constituents half a cent more? I do not believe they would kick.

Mr. HARDY of Texas. Those are the only arguments against the proposed bill with the exception of the argument made by the gentleman from Virginia [Mr. MONTAGUE], which came so near being profound that it only failed a little. That was that the fewer members you have in a legislative body the greater freedom from—I do not know exactly just what the argument was, but the fewer the legislators the better their work was the argument. On the contrary, I want to state this, that with the increasing activities of this Government it becomes more and more necessary that a Member of Congress should spend his days and hours here in order to discharge his duties, and one of two things would happen.

To fairly perform the duties of a Member of Congress you must have more of them in proportion to our people or you must increase the clerical hire. We have increased the clerical hire and still we can not do the work. Is it better to have fewer Members of Congress with a greater number of secretaries, thereby adding to the Members' dignity and importance,

or do you want to get nearer the people and have enough elected Members of Congress to discharge all the congressional functions and duties of a Member of this body?

There is another philosophical reason that I wish you to bear in mind. In the cloakroom a moment ago a gentleman said to me that some of the counties of his district wanted to get away from a certain big county to which they were tied in a senatorial district, because they could not have any voice, because they were overpowered by this big county. When you make large congressional districts, minorities are submerged by the vast majority, and the minority is not heard or represented. The wider you spread your representation the more fully the minority representation is protected and the better opportunity for minorities to get a hearing in lawmaking. There is a philosophy in that. If you increase the population per Member to 500,000, you would have a large number of small interests unrepresented, because they would be swallowed up. As you increase the population of districts also you make it more expensive for a man to make the race for Congress and you make this Government more and more a Government of the rich rather than of the common man. Suppose you reach a position where you have 500,000 population to a Member. With the men and women both voting, and thereby doubling the old-time vote, with the campaign expenses under the present system of campaigning quadrupled as compared with campaign expenses a few years ago, what poor man can run? It costs me all I want to spend to make the race if I have opposition in my district to-day. It is immaterial to the man who is able to throw away money, who has a big barrel. I would not think of making the race for Senator in any State of the Union, because of not only the labor entailed but of the expense, which is prohibitive. It is going to be that way in congressional races if you continue to increase the size of the congressional districts, and we have increased it every time. The number of the people in each congressional district is greater under the last apportionment than in the one preceding it. It will be greater under this, with the large number—that is with 483 Members—than it was under the last. So that these infinitesimal considerations and the expense and the unwieldiness of Congress is the argument against it, while the desire to represent the people, and particularly the minorities, is the argument in favor of a larger number. Are we democratic or are we autocratic? Will we gradually close the door of opportunity politically to the man of moderate or small means?

The CHAIRMAN. The time of the gentleman from Texas has expired.

By unanimous consent Mr. HARDY of Texas was granted leave to extend and revise his remarks in the RECORD.

Mr. LARSEN. Mr. Chairman, I yield five minutes to the gentleman from Mississippi [Mr. SISSON].

Mr. SISSON. Mr. Chairman, I happen to come from a State that under the present representation in this House will lose a Member. Every selfish impulse of my heart would prompt me to vote to increase the membership, so that my State would not be redistricted, but it was the consideration of individual Members 10 years ago that caused us to increase the membership of this House from 391 to 435. I have heard a good deal about philosophy. These gentlemen have certainly not studied the philosophers' opinions about this, or they would not have invited us to that field for investigation. The great Aristotle said that in great populations a democracy pure and simple could not exist, and that the tendency in republics was such that unless it was greatly curbed they would fail, because the representative bodies would be too great to really function.

No man familiar with city government but knows that the boss is greater in a mighty city than he is in a small city, and there is no such thing as a boss in a village. In this House of Representatives I want to say that the greater you make the membership the more complete you are going to have boss rule. Then they may talk about it as much as they please, but in the great conventions of this country a few men get together and form the platforms and control the conventions, and they could not do it if the convention were made up of a smaller number.

Aside from the question of policy, the question of expense ought not to be lost sight of. When will you find the hour at which some States will not come before this Congress every 10 years and insist that the membership ought to be increased in order to take care of "me" or to take care of "my district"? And as such I would like to have the House remain so that my State will not be redistricted—because no man knows where he is going to land when the legislature redistricts a State—yet I have endeavored to eliminate my own interest and my own political future, because that is a question which is utterly immaterial with the future of this great Republic. It is of great consequence, however, when you get the membership of this House to that point where a Member is so small a division that, there being only a certain number of hours in a day, there can then be given only a few moments to the consideration of a question if a reasonable proportion of the Members are to be heard; and it is quite true that to a large extent, except in the committee rooms and on rare occasions when some great question is debated for days and days, this House has ceased to be a deliberative body.

A man would be a foolish man who would imagine that a new bill which comes from one of these committees, that has spent weeks and weeks in framing it, will be considered in a deliberative way by the House in one or two days, with no general debate under the five-minute rule, or under a motion to suspend the rules, when it can be discussed for not more than 40 minutes.

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. SISSON. Therefore, Mr. Chairman, I am willing to sacrifice my own individual political future for what I believe to be the good of the country. [Applause.]

Mr. LARSEN. Mr. Chairman, I yield five minutes to the gentleman from Mississippi [Mr. HUMPHREYS].

Mr. HUMPHREYS. Mr. Chairman, as I view this question it is simply a choice between a House of 435 Members and a House of 483 Members. The judgment of the House is to be taken as to which is the most efficient legislative body. My own opinion is that it would be much more efficient if it were to consist of only 300. Some gentlemen insist that the rural districts would suffer if we retained the House at the present membership of 435. There is nothing in that. Under the last census it was shown that 51 per cent of the population live in towns of 2,500 population and more. If every man who lives in a town votes for a town man and every man who lives in the country votes for a country man, then in the next Congress there will be 51 per cent who represent the towns; but no one thinks any such lines will be drawn. The representation of the cities will be increased whether we have 435 or 483, and Congress could not prevent it if we so desired. The Constitution apportions Representatives among the several States according to population, and the cities have increased in population more rapidly than the rural districts.

No State is losing. The State of New York, having 10 per cent of the population, would have 10 per cent of the Representatives. If the number of Representatives were 300, the State of New York would have 30; if 500 she would have 50; and so with the State of Mississippi, it will not lost its relative strength, although this bill will reduce the number of Representatives to seven. I can remember when the State of Maine with its four Members was the most influential State in this body. Of those four one was Speaker, one was chairman of the Ways and Means Committee, one was chairman of the Committee on Naval Affairs, and the other chairman of the great Committee on Public Buildings and Grounds, and so it happened that the State of Maine, with only four Representatives, had more influence in this House than had the State of New York with all of its Members. One gentleman refers to the fact that Spain has four hundred and odd legislators for her 19,000,000 people. I dare say we have 6,000, maybe 7,000, legislators in the United States. We here are simply to legislate touching Federal affairs. The legislative body of Spain represents the entire body——

Mr. ASWELL. Will the gentleman yield?

Mr. HUMPHREYS. I can not yield. So it is with England. We have 48 legislatures throughout the country. They have small constituencies and they are to legislate in those matters touching solely the local interests. There is no advance in politics, no partisan advantage whatever the number of representatives is fixed at. Some gentlemen say that the Southern States would lose. The Southern States will get their exact proportion according to the population, whether the total be 483 or 435. That is determined by the Constitution and not by the Congress. Congress can not reduce the representation of any State below its proper proportion. If the State of Mississippi has 7 Members or 10 Members or 5 Members or 15 Members it has its relative percentage, 2 per cent of the Representatives here will be from the State of Mississippi. If the total is 100 Mississippi would have 2, if 200, 4, and so forth.

The sole question is, Will the creation of 48 additional seats in this House make for efficiency here in the conduct of the people's business? I do not think so. I believe the membership here is too large now. I believe a smaller House, say 300, apportioned among the States according to population, would be a more efficient body than the present House, and no State would loose

UMI

one iota in its relative strength. Believing this, I shall vote for the minority substitute.

Mr. FAIRFIELD. Mr. Chairman, I yield five minutes to the gentleman from Illinois [Mr. McKENZIE]. [Applause.]

Mr. McKENZIE. Mr. Chairman and gentlemen of the committee, in all forms of organized government there must of necessity be an office-holding class. Our forefathers recognized that and the framers of the Constitution provided that in our legislative branch there should be a Senate and a House of Representatives. They wisely, in my judgment, fixed the number of Senators at two from each State regardless of the size of the State. They also provided that in the First Congress there should be a certain number of Representatives from each of the States, and that thereafter the Congress should fix the number of Representatives from each of the States based on the census to be taken every 10 years. Now, gentlemen, this is a practical proposition. There may be some sentiment wrapped up in it. It may be that we have a little sentiment for some of the older States of the Union that once had a greater population and may have a greater representation now than they will have in the future. Their population has moved westward as the country has expanded, thereby diminishing their representation if this bill is defeated, but after all it comes right down to one proposition—efficiency. How many Members are necessary in the House of Representatives appropriately to represent the people in its legislative branch of the Government? It simply means that we should have a sufficient number from the different sections of the country properly to represent the various interests of our people and to deliberate upon them in this body and to enact into legislation such measures as will be for the benefit of the entire people. In my judgment, we should have a sufficient number to make up the various committees and to deliberate on the various measures that come before the Congress, and that is all we need in the House of Representatives. It is not a question of State pride, it is not a question of section. It is a question of business efficiency in matters of legislation. How many men are necessary properly to legislate for the people of this country? I am one of those who believe that 435 Members are plenty. [Applause.] In days gone by when we did not have the telegraph and telephone and railroads and all the means of communication that we have at the present time there was an argument for smaller constituencies and a greater number of Representatives than exists to-day in proportion to the population. To-day we know that not one single man needs to be added to this body to enable us to legislate efficiently. Did not the Congress prior to the last apportionment get along very well with the legislation with three hundred and ninety and some odd Members? They certainly did; there is no question about that. Now, then, if there is a man in this Chamber who seriously and honestly can get up before this body and urge that it is necessary to increase this body in order to do the business of the country speedily and efficiently, I will be glad to hear him——

Mr. ASWELL. I will.

Mr. McKENZIE. In my judgment, the addition of 48 or any other number to the membership of the House would be adding a needless burden to the now heavily taxed people of the country. Not a single argument has been made pointing out wherein the interests of the people have suffered on account of the present membership of the House. Personally I think 435 now constituting the House membership too large a number. I feel that business could be expedited and greater deliberation given to important matters of legislation with a smaller membership. To propose to increase the number on the ground that Congress would be more efficient is unsound and falls to the ground; then, why do it? Why add another million to the expenses of government? Is it justifiable from any standpoint, and especially at this time, when we are striving to cut down expenses by cutting off from the pay roll large numbers of low-salaried clerks, to take the inconsistent position of adding 48 new Members of Congress to the now too large representation? To do this, in my judgment, would justly bring down upon us the merited condemnation of the people we claim to represent. I have always viewed the ever-increasing number of the office-holding class as a menace to our institutions, and if persisted in will eventually result in our overthrow as a Government. I realize the tendency along this line is natural; all Governments have had the same experience; but I would feel derelict in my duty if I did not protest against this proposed useless addition to the class of office-holders whose salaries must be paid by the people. At least let us be consistent at this time when the burdens of the people are so great.

The CHAIRMAN. The time of the gentleman has expired.

Mr. McKENZIE. I ask leave to revise and extend my remarks.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. ASWELL. Mr. Chairman, I now yield 10 minutes to the gentleman from Missouri [Mr. CLARK]. [Applause.]

Mr. CLARK of Missouri. Mr. Chairman and gentlemen, all over Missouri there are old Union soldiers whose chief boast is that they "fought mit Siegel." And to-day I am going to "fight mit SIEGEL" myself. [Laughter and applause.] I propose to clear up two or three not exactly misstatements but something approximating it which have been made here. When the number of Members was cut down in 1843 John Quincy Adams wrote into his diary how he felt about increasing the number, and he said that he lay awake several nights studying some way to prevent increasing the number of Members in the House; that whenever we increased the number of Members it diminished the influence of New England. That was his reason.

Now, Gov. MONTAGUE, for whom I have great respect, based his argument on the fact that in the early days a small number of votes elected a Congressman, and so forth. I will tell you about that. In the early day there were not a half dozen public men in the United States that believed in the common people. Barring Thomas Jefferson and old Sam Adams and Benjamin Franklin, there was scarcely one of them that did not have an idea that this Government ought to be founded on something like a landed aristocracy. That accounts for the legislatures electing United States Senators and for presidential electors electing our Presidents. That is thoroughly demonstrated by the fact that until the Virginia constitutional convention of 1830 a man could not vote at all in Virginia unless he was a freeholder. It had this effect: He had to have so much land. Men were so anxious to get the vote that they gave in more land to the assessor than they had, and finally to such an extent did that habit grow that there was nearly twice as much land assessed and paid taxes on in the State of Virginia than there was land in the State itself. Human nature has not changed a particle in the lapse of years, and each fellow fights for himself or fights for his own people.

Now, under the last census we increased the number by 44 Members in the House, and the great agricultural States, in the very heart of the corn belt, of Indiana, Kentucky, Tennessee, Arkansas, Missouri, Iowa, and Nebraska never gained enough population to get one of the 44 Members. I will tell you where they went. They went to the seaboard and to the Gulf coast and to the Great Lakes coast and where these enormous mushroom cities have grown up.

We want to hold our own if we can. I will vote for a constitutional amendment to fix the number at 500, or 400, or 300. Then you will get rid of this stupid debate every 10 years, because it is a dreary performance. I have no doubt in the world that the same arguments were used at the time of the first apportionment that are used to-day, and have been repeated every 10 years, and every 10 years we have these squabbles about Members.

Now, somebody made the statement, I think it is, that it was 26 that the Republican States gained and 11 that the Democratic States gained, but that was based on the election of last year, which was no criterion for anything. [Laughter.] The Democrats are just as certain to increase their membership in the next House as the sun is to rise to-morrow. [Applause on the Democratic side.] And I would not be at all surprised if we threw the Republicans out of the majority and took it over again ourselves.

As to the cost, it amounts to nothing. As a rule, I am in favor of economy. They say it costs a million dollars. Somebody ciphered it out here that it would cost $5,000,000 for a rooming house over here for extra Congressmen. That would give the 44 new Congressmen about 15 or 20 rooms apiece. They can enlarge the one they have. The truth is, if they had devoted a few dollars more to the property when they built that house over there they could have built each Member a 10-room residence in this town, and a good one, too. And there would have been sense in that. There is no use for the building over there. I was opposed to it when "Uncle JOE" proposed it. I think that he intended it as a monument to himself, and I congratulate him on that. But when they got the walls up, before they cut it into rooms, I got me up a resolution to turn it over to the Department of Commerce and Labor. You have heard of trying a thing on the dog. I thought that I would try that experiment. I went out into the cloakroom when it was pretty full and I read that resolution to them, and I made up my mind that I would be lucky if I got out of there alive. [Laughter.] So I withdrew my opposition to it.

Speaker Reed said that the House had ceased to be a deliberative body. If that was true it had ceased years and years before, and he did as much as any man that ever lived to convert it from a deliberative body into what it is now. And inasmuch as we deliberately transferred all the powers of the House to a committee of 35 select persons here the other day, unless that scheme is "busted," why we might as well have 483 Members as to have 290. But I will make you one prediction before I sit down. That thing is going to be done for. [Applause on the Democratic side.] The 35 men on that committee will control the deliberations of this House if it is not "busted," and the people do not want to be controlled by 35 Members. We are drifting more and more into a rule of the committees, anyway. In the first several Congresses they did not have any standing committees and they appointed a special committee for every bill of any importance that came up. I am in favor of raising this number of Members to 483 not because I have any interest in it—I am through with it—but because this flow of people to the great cities is going to come back. The agricultural States proper will increase in population in the next 10 years as compared with these great cities. They can not support them there. The agricultural population is dwindling so in every State of the Union that it is going to be impossible for the farmers to raise enough to feed these fellows in the city, and as soon as they get hungry, good and plenty, they will go back to the farm, where they ought to have stayed all the time. That is the place for a man to live, anyhow.

Mr. BLANTON. Will the distinguished Speaker yield?

Mr. CLARK of Missouri. Yes.

Mr. BLANTON. Did not the Speaker state on the floor once that he would be willing to vote to reduce the membership to 300?

Mr. CLARK of Missouri. I said I would vote for a constitutional amendment to reduce it to 300 Members, and I would like to do it to-morrow. If I were going to pick the number for the constitutional amendment I would pick about 400, no more and no less, and everybody would get used to it, and they would understand as quick as the census was taken how many Congressmen they had. Now it is a universal scramble, each side trying to get more than it is entitled to. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. JOHNSON of Mississippi. Mr. Chairman and gentlemen, I can not allow this opportunity to pass without entering my protest against the efforts to reduce the representation of my State in this House. An effort has been made every 10 years since this Government was established to decrease rather than increase representation in this popular branch of government.

The bill before the House—that is, the Siegel bill—proposes to apportion the representation among the several States so as to give Mississippi the same representation—that is, eight—she has had for a number of years.

I am going to vote for that bill.

The Barbour amendment, now pending, proposes to reduce Mississippi's representation to seven Members. This apportionment is based upon the census taken in 1920. In preparing the figures from which this apportionment bill was written it now appears, according to a letter from Prof. Huntington, of the Harvard Engineering School, that there is grave doubt of the correctness of the figures, and in his letter addressed to the chairman of the Census Committee he asks permission to come before the committee and point out the errors.

A great injustice will be done my State if the proposed amendment is adopted. A great wrong will be done my State if she is reduced to seven Members, based upon an erroneous apportionment.

What harm could come of delaying this matter for a few days until it could be thoroughly investigated? It is the duty of this House to proceed to an apportionment of its Representatives in a legal and orderly way.

It is a well-known fact that on account of the high prices prevailing in industrial centers that the Census Bureau was unable at the time the census was taken to employ expert help in taking the census because the Government did not pay sufficient salaries to the census enumerators.

It is a well-known fact that there are in my State many people who were never enumerated in the last census, and I charge upon the floor of this House that Mississippi has not lost in population sufficient to justify a reduction of her representation.

Thousands of her citizens were temporarily employed in other sections of the country, and they were not enumerated. Thousands of her citizens, mostly colored, were temporarily removed to Chicago and other places before the recent election, to be used politically. They have been used and are now returning to their homes, poorer but wiser. These people should have been enumerated as citizens of Mississippi.

When the fathers of this Government decreed that 30,000 people should be a sufficient number to be represented by one Congressman they evidently intended the House of Representatives should be the popular branch of the Government and should remain close to the people.

Washington said when the first apportionment bill was passed that 30,000, and not 40,000, should be the ratio of representation. He said that if it was to be a representative body that the representation should be such as to keep the Representative in close touch with his people; that he should know and understand their needs; that he should come in personal contact with his people as much as possible.

There has never been a successful effort to reduce the representation of this House, save in 1842, when the Senate was dominated by influences favorable, as it was charged at that time, to big interests. It was charged at that time that the Senate was not in sympathy with the masses of the country; and even in 1842 the House of Representatives was not favorable to reducing its representation, but after contending with the Senate for considerable time the House finally acceded to the Senate amendment which reduced the representation of the House.

And even then such a leader as Jacob Thompson, of Mississippi, protested against the reduction and urged that the House of Representatives be kept as was intended by the fathers of this Government—a representative body. Thompson said that as the great country progressed and the population increased, so should the representation in the House increase.

The United States Congress has 435 Representatives and 96 Senators. There is no other Government in the world with such small representation. The 435 Members in the lower House of the United States Congress represent 107,000,000 people.

In Great Britain, 707 members of the lower house represent 45,516,259 people; in Belgium, 189 lower-house members represent 7,555,576 people; in France, 626 represent 41,475,523; in Germany, 423 represent 55,086,000; in Norway, 126 represent 2,391,782; and in Italy, 508 members of the lower house represent more than 36,000,000 people.

It is said by some gentlemen that the country is making no demand for an increase, and it has been stated on the floor of the House that the people have not been writing their Congressmen not to reduce the representation.

In answer to that argument I will say that the people whom I represent trust me to vote for their interests without having to write me every time as to how I should vote.

The masses have not the time to look after their Congressmen, but the great industrial interests of the country are so well organized that they can always exert influences in their behalf, and it is to their interest to reduce the number of Representatives of the people as much as possible.

Let me say to you that there is now what is known as the "steering committee" of the Republican Party, composed of seven millionaires, most of whom reside east of the Mississippi and north of the Ohio Rivers; that they dictate the legislation of this Congress.

While the Census Committee reported the Siegel bill favorably, and it was generally understood in the House that the bill would pass, thereby saving Mississippi her representation, yet on January 16 this same "steering committee" got together and decreed that the membership of this House should be 435, and as it is a waste of time to argue against them we might as well "stand aside and let the steam roller pass."

The census of 1920 shows 51 per cent of the population in the cities. It is shown that the average farm laborer is 40 years of age. The drift of the people is toward the cities and from the farms. The increase of representation is for the cities and against the agricultural districts. Unless something is done to stop the people from moving to the cities the population will so decrease in the rural districts as to almost deprive them of representation in the House.

This is the greatest Nation in the world, and the richest. It has made greater progress than any other nation on earth, due to the fact that it is a "government of the people, for the people, and by the people."

It has been said that to increase the number of the House would make it unwieldy. That argument has been advanced in every single instance when the apportionment bill was being considered by this House.

The Senate of the United States, having only 96 Members, requires more time and is more unwieldy than the House of Representatives. Do you not recall the number of months spent by the Senate in making long and useless arguments in considering the peace treaty? There are many other instances, which I can not undertake to recite on account of the lack of

time, to show that the smaller the number the more unwieldy and the more easily influenced.

The tendency now is toward centralization of authority. No wonder the people are crying out for an initiative and referendum. Unless this tendency toward centralization is checked, this Government can not endure.

It is argued that the membership of the House should not be increased on account of economy. I do not see how Members who in this House of Representatives recently voted to take away from the Treasury of the United States $634,000,000 and give it to the railways of this country, guaranteeing them 6 per cent dividends on their earnings, and that, too, when it was a well-known fact that much of the stock of the railroad companies was watered, can stand up here and talk about saving money for the people.

I do not see how Members can cry "economy" when it comes to the people's representation when these same Members have voted hundreds of millions of dollars for irrigation projects, many of which projects have wasted millions of dollars.

I don't see how you people who voted for an Army of 280,000 men and 17,000 officers, thereby placing upon the people an unjust and cruel burden, can stand up here and talk about economy: These officers sit around in their swivel chairs, "all dressed up and nowhere to go." There are thousands of them around Washington who do nothing but stand around, stepping on each other's toes, and getting in everybody's way.

The people are tired of such extravagance, and have so indicated. It would be a very easy matter for this Congress to reduce the Army to 125,000, and then have more than we have use for. Reduce the officers to 5,000 and we will have plenty. Then these economists could consistently argue economy.

It is idle to argue economy in this matter, when for each State to retain its representation the new Members would receive but a small sum compared to the millions that would be lost to the people without this representation.

This Congress has a majority of Republicans in both the House and the Senate, and can do whatever they wish.

I know the big interests of the country do not want a large House. It is better for them that the House be as small as possible, but we are here to voice the sentiment of our people, and they are against losing their representation in this House.

When the first apportionment was made there were 200,000 people in the United States. They then had 65 Representatives. Now we have in the United States 107,000,000 people and only 435 Members. There are to-day at least a thousand demands made upon a Congressman where there was one demand 75 years ago.

It is dangerous to the people to allow their Representative to be out of touch with them. The makers of the Constitution intended when they said the Congressman should be elected every two years that he should visit his district, know his people, know their needs and wants, and be in reality their representative.

And as it is to-day, Congress being in session nearly all the time, it is impossible for the Congressman now to get over his district every two years, and you, by this amendment, propose to make his district even larger, thereby taking him away from his people.

The people, whose trustees we are, demand that they be given equal representation in this House. In my district there are more than 250,000 people. The other districts of Mississippi are large. If you pass the amendment of this bill you will violate the letter and the spirit of the law.

Is Mississippi to be denied her representation under the Constitution because of the whims and notions of some alleged progressive Congressmen, who do not seem to favor representative government but who are swept off their feet by the strong drift of reactionary forces toward centralization of authority?

I deny that the population of my State has decreased. The census is inaccurate, due largely to the Census Bureau being unable to employ such help as was necessary in enumerating the citizens because the Government would not pay the salaries demanded by expert help.

If you reduce Mississippi's representation for the reasons advanced here by some gentlemen you violate the Constitution and put your seal of disapproval on representative government.

Mr. ASWELL. Mr. Chairman, I yield my remaining five minutes to the gentleman from Mississippi [Mr. QUIN]. [Applause.]

Mr. QUIN. Mr. Chairman, I am sorry that my colleagues from Mississippi are divided on this question. I can not agree with those gentlemen who seek to keep down the representation in proportion to population according to the present system. I am for the 483 Congressmen to represent the increased population of the United States. It seems to me that the few who want to control, as one of my distinguished colleagues from Mississippi stated, would vote for 300, as he believed that a few men could do better than many.

That has been the case in all ages. That is what every tyrant in the world always thought. That is what the great interests of the United States think to-day. That is what every standpatter in this Congress is going to express by his vote. That is what was meant, as the distinguished gentleman from Missouri said, by the statement that those who believed that a few should control the land are in favor of introducing a landlord system in legislation, wielding the same power as the special interests. Whatever class it might be that would want to dominate the legislative bodies of this Nation could do it more efficiently and better with a few than they could by having numbers of Congressmen according to the quota of population now allotted to each Representative to represent personally great masses of people, with whom they would be in direct touch.

If you are going to allow one Congressman to represent 500,000 men, women, and children, he will become far removed from many of them, and it would be hard for the people, if they are so many to each district, to put an unfaithful servant out of power. For that reason the man who wants to stay here, whether he is in touch with the people or not, would in my judgment be better fixed if he had a large constituency, some of whom would never see him, some of whom might never hear from him. But, according to my conception of the fundamental principles of this Government, the people should be represented by having Congressmen according to the quota of population set forth for each district in existing law. I will not vote to reduce the representation of Mississippi, nor any other State. I appreciate the Siegel bill and I am for it. [Applause.]

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. FAIRFIELD. Mr. Chairman, I yield five minutes to the gentleman from Wisconsin [Mr. ESCH]. [Applause; all the Members rising.]

The CHAIRMAN. The gentleman from Wisconsin is recognized.

Mr. ESCH. Mr. Chairman, as I shall not be in the next House, my views upon this bill may be considered as disinterested. In voting against this measure I pursue a consistent course. In the apportionment act of 1903 I voted against the increase of 34 Members. In the apportionment act of 1911 I voted for a proposition which, if enacted, would have reduced the membership of my State by one. I shall vote against this measure.

It seems that in every controversy on an apportionment bill the main argument is we must raise the membership so that no State shall lose a Member. It was on this theory that Mr. Littlefield, of Maine, led the great fight in 1903. It was on this theory that Judge Houston, of Tennessee, led the fight in 1911. It is the same theory that is being urged to-day, fixing the apportionment so that no one State shall lose a Member.

Since 1903, gentlemen, if this bill becomes a law, we shall have increased the membership of this House by 126, which is practically 25 per cent of our membership. When shall these increases cease? You say, "Put it off to the Congress which shall make the next decennial apportionment." Why can not this Congress have the courage to fix the limitation and say, "There shall be no increase"? [Applause.] Fix the unit at 242,000 instead of 211,000, as now, with no increase in membership, and it would mean practically an increase of 30,000, which is the population of an average county. I can not believe that the increase of the population of a district by even 30,000 will increase the burdens of a Member so that he can not be efficient and be able to perform his duties in the House and to his constituents.

Gentlemen, do you realize that this bill increases the membership of this House by 24 in order to save 2 Members, 1 for the State of Maine and 1 for the State of Missouri? Do you realize that this bill increases the membership of this House by 31 in order to save 1 Member each for the States of Iowa, Kentucky, Maine, and Missouri?

Calculations that have been made indicate that if this bill is enacted it will mean that to enable two States to retain one Member each an expenditure of half a million dollars will be necessary. You can not go before the people and justify such action.

The great States of this Union have fixed the number of their State senators and members of their legislature. Those States have grown from 100 to 1,000 per cent in population, and yet the representation of those States in their legislatures has remained the same. No one will claim that these legislative bodies are not performing their legislative duties properly or efficiently. The State of Illinois has 55 State senators, each

representing 116,000 of population. The State of Pennsylvania has 50 State senators, each representing 180,000 of population. New York State has 50 State senators, each representing 216,000 population—more population than you or I are representing in this House.

I want to maintain the proper perspective. I do not want to belittle the Members of this House in prestige, influence, or power of making them represent a less number of people than a senator of a State. Gentlemen, the people of the States are not so much interested in the number of their Members as they are in the ability and the efficiency of their Members. I can remember when the little State of Maine, with her 4 Members, had more influence in administration and in legislation than the Empire State, with over 30 Members. [Applause.]

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. FAIRFIELD. Mr. Chairman, I yield five minutes to the gentleman from Connecticut [Mr. GLYNN].

Mr. GLYNN. Mr. Chairman, I notice one statement in the report of the majority the meaning of which I confess I do not quite understand. They say an increase to 483 Members would make a more representative body. My contention is that a House of 435 Members is precisely as representative as one of 483. On the 4th of next March we are going to have a new President in the White House. He will represent 105,000,000 people, but he will be just as representative and as truly representative as if the population were only 10,000,000.

Some things have been said about the danger of an aristocracy, about the tendency to aristocracy in a small legislative body, and the majority have given figures to show the size of the various leading legislative bodies of the world. I do not suppose any claim is made that those foreign legislative bodies are more democratic than we. Why, it has been stated on this floor that the legislative bodies in many of those countries are landed aristocracies; yet they represent fewer people in their various districts than we do. I think there are some things that perhaps we can learn from foreign countries. There are some things that we do not want to learn from them. If we must copy something from foreign countries, at least we ought to copy their virtues rather than their faults. I think a considerable number of people in the United States indicated last November that there were some things about Europe that they did not want to copy.

The States of this Union are pretty well represented. Under this plan of 483 Members, California will have thrust upon her 5 additional Representatives. Now, California is not asking for them. California does not want them. California does not need them. She is splendidly represented here to-day. Under that plan Michigan, New York, Ohio, and Pennsylvania will have four additional Members each. I do not think they want them. I think the people of those States feel that they are pretty well represented here to-day, every one of them.

Illinois and Texas will have three additional Representatives. They are not asking for them. Those States are splendidly represented to-day. And so it is generally with all of the States. Under the plan for 483 Members Massachusetts, New Jersey, and North Carolina get two additional Representatives; and Alabama, Arkansas, Connecticut, Georgia, Maryland, Minnesota, New Mexico, Oklahoma, Oregon, South Carolina, Tennessee, Virginia, Washington, West Virginia, and Wisconsin each get one additional.

Something has been said about the cost of having the States redistricted if the substitute which will be offered shall pass, keeping the House at 435. As a matter of fact the representation in more States will be changed under the 483 plan than under the 435, because under the plan fixing the House at 483, 25 States will gain Members, and under the plan of leaving the House at its present size only 19 States are affected. The other States of the Union will have the representation which they have to-day, so that there will be fewer States where a redistricting will be necessary. [Applause.]

The burden of proof for the necessity or desirability of this increase of 48 in the membership of the House of Representatives rests properly upon the shoulders of those who advocate such an increase. Up to this time, they have failed to advance any good argument for such a large increase and I shall vote for the amendment which will keep the membership of the House at 435.

Mr. SIEGEL. I yield five minutes to the gentleman from Vermont [Mr. GREENE].

Mr. GREENE of Vermont. Mr. Chairman and gentlemen, I hope that no ill-considered or tactless word of mine may even by inference put my grand old Commonwealth of Vermont in the attitude of pleading for a seat in Congress. I think I owe that much to the pride and the sensitive spirit of a self-respecting people. I think I owe that much to the memories and the traditions of a little old Commonwealth that, a long, long time ago, before the glorious West and most of the rest of our country were known to the white man, helped to make the Declaration of Independence a sublime fact and rocked the cradle of the Nation. [Applause.]

Now, true enough, "Westward the course of empire takes its way." Nobody is prouder of it, nobody rejoices more in it than my noble old Mother Vermont, who has sent so many of her sons and her daughters to help lay the cornerstone of the mighty civilization that now builds up the great West and the Pacific slope. She is proud of them and of the States they live in, and she does not ask anything here and now for sentiment or for pride.

I trust that with this suggestion I may invite your attention just for a moment to a phase of this question that is not reducible to mathematics, not at all reducible to calculus or to tables of logarithms. Figures have a bewitching faculty of dancing in front of our eyes here and proving something once in awhile, but often what they prove is quite an intangible thing altogether when compared with some other intangible things that, paradoxical as it may seem, are real, substantial facts. One of those facts is this:

With the inevitable drift of mankind toward city building, piling up these towers of Babel one beside another, and with the inevitable resultant "confusion of tongues," so in the same proportion comes the gradual diminishing of the steadying influence of the countryside upon the affairs and policies of this great "Government of the people, by the people, and for the people."

Now, of course, mathematically, no one will contend for a moment that a minority in the countryside should outvote a majority within the city walls. But you and I and other men who are thoughtful about these things and who represent great bodies of thoughtful men and women who study these things know that a popular government is not made a success merely by being based upon tables of mathematics. There is a moral influence somewhere that must be the manner and method of restraint and check and gradually compelling persuasion upon the ofttimes heedlessness of the multitude, or no popular government is safe. [Applause.] And it is to the countryside that this great popular Government of ours turns ever in its crises, to make sure that this sheet anchor in the sober second thought is safe. [Applause.]

There are many things of a practical nature in government that might be advanced to support this view that I have barely suggested to you, but it is hopeless to think of detailing them in the meager allowance of five minutes' time on this floor. We only ask that in considering these figures and this proposition to-day, the minority in the countryside shall not be made disproportionate in its representation in the council of the Nation. [Applause.]

Mr. FAIRFIELD. Mr. Chairman, I yield five minutes to the gentleman from Pennsylvania [Mr. MCFADDEN].

Mr. MCFADDEN. Mr. Chairman and gentlemen of the House, Pennsylvania is represented in this House by 36 Representatives. Under the plan proposed in the bill under consideration it would have a representation of 40. I am opposed to the measure because I do not believe the people of Pennsylvania are asking for an increase in its representation in the Halls of Congress. I believe the people of Pennsylvania are more interested in the ability and the work that the present representation put forward. I think it unwise that I should vote in favor of this measure. The people I have the honor to represent are not asking for additional representation, and while we are pondering over this question to-day we should consider somewhat the expense attached to the proposition. The people of this country are expecting economies in governmental administration. It has been said here that the increase in the expense is very slight. From what I can figure out it will be at least one million and a half dollars, and that is an annual payment and must be met every year. In addition to that there is at least the initial cost for office space and equipment, which should have our careful consideration.

Taking all these things into consideration, I feel that I must voice my opposition to an increase in the membership of this House.

I yield back the remainder of my time.

Mr. SIEGEL. Mr. Chairman, I yield five minutes to the gentleman from Kansas [Mr. LITTLE].

Mr. LITTLE. Mr. Chairman, every aspect of this proposed legislation has been pretty thoroughly discussed except the only one that is really important, and that is the result of this legislation upon the man at home. You have talked about your own

convenience and your own work and what the result would be here, but the question in my mind is how to give the best representation to the folks who send you here. The larger your constituency, the less you can do for each and for the general good, and the more you will feel compelled to trust to committees and to leaders. The concentration of power in the hands of a few is always a menace to free Government. Keep the districts small enough so that every Representative may keep in touch with all.

Here is a Government of 100,000,000 people, who are supposed to govern themselves. If everyone of them could take an active part in the Government we would have an ideal situation, but they can not get to town or the city hall, and so they send somebody to attend to their business. If you were one of them would you rather live in a district of 100,000 that had a Congressman or in a district of 1,000,000 people that had a Congressman? That is all there is of it. You know that a Congressman for a hundred thousand people can do for each of them better work than he would be able to do for each of a million whom he represented. A gentleman a moment ago said that 17 years ago he voted against an increase in the number then. If he had had his way, these people, 100,000,000 of them, would have only as many Representatives in Congress as they had when they had only 70,000,000. If the men who composed this body in the first Congress had had their way, along with the fellows who succeeded them, there would be only 65 Members of the House in this Congress. This idea can only spring from a lack of confidence in the people. Then why should they have confidence in you? That is the philosophy that we are up against.

This is a representative Government. You can not represent a million people, any one of you, and do them justice on this floor. I am in favor of a constitutional amendment that would assure to the people of this country that every 300,000 people in the country should always be represented on this floor. I would rather vote for 200,000. Gentlemen forget that they represent the people, that they do not come here to consider their own convenience and these little questions of time and petty economy. What is money or convenience here in comparison with 300,000 Americans and their interest in their lawmakers?

Why, you can turn your credentials over to your steering committees and go home and save money. They tell you that we take more time than a smaller body. There is a body over here composed of 98 men, and this body of 435 men work twice as fast as they do. There is nothing in that.

Mr. WINGO. Mr. Chairman, will the gentleman yield?

Mr. LITTLE. No; I have not the time. The administration does not represent any one. The administration enforces the laws that the representatives of the people make. The Senate is not a representative body. Delaware has as many representatives in the Senate as New York. It is a deliberative body. You, and you alone, represent the people who stay at home. If they are not represented here, nowhere can their voice be heard. Is there one of you who thinks he can talk so loud that he can tell what a million people are thinking about and serve them here? Three hundred thousand people at the outside is as large a number as any man can represent here and do good work for.

A few months ago in this Capitol I heard our next President address himself to the dangers of one-man power in a Republic. Do you gentlemen so fear the American people that you can not trust them to elect 48 more Representatives? There are those who ridicule them for electing you, and they are the very men who urge you to this refusal to give 100,000,000 people a few more Representatives than you gave 80,000,000 a few years ago, as your fathers have done for 130 years. I hear men inquire, Why add to the list of Representatives? Why, because nature has added millions to the number to be represented, of course. The query is absurd. You say, "When will it end?" It certainly should not end just now, when this largest Congress has shown the greatest degree of accomplishment and efficiency in legislation the country ever reached.

To refuse our mightier Nation equal representation with earlier generations will be acknowledgment that the Republic has reached its growth and is on the decline, an admission that our institutions are not adapted to a Republic of more than 100,000,000. Who are we to cry halt to the progress of this Republic and tell 500,000 Americans in each district that the voice of an American, which so long has boldly sounded the notes of freedom, shall still to a whisper in this Hall?

Those Congressmen who know the people best will serve the Nation best. Keep your feet on the ground, among those you really know at home, and America's statesmen can hold their heads high among the stars that shine from America's past to illuminate the future that we may walk safely down the paths the fathers made. Make it possible for every citizen to work together with his Congressman and for each Congressman to know the needs of the people he represents.

What are you doing now? You are making an effort to centralize power, to diminish the personal influence of each voter, to turn this Government over to the cities where ignorance, poverty, vice, and crime are staring you in the face. Do you wish to take their share in government away from American citizens out yonder in the country and in the small towns and make the compact districts in big cities the absolutely controlling factors. The drift of population to great commercial centers is not good for a Nation that began at Concord and Lexington. It is not best for America that her councils be dominated by semicivilized foreign colonies in Boston, New York, Chicago. Let us adhere to the methods of representation that have carried us so far and so well. [Applause.]

The CHAIRMAN. The time of the gentleman from Kansas has expired.

By unanimous consent, Mr. LITTLE was granted leave to extend and revise his remarks in the RECORD.

Mr. SIEGEL. Mr. Chairman, I yield one minute to the gentleman from Massachusetts [Mr. TINKHAM].

Mr. TINKHAM. Mr. Chairman, I desire to give notice to the House that to-morrow I shall offer the following amendment to the bill reapportioning Representatives among the several States of the Union:

Insert on page 3, between lines 17 and 18, after the words "Wyoming, 1," the following: "*Provided, however*, That should any State deny or abridge the right of any of the inhabitants thereof being 21 years of age and citizens of the United States to vote at any election named in the amendment to the Constitution, Article XIV, section 2, except for participation in rebellion or other crime, the number of Representatives apportioned to such State shall be reduced in the proportion which the number of such citizens shall have to the whole number of citizens 21 years of age in such State."

Mr. LARSEN. Mr. Chairman, I yield three minutes to the gentleman from Texas [Mr. JONES].

Mr. JONES of Texas. Mr. Chairman, the argument that has been made here by some of the Representatives to the effect that they would have more representation if you increased the membership reminds me of the heir who was one of eight children, and who thought that if they would divide the estate into 16 parts so that he would get two-sixteenths he would get more than if he got only one-eighth. If only the interest of Members were concerned it would be all right to increase the membership. But the interest of the people is, of course, the primary test. I think the way to solve this question is to reduce the whole membership to about 300 Members, so that all of the States will be reduced, and get the thing down to really a proper basis. I believe if the membership of the House were reduced to about 300 we would have a much more effective working body.

As it is to-day, there are about 60 committees of the House. Of those 60 committees about 20 committees do the work, and of those 20 committees about 5 or 6 do most of the work, so that new Members coming to the House, frequently, not being able to get on an important committee and finding that they can not take much part in the work of the House, frequently get to doing departmental duties and other incidental things, and cease to take much of an interest in the affairs of the House. Now, I believe if we had the membership reduced to about 300 men and could get about 20 committees, and break up the committees so that one committee would not have a great amount of work and another practically nothing to do, and could arrange the business of the House so that each of those 20 committees would have about the same amount of work to do, we would be able to have a much more efficient body. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. LARSEN. Mr. Chairman, I yield three minutes to the gentleman from Texas [Mr. SUMNERS]. [Applause.]

Mr. SUMNERS of Texas. Mr. Chairman, there is just one question before us, and that is whether or not, in the judgment of the membership of this House, the territory and the number of people who are now assigned to each Member is so large that the Member can not keep sufficiently advised as to the legislative will of his constituents to reflect that will in the House. That is all there is to it. If Members of Congress do not have constituencies so big that they can not keep advised in detail as to the legislative will of their people, then the House is big enough. I can take care of what I have now as well as I could if the number was cut down to allow for this proposed increase of Members. I do not want to loose one of my people. There is no practical need for it. I want to suggest to you, gentlemen, that to-day this body faces a more important proposition than, at first consideration, it may appear.

We have been reducing the departments, we have been economizing where others were directly concerned. We are under the crucial test now. Everybody knows the appeal to State pride and self-interest which comes to a man when he faces the proposition of reducing his State's membership. I do not face that test, but it seems to me that the very best friends I have in this House may be left out. For the sake of economy we are taking the jobs of department clerks away from them. But here now is the real test: What are we going to do about our own membership? If we increase the body of this House to-day, will it be solely and alone to serve the necessary legislative interests of the American people? Who has established the fact? What is the argument? I love my colleagues. I would go the limit to serve them with that which is mine. But my vote does not belong to me, it belongs to my country, and that which I am asked to give does not belong to me; it must be taken by taxation from my people. I have no right to save the job of some man whom I love at the expense of the taxpayers of the Nation. We can not afford to do it. [Applause.] As I see it, that is all there is to it. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. LARSEN. Mr. Chairman, I yield three minutes to the gentleman from Arkansas [Mr. CARAWAY].

Mr. CARAWAY. Mr. Chairman and gentlemen of the committee, all, I presume, that could be said for or against the measure has been said. Much that I wanted to say has been much better said. Permit me, however, to call your attention to this one fact: You are often more able to determine what the real reasons are that actuate men by what they leave unsaid rather than by what they say. Nearly every gentleman who has arisen to support the increase prefaced his remarks by saying that he had no personal interest in the matter. Now, when any man approaches you on a proposition feels himself compelled to explain the motives which actuate him he is moved by motives that he does not want you to know. [Laughter.] If he were absolutely on the surface he would have no reason to suspect you of thinking he was not. It is invariably true that whenever a man begins his approach to any proposition by saying, "I am not interested at all and am just honest and compelled to say this," why, if you have got anything valuable you had better lock it up. [Laughter.] Here is my distinguished friend from Tennessee [Mr. SIMS] shedding tears as nearly as he could shed, except at election time [laughter], and proclaiming the reason he wants the increase in membership is that all of you gentlemen who are to remain after he is gone are corporation tools, bought and owned, and therefore he wants this increase in order to get 48 honest men in this House. [Laughter.] Now, he said that or he did not say anything, but I am rather inclined, however, to think he could take either horn of the dilemma [laughter] and be within his argument. [Laughter.] My left-handed friend from Mississippi—no use to call his name; you all know him—reverses the gentleman from Tennessee [Mr. SIMS] when he says that unless you have more than 435 Members in this House that corporations would control it. My friend from Mississippi [Mr. QUIN] said the reason some people wanted big congressional districts was that if you had many constituents and you were crooked they would not find it out. [Laughter.] Why, bless your soul, a large membership in the House, according to SIMS, insures honest Members; a numerous constituency, according to QUIN, favors and protects the dishonest Congressman. Now, that is logic, coming, as it does, from two gentlemen both favoring the increase and both willing to besmirch the reputation of their fellow Members in order to put over this legislation, which fastens a fixed charge of more than $1,000,000 a year upon the taxpayers of this country and legislates a few men into office. Of course, both are actuated by patriotic motives, and both proclaim it. I thank God I have not that brand of patriotism.

Why should the House membership be increased? Is the present membership too small? Both questions are to be answered by a study of this body.

We all know that the present membership is so large that but few men can be heard on pending legislation, and we have for that reason the constantly growing tendency of Members remaining in their offices until the vote is to be had. Then they come into the Hall without knowing what the measure is upon which they are to vote and vote with little or no knowledge of the merits of the measure.

A larger membership will augment this evil.

Economy, intelligent legislation, and orderly transaction of business will be secured by the defeat of this increase.

I sincerely hope the bill for increasing the membership may be defeated.

Mr. FAIRFIELD. Mr. Chairman, I yield five minutes to the gentleman from New York [Mr. SNELL].

Mr. SNELL. Mr. Chairman, to my mind this is one of the most important propositions that has come before us this session. I have looked over the evidence before the committee, I have listened to the debate here to-day, and so far as I can learn there is no real evidence before us why we should increase the membership of this House at this time. [Applause.] The only possible excuse that has been given or can be given is personal individual friendship for various Members of this House who may be inconvenienced on account of the change or lack of change or increase in the membership.

Mr. LITTLE. Will the gentleman yield for a question?

Mr. SNELL. Not now. Gentlemen, you must take into consideration that this will not affect the next Congress, and those very individuals you are so sorry for now may not be candidates in two years from now. And furthermore, looking at this proposition from a different angle, we must take a broader and more comprehensive view of the whole proposition and legislate for the interest of all of the people all of the time, rather than for a few individual Congressmen who at present you are sorry for if they should happen to lose their districts.

The question has been brought up here that the people at home were demanding more representation. I deny that. I claim that people are not demanding more Congressmen, but that they are demanding better Congressmen. That is the proposition. No one is interested in increasing the size of the House, and there is not a man who has said on the floor that he even believed the efficiency would be increased by increasing the number of Members of the House. There are some potent arguments against it at this time. The first is the increased expense. It will certainly cost $1,000,000, and you will be placing that tax on the American people for all time. That is a thing that you ought to take into consideration. If we increase it, it will certainly not be decreased. Where are you going to take it if you increase it at this time? It means another building and it means an additional expense.

How many votes would this proposition get if you sent it to the people? It would not get a corporal's guard of a vote by the people of this country, and the Members know it. It would not do a single thing to increase the efficiency or in any way facilitate by the Members of Congress the public business, and if we can not do that there is certainly no reason in the world why we should add this additional expense. We are simply adding 50 extra jobs, with the hope that we will get one of them. That is the proposition, and every Member of this House knows it. And if it was not personal they would not bring this on the floor of the House or think for a minute of increasing the membership.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. LARSEN. Mr. Chairman, I yield three minutes to the gentleman from Texas [Mr. BLACK].

Mr. BLACK. Mr. Chairman, most of the reasons I have heard in this debate for the passage of the Siegel bill, or the defeat of the Barbour amendment, as the case may be, hinge upon the fact that in the one case the number of Representatives of a State will be increased or held at its present figure, and that in the other case it will be decreased. A good many of the gentlemen in the debate dwelt upon the fact that the decrease which would result to some States from the adoption of the Barbour amendment would fall upon the agricultural States. Now, it seems to me that these gentlemen in using that argument as a reason for the adoption of the Siegel bill prove too much. For instance, our esteemed colleagues from Mississippi complain that the Barbour amendment will reduce the State of Mississippi by one Representative. Well, now, let us see what the Siegel bill, which they advocate, says. It says that the State of New York shall have 47 Representatives and the State of Mississippi 8. The Barbour amendment proposes that the State of New York shall have 43 Members and the State of Mississippi 7. Therefore, in order for the agricultural State of Mississippi to gain one representative over what it would have under the Barbour amendment, the advocates of this measure would increase the Representatives from the State of New York by four. Now, it seems to me that if there is any valid argument in this contention that agricultural States will lose relatively by the adoption of the Barbour amendment, the situation would not be cured any by the Siegel bill. How would it help the situation any to give New York an increase of four to prevent Mississippi from losing one, or to give Pennsylvania an increase of four to keep Louisiana from losing one?

It seems to me that the advocates of such a proposition would find themselves coming back through the same door as they went out.

Now, as a matter of fact, my friends, it is erroneous to refer to hardly any one of our States as an industrial State and to

another as an agricultural State. Take the State of New York, for example.

Mr. BEE. Do you think that is true of Kansas?

Mr. BLACK. Just wait. I think I will answer the question by the examples I give. Let us take the State of New York, that has the largest center of population in the United States, and yet it ranks right up at the top in agricultural production. Let us take the great State of Illinois, that contains the second largest center of population in the United States, and yet I saw no longer than yesterday a statement from the Department of Agriculture showing by States the aggregate value of the agricultural products in the United States, and the State of Illinois stands third. It is next to the State of Iowa. Texas is first. If under the Barbour amendment New York has 43 Members and Mississippi 7, or Missouri 11, it is not because New York is given any greater proportional representation, but because it has that many more people. Therefore, because I believe the present membership of 435 is large enough, I shall vote for the Barbour amendment, to hold it to that figure.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. FAIRFIELD. Mr. Chairman, I yield five minutes to the gentleman from Indiana [Mr. WOOD].

The CHAIRMAN. The gentleman from Indiana is recognized for five minutes.

Mr. WOOD of Indiana. Mr. Chairman, if sentiment had been the rule in making the different apportionments since this Government began, we would have a very peculiar representative body here to-day, so far as representation is concerned. Until about 30 years ago, in fixing these 10-year apportionments, sentiment did not obtain and apportionments were made without regard to what States would gain or lose. If sentiment were to obtain, and had obtained all these years, the State of New Hampshire to-day would have 6 Representatives, and in order to keep up the proportion so that it would be possible to permit New Hampshire to retain 6 Representatives the State of New York would have over 100 and the State of Pennsylvania more than twice its present number.

It has been stated—and I think it is correct—that it is the personal equation that enters between Members here which prompts us to keep the units so composed as not to lose to any State any of its Representatives. It is far more personal with us than it is with the States we represent. The States of this country to-day are not asking—those who are entitled to an increase—that the increase be made in order that they may have additional representation. Some of the States, I know, are not asking that the ratio be increased in order that they may retain their present number of Representatives, and I am glad that I come from a State of this character. The Indiana Legislature, now in session, fully cognizant of the fact that if the membership is kept at 435 we are to lose a Representative, without division, in house and senate, unanimously have asked that this representation be not increased.

Mr. BENHAM. Mr. Chairman, will the gentleman yield?

Mr. WOOD of Indiana. Yes.

Mr. BENHAM. Was not that resolution put through after the papers of the city of Indianapolis had stated that either under the minority or majority report the representation of the State would not be changed?

Mr. WOOD of Indiana. It was not. The Indianapolis News and various other papers throughout the State since the time we had our caucus or conference here have published from time to time what would happen, and what the unit would have to be in order for us to retain our present representation. We would have to have a representation here of 452 in order that we might retain 13 Representatives from the State of Indiana, and, as has been stated here, the only excuse that has been offered for this increase to 483, or a net increase of 48 Members, is that no State would lose any of its present representation.

That is what actuated the membership of this body 10 years ago, and that is what actuated the membership of this body 20 years ago. Prior to that this rule did not obtain. And, gentlemen, I think that we should be big enough to forego this personal equation. There is no one upon that side that I would like personally to see go out by reason of this representation not being increased, and I would regret exceedingly to see that happen. There is no one upon this side that I would like to see go out because of our maintaining our present representation. But if we are to keep this thing up, what of the future of this body that is now too large for good business administration? Is it not time to be big enough and courageous enough to do our duty? [Applause.]

The CHAIRMAN. The time of the gentleman from Indiana has expired.

Mr. SIEGEL. Mr. Chairman, I yield five minutes to the gentleman from Maine [Mr. PETERS].

The CHAIRMAN. The gentleman from Maine is recognized for five minutes.

Mr. PETERS. Mr. Chairman and gentlemen, the Constitution requires an enumeration of the people of the United States to be made every 10 years, and it requires the Representatives to be apportioned in accordance with population as shown by the successive enumerations.

The only limitations as to number are that they shall not exceed 1 for each 30,000 of population, and that each State shall have at least 1; or, with our present population and number of States, the number of Representatives can not be more than 3,500 nor less than 48.

It is interesting and, I think, important to note that never once in the history of the country has the number been the same in any two apportionments. The smallest membership of the House was that of the First Congress, 65, and the largest the present Congress, 435. The House is, and was intended to be, the flexible and expansible member of the National Legislature, strictly representative and adapted to expand with the growth of the country, as it has, although not so fast in proportion as the population of the country.

The Fourteenth Census now having been taken and the population having been found to have increased 15 per cent, the question presents itself whether we shall partially recognize this increase and enlarge the membership of the House 11 per cent, as proposed by the committee, or whether we shall load the additional 14,000,000 of constituents upon the present membership?

My State favors, and I favor, such action as will cause the size of the House to reflect, so far as reasonably possible, the expansion in the size of the population.

I am perfectly conscious of the fact that the adoption of another policy would reduce the representation of Maine in this body by 25 per cent. It would also reduce Vermont by 50 per cent and Rhode Island by 33⅓ per cent. Eight other States are affected in different degrees. The adoption of the Siegel bill protects all States from loss in representation and furnishes 48 new Representatives to take care of 14,000,000 more population in constituencies than we had 10 years ago when the existing apportionment was made.

I do not regard the protection of the 11 State delegations from shrinkage as a conclusive reason or the most important reason for the adoption of this bill. The Constitution carries within itself provisions which inevitably cause reduction of State delegations as States fall behind in relative gain of population. But surely the effect on a State of the adoption of any particular basis of apportionment is a matter for earnest consideration and should not be lost sight of for a moment.

Take the situation in Maine. She has occupied a unique and not unimportant part in the history of the country. Her sons and daughters have scattered broadly over the West for a hundred years and have been vital factors in every human activity in that great region. She has furnished men of note for both the judicial and legislative branches of this Government, including Chief Justice Fuller, of the Supreme Court, and two Speakers of this House, whose names will never be forgotten—James G. Blaine and Thomas B. Reed. In the World War, Maine furnished more men in proportion to the population than any other State in the Union save one—Oregon—and I suspect that if the former Maine men in that State could be counted we would stand first. Maine wants to develop opportunities to be of such service in the future.

To divide Maine into three districts instead of four would create an appalling geographical situation. I now happen to represent the eastern district. I sometimes say that I am the only real down-east Yankee in Congress, as my district runs way down to Eastport, with 150 miles of ocean frontage and 9,000 square miles of area—just the size of Massachusetts.

The most probable new division would increase that area nearly 50 per cent. Not only that but large and entirely different business interests are brought in to be cared for. The 263,000 people of that division scattered over great territory are entitled to have their interests represented more efficiently than would be possible by one Member of Congress.

The second or middle district of Maine, now so effectively represented by WALLACE H. WHITE, who happens to be a grandson of another of our distinguished elder statesmen, William P. Frye, now has an area of 5,000 square miles. In a tripartite division it could hardly have less than 12,000. There are too many people, too diverse interests, and too much northern out of doors in that probable district to admit of adequate representation by any one human being.

Situations more or less similar exist in other of the 11 States most interested, and I maintain that they furnish at least important reasons why the size of the House should be increased.

From a broader viewpoint, without regard to the interests of particular States, it seems to me there are good reasons for enlarging the House to at least 483 Members.

The principle of the selection of Representatives has always been that each be elected by a relatively small number of people. According to the framers of our Constitution, the size of this body should be large and the constituencies as small as possible. The only limit to the size of the House on this basis is when it reaches so unwieldy a character that it can not properly function. In balancing the size of the constituencies on one hand and the size of the House on the other, the policy has always been to keep the size of the constituencies as low as possible, and this is in harmony with our representative form of government, to the end that this, the only elastic branch of our Government, shall be a body near to the people, closely representing their interests, familiar with their desires and aspirations, and readily responsive to their will. This is best done when the constituencies are small.

Hamilton himself, the great Federalist, who believed in a strong central government, expressed himself in 1787, according to the record, as follows:

> He avowed himself a friend to a rigorous government, but would declare at the same time he held it essential that the popular branch of it should be on a broad foundation. He was seriously of the opinion that the House of Representatives was on so narrow a scale as to be really dangerous and to warrant a jealousy in the people for their liberties.

Hamilton referred to the attacks on the Constitution, to the charges that—

> so small a number of Representatives will be an unsafe depositary of the public interests, that they will not possess a proper knowledge of the local circumstances of their numerous constituents, and that they will be taken from that class of citizens which will sympathize least with the feelings of the mass of the people.

This was when the size of the House was to be 65 and the ratio of population 30,000.

Hamilton pointed out how the danger would be averted by the increase in the size of the House, as provided for in the Constitution, to correspond to the increase of population in the country. He predicted an increase of the House to 200 in 25 years from the time he spoke and to 400 in 50 years. He saw a guaranty of the liberties of the people in the provisions for increasing the size of the House from time to time.

Never but once in the history of the country has the Congress failed to reflect in the size of the House the increase of population. That was once before the Civil War, when slavery complications were involved, and the Senate, contrary to the will of the House, reduced its membership by 17.

For the last three apportionments beginning with 1890 the precedent has been to increase the size of the House and keep down the size of the constituencies, and in doing this to fix a number so that no State would lose a Member of its delegation.

We hear some suggestion that increase in the size of the House makes for inefficiency. That is a matter of argument. There is no question that increasing the size of the constituencies will make for inefficiency in the Members. If the membership of the House is kept where it is, each Member will have to try to represent 241,000 people instead of 211,000, as at present.

The theory of the Constitution, the fundamental principles of representative government, and the precedents all require that in adjusting this balance between the size of the constituencies on the one hand and the size of this House on the other that the ratio be fixed so that each Member will represent the smallest possible number of people consistent with the proper functioning of this body as a legislative assembly.

It seems to me that the only proposition advanced by the other side that is worthy of consideration is the question of the proper functioning of a larger body. The matter of expense of some new Members and the embarrassment at the moment as to office room has been mentioned, and stress is laid upon this in the minority report of the committee.

I submit that those are questions subordinate to the main issue.

If it is proper that 105,000,000 people should have 483 Representatives, then it is proper that they be paid and furnished quarters, as in the case of the present 435 Members. Economy is not the only thing the Government is run for. We could save money by reducing the membership to a hundred, but the people would not stand for it. They expect to be adequately represented at a reasonable cost. Can 483 Members function efficiently as a legislative body? Why not? The House ceased to be a deliberative body many years ago. Its business is done by committees and their subdivisions and always will be. Can not 483 Members be divided into committees and operate as effectively as 435?

Both the British and the French Parliaments are 50 per cent larger than our proposed House of Representatives, and they seem to have no difficulty in functioning. Can it be said that we are not as capable of operating in a representative Government as the French and the English? Perish the thought! [Applause.]

The CHAIRMAN (Mr. NEWTON of Minnesota). The time of the gentleman from Maine has expired.

Mr. PETERS. Mr. Chairman, I ask unanimous consent to extend my remarks.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. LARSEN. Mr. Chairman, I yield three minutes to the gentleman from Ohio [Mr. GARD].

The CHAIRMAN. The gentleman from Ohio is recognized for three minutes.

Mr. GARD. Mr. Chairman and gentlemen of the committee, I was interested in my investigation of this matter to note the report of the Committee on the Census in 1911, and to note in the report this year the same thing. In 1911, the very first item we had in that report is that "Under this apportionment no State will lose a Member." We have in the present report on the so-called Siegel bill now under consideration the same statement, "Under this apportionment no State will lose a Member." So that it is easy to see that the gist of that which is set out in this majority report is that no State will lose a Member.

Now, I disclaim that as a test for congressional representation, and therefore I oppose the majority bill; I oppose the report as brought out by the majority of the Committee on the Census. I oppose, too, the plan offered by that committee for the submission of a constitutional amendment to make certain and definite the membership of this House. There is no mystery, there is no element of philosophy, there is no element of mathematics in this matter. It is simply and only the application of that which we by experience come to know is the best for efficiency in this House.

The rule is that the people must be proportionally represented. Therefore, after using the dictates of common sense and experience, we arrive at a sum total which a man may well and truly represent. Then we apportion that among the people of all the States, and thereby we determine the proportion of representation and the proportionate number of Representatives in the different States. At one time a State may have more and at another time less, but that is the controlling rule. Sometimes the agricultural States may lose. They lose now. Ten years from now they may gain, but always the sense of proportion remains, and always the proportionate representation is the same.

I maintain, too, that the element of a constitutional amendment, an arbitrary, iron-bound limitation, is entirely opposed to that rule which makes for a revision of the membership of this House every 10 years, guided by the principles I have stated. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. LARSEN. Mr. Chairman, may I inquire how much time I have remaining?

The CHAIRMAN. The gentleman from Georgia has 15 minutes remaining.

Mr. LARSEN. I yield five minutes of that time to the gentleman from Tennessee [Mr. GARRETT]. [Applause.]

Mr. GARRETT. Mr. Chairman, there are some phases of this bill that I think I shall have something to say about under the five-minute rule, but for the present I shall speak only of that which is contained in the first paragraph or section of the bill, to wit, the number of Representatives.

I shall oppose the bill reported by the majority of the committee, and shall vote for the proposition to retain the membership at the number as at present fixed. [Applause.] Like others who have expressed themselves, I should be willing to vote for a carefully worked-out bill that would reduce the number of Members of the House, but that is an impracticable thing now.

I can add nothing new to the arguments that have been made against the measure, but there have been certain suggestions that I think should be commented upon for just a moment.

Not to be invidious, I was particularly struck with the remarks made by my friend from Vermont [Mr. GREENE]. His was an excellently well worded address; and there was a subtle suggestion, entirely legitimate, which if properly understood was an appeal to a very sound psychology in a government such as ours, and yet which if misunderstood might be unfortunate, to wit, the appeal to preserve, as I understood him, the proper balance of power in the hands of the agricultural or country interests of the United States. That, of course, is desirable; but it ought not to be understood that a measure fixing the number of Members at 435 does not do that in so far as it may properly and legally be done under the Constitution of the

United States. It has been little commented upon here, but, of course, we know that this body does not represent States. It represents people. Under the original plan of the founders of this Government the Senate was to represent States. To what extent that may have been modified by the amendment to the Constitution which provides for a direct election of Senators, of course, is somewhat speculative, and we need not comment upon it now. But what I particularly desire to say is that it would be most unfortunate if the agricultural sections of our country, or what may be called the rural sections, should obtain, from what has been said here to-day by many gentlemen, an impression that they were being discriminated against in representation upon this floor. If the provisions laid down in the first or second section of this bill are followed, namely, that the representation shall be fixed by the States forming congressional districts of contiguous territory and as nearly as possible equal in population, what is the result? I presume that will be followed, although I do not think this Congress could make it mandatory to do it. I think the formation of the districts is a thing which is left to the States to do for themselves.

The CHAIRMAN. The time of the gentleman has expired.

Mr. LARSEN. I yield to the gentleman one minute more.

Mr. GARRETT. I can not go into details, but the States that gain the most are California, New York, Michigan, Illinois, Pennsylvania, and Ohio. I dare say that in every one of those States, except California, the gain in population is almost wholly in the great cities, and in laying out the congressional districts you will find that the increase in membership in those States will be in the city districts and not in the rural districts of those States. I understand that is probably not true in California. [Applause.]

Mr. FAIRFIED. I yield five minutes to the gentleman from Illinois [Mr. MADDEN]. [Applause.]

Mr. MADDEN. Mr. Chairman, it may be unfortunate that the trend of population is toward the cities, but I deny that the representation from the cities in this House is not as able or as patriotic as that which comes from the rural districts; and I also deny that the representation is not equally as nation wide through them as it is through the representation coming from the rural territories.

I am opposed to an increase in the membership of the House at this time, and I oppose it because I believe that the House is sufficiently large and that if it could be reduced below its present size it would be still more efficient. I believe that efficiency should be the watchword, that quality and not quantity should be the reason for the fixing of the membership of the House. The volume of business to be transacted by the Congress is becoming more intense every year.

Mr. HERSEY. Will the gentleman yield?

Mr. MADDEN. I can not yield in five minutes. Men here have said that 242,000 citizens are too large a constituency. I say in reply that I have never yet had an application from any citizen of the United States, no matter where he came from, for the transaction of any public business that I did not give it attention, and prompt attention. So that the constituency does not consist wholly of those who live within the boundaries of a congressional district, and if every Member of Congress has done the same thing—and I presume nearly every Member has—it is fair to assume that they could take on a large constituency without overburdening them with the work. There can be no doubt but that they can represent more with equal efficiency.

Mr. DALE. Will the gentleman yield for a question right there?

Mr. MADDEN. I can not yield in five minutes. If we take into consideration the cost, which ought always to be an element in the determination of problems of this sort, we will certainly not increase the membership; and we fix an additional cost of something like $1,000,000 a year by the proposal of the majority of this committee. One million dollars a year carried on for time out of mind means something to the American people. It should be understood that we have a greater bonded obligation than ever in the history of America; that to-day our fixed charge for interest and sinking fund amounts to $1,250,000,000 a year; that our pensions and allotments and allowances for the late war and all previous wars now run into three-quarters of a billion dollars a year, making a fixed charge because of these two items alone of $2,000,000,000, whereas it cost only a billion dollars a year to conduct this Government before the war. And now to add $1,000,000 more to the expense of the Government by the addition of 48 new Members, without adding anything whatever to the efficiency of service, is unjustifiable and would not be approved by the people. [Applause.]

By unanimous consent, Mr. MADDEN was granted leave to extend and revise his remarks in the RECORD.

Mr. FAIRFIELD. Mr. Chairman, I yield five minutes to the gentleman from Ohio [Mr. FESS].

Mr. FESS. Mr. Chairman, I have given a good deal of consideration to this question from the various angles that have been discussed by the various Members. I regret that in order to do what my judgment indicates it will be necessary for some States to lose part of their representation. That really is no argument, however, to change my convictions. In addition to the objection to an increase of the membership of the House because of the added expense, there is a more fundamental objection. The larger the House the more rigid must be the rules of the House, and with the increased rigidity of the rules the individuality of the membership is sacrificed. Even the House is now so large that it necessitates now and then the bringing in of a rule by a committee with almost summary power in order to get the House to function. That would seem to be unnecessary if it were not that the House now is so large that to give any time to each individual Member would make it absolutely impossible to do any business at all. Consequently we have to tie down the proceedings of the House by rather rigid rules, and, as I say, with the rigidity of the rules necessarily we deny the individuality of the Member and indulge in what sometimes is offensively called machine proceedings, where the work is done by a few, too frequently denominated the select few in the interest of favorites in the House. This is inevitable where the membership is large, that the work shall be done by a group of a few. That is not simply a charge; it is not only possible but positively inevitable. Therefore, with the constant increase in the size of the House, we will constantly increase this objection of leaving the work of the House in the hands of a very few Members. That ought not to be the subject of criticism, in view of the size of the House, if we choose to enlarge the House, but rather a recognition of a situation which we tolerate. With the increased opportunity for what is called machine methods, or the more formal method where a few will direct the business, you will have the additional objection that in multiplying the number of districts you multiply the chance for what we call the local interests in their reciprocal relations, producing what is offensively called pork-barrel legislation. I think that the one thing that the House of Representatives ought to stand upon is that the Member from each district is not a representative of that particular district, but a Member of the Congress of the United States, and ought to represent the people of the United States instead of the local particular district. [Applause.]

Representation is not a matter of mathematics. It does not depend upon the number of Representatives but the qualities of Representatives. A State is never distinguished for the many, but rather the impression made upon the country by the men who have had time and opportunity to exert their influence. In the days when the House was not so large, a State was more distinguished than now.

The large House becomes inefficient as well as ineffective because of confusion created by numerous roll calls. The habit of suppressing individuality of the Member leads him to absent himself from the Chamber to allow the few to conduct the business of the House. Every Member knows this consumes time. I shall vote against increasing the House.

Mr. FAIRFIELD. Mr. Chairman, I yield two minutes to the gentleman from Massachusetts [Mr. TINKHAM].

Mr. TINKHAM. Mr. Chairman, Mr. Madison in the fifty-eighth number of the Federalist made some remarks which are pertinent to this debate. He said:

> In all legislative assemblies, the greater the number composing them may be, the fewer will be the men who will in fact direct their proceedings. In the first place, the more numerous any assembly may be, of whatever characters composed, the greater is known to be the ascendency of passion over reason. In the next place, the larger the number the greater will be the proportion of members of limited information and of weak capacities. Now, it is precisely on characters of this description that the eloquence and address of the few are known to act with all their force. In the ancient republics, where the whole body of the people assembled in person, a single orator or an artful statesman was generally seen to rule with as complete a sway as if a scepter had been placed in his single hands. On the same principle, the more multitudinous a representative assembly may be rendered, the more it will partake of the infirmities incident to collective meetings of the people.
>
> Ignorance will be the dupe of cunning, and passion the slave of sophistry and declamation. The people can never err more than in supposing that by multiplying their representatives beyond a certain limit, they strengthen the barrier against the government of the few. Experience will forever admonish them that on the contrary, after securing a sufficient number for the purposes of safety, of local information, and of diffusive sympathy with the whole society, they will counteract their own views by every addition to their representatives. The countenance of the Government may become more democratic, but the soul that animates it will be more oligarchic. The machine will be enlarged, but the fewer and often the more secret will be the springs by which its motions are directed.

By unanimous consent, leave was granted to Mr. TINCHER, Mr. TINKHAM, Mr. SUMNERS of Texas, and Mr. BLACK to extend their remarks in the RECORD.

Mr. FAIRFIELD. Mr. Chairman, I yield five minutes to the gentleman from Ohio [Mr. LONGWORTH].

Mr. LONGWORTH. Mr. Chairman, I take the floor to express the hope, the very sincere and fervent hope, that this bill will not pass as recommended by the committee. Its result would merely be to make an already unwieldly body more unwieldy, and to greatly increase the cost of Government at a time when we should bend every energy to cut the cost of Government to the bone.

When I first came to Congress the membership consisted of 357, and I have not seen that its increase since that time by 80 has contributed either to the quality of legislation or the efficiency of producing legislation. In support of the proposition to increase the membership to 483, gentlemen have quoted the example of the House of Commons of Great Britain. I do not know whether gentlemen here know that in the House of Commons, consisting of some 700 members, there are seats for only about 300, and so more than half of the members of the British House of Commons occupy seats in the gallery when important business is being transacted. Some years ago I sat for two weeks in the gallery of the House of Commons, and I saw members crowding into the galleries and participating in the business of the House in no other way than by merely waiting for the call of the party whips to come down and vote. It does not seem to me that that is an argument in favor of a larger assembly here.

Gentlemen have said that this would diminish the quality of representation because it would mean it would give men too many constituents to look after. I had an experience for nearly two years here of representing two districts in the State of Ohio, when my colleague Capt. Heintz was fighting abroad. I found no difficulty whatever in looking after, with competent clerical service, and I hope properly, the legitimate needs of over 500,000 people in so far as routine matters were concerned.

It has been my experience in this House that the test of good representation does not mean so much attention to local details as participation actively in legislation on the floor of the House. I have almost invariably found, when the time came when a man could be of actual service to his district, that he who had legislative influence on the floor of the House could do most for his district. To increase the membership of the House by 50 will simply make it more and more difficult for men to come here and obtain a position of anything like real influence in legislation. It is hard enough in a body of 435 for the brightest men to come here and within less than 10 years at the very least achieve a position of rank in committees and real influence on the floor of the House and in general legislation. It is going to be just that much harder if you increase the body to nearly 500 Members.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. LARSEN. Mr. Chairman, I yield one minute to the gentleman from Pennsylvania [Mr. ROSE].

Mr. ROSE. Mr. Chairman, I expect to be out of the city tomorrow in attendance upon a funeral of a very dear friend and therefore will not be in a position to cast my vote when the roll is called. I merely rise to make known the fact that I am against the passage of this bill now under consideration, and that I favor the Barbour amendment; in other words, that the membership be not increased at this time.

Mr. Chairman, I ask unanimous consent to revise and extend my remarks.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. LONGWORTH. Mr. Chairman, I ask unanimous consent to revise and extend my remarks.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio? [After a pause.] The Chair hears none.

Mr. LARSEN. Mr. Chairman, the question of reapportionment, occurring once every 10 years, always engenders the proposition of increased membership for the House. This is not a local question, but general in nature, affecting the entire country and all its people. The effect upon any particular State or district should not be considered, nor should it be made a party question.

I can not refrain from calling attention to the following paragraph which appears in the majority report, as follows:

> The country is developing in population and all over the world, and it is becoming apparent that the representative bodies must be more representative of the people.

I indorse this sentiment, and I am quite sure every member of the committee does, but I can not reconcile it with the present proposed bill.

A Government whose officials are chosen by the people is representative in form, regardless of the number of its representatives. This House might be just as representative with 300 Members as with 500. The representative character of the Congress is not determined by the number composing it, but by the character of legislation enacted. Suppose we had a membership of 1,000, and the legislation enacted was not in the interest of the masses, but to forward the selfish desires of individual Members, political or otherwise; would anyone pretend to say it was a representative body? A representative is one chosen by the people, but when he fails to reflect the sentiment, or to protect the interest of those for whom he acts, he is not representative.

If we prove ourselves representative to-day our act will not be for the selfish purpose of enabling some State to retain its present representation unless it be for the best interest of the country. It should not be for the purpose of preventing some Member of Congress from having to retire two years hence, but in the interest of public welfare.

It must be apparent to everyone that increased membership can not result in benefit to the House or to the public; it appears to me simply as a move to gratify the selfish ambition of a few States. I might not object to aiding in the proposed movement if I could do so without detriment to the public good, but this does not seem possible.

The question for consideration is, How large should the House be so as to preserve its representative character on the one hand and not become so unwieldy as to seriously impair its ability to perform its constitutional functions on the other hand?

As we increase membership we lessen responsibility; as we lessen responsibility we destroy efficiency and make the House unwieldy. Members contend that the House is not unwieldy at this time. I believe that it is, and I am quite sure it would be unwieldy with such an increased membership as is now proposed. I call attention to the fact that men who have spoken on this bill and who speak every day, as far as that is concerned, seldom ever have the opportunity to fully discuss the merits of any question before the House. The brightest Members of the House are frequently begging for time, asking that they be given from three to five minutes to discuss questions which, if they were allotted proper time, would require 30 to 50 minutes. If the House were not already unwieldy this difficulty would be obviated. What will result should the proposed measure be enacted?

Mr. LITTLE. Will the gentleman yield for a question?

Mr. LARSEN. I do.

Mr. LITTLE. Does the gentleman think that in the Senate, where they talk as long as they want to, they work any more efficiently or rapidly than this House?

Mr. LARSEN. Well, in some respects I might say yes; in others I might say no. Certainly they have the opportunity of doing more efficient work in that they have more time for deliberation. I believe there is wisdom in deliberation.

Mr. LITTLE. May I ask one more question?

Mr. LARSEN. Yes.

Mr. LITTLE. Does not the gentleman think, as a matter of fact, that the reason we do work so much more rapidly, as everybody knows we do, is due to the fact that there is not so blame much talking and the more doing of things because of our number?

Mr. LARSEN. No; I do not think so. I think it is due to the fact that so few men control matters in the House. There are many who have no chance to talk. I think the rules and the membership of the House should be such that they could. Then conditions would permit the giving of more legitimate thought and attention to matters before the Congress.

Mr. CHINDBLOM. Will the gentleman yield?

Mr. LARSEN. Just for a question.

Mr. CHINDBLOM. With five hours' debate set aside on this matter this afternoon, and with many speeches limited to two, three, and five minutes, there are still Members on the floor of the House who will not have an opportunity to discuss the bill.

Mr. LARSEN. That is correct.

Practically every Member of the House was either elected or stood for election last year upon the express or implied promise to curtail Government expenses so far as possible. Gentlemen, to-day you have an excellent opportunity not only to show the people of your own district but of the Nation that you desire to keep that promise. Conditions both in the Capitol and the House Office Building are such that additional Members could

not be provided for in either building. The increased membership, if authorized, must secure quarters elsewhere, and any present arrangement only would be temporary.

The erection of a new office building, at an estimated cost of four to five million dollars, will be necessary. The Washington Post of to-day estimates the cost of the proposed increase to be $1,500,000 annually. This, in my judgment, may be a little excessive, but considering the increased salary for Members, clerk hire, franks, postage, maintenance of quarters, and other necessary expenses, it will certainly be something like a million dollars annually.

Proponents of the proposed measure endeavor to justify its passage upon the theory that the demands of the public upon the individual Member are such that he can not properly discharge them. I have much sympathy for the Member who finds himself in such a deplorable position, but I am sure the instances are rare.

The extension of highways, railways, telegraph and telephone lines, as well as the invention of the automobile, typewriter, mimeograph, multigraph, and other labor-saving devices within recent years have multiplied our capacity for travel, association, and communication, and has resulted in great increase of capacity for performance of duty. Within the last year or two we have also increased the clerical force of the Member, which, in my judgment, should operate in taking care of a wonderful amount of demands coming from our constituents.

Gen. SHERWOOD, oldest Member of the House, and ex-Speaker CANNON, second oldest in years, and older in point of service than any other Member who ever served in the House, represent districts above the average size in population, and yet both respond to every legitimate demand of their constituents and are opposed to increased membership. If these gentlemen, old in the service and in years, are able to look after the demands of their districts, I ask, in the name of reason and justice, why the younger Members in this House can not look after any increase in population that may occur in their districts? The gentleman from Texas [Mr. GARNER], representing a district larger in area than many States of the Union and having a population of about 380,000, finds no difficulty in meeting the demands from his constituents, and is also opposed to increased membership. Other Members of the House representing districts in the larger cities of the country, with a present population of something like 500,000, say they are able to meet every legitimate demand, and are opposed to increased membership. Hence it appears to me that the argument as to "demands of constituents" can not be urged to great advantage.

The argument as to increased territory heretofore urged can not be made at this time, as all the continental territory was consumed in districts organized 10 years ago. Now it is simply a question of increased population. I can understand how a Member in the early days of the Republic might have had quite a task in representing thirty to forty thousand people, but I can not understand why, under present conditions, a Member can not represent ten times that amount just as easy.

There is no popular demand for increased membership, and I think the proceedings of to-day have demonstrated this fact very forcibly. It has been stated on the floor of the House time and again during this debate by various Members that they have received petitions and letters from their districts asking that no increase be permitted. I believe in one case it is said the legislature of a State so recommended. Yet, in the face of these facts, no one has risen who said that he had a telegram or letter or anything urging him to support increased membership.

Mr. JOHNSON of Mississippi. Will the gentleman yield?

Mr. LARSEN. Yes.

Mr. JOHNSON of Mississippi. The opportunity for the poorer class of people, those who live in the rural districts, to convey their protests to Congress is not furnished them like it is to those with money who can send letters, telegrams, and so forth.

Mr. LARSEN. I assume from the gentleman's question that he represents some of the poorer classes, and I would like to ask what letters he has received from the poor people of his district asking for this increase?

Mr. JOHNSON of Mississippi. I represent one of the wealthy districts of my State.

Mr. LARSEN. I trust the gentleman's constituents are not plutocrats, but from his statement I do not know. [Applause.]

Mr. FAIRFIELD. Mr. Chairman, I yield five minutes to the gentleman from Wyoming [Mr. MONDELL].

Mr. MONDELL. Mr. Chairman, some of the gentlemen have referred to the attitude of the steering committee and of the majority floor leader in regard to this bill. Those gentlemen will probably remember that a Republican conference was called, and that that conference decided that we should legislate on the subject of apportionment. At the request of gentlemen who desire to increase the size of the House, gentlemen who are supporting the bill as reported, the Republican conference did not take up the question of the size of the House. I then stated to gentlemen, as I have at various times, that personally I should feel I could not support any bill proposing to increase the size of the House. The steering committee has taken no action on the subject, although every member of the committee is opposed to an increase in membership.

When I came here there were 365 Members in the House. After I had served here a short time there was a proposal to increase the size of the House. The sentiment then, as now, was against the increase, but through political trading the best judgment of the House was not carried out and the House was increased in size. I believed that increase unwise, and as my service has continued here I have been more and more convinced that if this body is to remain what the fathers intended it to be, a deliberative body, with each Member charged with large responsibility and given full opportunity to represent the views of his constituency, it must be kept reasonably small.

This is true beyond question, that with the increase of the size of the House the importance, influence, and opportunity of each individual Member decreases. That is inevitable.

If it is to continue to be a great honor to represent a constituency in Congress, the Congress must remain what the fathers intended it to be, a truly representative body, with responsibility resting on each individual, not a body such as they have in England, in France, and in Italy, where they have a ministerial government and the popular branch of the legislature exists largely for the purpose of recording the judgment of the ministry of the party in power. Large memberships they have, but in order to do business their quorums are exceedingly small—40 in the case of the House of Commons in England as compared with a majority of all the Members with us.

It is our duty to continue the House of Representatives what it was intended to be, a body truly representative, a body small enough that each and every Member may hope and expect that on proper occasions he shall have full opportunity to present the views of his constituency. If we increase the size of the House, we shall diminish the stature of the Representatives. If we increase the size of the House greatly beyond its present number, we shall reach a condition under which the individual will count for little, under which the committees will be all powerful, and under which a small, compact organization can absolutely control the destinies of the House. We should do nothing calculated to bring about that condition. [Applause.]

As the debate has gone on I have been surprised at the lack of real argument on behalf of an increase in the size of the House. Of appeal that has aroused our sympathy without convincing our judgment there has been much, but of logical argument but little.

Our sympathy has gone out to those whose political fortunes may be placed in some jeopardy by the reduction of the size of State delegations, for we would not wantonly or needlessly embarrass the career of any of our colleagues, but as to these we can not help reflect that in proposing the constitutional amendment to limit the size of the House to 500 they unintentionally admit the virtue of our contention that there is danger to the Republic in the increasing size of the House.

We are not moved by appeals on behalf of States, for their relative strength in the House remains the same whatever the size of the House. The appeal on the ground of political expediency is not convincing. We shall win or lose on our record of legislation and administration, and by no manipulation of congressional districts as effected by apportionment.

The only sentiment we can allow to affect our action to-day is that of lively regard for the welfare of this House and of the Republic.

The House has already reached a size which tends to discourage the average Member from participation in debate. Any further increase will tend to increase absenteeism, discourage individual activity, and to concentrate the work and power of the House in a few hands.

I have referred to the argument that as England, France, and Italy have larger popular legislative bodies, we should have. The situation is not identical; conditions are not the same.

We have 48 State legislatures, which legislate and appropriate for the major portion of the public interests and activities of the country. The nations referred to have no like legislating and appropriating bodies. England, France, and Italy have ministerial Governments. In the main their popular branches merely approve or reject the budgets and programs of the cabinet. The average member of these foreign legislative bodies has no public duties to perform, save on the rare occasions

when he may be called to the seat of Government to pass on a vital national or party question. The House of Commons does not even provide seats for all of its members, and all of these legislative bodies transact their business with a quorum of from a tenth to a quarter of their membership.

As distinguished from these foreign legislative bodies, the House of Representatives was, as I have said, intended to be a deliberative assembly, in which each Member should have important duties and important responsibilities in representing the views and wishes of his constituency.

We have already imperiled that ideal of the founders of the Republic; we can afford to imperil it no longer, much as we may desire to meet the wishes and serve the convenience of our colleagues. The interest of the Republic should be paramount, and that interest can be best served by retaining the House at its present membership. It would be well if the membership of the House could be somewhat decreased. As that is not practical, let us at least not increase it.

Mr. SIEGEL. Mr. Chairman, I yield the balance of my time to the gentleman from Iowa [Mr. TOWNER]. [Applause.]

Mr. TOWNER. Mr. Chairman, this bill has been brought before the House in response to the mandate of the Constitution, which provides that Representatives in Congress shall be apportioned among the several States according to population. The Constitution also provides that a census to ascertain the number of the population shall be taken every 10 years. This requires a readjustment of representation at every decennial period following the taking of the census.

In accordance with these requirements the House has been increased in numbers from 65 to its present membership, 435. The increases and the ratios of representation are as follows:

Membership and ratio under several apportionments.

Apportionment.	Year.	Members.	Ratio.
Constitution	1789	65	30,000
First Census	1793	106	33,000
Second Census	1803	142	33,000
Third Census	1813	186	35,000
Fourth Census	1823	213	40,000
Fifth Census	1833	242	47,700
Sixth Census	1843	272	70,680
Seventh Census	1853	237	93,423
Eighth Census	1863	243	127,381
Ninth Census	1873	293	131,425
Tenth Census	1883	332	151,911
Eleventh Census	1893	357	173,901
Twelfth Census	1901	391	194,182
Thirteenth Census	1911	435	211,877

The present bill increases the membership of the House to 483, with the ratio of 218,986. In method and in substance this bill follows, in the main, the precedents of the past.

These increases from time to time have been contested vigorously, just as to-day the proposed increase is contested. Always there have been good men, strong men, who believed that the popular branch of Congress should be kept as small as possible. Such men are here to-day contesting an increase in the number of Representatives to correspond with the increase in population. Nothing new has been said by the opponents of this bill. Everything that is now urged against it has been urged at every decennial period during the history of the country; and yet, with but one single exception, the membership of the House has been increased at each decennial period. Out of 14 apportionments that have been made, 13 have increased the size of the House.

Were such increases justified? Were they wise? If we are to render our judgment upon the record of the past, yes. Did such action meet with the approval of the fathers? It did. They themselves increased the representation with the increase of the population. Instead of the dire results that are prophesied if this proposed increase shall be made the Congress will do its work not with less efficiency but with more efficiency during the coming decennial period.

It is popular to decry the present and to praise the past. In the prospective of history we recall only the great men and the demagogues, and the foolish things that were done and the wise things that were left undone are forgotten, fortunately for our good name and fame. However, those who have carefully studied the record of Congress during past years know that in efficiency and in wisdom there has been a steady progress and a marked improvement down to the present time. This Congress may well challenge comparison with any of the Congresses of the past. In efficiency of work and in volume of accomplishment it has not been surpassed by any of the 65 that have preceded it. Gentlemen who oppose this bill know this, and yet they say that if we make the ordinary, the reasonable, the fair increase that is proposed here, just as previous increases have been made, because of some supposed fortuitous combination of circumstances this is the one time when Congress will be ruined if its Members are increased.

Everyone understands that these increases can not go on forever. It is within the judgment of Congress to determine when increases in its membership shall cease. It is a fair question for each Member to decide whether or not that limit has been reached now. But that is all there is of it. It is not at all probable that any injurious results will follow the proposed increase, and there are some very strong reasons why it should be made.

Mr. LONGWORTH. Mr. Chairman, will the gentleman yield?

Mr. TOWNER. Yes.

Mr. LONGWORTH. I simply want to remind the gentleman that while it may be true that in the last Congress there has been a very large amount of legislation, yet Congress has been in session practically all the time, whereas in the case of former Congresses that was not the fact.

Mr. TOWNER. That is true, but it does not militate against the argument. If in response to the demands of an emergency Congress has transacted its enlarged duties well and expeditiously, it shows that the results of previous increases has not impaired its efficiency. The emergency is by no means over. The demands upon Congress are as great now as they were during the war, and it is probable that we shall have to remain in session most of the time for some years.

It seems to me, gentlemen of the committee, that if there ever was a time in the history of the country when an increase was justified it is at this particular time. We have on our hands an accumulation of the business of the people of the United States, not directly legislative in character but personal in its nature, such as never before existed.

Mr. RAKER. Mr. Chairman, will the gentleman yield right there?

Mr. TOWNER. Will not the gentleman defer his inquiry until I have finished this statement? The business to which I refer is the personal appeals and requests of individual constituents made directly to the Congressman which require personal attention and are often of a difficult and complicated nature. Gentlemen will remember that following the Civil War the principal business of Members of Congress for many years was in looking after the affairs of the soldiers. But they were comparatively few in number compared with the more than 4,000,000 soldiers of the late war who now appeal to us to help them with their allowances, their insurance, and their other claims upon the Government. The cases before the War Risk Bureau, in the Surgeon General's Office, and before the board for the training of disabled soldiers are often of a complicated nature and require the personal attention of the Congressman. None of us but is glad thus to be of service to those to whom we owe so much; but it is nevertheless a material increase in our duties.

There are many other matters arising out of the war which do—and will for some time—increase our work. Those who have tried to correct the mistakes of the Revenue Bureau in its assessment and collection of the income tax will understand what that means. The mere fact that we must undertake the task of completely revising our revenue system convinces us that our work will be materially increased.

There is another matter deserving attention in this connection. We have just doubled the voting population of the United States. The average number of voters in each district has been increased from about 50,000 to 100,000. Instead of 50,000 voters with claims for assistance and personal attention, there are now 100,000 with such claims. It is manifest that this will add materially to the duties of Representatives.

It is proposed to amend this bill so as not to increase the number of Representatives. This will add over 30,000 people to the constituency of each Member. Such an increase will give him an additional amount of work, which must of necessity decrease his ability to represent his constituency well and faithfully.

Gentlemen talk about the additional expense that will be incurred by the proposed increase. We ought not to consider the expense, although in this case it is inconsiderable, if in fact the representation of the people is facilitated by the action we take.

What, after all, is the House of Representatives? It is the popular branch of the National Legislature. It has been stated here, and justly so stated, that we are smaller in numbers proportionately than any of the great popular representative bodies among the nations of the world. Gentlemen say, "That is no argument, because their systems are different from ours."

But in every government where the people are represented in their lawmaking body the popular branch is made up of the immediate representatives of the people, and in so far as their

number bears relation to the number of people whom they represent the parallel is exact between those countries and our own. Their lower houses are the popular branches of their parliaments or congresses, just as the House is the popular branch of our Congress. They represent the people directly, just as we represent the people directly. In the degree in which the number of people whom they represent is less than the number we represent they are more representative of the individual desires and needs of the people than we are; they are the more democratic, their people have the better representation.

The number of the lower houses, ratio, and population of the principal countries having popular representation as compared with the United States are herewith given:

Countries.	Census year.	Number of members in lower house.	Ratio of members to population.	Population on which ratio is based.
United Kingdom	1911	707	.....	45,516,259
England and Wales	1911	528	70,000	.....
Scotland	1911	74	70,000	.....
Ireland	1911	105	43,000	.....
Belgium	1918	189	40,000	7,555,576
Denmark	1916	140	21,000	2,940,000
France	1919	626	66,255	41,475,523
Germany	1919	423	130,227	55,086,000
Greece	1913	316	16,000	4,744,725
Italy	1911	508	71,000	36,740,000
Jugo-Slavia (Serbia)	1919	166	86,238	14,316,459
Netherlands	1918	100	66,787	6,678,699
Norway	1910	126	18,982	2,391,782
Portugal	1911	164	36,329	5,957,985
Rumania	1919	347	50,124	17,393,149
Spain	1910	417	47,844	19,950,817
Sweden	1918	230	25,278	5,813,850
Switzerland	1916	189	26,127	3,937,000
United States, as provided in bill	1920	483	218,986	105,750,238

It will be observed that the popular branch of Congress with the proposed increase would be 224 less in number than the House of Commons of Great Britain. It would be 143 less than the lower house of France and 25 less than that of Italy.

On the ratio of representation carried in the present bill, each Representative in the American House would represent more than three times the number of people a member of Parliament represents in Great Britain, almost three times as many as in France, more than three times as many as in Italy.

There are two viewpoints from which to consider this question. One is from the viewpoint of the people. Perhaps our individual importance as Members would be greater if we were fewer in number. Certainly we could be more easily managed. That is the viewpoint from which too many are considering this proposition. But from the viewpoint of the people, they will not be concerned about our individual importance, and they will view with apprehension a House that can be easily managed.

Repeatedly it is urged that if we want efficiency we must have a House small enough to be effectively managed. But is that popular government? Is that what the people want? To make smaller the number increases the power of the organization to smother legislation which it does not approve and to force through legislation which the people would not approve.

Gentlemen say this Congress can not be thus managed. Certainly every Member will admit that is true. But the courageous, unpurchaseable statesmen who compose the present House can not always remain. Besides, it is not only necessary to be in fact independent and inviolate, but the House should be so constituted as to be above criticism and above suspicion. To deliberately so constitute the House as to make it more easily influenced by selfish interests, and to make it more easily manipulated by sinister influences, is not a pleasant reflection.

It is important to understand that it is a serious matter for a State to lose representation in Congress. It is still more important to understand where that loss will fall. Gentlemen say that regret at the loss of one or more Representatives by a State is only a sentimental regret. But there is something more than sentiment involved. The cities do not lose, but the rural States do. Theirs is the loss. The war drained the States of the central West of their young men, who either enlisted in the Army or went to the cities to engage in war work. The census was taken before they had returned. Some will never return, but many are now returning. It is confidently believed that in the near future the recurrent wave will bring back their own to the rural districts. To fix for at least 10 years a ratio disadvantageous to the country and distinctly to the advantage of the cities can not be wise. We are blind to the lessons of history both in our own country and in every other country throughout the ages not to realize that such conditions are neither satisfactory nor safe.

On the whole the bill presented by the committee is within the almost unbroken precedents of the past, is reasonable and fair to all sections of the country, and in my judgment should be approved.

The CHAIRMAN. The time of the gentleman has expired. All time for general debate has expired.

Mr. SIEGEL. I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. CAMPBELL of Kansas, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill (H. R. 14498) for the apportionment of Representatives in Congress amongst the several States under the Fourteenth Census had come to no resolution thereon.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted—

To Mr. PATTERSON, on Wednesday, on account of important business.

To Mr. DUNBAR, for four days, on account of important business.

To Mr. STEVENSON, for four days, on account of illness of a member of his family.

LEAVE TO EXTEND REMARKS.

By unanimous consent, leave was granted to extend remarks in the RECORD on the apportionment bill to Mr. TOWNER, Mr. FIELDS, Mr. KENNEDY of Iowa, Mr. HERSEY, Mr. ROMJUE, and Mr. GOLDFOGLE.

Mr. LARSEN. Mr. Speaker, the gentleman from Missouri [Mr. MILLIGAN] is providentially prevented from being present to-day, and I ask unanimous consent that he have leave to extend his remarks in the RECORD. He is a member of the committee.

The SPEAKER. The gentleman from Georgia asks unanimous consent that the gentleman from Missouri [Mr. MILLIGAN], who is unable to be present, have leave to extend his remarks in the RECORD. Is there objection?

There was no objection.

MEMORIAL EXERCISES.

Mr. McLAUGHLIN of Michigan. Mr. Speaker, I ask unanimous consent that Sunday, February 27, be set apart for addresses on the life, character, and public services of the late Representative from Michigan, Mr. CHARLES A. NICHOLS.

Mr. CARTER. I ask that the same day be set aside for memorial services for the late DICK T. MORGAN, of Oklahoma.

The SPEAKER. The gentleman from Michigan asks unanimous consent that Sunday, February 27, be set apart for memorial services on the life, character, and public services of the late Representative NICHOLS, of Michigan, and the gentleman from Oklahoma asks that the same day be set apart for memorial services on the life, character, and public services of the late Representative MORGAN, of Oklahoma. Is there objection to the two requests?

There was no objection.

ADJOURNMENT.

Mr. SIEGEL. I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 33 minutes p. m.) the House adjourned until Wednesday, January 19, 1921, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV,

352. A letter from the Secretary of the Navy, transmitting draft of requested legislation authorizing the Secretary of the Navy to transfer enlisted men to the fleet reserve after 16 years' service, was taken from the Speaker's table and referred to the Committee on Naval Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. GARD, from the Committee on the Judiciary, to which was referred the bill (S. 4310) to amend an act entitled "The New Mexico enabling act," reported the same without amend-

ment, accompanied by a report (No. 1205), which said bill and report were referred to the House Calendar.

Mr. RHODES, from the Committee on Mines and Mining, to which was referred the bill (S. 4259) to provide further for the relief of war minerals producers, and to amend an act entitled "An act to provide relief in cases of contracts connected with the prosecution of the war, and for other purposes," approved February 2, 1919, reported the same without amendment, accompanied by a report (No. 1206), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. LITTLE: A bill (H. R. 15791) to transfer to the Department of Justice the Judge Advocate General's Department of the Army and the Judge Advocate General of the Navy, and the office of the Judge Advocate General of the Navy, with all his assistants and force on July 1, 1921; to the Committee on the Judiciary.

By Mr. McLEOD: A bill (H. R. 15792) to simplify the revenue act of 1918 by repealing the war-profits and excess-profits tax, and for other purposes; to the Committee on Ways and Means.

By Mr. RHODES: A bill (H. R. 15793) authorizing the Secretary of the Interior to purchase necessary lands for use of the Government fuel yards, for the erection of a garage, and payment by check by branches of the Federal Government for fuel furnished; to the Committee on Mines and Mining.

By Mr. MONTAGUE: Joint resolution (H. J. Res. 450) authorizing and directing the Secretary of War to donate to the Richmond, Va., branch of the Salvation Army 50 cots, bed sacks, pillows, sheets, and blankets; to the Committee on Military Affairs.

By the SPEAKER: Memorial of the California State Legislature, relating to the question of quicksilver mining industry; to the Committee on Ways and Means.

By Mr. McARTHUR: Memorial from the Oregon Legislature, favoring the Fordney emergency tariff bill; to the Committee on Ways and Means.

By Mr. WEAVER: Memorial of the House of Representatives and Senate of the State of North Carolina, favoring appropriation for road building in cooperation with the States; to the Committee on Roads.

By Mr. KAHN: Memorial of the Legislature of the State of California, relating to naturalization and property rights of aliens; to the Committee on Foreign Affairs.

Also, memorial of the legislative department of the State of California, relative to the protection of the poultry industry; to the Committee on Ways and Means.

Also, memorial of the legislative department of the State of California, relating to the protection of the quicksilver-mining industry; to the Committee on Ways and Means.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BLACKMON: A bill (H. R. 15794) for the relief of Mary Kent; to the Committee on Claims.

By Mr. CLASSON: A bill (H. R. 15795) to correct the military record of Josiah P. Sanders; to the Committee on Military Affairs.

By Mr. CRISP: A bill (H. R. 15796) granting a pension to Paul O. Brownlee; to the Committee on Pensions.

By Mr. DUNBAR: A bill (H. R. 15797) granting an increase of pension to Mary E. Goldman; to the Committee on Invalid Pensions.

By Mr. GANDY: A bill (H. R. 15798) authorizing the allowance of homestead application to Hugh H. Gunn; to the Committee on the Public Lands.

By Mr. LITTLE: A bill (H. R. 15799) for the relief of Adaline White; to the Committee on Claims.

By Mr. RAMSEYER: A bill (H. R. 15800) granting a pension to Annie Crill; to the Committee on Invalid Pensions.

By Mr. STRONG of Kansas: A bill (H. R. 15801) granting an increase of pension to Mary J. Willey; to the Committee on Invalid Pensions.

By Mr. VESTAL: A bill (H. R. 15802) granting a pension to William Robinold; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15803) granting an increase of pension to Susan Baker; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

5036. By Mr. FULLER: Petition of National League of Women Voters favoring the Sheppard-Towner bill; to the Committee on Interstate and Foreign Commerce.

5037. Also, petition of Tricity Council No. 166, U. C. T., Rock Island, Ill., favoring 1-cent drop letter postage; to the Committee on the Post Office and Post Roads.

5038. Also, petition of the Boone County (Ill.) Farm Bureau Executive Committee, favoring the Wadsworth bill (S. 3390); to the Committee on Agriculture.

5039. Also, petition of American Nickeloid Co., Peru, Ill., favoring a high tariff on sheet zinc; to the Committee on Ways and Means.

5040. Also, petition of National Association of Wool Manufacturers, concerning tariff rates; to the Committee on Ways and Means.

5041. Also, petition of J. D. Hollingshead Co., Chicago, Ill., favoring the Winslow bill (H. R. 15551); to the Committee on Interstate and Foreign Commerce.

5042. By Mr. GALLIVAN: Petition of Daniel O'Connell Associates, Local 799, International Longshoremen's Association, favoring Senate bill 4606; to the Committee on the Judiciary.

5043. Also, petition of Leas & McVitty Co., Kistler Lesh Co., Proctor Ellison Co., and the Day Gormley Leather Co., all of Boston, Mass., protesting against a tariff on imported hides; to the Committee on Ways and Means.

5044. Also, petition of Crane Co., South Boston, Mass., favoring $96,000,000 appropriation for the Emergency Fleet Corporation; to the Committee on Appropriations.

5045. Also, petition of Women's Auxiliary of the Massachusetts Civil Service Reform Association urging the passage of House bill 15228; to the Committee on Reform in the Civil Service.

5046. By Mr. McDUFFIE: Petition of citizens of the first congressional district of Alabama favoring the Winslow bill; to the Committee on Interstate and Foreign Commerce.

5047. By Mr. MORIN: Petition of the house of delegates of the Medical Society of the State of Pennsylvania, of Pittsburgh, Pa., protesting against the discriminatory and inequitable features of the Harrison narcotic act; to the Committee on Interstate and Foreign Commerce.

5048. By Mr. O'CONNELL: Petition of Civil Service Forum of New York State, favoring legislation for the benefit of civil-service employees; to the Committee on Reform in the Civil Service.

5049. By Mr. TINKHAM: Petition of Mount Pleasant Council, No. 98, Knights of Columbus, opposing the passage of the Smith-Towner bill; to the Committee on Education.

5050. By Mr. WEAVER: Petition of citizens of Rutherford County, N. C., relating to aid for suffering Chinese; to the Committee on Foreign Affairs.

5051. By Mr. YATES: Petition of World Metric Standardization Council, 681 Market Street, San Francisco, Calif., urging passage of House bill 15420, the metric standards bill; to the Committee on Coinage, Weights, and Measures.

5052. Also, petition of Miss Lilias Gordon Wilson and Mrs. Janet Norris Bangs, 5755 Kenwood Avenue; Dr. James W. Walker, 1504 East Fifty-third Street; and William E. Walker, 7506 Junior Terrace, all of Chicago, Ill., protesting against granting of water rights for commercial uses in the national parks; to the Select Committee on Water Power.

5053. Also, petition of Illinois League of Woman Voters, 410 South Michigan Avenue, Chicago, Ill., by Mrs. Henry W. Cheney, State president, urging that the present appropriation for Public Health Service and for the Interdepartmental Social Hgyiene Board be continued; to the Committee on Appropriations.

5054. Also, petition of Headley Glass Co., Danville, Ill., urging passage of Nolan Patent Office bill (H. R. 11984); to the Committee on Patents.

5055. Also, petition of William P. Ullrich, 809 Davis Street, Evanston, Ill., urging a tax on sales; to the Committee on Ways and Means.

5056. Also, petition of Watseka Woman's Club, of Watseka, Ill., by Mary Z. Lewis, Mayme Bear, Edythe H. Kenny, Carrie M. Duckworth, and Livonia R. Kay, committee on legislation, urging passage of the Smith-Towner bill, the Sheppard-Towner bill (H. R. 10925), the Rogers bill (H. R. 12749), and the Fess bill (H. R. 12078); to the Committee on Education.

5057. Also, petition of Chicago Waiters' Association, by F. D. Ragan, chairman, and Fred Scholl, secretary, 115 West Madison Street, Chicago, Ill., urging that the economic blockade main-

tained against Russia be abandoned; to the Committee on Foreign Affairs.

5058. Also, petition of Press Service Co., 25 West Forty-third Street, New York City, N. Y., protesting against the passage of Senate bill 3390 (H. R. 10329); to the Committee on Appropriations.

5059. Also, petition of Mrs. J. A. Trimmer, 1265 West King Street, Decatur, Ill., urging passage of Elkins bill (S. 4596) for Spanish War veterans, their widows, and dependents; to the Committee on Pensions.

5060. Also, petition of Charles D. Center, secretary Chamber of Commerce, Quincy, Ill., urging passage of Federal road appropriations; to the Committee on Roads.

5061. Also, petition of J. D. Hollingshead Co., 205 South De Salle Street, Thebes, Ill., by Paul L. Dysart, jr., urging 1-cent letter postage on drop letters; to the Committee on the Post Office and Post Roads.

5062. Also, petition of Francis T. Simmons & Co., importing glove merchants, 320 South Franklin Street, Chicago, Ill., urging a sales tax to take the place of the present system of taxation on business; to the Committee on Ways and Means.

5063. Also, petition of J. S. Madden, secretary and treasurer of the United States Customs Inspectors' Association, 450 Federal Building, Chicago, Ill., urging passage of House bill 15089, fixing the compensation of inspectors; to the Committee on Interstate and Foreign Commerce.

5064. Also, petition of Interstate Iron & Steel Co., 104 South Michigan Avenue, Chicago, Ill., urging passage of Senate bill 4204, relating to interference with commerce; to the Committee on Interstate and Foreign Commerce.

5065. Also, petition of American Farm Bureau of Federation, 1411 Pennsylvania Avenue, Washington, D. C., urging the Muscle Shoals appropriation; to the Committee on Appropriations.

5066. Also, petition of American Association of State Highway Officials, Richmond, Va., urging that Congress should extend the provisions for Federal assistance to the States, and should therefore pass House bill 14905; to the Committee on Roads.

5067. Also, petition of Herman H. Hetler Lumber Co., 2601 Elston Avenue, Chicago, Ill., urging that there is no justification for a duty on rough lumber; to the Committee on Ways and Means.

5068. Also, petition of Tonk Manufacturing Co., 1912 Lewis Street, Chicago, Ill., urging appropriation for continuing the work of the forest products laboratory at Madison, Wis.; to the Committee on Appropriations.

5069. Also, petition of Juliet F. Goodrick, 1210 Astor Street, Chicago, Ill., protesting against the granting of water-power rights in the national parks; to the Committee on Water Power.

5070. Also, petition of Morden Frog & Crossing Works, Chicago, Ill., by Irving T. Hartz, urging that Congress direct the Treasury to honor interstate commerce certificates, thus releasing large sums, enabling railroads to pay for supplies purchased and also to resume buying; to the Committee on Interstate and Foreign Commerce.

SENATE.

WEDNESDAY, *January 19, 1921.*

(Legislative day of Tuesday, January 18, 1921.)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

MEMORIALS OF WYOMING LEGISLATURE.

Mr. WARREN. Mr. President, I ask that the memorial of the Legislature of Wyoming, which I send to the desk, may be printed in the RECORD and referred to the Committee on Interstate Commerce.

The memorial was referred to the Committee on Interstate Commerce and ordered to be printed in the RECORD, as follows:

THE STATE OF WYOMING,
Office of the Secretary of State.

UNITED STATES OF AMERICA,
State of Wyoming, ss:

I, W. E. Chaplin, secretary of state of the State of Wyoming, do hereby certify that the annexed copy of enrolled Senate joint memorial No. 1, of the sixteenth legislature of the State of Wyoming, has been carefully compared with the original, filed in this office, and is a full, true, and correct transcript of the same and of the whole thereof.

In testimony whereof, I have hereunto set my hand and affixed the great seal of the State of Wyoming.

Done at Cheyenne, the capital, this 14th day of January, A. D. 1921.

[SEAL.]

W. E. CHAPLIN,
Secretary of State.
By H. M. LYMANN,
Deputy.

Enrolled joint memorial 1, Senate, sixteenth Legislature of the State of Wyoming, memorializing Congress to enact into law the so-called "French-Capper truth in fabric bill."

Be it resolved by the Senate of the State of Wyoming (the House of Representatives concurring), That the Congress of the United States be memorialized as follows:

Whereas shoddy made from rags absorbs a large part of the legitimate demand for virgin wool; and

Whereas the general public is deceived thereby at the expense of both the consumer and the producer, to the great profit of the manufacturers of shoddy goods; and

Whereas the term "all wool" has become a means of deception and fraud: Be it

Resolved, That the Congress of the United States be urged to enact the so-called French-Capper truth in fabric bill; be it further

Resolved, That a certified copy of this joint memorial be sent to each of the members of the congressional delegation of this State in Congress, and to the chairmen of the committees in Congress to which this bill has been referred, with the request that they employ their best efforts to secure the speedy enactment of this measure into law.

W. W. DALEY,
President of the Senate.
L. R. EWART,
Speaker of the House.

Mr. WARREN. I ask that the joint memorial of the Legislature of Wyoming, which I sent to the desk, may lie on the table and be printed in the RECORD.

The memorial was ordered to lie on the table and to be printed in the RECORD, as follows:

THE STATE OF WYOMING,
Office of the Secretary of State.

UNITED STATES OF AMERICA,
State of Wyoming, ss:

I, W. E. Chaplin, secretary of state of the State of Wyoming, do hereby certify that the annexed copy of enrolled house joint memorial No. 1 of the sixteenth Legislature of the State of Wyoming has been carefully compared with the original filed in this office and is a full, true, and correct transcript of the same and of the whole thereof.

In testimony whereof I have hereunto set my hand and affixed the great seal of the State of Wyoming.

Done at Cheyenne, the capital, this 14th day of January, A. D. 1921.

[SEAL.]

W. E. CHAPLIN,
Secretary of State.
By H. M. LYMANN,
Deputy.

Enrolled joint memorial 1, House of Representatives, sixteenth Legislature of the State of Wyoming.

Be it resolved by the House of Representatives of the State of Wyoming (the Senate concurring), That the Congress of the United States be memorialized as follows:

Whereas the producers of live stock, wool, and farm products are today facing almost certain financial ruin, owing to the demoralization of the markets for their products, coupled with the unprecedented high cost of production of those products; and

Whereas this condition has been brought about largely by the dumping upon our markets of cheaply produced foreign products; and

Whereas this influx of foreign products has been greatly accentuated by the rates of foreign exchange, which, in effect, have placed a bonus upon such importations; and

Whereas the continued production of live stock, wool, and farm products is so seriously threatened by these conditions that an emergency exists that is without parallel in the history of this country: Therefore be it

Resolved, That the Congress of the United States be earnestly urged to enact without delay the so-called Fordney emergency tariff bill now pending; be it further

Resolved, That the Congress of the United States be urged to provide that in the collection of customs duties the customs authorities shall be directed to compute such duties upon the basis of the normal rate of exchange; be it further

Resolved, That a certified copy of this joint memorial be sent to each of the members of the congressional delegation of this State in Congress, to the chairmen of the committees in Congress to which these measures have been referred, and to the President of the United States, with the urgent request that they employ their best efforts to secure the immediate enactment of these measures into law.

W. W. DALEY,
President of the Senate.
L. R. EWART,
Speaker of the House.

Mr. WARREN. I also present on behalf of my colleague [Mr. KENDRICK] identical resolutions of the Legislature of Wyoming, and they will take the same course as those which I have presented.

REPUBLICS OF HAITI AND SANTO DOMINGO.

Mr. JOHNSON of California. I ask permission to submit a resolution for reference to the Committee on Foreign Relations.

The resolution (S. Res. 428) was read and referred to the Committee on Foreign Relations, as follows:

Resolved, That the Committee on Foreign Relations be, and it is hereby, authorized to investigate all the circumstances attending the participation of Americans, either civilians or members of the Military or Naval Establishments, in the governmental affairs of the Republics of Haiti and Santo Domingo.

DISTRICT OF COLUMBIA APPROPRIATIONS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 15130) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1922, and for other purposes.

The VICE PRESIDENT. If there are no further amendments as in Committee of the Whole, the bill will be reported to the Senate.

The bill was reported to the Senate as amended.

The VICE PRESIDENT. The question is on concurring in the amendments.

The amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

Mr. PENROSE. I move, with a view to making it the unfinished business, that the Senate proceed to the consideration of the bill (H. R. 15275) imposing temporary duties upon certain agricultural products to meet present emergencies, to provide revenue, and for other purposes. I make the motion, of course, with the understanding that the bill will be laid aside for the consideration of appropriation bills.

Mr. ROBINSON. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Glass	McCormick	Sheppard
Ball	Gooding	McCumber	Sherman
Beckham	Gronna	McKellar	Simmons
Calder	Hale	McLean	Smith, Md.
Capper	Harris	McNary	Smoot
Colt	Harrison	Moses	Spencer
Culberson	Heflin	Nelson	Sutherland
Curtis	Henderson	New	Swanson
Dial	Johnson, Calif.	Overman	Townsend
Dillingham	Jones, Wash.	Page	Trammell
Edge	Kellogg	Penrose	Underwood
Fletcher	Keyes	Phipps	Wadsworth
France	King	Pittman	Warren
Frelinghuysen	Knox	Poindexter	Williams
Gay	La Follette	Pomerene	Willis
Gerry	Lodge	Robinson	

Mr. LA FOLLETTE. I was requested to announce that the Senator from Maine [Mr. FERNALD], the Senator from New Mexico [Mr. JONES], the Senator from Missouri [Mr. REED], and the Senator from Massachusetts [Mr. WALSH] are engaged on business of the Senate in attendance upon a meeting of the Committee on Manufactures.

The VICE PRESIDENT. Sixty-three Senators have answered to the roll call. There is a quorum present.

Mr. HARRISON. Mr. President, this morning I got into the Chamber two minutes late. I came straight from a meeting of the Committee in Immigration, at which we were considering the immigration bill. I had served notice in the Senate that there were three or four amendments which I desired to offer to the District of Columbia appropriation bill, two of which, I think, were pending. They were only pending and not offered, because we were trying to get through with the committee amendments first. The Senator from Utah [Mr. KING] has some amendments that he wishes to propose.

I wish to say to the Senator from Kansas [Mr. CURTIS] that I have no desire to delay the bill to-day. One of the amendments that I expect to offer is, in my opinion, very necessary for the welfare of the District. It is to provide some school buildings. I move to reconsider the vote by which the bill was passed, and I hope the Senator from Kansas will not object to a reconsideration.

Mr. CURTIS. I judged from the action yesterday that Senators on the other side were simply delaying, desiring to kill all the time they could, but if the Senator from Mississippi states that he has two amendments which he desires to offer in good faith I will consent to a reconsideration.

Mr. HARRISON. There may be two or three amendments. I will say to the Senator, as to his suggestion with reference to yesterday, that I occupied the floor yesterday not over 40 minutes at most, and I discussed the community-center amendment which was before the Senate. It was a matter with reference to which there was some very sharp debate, and I can not understand why the Senator makes the suggestion.

Mr. PENROSE. Mr. President, I understood that I had a motion pending to proceed to the consideration of the so-called emergency tariff bill, but if the Senator from Mississippi states to the Senate that owing to being a few seconds late in entering the Chamber he failed to have an opportunity to address himself to the bill making appropriations for the expenses of the District of Columbia, and now moves to reconsider the vote by which that bill was passed, I feel that I owe him the courtesy of withholding my motion until his motion can be acted on.

Mr. HARRISON. I thank the Senator.

Mr. PENROSE. But I wish it understood that at the earliest opportunity and at every opportunity I intend to press my motion until the emergency tariff bill becomes the unfinished business of the Senate.

The VICE PRESIDENT. Is there any objection to the motion of the Senator from Mississippi? The Chair hears none. The vote whereby the bill was passed is reconsidered, the vote whereby it was passed to a third reading is reconsidered, and the bill is now in the Senate and open to amendment.

Mr. KING. Mr. President, I called attention in a few general remarks a day or two ago to communications which I have received concerning certain features of the bill. Statements were made to me that the appropriation carried in this bill is too large and that provisions are made for entirely too many employees. Conformable to the information which has been conveyed to me, I move, on page 6, line 8, to strike out the word "four" and insert the word "two," so that it will read: "two assistant engineers at $1,200 each."

The VICE PRESIDENT. The proposed amendment will be stated.

The ASSISTANT SECRETARY. On page 6, line 8, where the bill reads "four assistant engineers at $1,200 each," it is proposed to strike out the word "four" and insert in lieu thereof the word "two."

Mr. CURTIS. If the Senator from Utah will turn over to the subcommittee or to the conferees on the part of the Senate the letter which he has in reference to these employees and others, I will have no objection, so far as I am personally concerned, to consenting to the amendment, in order that we may take it to conference. I wish to add, however, that the committee went very carefully into all these estimates for places and only allowed such as the District Commissioners made a showing that they needed; in fact, we did not give them nearly as many as they estimated for.

Mr. KING. Let me say to the Senator that I read the testimony, and while not desiring to criticize the District Commissioners, I will say very frankly that their testimony was not convincing or impressive. They seem to be guided by the same spirit and actuated by the same desire as other departmental heads who appeal to Congress for appropriations. There was not, as I read their statements, that apparent spirit of cooperation, that earnest desire for economy, which should manifest itself in the requests for appropriations, particularly at this time when the people are groaning beneath the burdens of taxation. The Senator knows that the estimates which have been transmitted by the heads of departments and by bureau chiefs have exceeded what Congress has thus far indicated it will allow not by millions, but by hundreds of millions of dollars; indeed, as I recall, at the last session the estimates of the various departments exceeded by more than $1,000,000,000, the amount which was finally appropriated by Congress. It has become a part of the established practice of the executive departments of the Government to swell the estimates which they transmit to Congress as the basis for appropriations to the extent of millions and hundreds of millions of dollars. One of the chief arguments in favor of the budget bill arises from the fact that the heads of the departments, the bureau chiefs, and the executive agencies of the Government seem utterly oblivious to the law and to matters of economy and problems of taxation and revenue. Their chief concern in too many instances is to secure enormous appropriations and to obtain authority to extend their authority and activities. There is but little regard for the taxpayers and no interest in conserving the Treasury.

Mr. CURTIS. Mr. President——

Mr. KING. I yield to the Senator.

Mr. CURTIS. I wish to add that the commissioners estimated for increases in the case of 43 employees in the branch of the service referred to; but the Senate subcommittee and the full committee refused to allow the increases.

Mr. KING. That shows, Mr. President, the lack of merit upon the part of the contention of the commissioners. We have here a provision for the care of District buildings, for which a large sum is appropriated and a large number of employees are allowed by existing law; but, notwithstanding that fact and notwithstanding the fact that the Treasury faces a deficit of $2,000,000,000, the Senator from Kansas has called attention to the action of the commissioners in asking for 43 additional employees for one small agency of the municipal government.

Mr. CURTIS. I beg pardon. I meant that the commissioners asked for increases of salary in the case of 43 employees.

Mr. KING. For how many additional employees have they asked?

Mr. CURTIS. They have asked for no additional employees, but have asked for 43 increases in salary.

Mr. KING. I understood that they desired additional employees. It appears, however, that the demand is for increased compensation for a large number of employees in this branch of the service. But let me ask the Senator from Kansas if it is not a fact that the District Commissioners have asked for a large number of additional employees in numerous departments of the District government?

Mr. CURTIS. In other parts of the bill they asked for a number of additional employees, which were refused by the Senate committee.

Mr. KING. I am glad to learn that the committee denied such request. The fact, however, is patent that the commissioners have asked for nearly or quite $7,000,000 more than were appropriated for 1920 or 1921. It is unfortunate that there should have been displayed by the District officials such a spirit of "spending" and so little concern for the taxpayers of the District and the country. There can be no justification for such demands in the face of the financial depression now existing and the bankrupt condition of the United States Treasury. As proof of the fact that appropriations for the District have been generous, if not extravagant, during the war period and since let me invite attention to the appropriations which have been made for a number of years. And notwithstanding these large appropriations the officials of the District supply estimates and make demands for millions more. It would be well for business men and taxpayers to more often be named for Commissioners of the District.

In 1881 the appropriations for the District were $3,425,000 plus, and in 1882 they were $3,379,000 plus. In the same year the appropriations for the entire expenses of the Government amounted to but $332,791,000 and to $361,000,000 plus for 1882.

In 1883 Congress appropriated for the District $3,496,000, and in 1884 $3,505,000 plus. The entire expenses of the Government in the last-named year were only $349,000,000 plus.

In 1885 the appropriations for the District were $3,594,000, and in 1886 $3,622,000. I am omitting the odd figures. The grand total of the expenses of the Government for 1885 was $306,000,000, and for 1886 $344,000,000.

In 1887 there were appropriated for District purposes $3,721,000, and for 1888 $4,284,000, while the expenses of the Government for the last-named year were only $365,000,000.

We appropriated for the District in 1889 the sum of $5,056,000, and in 1890 $5,682,000, while in the last-named year the entire expenses of the Government were only $395,000,000.

In 1891 there were appropriated for District purposes $5,762,000; in 1892 there were appropriated $5,597,000, while the entire expenses of the Government for 1891 were only $463,000,000.

In 1893 the District appropriations aggregated $5,317,000; in 1894 they amounted to $5,413,000, while the expenses of the General Government for the same year were only $519,000,000.

In 1895 Congress appropriated $5,444,000 for the District, and in 1896 $5,745,000, while in the last-named year the expenses of the Government were only $496,000,000.

In 1897 the sum of $5,900,000 was appropriated for District purposes; the next year there were appropriated for District purposes $6,186,000, while the Government expenses for the last-named year totaled but $528,000,000.

In 1899 there was an appropriation of $6,426,000 for the District, and in 1900 an appropriation of $6,834,000. The expenses of the Government for the last-named year were $698,000,000.

In 1901 the appropriations for the District were $7,577,000; in 1902 they were $8,502,000, while the expenses of the Government rose until they totaled $780,000,000.

In the Fifty-seventh Congress, in 1903, $8,544,000 were appropriated for District purposes, and in 1904 $8,038,000. For the last-named year the expenses of the Government were $752,000,000.

In 1905 $11,000,000 were appropriated for District purposes, and in 1906 $9,801,000. Evidently Congress perceived that some retrenchment was necessary, and in 1906 they reduced the appropriations for the District by considerably more than $1,000,000. The entire appropriations for the Government in 1906 were $818,000,000.

In 1907 the District received $10,232,000, and in 1908 $10,440,000, while the expenses of the Government reached the high mark of $919,000,000.

In 1909 there were appropriated for District purposes $10,000,000, and in 1910 $10,699,000. In each of those years, 1909 and 1910, the expenses of the Government exceeded $1,000,000,000. Senators will recall the resentment manifested throughout the United States when Congress appropriated a billion dollars for one year's expenses of the Government. There was much criticism of the "billion-dollar Congress." Economists and serious students of the administration of the General Government demonstrated that there was waste and extravagance upon the part of the officials of the United States and that reforms were imperative. It is to be regretted that the people do not insist most earnestly on economy in all governmental affairs. They are often roused by the bold raids upon the Treasury, and the realization that they are being plundered by recreant officials, but after the tempest of their wrath has passed they slumber and the raids are repeated.

In 1911 the District received $10,608,000, and in 1912 $12,000,000, while the expenses of the Government continued to be over a billion dollars, the exact amount for 1912 being $1,022,759,948.52.

In 1913 the District of Columbia received $10,675,000, and in 1914 $11,383,000, while the total expenses of the Government were $1,098,000,000 for the last-named year.

Mr. President, in 1917 there were appropriated $12,841,000 for the District, and in 1918, when we were at war, when there ought to have been economy practiced in all branches of the Government, $14,172,000 were given the District. The total expenses of the Government for that year, including the stupendous sums appropriated for war purposes, amounted to $18,892,000,000.

In 1919 there was appropriated for the District $15,000,000, and in 1920 $15,364,000.

Mr. President, I doubt whether we can defend the large appropriations for 1919 and 1920, in view of the condition of the Treasury and the heavy burdens placed upon the backs of the taxpayers of the United States. Instead of retrenchment in the departments of the Government, there were increased expenditures—I was about to remark that there were increased extravagances. The era of profligate expenditures had not ended. Thrift and economy were not virtues possessed or followed by individuals or by the Federal Government. Speculation was rife and prudent counsels were ignored. We are now reaping some of the harvests of those evil days, and the full payment for our follies has not yet been made. Then in 1920–21 we were presumed to be getting back to prewar conditions and seeking to readjust the economic conditions of our country, but we increased the appropriations for the District over those of the preceding year, which were $15,000,000, to $18,373,000. For that year the expenses of the Government totaled $4,780,000,000.

Now, for the fiscal year 1922 the House has increased the District appropriation for 1921 by more than $1,000,000. For the fiscal year 1921, as stated, the appropriation for District purposes was $18,373,000. As the District bill for 1922 came from the House it carried items which aggregate $19,807,012.99. As I understand the report submitted by the Senate Committee on Appropriations on the pending bill, there is a net decrease reported amounting to $66,349.13. So that, reading from the report of the committee, the "amount of the bill proper as reported to the Senate is $19,740,663.86." The committee report contains this language:

> Increase recommended by Senate committee for emergency items to be paid one-half from the surplus revenues of the District of Columbia, $2,276,500.

So that the amount of the bill as reported to the Senate is $22,017,163.86.

The report also contains this language:

> Amount of estimates for 1922, regular and supplemental, $25,039,044.99.

And the committee states that—

> The bill as reported to the Senate is less than the regular and supplemental estimates for 1922, $3,021,881.13.

Mr. President, the figures which I have just read show the tremendous increase in appropriations for the District of Columbia. We are now asked to appropriate for the fiscal year ending June 30, 1922, more than $22,000,000 for the District, whereas a few years ago the appropriations were four, five, six, and seven millions of dollars.

I appreciate the heavy responsibility which rests upon the majority party in Congress. They are expected to control legislation and determine national policies. They will be held accountable for the extravagance in the Government and the mistakes in administration. For bad laws and bad government the Republican Party will be responsible.

The burden rests upon the majority to adopt a plan which will save the Nation from heavier taxation and bond issues. Indeed, it is the imperative duty of the Republican Party to reduce expenses and tax burdens. Our friends have had control of the legislative branch of the Government for nearly two years, and should have reduced taxes and effectuated reforms in the departments. There will be no solving of the financial situation unless there is manifested upon the part of the majority of the Senate and the House a spirit of retrenchment

and economy not thus far exhibited in the bills which have been reported. The Democrats desire to aid the party in power in lightening the burdens of the people and in reducing the expenses of the Government. We now appeal to our friends upon the other side of the Chamber to join with us in working out reforms and reducing the appropriations for the coming year.

Mr. President, this is not a partisan matter. I am not now charging that the Republicans are more extravagant than were the minority. As a matter of fact, I have perhaps offended Democrats by my criticism of the conduct of some alleged Democrats who have held positions of responsibility under Mr. Wilson.

They have not been provident and economical, and their mistakes are reacting upon the entire party. I am anxious that we shall relieve the people of the United States of the pressing burdens of taxation resting upon them. I should like to see the excess-profits tax modified materially, if not repealed, and the revenue laws so modified that the needs of the Nation could be met without effort or strain by the people; but I ask Senators how this is going to be done if we continue to make these enormous appropriations, the evidence of which is found in the bill now under consideration. If we increase appropriations, it is manifest that we can not decrease taxes, and the amount of taxes now derived by the Government is inadequate to meet the expenses of the Government. Therefore, there must be retrenchment and reform and a reduction in the expenses of all executive branches of the Government; and it rests upon the Appropriations Committee, difficult though the task may be, to cut down these expenses and to report bills that will carry in the aggregate for the next fiscal year not to exceed $3,000,000,000. If the Appropriation Committees fail to enforce economies, where may we look for guidance and safety?

But this bill is larger than any measure ever reported for the District. In this hour of depression and financial darkness the committee reports a bill carrying more than $4,000,000 in excess of the appropriation for 1918.

I was interested in the statement submitted a few days ago of the Senator from North Dakota [Mr. McCUMBER]. He lifted his voice against the saturnalia of extravagance now found in the Government, and warned the country of the peril threatening the financial integrity of the United States. He called attention to the fact that there would be a deficit of more than two billions of dollars for the current year. How are we to meet that deficit? As we are now proceeding and appropriating money the deficit will be augmented instead of reduced.

There will be more than $2,000,000,000 of deficit; yet, Mr. President, I believe that every day Senators receive numerous communications complaining of the high taxes and praying for relief from the burdens, so onerous and heavy, which press down upon them. I appeal to the Republican side of the Chamber in the interest of economy. I feel sanguine that this side of the Chamber will join with them in cutting these expenses to the lowest possible limit, to the end that the deficit which is inevitable may be reduced to the smallest possible proportions and the Nation relieved from the necessity of issuing bonds in time of peace to meet the ordinary expenses of the Government.

A few years ago, under a Democratic administration, it was charged that bonds were issued in time of peace. It is true that the issue was small; but we shall be compelled, unless taxes are increased, to issue bonds to the extent of more than $2,000,000,000. If we do not issue bonds, we shall be compelled to issue temporary obligations of the Government in order to raise funds to meet the daily expenses of the Government.

In my opinion, Mr. President, this bill should be reduced at least $2,000,000,000; and after I shall have tendered a number of amendments I shall offer a motion to recommit the bill—I shall not debate it, but shall ask for an immediate vote—to the Committee on Appropriations, with instructions to report it back with a reduction of at least $2,000,000.

I see no reason, in view of the conditions of the country and in view of the conditions of the Treasury, why we should increase this year the appropriations for the District.

Mr. CURTIS. Mr. President——

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from Kansas?

Mr. KING. I yield to the Senator.

Mr. CURTIS. The Senator realizes that for the years during the war the appropriations for the District of Columbia were very, very greatly reduced. Many improvements that they needed were not given them for that reason. I desire to state, in behalf of the Senate committee, that notwithstanding the thorough investigation made a year ago by the House, when the bill came to the Senate your Senate committee reduced the appropriations—the first time a House appropriation bill had ever been reduced by the Senate—and in this bill, so far as the principal bill is concerned, we again reduced it; and the separate section was put in as a matter for the consideration of the Senate, in order to use for necessary purposes the surplus that is now in the Treasury to the credit of the District of Columbia.

Mr. KING. Mr. President, I think my friend the Senator from Kansas is slightly in error, and yet I always bow to him in a discussion of matters that come from the Appropriations Committee. As I understood the Senator, he stated that during the war the appropriations were greatly reduced.

Mr. CURTIS. No; I did not mean that. What I meant was that we refused to give them the estimates for real and necessary improvements. Why, the streets of this city were neglected until, as the Senator knows if he went over them in automobiles, they were in a disgraceful condition.

Repairs were delayed; the usual amount was not appropriated because of the war and war prices, and the streets got in such condition that last year and this year something had to be done. There were no new school buildings erected. Last year we had to authorize the erection of a lot of school buildings, and this year we are providing for the completion of those buildings that were authorized a year ago.

Mr. KING. Mr. President, I have heretofore called attention to the appropriations for preceding years; but in view of the statement made by the Senator, permit me to recur to the appropriations made for a few years last past.

In 1913 the appropriation for all District purposes was $10,679,000. In 1914 it was $11,383,000. We are asked now to more than double the appropriations that were made for District purposes in 1913 and 1914. In 1915 the appropriations, as I have heretofore stated, were $12,000,000; and in 1916, before we entered the war, the appropriations for District purposes were only $11,589,000. I believe that in 1913, 1914, 1915, and 1916 the appropriations for District purposes were not only adequate but extremely liberal, and they permitted extensive municipal improvements.

In 1917, the year we entered the war, the appropriations were $12,841,000, and in 1918 we appropriated $14,172,000. In 1919, as I have stated, we increased that amount by nearly $1,000,000, and in 1920 we increased the appropriation over 1919 by approximately $300,000, the aggregate being $15,364,000. In 1921 we jumped from that figure to $18,373,000.

Mr. President, there has been no niggardly policy pursued by Congress toward the District. There was no reduction of appropriations because of war activities.

Mr. CURTIS. Mr. President, the Senator insists on misconstruing what I said. I said we refused to give the estimates of the District Commissioners, for this reason: If you will take the estimates and the appropriations, you will find that the amount they asked for was not appropriated.

Mr. KING. I apologize if I misinterpreted the position of my friend. I certainly did not desire to do so, and I meant merely to state that the Government, notwithstanding we were at war, did not reduce the appropriations below the peace years, but, upon the contrary, increased them.

The Senator said that appropriations were not made to the limit recommended or estimated for by the District Commissioners. I concede that. Mr. President, my friend knows that his party has denounced in unmeasured terms the action of the executive bureaus and departments in making estimates which were so entirely disproportionate to the amounts actually needed or the benefits which would result to the Government from the appropriations sought; and I am not saying this by way of criticism. I approve of their attitude in that respect. It is absolutely impossible, as Republican Senators and Representatives have repeatedly said—and I approve of their statements—to curb the avariciousness of the executive departments. If we appropriate a million, the heads of the departments and the executive agencies of the Government immediately demand a million and a half, and if we grant the demand they are not satisfied until they get two million.

There is no satisfying the desires of the executive agencies of the Government for appropriations from the Treasury of the United States, and those agencies are as deaf to the pleadings of the people for relief from the burdens of taxation as the inanimate objects around us. They have no more concern, apparently, for the condition of the Public Treasury than if they lived on the island of Yap, or in Tahiti.

Mr. McCORMICK. Mr. President, will the Senator repeat that geographic expression?

Mr. KING. I welcome my distinguished friend to our midst again, and I am sure that in his journey overseas he has learned much more of geography than I know. Mr. President, I stated that some of the executive departments which were making

UMI

these great demands for appropriations seem to have no more concern for the condition of the Treasury of the United States than if they were inhabitants of the island of Guam, or Yap, or lived at Tahiti.

Mr. President, it is unfortunate that there should not be more of a spirit of cooperation upon the part of the executive officials of the Government with Congress, more of a purpose to understand the condition of the Treasury, and to make their estimates with reference to the burdens which rest upon the people. Instead of that, I repeat, nearly every Government agency, if not all executive departments of the Government, make demands for appropriations greatly in excess of their needs and greatly in excess of what the condition of the Treasury would warrant.

Mr. President, I can not understand the apathy which exists in the country to-day upon the part of men in public life when we mention the fact that we are confronted with a deficit of $2,000,000,000. Before the hysterical condition which the war developed existed the thought of a deficit of two or three hundred million dollars would have provoked deep concern; indeed, it would have aroused profound resentment in every part of the United States. Yet Senators talk about a deficit of $2,000,000,000 as if it were an unimportant matter. When they mention it and inquiries are directed to the means by which that deficit shall be met there is silence which bespeaks unconcern. The distinguished Senator from Pennsylvania [Mr. PENROSE] is with us this morning, and he announced a moment ago that a bill which has just been reported from the Finance Committee is to be pressed for consideration. We are, of course, delighted that the distinguished Senator, the chairman of the Committee on Finance, is with us discharging his duties as a Senator in the able manner which has always characterized his activities in this body. But, Mr. President, will that bill, if it shall be enacted into law, increase the revenues of the United States? Manifestly not. Concede, for the sake of the argument, that the emergency tariff bill which is now before us, shortly to be considered, should supply some revenue, it is obvious that the amount to be derived from it will be inconsequential. If I interpret the emergency tariff bill aright, its purpose is to cut off imports rather than to raise revenue to meet the expenses of the Government.

Mr. President, are we to adopt new theories of political economy? Some of our statesmen and public writers are now announcing to the world that we can be a great exporting nation and yet not be an importing nation; that we can have prosperity by being a selling nation, and a selling nation exclusively. It might be wise, Mr. President, to declare by formal resolution or enactment that the United States of America is to continue to be a rich and powerful nation by selling to all peoples of the world and refusing to buy from any of the peoples of the world, and that all who purchase from the United States must pay for their commodities and products obtained with gold.

Mr. President, to recur to the question before us, the appropriations made for 1919 and 1920, $15,000,000 each year, are now to be increased by approximately $7,000,000. Cities everywhere in the United States are crying out for retrenchment, reform, reduction of expenses. I noticed the other day that in the city of New York it was announced that the Republican governor intended to effectuate financial reforms, and attention was called to the fact that there were more than 10,000 offices, created quite recently, which were deemed unnecessary.

As soon as Gov. Miller announced his policy of reform, the politicians, the officeholders, the great army of employees of the State, their friends, and all whom they could influence, began to besiege the executive mansion and to direct all influences at their command against the governor and against the policy of reform which he advocated. May I be permitted to say to my Republican friends who may have their lightning rods up for the Presidency four years or eight years from now, that they must keep their eyes upon Gov. Miller, of New York. If he carries out his policies of reform, his State and other States will demand that he be the standard bearer of the Republican Party.

What reason is there, Mr. President, for increasing the appropriation for the District from $15,000,000, as it was in 1919 and 1920, to $21,000,000 or $22,000,000 now, in this period of depression, when we are attempting everywhere to economize and to get back, in the language of the President elect, to normalcy? Certainly we want to get back to a condition of sanity in public expenditures. We want to reach a condition where we can accept it as a fact that the money which we spend has to be wrung from the earnings of the people. As the Senator from Mississippi said in his eloquent speech day before yesterday, whenever a dollar drops into the till of the Treasury we know that that dollar has been taken from the pockets of the wage earners and of those who toil and labor in our land.

I see no reason, Mr. President, for this great increase to $22,000,000 for the current year. It is too much to appropriate for the District. The condition of the Treasury forbids it, and the condition of the District not only does not demand but does not warrant or justify this amount.

Mr. President, I sincerely hope that there may be stricken from this bill a number of items, to which I shall call attention. I wish the Senate would recommit the bill for the purpose of having the committee go through it again, and prune it, and reduce it at least $2,000,000; and even then, Mr. President, it would exceed the appropriations for 1920 by four or five million dollars, and the appropriations for 1921 by the same amount.

Mr. President, I will ask the Senator from Kansas whether he will resist the amendment which I suggested a moment ago?

Mr. CURTIS. I stated to the Senator that if he would turn over to me the letter he has from one of the officials of the city, as I understood it, giving information that these clerks are not necessary, I would accept the amendment, so far as I could personally, and would take it to conference. But I want the letter the Senator showed me yesterday, so that I may have something to submit to the conferees. I think the matter is entitled to an investigation. I am sorry it was not brought to the attention of the subcommittee while we were in session. If it had been, we would have looked into it very carefully.

Mr. KING. I stated to the Senator that I would gladly give him a copy of the letter, and I will hand him the original whenever he desires. The letter does not specify the particular clerks in any of these departments who should be separated from the service.

Before I conclude I wish to call attention to a letter which I have received from a gentleman who is thoroughly familiar with conditions in the District. It is insisted that in the assessor's office the number of clerks is entirely too great. The writer refers to the fact that there are five field men carried at $2,000 each per annum who are unnecessary.

Mr. CURTIS. We went very thoroughly into the question, and we find that they asked for an additional number of field men because they had over 41,000 personal property lists or statements to look into, and they claimed that they needed more inspectors because of conditions which were created by the law of two years ago placing a tax on intangible property.

Mr. KING. May I ask the Senator if the amendments which I am about to tender, most of which are in conformity with information which I have received, are not offered by me, and the conference committee is advised of the criticisms made and are convinced that there ought to be reductions, would they have the authority to make them?

Mr. CURTIS. No; under the rule we can not change the bill as it passes the House and the Senate. There would be nothing in conference.

I may add that in one place we reduced the number of employees from three to two because we found after investigation that they had more in that branch than were really needed. The committee went into the matter very carefully, particularly that part having to do with the assessor's office.

Mr. KING. Will the Senator consent to do this? I do not wish to delay or take up time and yet I feel constrained to offer a number of amendments. Will the Senator permit me to offer these amendments and have them adopted pro forma, with the understanding that if the committee, upon investigation, shall find that they ought not to be allowed, the conferees will disagree to them.

Mr. CURTIS. I will state to the Senator that so far as I am personally concerned that is satisfactory and I presume the Senate will adopt them. I am very anxious to get a vote on the bill.

Mr. KING. I shall run through a few of the amendments very hurriedly. I will state to the Senate that I have had no opportunity to go into the departments and make the investigations necessary to enable me to determine whether or not the reductions should be made. I am acting upon information which has been conveyed to me.

The VICE PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Utah, on page 6, line 8, to strike out "four" and insert "two."

The amendment was agreed to.

Mr. KING. On page 7, line 15, under the subheading "Personal tax board," I move to strike out the words "2 clerks at $1,200 each."

The amendment was agreed to.

Mr. KING. I suggest to the Senator from Kansas that amendments should be made in the totals, changing them to the correct amounts.

Mr. CURTIS. I ask unanimous consent that the clerks at the desk be directed to change the totals to correspond with the amendments.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. KING. On page 7, line 18, under the subheading "License bureau," I move to strike out "two" where it reads "2 at $1,400 each," and insert in lieu thereof the word "one" and to strike out the word "each," so that it will read, "clerks—1 at $1,400," and so forth.

The amendment was agreed to.

Mr. KING. On page 7, line 20, under the subhead "License bureau," I move to strike out the words "assistant inspector of licenses, $1,000."

Mr. CURTIS. Does the Senator wish to retain the inspector of licenses at $1,200 or the assistant inspector of licenses at $1,000?

Mr. KING. My proposed amendment is to strike out "assistant inspector of licenses, $1,000."

The amendment was agreed to.

Mr. KING. Under the subheading "License bureau," on page 7, in line 21, I move to strike out the words "temporary clerk hire, $1,500."

Mr. CURTIS. I know from an investigation that that would be a very serious mistake, because they do need temporary employees in the rush period. The committee made a thorough investigation in that particular, because there was an effort made to get additional help. I hope the Senator will not insist upon that amendment.

Mr. KING. Not having adequate information to warrant me in contending for it, and in view of the statement of the Senator that investigation has been made, I withdraw the amendment.

I move, on page 7, line 25, under the subheading "Collector's office," to strike out the word "two" and insert in lieu thereof the word "one"; to strike out the word "cashiers" and insert the word "cashier"; and to strike out the word "each," so that it will read, "one assistant cashier, at $1,500."

The amendment was agreed to.

Mr. KING. For information I desire to inquire of the Senator having the bill in charge whether, under the provisions of the bill providing for street-cleaning division superintendents, there has been appointed a person bearing the title of superintendent of city refuse?

Mr. CURTIS. Not in the bill and not to the knowledge of the members of the subcommittee. Some one may have given that designation to some person employed in that branch of the service.

Mr. KING. I am advised that out of the lump sum that is appropriated $4,000 is paid to an individual who bears the title superintendent of city refuse; that the work which he is presumed to do ought to be done by the street-cleaning division; and that the supervision of that work should be conducted by the superintendent of the street-cleaning division; in other words, that a new office is created, not by statute but out of a lump-sum appropriation. I have looked through the bill, I will say to the Senator, and I do not find any provision making an appropriation for a superintendent of city refuse, but my information is that such a position exists and that it exists by authority of some District agency.

Mr. CURTIS. If that is true, it must be paid out of the $8,000 mentioned on page 12, in line 16, under the subheading "Surveyor's office," appropriated for services of temporary draftsmen, computers, laborers, and so forth. If the Senator desires to move to reduce that amount to $4,000, the conference committee can inquire into the matter to which he has referred.

Mr. KING. Accepting the suggestion of the Senator, which, I think, is better than my own idea, I move to amend as follows: On page 12, under the subtitle "Surveyor's office," in line 16, strike out the figures "$8,000" and insert in lieu thereof the figures "$4,000."

The amendment was agreed to.

Mr. KING. I now ask the attention of the chairman of the subcommittee to another matter. Criticism has been directed and communications have been made to me with respect to the item of asphalt and cement inspection, $2,400.

Mr. CURTIS. On what page?

Mr. KING. On page 9, in line 17, under the subtitle "Engineer commissioner's office," the item reading "assistant inspector, $1,500." May I inquire of the Senator whether those items were investigated? I observed that the Senator from South Carolina [Mr. DIAL] the other day, speaking with reference to some features of the bill, called attention to the failure of this department to make proper inspections.

Mr. CURTIS. We made a very careful investigation of the items in that section. I think they should stand as they are unless some further information is secured.

Mr. KING. I have heard criticism of a number of items in the provisions of the bill under the head of "Engineer commissioner's office." In order that the conferees may investigate the subject a little more fully, I shall offer several amendments.

On page 9, in line 17, I move to strike out the words "assistant inspector, $1,500."

The amendment was agreed to.

Mr. KING. May I make one further inquiry of the Senator? Some of the good people of the District have called upon me with respect to some of these matters, and I feel it my duty to call the attention of the committee to them. I have been asked why the District should not assume control over all the parks in the District, why there should be a divided responsibility, and not only a divided responsibility of these matters of which the District takes cognizance but a division between the District and the War Department.

Mr. CURTIS. I will state to the Senator that the subcommittee has had just about as much trouble with that question as has the Senator from Utah. We have had it up at every session of Congress for the last four or five years, not only in regard to parks, but bridges. We have tried to remedy it two or three times and the matter has gone into conference. The conferees, because of the attitude of the departments, have been unable to agree to the Senate amendments and the Senate has usually receded, because it has been carried that way for so many years. It is true that the parks are under the War Department and under the Commissioners of the District. As one member of the committee, I think they ought all to be under the jurisdiction of the Commissioners of the District of Columbia.

Mr. KING. I think the Senator is right. I agree with him.

Mr. CURTIS. I think the bridges should be treated likewise, but I believe that can be better worked out later on when we shall have more time than at this session. We have also made an effort to take the bridges out of the jurisdiction of the department and put them in the hands of the District Commissioners.

Mr. KING. I am reluctant to halt the consideration of the bill by a prolonged discussion of the matter or by offering further amendments, but I do sincerely hope that the Senator will take some steps to remove what I conceive to be a most glaring evil. If it is not done, I shall introduce a bill within the next few days transferring all bridges and parks and the entire park and street system in every particular to the District Commissioners. And I shall also provide that there shall be a consolidation of all agencies of the District that have to do with the parks and grounds and trees upon the streets.

Mr. HARRISON. May I ask the Senator from Kansas whether the parks are now under the jurisdiction of the War Department?

Mr. CURTIS. Not all of them. Some of the parks are under the jurisdiction of that department. I think they have jurisdiction over Rock Creek Park and perhaps one or two others. The little parks around through the District are under the jurisdiction of the District Commissioners, but some of the older parks are under the War Department.

Mr. HARRISON. The small parks in the city proper are under the jurisdiction of the District Commissioners?

Mr. CURTIS. Yes; all of them.

Mr. HARRISON. So there is no divided authority there?

Mr. CURTIS. No.

Mr. HARRISON. It may be that Rock Creek Park was placed under the jurisdiction of the War Department because they have a military road, or a great many roads, there that they have to maintain.

Mr. KING. I am not sure that I understood the Senator from Kansas. Do I understand that all the little parks and grounds are under the jurisdiction of the District Commissioners?

Mr. CURTIS. All the little parks, unless there might be some facing on the river, about which the committee has no information, which would be under the jurisdiction of the Engineer Division of the War Department. Those, if there are any such, and Rock Creek Park are the only ones I know of. All the other little parks throughout the city are under the jurisdiction of the District Commissioners.

Mr. KING. I have been advised, Mr. President, that that is not correct.

Mr. CURTIS. I am carrying this matter in my head; it has been some little time since my attention was directed to it, and I do not remember all the details with reference to it. We had the question as to the bridges and the parks under consideration, I remember, upon three different occasions, and we did settle the bridge question at the time, but we paid no attention at this session to the park question.

Mr. KING. Criticism has been made, let me say to the Senator, of the policy under which there are a number of heads with respect to the little parks and plots that are under the

jurisdiction of the city. For instance, there is one department which has merely to do with certain trees upon the streets. Then there is another division which looks after flower plots and grasslands. Instead of having the entire parking system and the streets, so far as the trees are concerned, under one head, an examination of the District regulations and of the ordinances and statutes will reveal that there are a number of heads, a number of divisions; that the responsibility is divided. There is no one person to whom we may go who has complete authority as the head of a department or of a bureau over all of the parks and grounds and trees within the District.

Complaints have been made that in the engineer commissioner's office there are unnecessary employees. I regret that I have not had time to make a personal investigation, so that I might submit amendments covering the matter.

Mr. CURTIS. Will the Senator from Utah give me the date of the letter which he has?

Mr. KING. It is dated January 4.

Mr. CURTIS. I wish simply to state that the committee was in session but received no such communication. It is a little strange that the gentleman who desired to make such a complaint would not send it to the committee, as we were then considering the bill, instead of sending it to a Senator not a member of the committee.

Mr. KING. I will state to the Senator that this is only one of a number of complaints which I have received in reference to the matter. There have been a number of individuals who reported to me the situation in many of the departments of the District, and they have alleged that there was inefficiency and needless employees.

If we are to retrench, there should be a reduction in the number of employees in the District, and a material dimunition of appropriations for improvements and other matters covered by the bill.

May I ask the Senator from Kansas what disposition was made of the item of $5,000 in lines 12, 13, and 14 on page 11?

Mr. CURTIS. That appropriation was reduced from $12,500 to $5,000. The District Commissioners asked for more than $12,500—my recollection is, they asked for $15,000—but the committee, after carefully investigating the matter and remembering for what purposes the money was to be used, thought $5,000 was sufficient.

Mr. KING. I regret that the committee did not report to strike it all out. I wish to move to strike the provision out; and, if it be necessary to enable me to do that, I will move to reconsider the vote by which the committee amendment in line 14 was agreed to.

Mr. CURTIS. If the Senator desires to move to strike out the entire provision, I do not think it necessary to move to reconsider.

Mr. KING. Very well. I move to strike out lines 12, 13, and 14 on page 11, which is the item of $5,000 for incidental and all other general necessary expenses.

The VICE PRESIDENT. Without objection, the amendment is agreed to.

Mr. KING. I move to strike out the entire provision on page 12 embraced in lines 14, 15, 16, and 17.

The VICE PRESIDENT. The amendment proposed by the Senator from Utah will be stated.

The ASSISTANT SECRETARY. On page 12 it is proposed to strike out lines 14, 15, 16, and 17 as amended, as follows:

> For services of temporary draftsmen, computers, laborers, additional field party when required, purchase of supplies, care or hire of teams, $4,000, all expenditures hereunder to be made only on the written authority of the commissioners.

Mr. CURTIS. The Senator will remember that on his motion an amendment was made to that provision. I hope he will let the provision remain. Surely some money is needed, and I think the appropriation of $4,000 should remain.

Mr. KING. Does the Senator from Kansas, from the investigation made, believe that the appropriation is required?

Mr. CURTIS. We are satisfied that the surveyor's office needs some money for the purpose indicated in the paragraph. Whether the entire sum of $8,000 is needed we could not say, but we thought they did need some money. They asked for more.

Mr. KING. In the light of the Senator's statement I withdraw the amendment.

I desire to inquire of the Senator as to the items under the head of "Free Public Library, including Takoma Park Branch," whether his investigation confirms the view that all the expenses provided for are necessary? On yesterday I was told by a gentleman that some of those items are unnecessary. I have no knowledge in reference to the matter myself.

Mr. CURTIS. We made a very thorough investigation of the subject, and if the Senator from Utah will examine the matter he will find that we reduced in one place the number of employees from three to two. We made an increase, on page 14, for extra services on Sundays, holidays, and Saturday half-day holidays because of the showing that was made. Really they have asked for a very great increase in the item. We gave the matter very careful consideration, and it was also very carefully considered in the other House. We believe that they need all that we propose to give them at this time, if not more.

Mr. KING. While the question is not germane to the matter under consideration, I should like to inquire of the Senator if he is familiar with the item which relates to the sale of some land owned by the District and used in connection with the Mott School?

Mr. CURTIS. Mr. President, there is an old school building there which has not been occupied for school purposes for years. Business has encroached generally upon the neighborhood where that building is located, and there are probably not a sufficient number of children in the locality to justify the erection of a new school building there. The commissioners asked the committee to authorize the sale of the building and to allow them to purchase another site.

The committee thought the safer plan to pursue was to authorize the sale of the building—and it can be sold now probably for more than can be obtained for it later on—and let the money go into the Treasury, and then let the Congress determine when a new site shall be purchased, where it shall be located, and how much the new building shall cost.

Mr. KING. A lady of the city who has given a great deal of attention to schools and to charitable work—a very estimable lady, so far as I know—this morning called my attention to that item, and stated that the land is needed for playground purposes. She stated that it would be a mistake to sell the property; but that a certain business—I do not care to name it, although I have the name here—has been for a long time anxious to obtain the ground. Without giving further the reasons assigned, she states that the sale of the property would be very improper.

Mr. CURTIS. Business adjoins the property on all sides, but I will state to the Senator that if he desires to move to strike it out I have no objection. I repeat, the building is not being used and has not been used for years either for playgrounds or for school purposes.

Mr. KING. I shall move to strike it out, but I say to the Senator now that I have no knowledge other than that communicated to me, and I shall be satisfied if the conferees will investigate to determine whether it is necessary, or in the near future may be necessary, for school purposes or for playgrounds. If so, it ought not to be sold, but if not it ought to be sold.

Mr. CURTIS. This is the second time the subject has been before the committee. The subcommittee went very carefully into the matter. Without getting out to look over the ground, we drove by it in an automobile and saw that business establishments are located close by. So we concluded that it would be best to sell the property and let the money be invested in some other part of the city where a new school building is needed. Certainly there is not going to be any very great need for a school building there, for business is bound to grow around it rather than private residences.

Mr. KING. Mr. President, I shall yield to the judgment of the Senator. I felt that it was my duty, in view of the strong statement made to me by the lady to whom I have referred, to call the attention of the committee to this matter. If the committee feels, after the full investigation which they claim to have made, that the sale of the property is proper, I shall defer to their judgment.

Mr. President, I invite the attention of the Senator to page 23, lines 6, 7, and 8, and I should like to ask whether the item of $285,000, which is stated as the total, has been reached as a result of a consideration of the specific items. Lump-sum appropriations are always objectionable, and unless there has been a complete itemization of all of the sums which total the large sum indicated, I shall move to amend.

Mr. CURTIS. The matter was carefully investigated. All of that money will come back after a while, when payments are made by the people who have to pay the assessments. The money is merely advanced.

Mr. KING. Does the information furnished to the committee show that an itemization was made of the sums which constitute the grand total?

Mr. CURTIS. It was estimated that the amount stated will be required to meet the assessments. I repeat, the money all comes back; it is simply advanced. If it is not all used, it goes back into the Treasury; and if it is used, it is then reimbursed by those who derive benefit from its use.

Mr. KING. Does the Senator make the same explanation with respect to the item of $575,000 appearing in line 16, page

27? Of course, it is clear that that amount will not be paid back by the contiguous property owners, but will be a direct charge upon the treasury of the District.

Mr. CURTIS. That item refers to repairs of streets and avenues. That money does not come back, but we went into the matter very carefully and found that that much at least, if not more, was needed. It is necessary for the District authorities to catch up with the street-repair work, which, as I stated a few moments ago, was neglected to a very great extent during the period of the war.

Mr. KING. Mr. President, there are a number of other items of which complaint has been made, but I have detained the Senate so long that I shall not trespass further upon its time.

Mr. SUTHERLAND. Mr. President, I offer the amendment which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The ASSISTANT SECRETARY. On page 32, after line 15, it is proposed to insert the following item:

The Commissioners of the District of Columbia are hereby authorized to investigate conditions affecting the existing contract for the collection and disposal of night soil in the District of Columbia during the first two years of the five-year contract ending June 30, 1923, with a view to determining whether any adjustment should be made in connection with a reported loss of $4,217 to the contractor, and to adjust the same if the facts disclose the necessity for such adjustment: *Provided*, That additional compensation, if any, paid as authorized herein shall not exceed the sum of $5,000 for the two years, which sum, or so much thereof as may be necessary, is hereby appropriated.

Mr. CURTIS. I make the point of order that that is not estimated for, and that it is a claim.

The VICE PRESIDENT. Those are two good reasons for sustaining the point of order.

Mr. HARRISON. Mr. President, on page 37, at line 20, I desire to offer an amendment changing the word "two" to "three."

The VICE PRESIDENT. The amendment will be stated.

The ASSISTANT SECRETARY. On page 37, line 20, under the heading of "Public schools," where it reads "two assistant superintendents," it is proposed to strike out "two" and in lieu thereof to insert "three."

Mr. HARRISON. And on line 21, after the word "superintendents," insert "one of whom shall be business manager."

Mr. CURTIS. Mr. President, I make the point of order that that is not estimated for.

Mr. HARRISON. I understood that it was estimated for.

Mr. CURTIS. There is an item estimated for an assistant superintendent, who shall be business manager.

Mr. HARRISON. Yes.

Mr. CURTIS. If the Senator offers it in that way, of course it is not subject to a point of order.

Mr. HARRISON. That is the way it has been offered—"an assistant superintendent, who shall be business manager."

Mr. CURTIS. I shall have to object to that amendment and hope it will be defeated. Your committee carefully considered the matter and does not think a business manager is needed here in the schools.

Mr. HARRISON. I had hoped the Senator would withhold his judgment until I could present this matter, unless it was fully presented before the committee.

Mr. CURTIS. I may say that it was fully presented before the committee, and also the question of these various assistant superintendents; and your committee, after a very thorough investigation, thought it ought not to be considered at this time.

Mr. HARRISON. Was it on account of the cost involved?

Mr. CURTIS. Not on account of the cost, but because of the number of employees. There are some 13 supervising principals that we thought perhaps ought to be done away with, and that the work could be done by one or two men. If I am on the committee next year, the question will be taken up of reducing those supervising principals from 13 to 1 or 2, and transferring some of the work that is now done by them to this business manager, or whoever he may be; but we did not feel justified, upon the showing that was made, in making at this time a change in regard to the 13 supervising principals. Therefore the committee—not only the subcommittee, but the full committee—was opposed to providing for a business manager.

Mr. HARRISON. Did the subcommittee believe that it would necessitate an addition of 13 employees, or a change of 13 employees?

Mr. CURTIS. No; we think we have a number more than we need now doing certain work. These supervising principals are supposed to go around to the different schools and look after the property and look after the schools. The subcommittee, after carefully going into the matter, were of the opinion that they were not needed, and that when the change was made the question of considering a business manager could be taken up; but we did not feel that we had at this time the information that would justify amending that provision, and reducing them to three or four or five, and providing for a business manager or some such other officer. We thought the matter ought to be given further consideration.

Mr. HARRISON. The question of whether or not we should have supervising principals in the various districts of the city is a different question altogether from the question of whether or not we should have a third assistant superintendent of the school system who shall be a business manager. They are distinct officers and perform different functions. I do not agree with the Senator that we should abolish the supervising principals, because they are merely principals over a certain number of schools, as a matter of fact, and are the heads of the schools in those particular districts, and do this supervising work. They make their reports to the assistant superintendents—in the case of the white schools to the white assistant superintendent, and in the case of the colored schools to the colored assistant superintendent—and they, in turn, make their reports to the superintendent. But I say that the question presented by the Senator is different, and has nothing to do with a business manager.

Mr. CURTIS. That is true; but I stated that we wanted to settle the entire question at one time, and did not feel that we could go into the question of readjusting the school service in this bill at this short session of Congress.

Mr. HARRISON. I have offered the amendment with a view of trying to help the committee, in a spirit of economy. I think it would be a matter of economy. The amendment that I have proposed—and it is offered in absolutely good faith, I will say to the Senator—will only involve an additional expense of $3,750. We have, as the Senator is thoroughly aware, a superintendent of schools; then there are two assistant superintendents, very valuable assistant superintendents—one especially valuable, Mr. Kramer. The other one I can not say so much for; but one is over the white schools and the other is over the colored schools. This third assistant would not interfere with the work of the assistant superintendent over the white schools nor with the work of the assistant superintendent over the colored schools, but would perform a function that is now being performed by the superintendent, and which so burdens his time and occupies his attention that it is very liable to detract from his ability to perform other duties that he should perform. In other words, this third assistant superintendent should get the same salary as the assistant superintendent over the white schools or the assistant superintendent over the colored schools, but should be the business manager and should handle all the business details incident to the school system of the District of Columbia.

Mr. CURTIS. Mr. President, to save time, I will, so far as I am concerned, accept the amendment and take it to conference, where we will have time to give it further consideration.

Mr. HARRISON. I thank the Senator very much.

The PRESIDING OFFICER (Mr. JONES of Washington in the chair). The question is on the amendment offered by the Senator from Mississippi.

The amendment was agreed to.

Mr. HARRISON. Mr. President, there are some amendments that we discussed some days ago; I think the first one is on page 48, in line 7. It is touching the salaries of janitors.

Mr. CURTIS. Seventy-one janitors.

Mr. HARRISON. The amendment proposes to change the salary of $720 to $820.

Mr. CURTIS. Mr. President, I will say to the Senator—and I am doing this without consulting my colleagues—that the subcommittee thought that some increases ought to be made in these smaller salaries. If the Senator will limit his amendment to the 71 janitors, and make the increase $60, which will give them $780 a year and $240 bonus besides, I should be inclined to accept his amendment, so far as I am concerned.

Mr. HARRISON. Now, if the Senator will notice, right under that, on page 48, lines 8, 9, and 10, there are four janitors, all of whose time is taken up. They are the janitors of smaller buildings, and they get only $600 each. I think the subcommittee were under the impression that they really had increased those salaries, but they have overlooked the $600 positions. We ought to give them a little increase, I think.

Mr. CURTIS. Well, make that $660.

Mr. HARRISON. I move, then, on line 10, page 48, that the "$600" be changed to "$660"; and on line 7, page 48, I move to change the "$720" to "$780."

The PRESIDING OFFICER. The question is on the amendments offered by the Senator from Mississippi.

The amendments were agreed to.

Mr. WALSH of Massachusetts. Mr. President, as one interested in the schools of the District, I desire to commend the committee for the special consideration they have given to the subject of providing further for the development of the school system, especially the provision made for purchasing new school sites, and also for the consideration which the committee have given to the matter of providing new buildings. I think there is one very serious defect in the bill, to which I am sure the committee gave considerable attention, and that is the matter of the salary of the superintendent of schools.

Mr. CURTIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Massachusetts yield to the Senator from Kansas?

Mr. WALSH of Massachusetts. I do.

Mr. CURTIS. We looked into that matter very carefully. Both the subcommittee and the full committee felt that this year it was unwise to increase the salaries of any of these officers who were drawing over $2,000, and I shall have to oppose any amendment that may be offered to increase the salaries. The new superintendent is a new man here, and perhaps with some changes that we can make in the revenues next year we shall be in better condition to consider the question of increasing some of the salaries.

Mr. WALSH of Massachusetts. Is it a fact that the superintendent accepted his position with the understanding that his salary would be increased shortly?

Mr. CURTIS. I can not speak in regard to that; but surely the commissioners, or whoever employed him, would not be justified in making such a contract, because we have for the last three years, since the war was on, refused every year to increase the salary of the superintendent. The question has been up, and if that promise was made it was with full knowledge of the fact that the Congress had been refusing to do anything of the kind.

Mr. WALSH of Massachusetts. The reason given by the board of education during the hearings before the committee investigating the school conditions in the District of Columbia for their unwillingness to change the superintendent was the fact that the salary was so small and inadequate that a suitable man could not be obtained for the sum paid here, $6,000. I know the unanimous opinion of the investigating committee was that the salary was very inadequate; that there ought to be a substantial increase in order to get a man who would meet the requirements of this important public office. Did the subcommittee consider especially the subject of the superintendent's salary?

Mr. CURTIS. The subcommittee considered not only the salary of the superintendent but those of the assistant superintendents. We considered it very carefully.

Mr. WALSH of Massachusetts. The subcommittee is satisfied there is not any danger of losing, because of inadequacy of salary, the services of the new superintendent?

Mr. CURTIS. We thought not. The fact that he was a new man also was considered, and if by the end of the year he displays extraordinary ability, or good ability, and shows that he is entitled to an increase, probably the committee next year will consider the question of increasing his salary.

Mr. WALSH of Massachusetts. In any event, the committee did not feel disposed to recommend an increase at the present time, after considering the subject fully?

Mr. CURTIS. No; not at this time.

Mr. KENYON. Mr. President, I would like to ask the Senator from Kansas about a matter which has been called to my attention in connection with the revenue and inspection branch of the water department.

Mr. CURTIS. The items for the water department begin on page 95 of the print before the Senate.

Mr. KENYON. It is with reference to an increase in the pay of the men employed in that service. Was that question brought before the committee?

Mr. CURTIS. The District Commissioners asked for increases in the salaries of 38 employees, but the subcommittee did not feel that it could recommend them. The subcommittee very carefully considered the question of increases in salaries. We thought that we would be justified in recommending an increase of $120 in the salaries of men who were getting $600, and when we finally reported the matter to the full committee we recommended an increase for certain laborers and one or two janitors from $600 to $720.

This morning we have also consented to an increase in the salaries of janitors who were getting $720, so that they will receive $780. We thought this was a very bad time to go into a general increase of salaries. We feel that that matter ought to be delayed until the classification bill is presented, at which time the whole question should be settled. If I had my way about it, I would begin at the beginning of this bill and write new salaries all the way through, making some reductions and some increases.

Mr. KENYON. When this matter was presented to me it seemed that these men were not receiving anything like a living wage, and they informed me that for the year ending June 30, 1921, about $962,000 was collected above what has heretofore been collected for water rent.

Mr. CURTIS. The first increase they asked was where the man was getting $2,400; and surely he can live on that. They wanted it increased to $3,000. The next was a clerk who was getting $1,500, where they wanted the salary increased to $1,800. Clerks are ordinarily paid only from $1,200 to $1,400.

Mr. KENYON. I do not see much to complain about there.

Mr. CURTIS. For a clerk drawing $1,200 they wanted the salary increased to $1,500. Then for three clerks drawing $1,000 they wanted an increase to $1,200; for one index clerk drawing $1,400 they wanted an increase to $1,600; for eight meter computers, now drawing $1,000, with the $240 bonus, making $1,240, they wanted an increase to $1,200; for one meter clerk drawing $1,200 they wanted an increase to $1,500; for two meter inspectors, from $1,000 to $1,200, and one messenger from $600 to $840. We are paying messengers in the Government service $600.

Mr. KENYON. The per diem men were the ones called to my attention.

Mr. CURTIS. The per diem men are paid out of a lump sum, and the commissioners fix that themselves.

Mr. KENYON. They could allow an increase out of the lump sum?

Mr. CURTIS. Certainly they could.

Mr. KENYON. I do not complain, because I know the Senator has given this measure careful consideration; but I would like to see the wages and salaries of people who do not have a living wage raised at least to a living-wage point.

Mr. CURTIS. Your subcommittee fully agrees with the attitude of the Senator from Iowa; and their salaries should be raised not only to a living wage but to a point where the men working for the Government could lay a little aside for a rainy day, if they ever have any.

Mr. KENYON. But a living wage should be the minimum, at least.

Mr. HARRISON. Mr. President, we have now gotten down to the last amendment I have to offer, an amendment in which I am very much interested and which we discussed at some length Saturday, the amendment touching the immediate construction of some school buildings in the District. I have never offered the amendment. I think I signified my intention of offering it, but I have changed it since the first suggestion was made. I will say to the Senator from Kansas and to the Senate that this will remove every objection which has been made to the construction immediately of some school buildings here.

The original estimate for a building at Taylor Street and Fourteenth Street was $500,000. In my original suggestion I cut the limit of cost to $400,000. The amendment I propose now will cut it further and make it $375,000, which will place it at about 32 cents a cubic foot, which is a price lower than any bid which has been made in any city in the United States for the construction of school buildings or public buildings. I shall, before I finish, read the telegrams which have been received in response to the telegram sent out from the District Commissioners to various cities of the country, asking them the price per cubic foot for the construction of school buildings in those cities. The lowest price that was asked in any city of the country was in Denver, 33¾ cents a cubic foot. One of the reasons suggested by the subcommittee for not taking action for the immediate construction of school buildings here was because of the suggestion that at Denver, Colo., they have been constructing some school buildings at such a low cost. The figures which came from Denver are the only ones lower than the last bid for the erection of a school building in the District of Columbia. The last bid that came for the construction of a school building here was 39 cents a cubic foot. In Denver it was 33¾ cents a cubic foot.

There is a great deal of difference between the school buildings that were constructed in Denver at 33¾ cents a foot and the one for which the bid was made in the District of Columbia at 39 cents. A telegram I will read shows that the building in Denver has wooden floors, for instance. Of course, the bottom floors of the schools here are cement. I have reduced the limit of cost so that it will be less than 33 cents a cubic foot, giving to the District Commissioners the right to reject any and all bids. If they see fit to reject a bid of 28 cents a cubic foot, they have the power to do so, under my amendment. But they can not go over the limit of cost, which would be around 32

cents a cubic foot, less than the cost of any building in the country.

So, I say further to the Senator from Kansas, I have reduced this $500,000 estimate for the building at Fourteenth and Taylor Streets to $375,000.

For the building which was estimated to cost $500,000, to be erected in the vicinity of the Gage, Emery, and Eckington Schools, I have cut the estimate from $500,000 to $375,000. No one can say that the contractors of the District of Columbia can gouge the people by too high prices, when you make the limit of cost on that building $375,000, reducing it from the original estimate of $500,000.

For the building of the 16-room schoolhouse north of and in the vicinity of Lincoln Park, for which the commissioners estimated $400,000 as the limit of cost, I have reduced the estimate to $300,000, in order to remove the objection which has been raised here against the immediate construction of these school buildings, which everybody admits are needed and needed badly. Nobody has raised his voice in objecting to the immediate construction of them, except for the limit of cost, which we will remove by these amendments.

For the building of the 8-room building adjoining the Buchanan School, which the commissioners estimated would cost $200,000, I have reduced the estimate to $150,000, so that no contractor, if he desires to gouge the people of the District of Columbia, and is trying to extract from them an unreasonable cost, can do it, because the limit of cost will prevent him from doing it.

Mr. CURTIS. An 8-room building in Denver was erected for $85,000.

Mr. HARRISON. Yes; a building in Denver. Down in my country we have some beautiful little brick buildings, county educational schools, and public schools, which do not cost over fifteen or twenty thousand dollars. If you look at them from the outside, they appear to be beautiful; they look as well as buildings in this city. But they are not equipped with the same heating apparatus; their floors are not like those in the buildings here; their finishings are not like the finishing of the buildings here. There may be one layer of brick, while the schoolhouses here may have three or four layers of brick. You can not tell anything from the looks of a building, so far as the workmanship and the material that is placed in it are concerned. The best way to make a comparison of cost is to compare the cost per cubic foot.

There was a telegram sent out by the Commissioners of the District of Columbia on January 11, at the suggestion of the subcommittee of the Committee on Appropriations of the Senate, as follows:

WASHINGTON, D. C., *January 11, 1921.*

Will you please telegraph—collect—the cubic-foot cost or classroom cost of your school buildings, as shown by the latest proposals? Also state whether buildings are of fireproof construction or other materials. Information needed for use before Appropriations Committee.

A very full telegram asking for that information.

The telegram received from Denver was as follows:

DENVER, COLO., *January 11, 1921.*

Teller School, 445,000 cubic feet, cost, less architect's fee, $150,254; 12 classrooms; 33⅓ cents per cubic foot.

The last bid received for the erection of a building in the District of Columbia was 39 cents a cubic foot. That building was with cement floors and the very finest of heating apparatus inside, and well ventilated. The telegram further says:

Building of brick, with fireproof corridors, halls, and stairs; maple floors in classrooms on wooden joists, with metal lath ceilings and composition roof.

Let me go further and read telegrams from some of the other cities and see whether or not this great species of graft and corruption is existing here and existing nowhere else. I do not know whether graft exists here that has been intimated upon the part of contractors. I would not charge it and I would not state it, but I say when we look at bids that have come in here they look to be fairly reasonable when compared with bids that have been filed for the construction of school buildings in other cities. From Philadelphia, Pa., is an answer to the telegram sent to that city:

Latest proposal for school here was March, 1920. Price per cubic foot, 50 cents.

Fifty cents per cubic foot! The last bid that came in for Washington school buildings was 39 cents a cubic foot.

Here is a telegram from Buffalo, N. Y.—and I shall read all the answers to the telegram sent out from Washington. I have given Denver first place, which is 33⅓ cents per cubic foot. From Buffalo, N. Y., came this telegram in answer to the District Commissioners' telegram:

Bids opened June 5, 1920. Three school buildings averaged 59½ cents per cubic foot, which the school board rejected. Bids on 12 buildings will be opened January 19.

There is Buffalo, where the lowest bid was 59½ cents per cubic foot. In the city of Washington it was 39 cents per cubic foot, and yet it is said that the erection of school buildings should be put off for another 12 months or to some future date, simply because bids are too high and the contractors are extracting too much money from the taxpayers.

From Newark, N. J.:

Latest data on fireproof school building costs amount to about 55 cents per cubic foot.

That is at Newark. Here in Washington the last bid was 39 cents a cubic foot, practically 16 cents lower in Washington than it was in Newark, and yet they say, when everybody agrees that school buildings should be erected here, that we ought to put it off again, thinking that the bids are too high.

From St. Louis, Mo., is a telegram dated January 11:

Cost per cubic foot, 40 cents—Waterloo, Iowa, Fort Dodge, Iowa, and Dallas, Tex. Mr. Ittner returns to city to-morrow.

At Waterloo, Iowa, Fort Dodge, Iowa, and at Dallas, Tex., the bid was 40 cents a cubic foot, and yet here in the city of Washington it was less than that, the last bid being 39 cents per cubic foot.

Boston, Mass.; we will see how they are bidding up there.

BOSTON, MASS., *January 11, 1921.*

Peabody (Mass.) High School, $500,000; second-class construction, 50 cents a cubic foot.

Second-class construction, and it costs in Boston 50 cents a cubic foot, and here in the District the bid was only 39 cents a cubic foot. The telegram from Boston goes on further:

Stratford (Conn.) Elementary School, $270,000; second-class construction, 51 cents a cubic foot.

So there you are, in Stratford, Conn., 51 cents, higher than Boston by 1 cent, and higher than the city of Washington by 12 cents a cubic foot. Yet the Senator from Colorado [Mr. PHIPPS] says we have some pictures here that look mighty good for school buildings, and, although everybody says we need the school buildings, and, although 7,000 children are unable to get their schooling because we have not the buildings, they say, "Let us put it off here, because the bids are too high to build the school buildings at this time."

From Chicago, Ill., we have a telegram, which refers to several places over the country. At Bay City, Mich., in February, 1920, the bid was 53½ cents per cubic foot, 14½ cents higher than the last bid that was filed to build a school building in the District of Columbia. At Lorain, Ohio—and the new Senator from Ohio [Mr. WILLIS] has spoken in that place, no doubt, many, many times, and he knows about the schooling there—Lorain, Ohio, 43¾ cents per cubic foot. That is not so high; it is getting a little cheaper now—43¾ cents—and yet it is 4¾ cents higher than the last bid filed to build a school building in the District of Columbia; and yet the Subcommittee on Appropriations says that we can not build them here, although the school children need them, and we need to take care of 7,000 school children, because the bids are too high.

Here are some other places. Here is Hammond, Ind.—June, 60 cents, going up 21 cents higher in Hammond, Ind., than in the District of Columbia to construct the school buildings. It begins to look to me like 39 cents was a pretty reasonable price that the contractors put in here as a bid.

At Niles, Mich.—I do not know what size place Niles is. I never heard of it before.

Mr. WALSH of Massachusetts. It is a place of good size.

Mr. HARRISON. Niles, Mich., in July, 50 cents a cubic foot. Evidently my good friend the Senator from Maine [Mr. HALE] did not see these outrageous prices that had been paid in other cities, or he would not have cooperated with the Senator from Kansas and the Senator from Colorado in asking a delay in the building of school buildings in the District of Columbia. Richmond, Ind., in December, 1920, 40 cents, 1 cent higher than the last bid put in in the District of Columbia, and I think the last bid was put in here somewhere the latter part of last year.

So I submit to the Senate that there is no justification, there is not the slightest excuse if we agree that the buildings should be erected, for putting them off until we bring in another appropriation bill. The question that should confront the Senate is whether or not the buildings are needed. If they are needed, then the children of the District of Columbia are entitled to school buildings just as much as the school children of any other city in the country, and while we should protect the taxpayers, and do, to the limit, and every bid that is too high should be thrown out, yet I submit that if it does cost a good deal to build school buildings in the District of Columbia, and we can not get them built in any other way, that they should be built even for high prices, because the children must be educated.

The facts show here that we are operating a double-shift system to such an extent in the District that children get only

about a half day's schooling when they should get a whole day's schooling. I wish to read a clipping that I took from yesterday's paper, I think it was, containing this remarkable statement:

Fix for crowding in high schools—Two-shift system applied in two and continued in others.

I do not know whether all the Senators have read this, but I hope that they will accept the amendment. If the amount is not low enough, let us make it lower, but the thing to do is to get started in the erection of school buildings. I hope, if the Senator from Kansas has not read this article——

Mr. CURTIS. I have read it. The Senator can read it if he wishes or have it printed in the RECORD.

Mr. HARRISON. I did not know the Senator had read it.

Mr. CURTIS. Yes; I have read it.

Mr. HARRISON. Then there is less excuse to put off the building of the school buildings. Let me read it to the Senate. There are some Senators here who may not have read it:

Plans designed to provide accommodations in the already overcrowded high schools for new students expected to enroll at beginning of second semester, February 1—

That is right here at hand—

has tentatively been completed, it was announced to-day by school authorities. They call for the introduction of the 2-shift system in the only two institutions where this novel scheme of relieving congestion was not adopted in September, and the extension of this plan in the schools where it has been in operation for a half a year. Consequently, the entire white high-school system will be run on the 2-shift plan.

In the only two schools in which the plan has not been tried of relieving the congestion and preventing a child from getting a full day's schooling, but to give him only half a day, the plan is to be inaugurated on the 1st of February; and, yet, when we see such facts as these staring us in the face we say, let us put off the immediate construction of the buildings to some future day.

Mr. WALSH of Massachusetts. Mr. President——

The PRESIDING OFFICER (Mr. JONES of Washington in the chair). Does the Senator from Mississippi yield to the Senator from Massachusetts?

Mr. HARRISON. Certainly.

Mr. WALSH of Massachusetts. If I understand the matter, the Senator from Mississippi and the subcommittee representing the Senate Committee on Appropriations are agreed that there is need of erecting immediately new school buildings. I understand further that the District Committee is in favor of building the necessary new buildings in the District of Columbia. I understand that the subcommittee have taken no action to appropriate the money at this time because of high building prices, and that the Senator from Mississippi desires to see the first step taken in the erection of new buildings, namely, some act passed at this session appropriating the necessary money.

If the only reason and objection is that at the present time it is too expensive to build school buildings, could not the subcommittee agree to the appropriation of the money on condition that the erection of the school buildings be deferred until such time as the District Commissioners and the Senate committee agree to the actual time in the future when the buildings may be built at reasonable cost?

I would like to ask the Senator from Mississippi if the whole matter could not be settled with the appropriation of the money, leaving the month and the exact time of building to be determined by the District Commissioners, with the approval of a committee on behalf of the Senate? That may be in three months or six months, but it will leave open for action the immediate period of time when prices drop and buildings can be built at a more reasonable price. I understand the Senator's position to be that he wants some action taken now to meet a condition that may arise in a month or two or three months, when there may be such a drop in building prices that building can commence without delay.

Mr. HARRISON. It will take three months to get the plans and specifications.

Mr. WALSH of Massachusetts. The Senator feels that to postpone the appropriation for another year may mean two or more years' delay, because it may be the period of time when we are actually discussing appropriations that building prices may be at the highest.

Mr. HARRISON. Absolutely now is the time to give relief and to get this work done at a moderate price.

Mr. WALSH of Massachusetts. May I ask the Senator from Kansas if some arrangement can not be made to remedy the present deplorable situation? The difference between the position of the Senator from Mississippi and the committee is very narrow; it is merely a question of time as to when the buildings shall be erected.

Mr. CURTIS. Mr. President, I stated my position fully on this question yesterday. As chairman of the subcommittee I do not propose that I shall work on a committee with the Commissioners of the District of Columbia and the school board to arrange for school buildings. I am required now to work until 12 o'clock every night, and think I have about all the duties I can now perform.

I think the only businesslike way to proceed is to make no appropriation at this time and let the builders here come down in their prices and submit reasonable bids. When they submit reasonable and proper bids, then will be time enough for us to make appropriations. The Senator has offered an amendment providing for the erection of an 8-room building at a cost of $150,000, which can be built in Denver for $85,000. The contractors are asking $100,000 to erect a 4-room building here, such as has been built in Denver for $35,000. There has been no explanation of that discrepancy. The contractors are gouging the people of the District of Columbia.

So far as school accommodations are concerned, practically all of the children are provided for in the regular buildings, in rented schools, or in portable schools. The portable buildings ought to be done away with. I agree with both Senators on that point.

Mr. WALSH of Massachusetts. I am not out of sympathy with the Senator's position about not building to-day or to-morrow or next week, but I do want to have the funds available if in three months or six months there shall be a marked break in building prices and in the cost of construction. The door, however, would be closed by failure to appropriate now.

Mr. CURTIS. Oh, no.

Mr. WALSH of Massachusetts. We know that another District appropriation bill can not be acted upon until a year from now, and prices may in the meantime return to high levels.

Mr. CURTIS. The committee may take up a building program upon a deficiency bill at any time. That was stated the other day. There will be an extra session of Congress here by the 1st of April, I hope by the middle of March. There will be deficiency appropriation bills at this session almost up to the last day of the session; they will be coming in at the first of next session, and the matter can be taken care of at any time when the contractors demonstrate they will erect school buildings at something near reasonable prices.

Mr. WALSH of Massachusetts. The Senator from Kansas has more confidence of the result of offering amendments to deficiency appropriation bills than have I. I think if this matter is now neglected the issue is closed for a year.

Mr. HARRISON. Absolutely.

Mr. WALSH of Massachusetts. There is no use of deceiving ourselves as to that. What position does the Senator put us in as public servants? He says we should not appropriate this money because we do not want to yield to the excessive demands and to the extortion of corrupt contractors who have combined to make prices exorbitant. Because of that assertion shall we remain silent and allow from six to seven thousand children in the District of Columbia to be without proper school facilities? In other words, as public servants shall we continue to punish six or seven thousand children by failing to provide proper school buildings and do nothing to break up the combine, to expose the corruptionists, to send them to jail, if the law so permits? I do not think we can afford to take that position. I do not think it is fair to the school children of this city. I think if contractors have combined to keep up building prices they ought to be punished. If there is not law enough to punish them, we ought to provide the law. We are the lawmaking power of the District, and if they have any improper combine we ought to know it. If they are acting illegally or improperly, some action ought to be taken. It is not a fair excuse to the parents of six or seven thousand school children in the District to say there is a building combine here that is corrupt, and therefore we will not erect another school building, we will not appropriate any more money. Therefore I think we ought to make some provision in this appropriation bill for the expenditure of a sum of money to build schools at a later day if not at the present time.

Mr. HARRISON. Of course, Mr. President, the Senator from Kansas [Mr. CURTIS] is aware of the fact that we never know what the bids of contractors will be until there is authorization of law and the initial appropriation is made for the construction of the buildings. The only criterion we would have to go by would be the last bid which was made by them, which was 39 cents a cubic foot.

Mr. CURTIS. We have ample opportunity to ascertain what the bids will be, because we are carrying in this bill appropriations to continue the erection of buildings, and, as I recollect,

one of the commissioners stated that they are calling for bids on a three-plan proposition. We can tell when they bid on these various parts of the construction whether or not they are getting their bids down to something like a reasonable amount.

Mr. HARRISON. But under the plan suggested by the amendment of placing the limit of cost for a $500,000 building at $375,000 and for a $100,000 building at $75,000, they can not charge too much; they can not go over the limit of cost; they have got to make bids within a limit of cost or the bids will not be accepted; the construction of the building will not be begun; the contract will not be let. So it would seem to me for us to fold our hands, sit idle, and wait to ascertain, when the horse is out of the stable, what the bids will be, and, as the Senator from Massachusetts [Mr. WALSH] suggests to me, when the contractors might resort to legal methods, is a very unwise policy to pursue.

It seems that the committee have grown wise very quickly concerning this matter. In the past they have made authorizations to construct a building at a cost, say, of $300,000, and then the commissioners, without letting the bids, have come back and asked for $60,000 more or $100,000 more, and the committee heretofore have granted the increase. Of course, they did so in order to provide the facilities for the school children. I believe that when we place a limit of cost upon the erection of a building we should make the commissioners conform to it, and not allow them to come back and ask for, say, $60,000 more. It seems to me, Senators, that with the price of materials declining and labor costs being reduced, now is a very good time to make the initial authorization and the initial appropriation so that bids may be called for. Then if the price comes within the limit of cost, let the buildings be erected, while if they do not come within the limit of cost, of course, the bids can be rejected.

I had not finished reading the statement that appeared in yesterday afternoon's paper when the Senator from Massachusetts interrupted me—and I am glad he did so. The statement continues:

> According to some recent estimates, school officials expect at least 1,100 pupils more to enter the high schools in February, and only about 250 are slated to leave, making a net gain in their enrollment of 850, starting on the 1st of February.

I do not know where it is expected to start them, because there are no places in which to put them. If a parent goes to the Henry D. Cooke School, as I know from experience, and desires to enroll his child, he can only put the child in school for a half a day, for the double shift is in force at that school, and it is now being placed in operation, as I recall, in the only other two schools in the District where it is not now in force. It seems to me that the Senate of the United States and the Congress of the United States are culpably negligent in failing to make proper appropriation for the erection of schoolhouses in the District for the education of the children here. Such a situation is bad for the Government employees; it is bad for the citizens of the District who live and raise their families here; and it is bad for Senators and Representatives who keep their families in the District of Columbia, and accordingly can not educate their children in the States or districts from which they come, for they have to comply with the conditions existing here, and give their children only a half a day's schooling, when if they were at home they could send them to school for a whole day.

The blame is on the Congress of the United States; it is on every Senator who refuses to vote for an appropriation to provide suitable means and facilities for the education of the children.

Mr. CURTIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from Kansas?

Mr. HARRISON. I yield.

Mr. CURTIS. The Senator has referred to the Henry D. Cooke School. There are 16 rooms in that school and one portable building is attached to it. Those rooms were built to accommodate 48 children each, so that the capacity of the school is 768. The last report, however, for that school shows that there were only 533 children attending, and that there is not a room filled to its capacity.

Mr. HARRISON. I do not understand that statement exactly. I know that with a committee I visited the Henry D. Cooke School, as we visited a great many other schools, and every room looked to be crowded with pupils. I know a certain citizen who sends his children to the Henry D. Cooke School, and I know that one of his children has to abide by the double-shift system and go to school in the morning about 8.30 o'clock and leave about noon, without the possibility of returning in the afternoon because of the double-shift system there in force. The same system is used in other schools. There is no denying the fact that additional schools are needed. That need is placarded before us in the most glaring letters; the facts are before us, and no one has ever denied them.

Mr. ROBINSON. Mr. President, will the Senator yield to me for a moment?

Mr. HARRISON. I yield.

Mr. ROBINSON. If it is a fact that what the Senator from Mississippi calls the double-shift system is in operation, at any particular time would the presence of pupils in the school show the full number that attend the school?

Mr. HARRISON. The Senator is correct in his implication.

Mr. CURTIS. But, Mr. President, the census of the school was not taken under the double-shift system, but was taken when they were supposed to have only one class a day in each grade.

Mr. ROBINSON. How does the Senator know that?

Mr. CURTIS. Because I have the report, which gives the total, without reference to the so-called double shift. The rooms in that school are made to accommodate 48, whereas the highest number of children in any one room is 44, and two of the rooms house only 23 children. Other rooms house 24, 25, and up to 35 children.

Mr. ROBINSON. Mr. President, will the Senator yield to me for a question?

Mr. CURTIS. Certainly.

Mr. ROBINSON. At how many schools in this city is the double shift employed?

Mr. CURTIS. I could not tell the Senator unless I ran through the list. I might be able to give the information to the Senator later.

Mr. ROBINSON. I wish the Senator, if he has the information, would find out the number of schools which are so crowded that the double shift has to be employed and the number of pupils who are required to avail themselves of the double shift in order to obtain school accommodations.

Mr. HARRISON. There is no doubt about the schools being needed, I will say to the Senator from Kansas. He so admitted the other day. I do not think there is a better friend to the school system in the whole District than is the Senator from Kansas. He has fought hard for them and has gone around and visited the schools. I merely think that in this matter his judgment is wrong. I had hoped that before we finished the bill we could get together and adopt some plan that would result in improving the conditions and would give some hope to the parents of the school children of Washington who are not permitted under the present system and conditions to receive a whole day's schooling. Let us put some provision in this bill that will at least make the people of the District think they are getting a fair deal at the hands of the Congress of the United States.

Mr. ROBINSON. Mr. President, will the Senator yield to me for a question?

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from Arkansas?

Mr. HARRISON. Yes.

Mr. ROBINSON. Can the Senator from Mississippi give me the information for which I asked the Senator from Kansas a moment ago?

Mr. HARRISON. Yes. I will read from the House hearings. Mr. Kramer, the assistant superintendent of white schools, testified as follows:

> Mr. KRAMER. We are placing the pupils by double-shifting our schools. We must take care of the pupils. We can not refuse a high-school pupil. He comes and we must house him, and we are double-shifting our schools to do it, but we must have the teachers to organize the classes.
>
> Mr. DAVIS. How do you get along now?
>
> Mr. KRAMER. We double-shift some of our schools.
>
> Mr. DAVIS. Until new space is constructed, do you need any additional teachers?
>
> Mr. KRAMER. Oh, yes; because the pupils are there just the same.
>
> Mr. DAVIS. How do they get along now?
>
> Mr. KRAMER. We are getting along now on our present enrollment by double-shifting some of our schools. Next year we shall have at least 1,000 more pupils to take care of.
>
> Mr. DAVIS. But suppose you do not get any more school space?
>
> Mr. KRAMER. Then we will have to double-shift the schools in order to make space.
>
> Mr. CRAMTON. To what extent is that double-shifting carried out now?
>
> Mr. KRAMER. That is carried out in two schools, the Western and the Eastern.
>
> Mr. CRAMTON. How many pupils are affected by that arrangement?
>
> Mr. KRAMER. Roughly, I should say 1,400.

Mr. ROBINSON. Mr. President, will the Senator now yield to another question?

Mr. HARRISON. Yes.

Mr. ROBINSON. What number of pupils would be accommodated by the provisions of the amendment which the Senator has offered?

Mr. HARRISON. The provisions of the amendment which I have offered will take care of the whole situation here. In that connection I will say to the Senator that he was probably in the Senate Chamber when I read the statement that on the 1st of February, at the beginning of the second semester, they are going to provide this double-shifting in two other schools in the District in order to take care of 1,200 new pupils that will be enrolled at that time.

Mr. ROBINSON. It already applies to 1,400, and it will hereafter apply to 800 more?

Mr. HARRISON. Yes.

Mr. ROBINSON. Making a total, then, of 2,200?

Mr. HARRISON. Yes.

Now, the facts are that to reduce the classes to 40—and there are many classes in the District schools where they have 55 or 52 or 50 pupils, and the school authorities all agree that you never should put into any class over 40 pupils—to reduce the classes to 40 pupils in the classroom, according to the estimates that have been made, it will take 57 additional classrooms. In order to take care of this double shifting at present, not counting in this new arrangement that is coming on on the 1st of February, to give a full day of school to the 28 classes now on part time—there are 28 classes, 1,400 children, on the double-shift system now, 28 classes now on part time—it will take 18 additional classrooms; and yet we are here hemming and hawing and preventing the appropriation of money for a school building because somebody got a telegram from Denver, Colo., with a photograph of a school building that looked very good, and they said: "Now, let us put this matter off. We can build one like the Denver school cheaper than we can build one like we have been building here before."

Mr. McKELLAR. Mr. President——

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from Tennessee?

Mr. HARRISON. Yes; I yield.

Mr. McKELLAR. If the only objection to starting these buildings now is that the contractors are in a combine, and therefore the buildings will cost more than they should, why would not a simple amendment like this be sufficient to obviate that difficulty:

Any contractor bidding for the erection of school buildings in the District having an agreement, express or implied, with other contractors or contractor in reference to such bids or such buildings, shall be guilty of a felony, and upon conviction shall be fined in the sum of not less than $1,000 nor more than $5,000, and imprisoned not more than two years.

Mr. HARRISON. I am perfectly willing to accept such an amendment as that if we can get this proposition through.

Mr. McKELLAR. A provision like that, as it seems to me, if the Senator will excuse me, taken with the amendment of the Senator from Mississippi limiting the cost, would certainly be an absolute preventive of any such condition as confronts the committee. In my judgment, the fact that contractors are in a combination and are asking more than they should ask for the erection of these buildings should not deter the committee and should not deter the Senate from doing the right thing. We all know that there are several thousand children in the city that have not proper schoolhouses in which to go to school. It means a great deal to their future. It means a great deal to their parents. It means a great deal to the city in every way; and we should take enough pride in this city to prevent that condition of affairs existing in reference to the public schools of the city of Washington. Now, if an amendment is offered which fixes the limit of cost and which will imprison any contractor who is guilty of having an agreement of that kind, it seems to me it would obviate every excuse I have heard offered as to why this appropriation should not be made for the schools at this time.

I think it is imperative that action should be had at this Congress. I do not think we should delay it at all, and I hope the amendment will be adopted; and I am going to offer that amendment, unless the Senator will accept it.

Mr. HARRISON. I will cease arguing this proposition, if the Senator from Kansas, on behalf of the committee, will accept such a proposition as that on my amendment. Then we can get through with this matter very quickly and proceed to other business.

Mr. McKELLAR. May I ask the Senator from Kansas if the amendment I have offered will not obviate the trouble that is in the committee's mind? I hope it will.

Mr. CURTIS. Mr. President, the chairman of the subcommittee having charge of this bill is patiently waiting for whatever amendments may be offered, and then he will pass judgment on them.

Mr. HARRISON. I offer this amendment now.

The PRESIDING OFFICER. The Secretary will state the amendment offered by the Senator from Mississippi.

Mr. McKELLAR. Then I will offer my amendment as an amendment to it.

Mr. HARRISON. If the Senator wants to strike out one or two of these provisions, all right. I just want to get something started.

The READING CLERK. On page 55, after line 18, it is proposed to insert:

For beginning the erection of a junior high school upon a site owned by the District of Columbia north of Taylor Street and east of Fourteenth Street, $160,000; and the commissioners are hereby authorized to enter into a contract or contracts for said building at a cost not to exceed $375,000.

For beginning the erection of a junior high school in the vicinity of the Gage, Emery, and Eckington Schools, $160,000; and the commissioners are hereby authorized to enter into a contract or contracts for said building at a cost not to exceed $375,000.

For beginning the erection of a 16-room building north of and in the vicinity of Lincoln Park, $120,000; and the commissioners are hereby authorized to enter into a contract or contracts for said building at a cost not to exceed $300,000.

For the erection of an 8-room extensible building adjoining the Buchanan School, $150,000.

For the construction of an 8-room addition to the S. J. Bowen School, $150,000.

For the erection of an 8-room extensible building in the immediate vicinity of the Mott School, $150,000.

For the erection of an 8-room addition to the John Eaton School, $150,000.

For the erection of a 4-room building to replace the Smothers School, $75,000.

For the erection of an 8-room addition to the Lovejoy School, $150,000.

For the erection of a 4-room addition to the Monroe School, $75,000.

Mr. CURTIS. Mr. President, I make the point of order against the amendment that it is not regularly estimated for as provided by law, and not reported from any standing committee of the Senate.

Mr. McKELLAR. Will the Senator withhold his point of order for a moment until I can offer an amendment to the amendment to go in at the close of it? I should like to have it go in the RECORD.

The PRESIDING OFFICER. Does the Senator from Kansas withhold his point of order?

Mr. CURTIS. I will withhold it for the purpose of permitting the amendment to be offered.

Mr. McKELLAR. I have just written it out, so I shall have to read it:

Any contractor bidding for the erection of school buildings in the District having an agreement, express or implied, with other contractors or contractor in reference to such bids or such buildings, shall be guilty of a felony, and upon conviction shall be fined in the sum of not less than $1,000 nor more than $5,000, and imprisoned not more than two years.

The PRESIDING OFFICER. Does the Senator from Tennessee offer that as an amendment to the amendment of the Senator from Mississippi?

Mr. McKELLAR. I do.

Mr. CURTIS. I renew my point of order against the amendment offered by the Senator from Mississippi.

Mr. HARRISON. Mr. President, with reference to an estimate, the only difference between the estimates and the amendment I have offered and the one which the commissioners presented to the House committee and to the Senate committee, which in turn had been presented to the District Commissioners by the board of education, is a reduction from the amount that they asked for. Not only did they estimate for it, but they went before the committee of the House, and I presume they went before the committee of the Senate. I could not get a copy of the hearing, but I know they talked to them. The estimates that are provided for are in the hearings here, and the commissioners have presented the arguments. They have talked to them, not only on paper but personally about the matter.

Mr. CURTIS. Mr. President, the items offered by the Senator from Mississippi have not been estimated for and sent to us through the Treasury as required by law. The law says how estimates shall be sent to the Senate—that they shall be submitted to the Secretary of the Treasury, and that the Secretary of the Treasury shall send those estimates to the House of Representatives. That was not done in this case. I will state, for the information of the Senate, that every item estimated for by the District Commissioners in regard to the schools was placed in this bill by the committee. No one of these items was estimated for in the regular way. I may state for the information of the Senator from Mississippi that the figures were submitted to the subcommittee by the District officers at the request of the chairman of the subcommittee. That was done for the purpose of seeing if we could not devise some scheme or plan whereby we could use the surplus in the Treasury.

Mr. HARRISON. Does the Senator say that the superintendent of schools did not appear with Col. Kutz, Miss Boardman, and Mr. Hendrick, the Commissioners of the District of Columbia, before the House committee and ask for these things that were estimated for; and is it not true that the only difference between the amount placed in my amendment and in theirs is that mine is smaller?

Mr. CURTIS. That did not come through the Treasury Department. They came before the House with a building program that was rejected. Then the chairman of the subcommittee of the Senate asked them to submit to him figures that he might present, to see if the surplus money could be used; and those figures were given in response to that personal request, but did not come as an estimate through the department in any way.

Mr. HARRISON. Oh, well, I do not know whether they came through the Treasury or not. I think it has come to a pretty pass when the Senate of the United States invokes the technical rule simply because the Secretary of the Treasury did not have the matter pass through his hands from the commissioners to the committee, when all the commissioners appeared before both of the committees, when the representatives of the board of education appeared before both of the committees, when the needs are here, and they are urgent, and they are necessary—I say when the Senate of the United States invokes a technical rule to prevent the consideration of an amendment under such circumstances it has come to a pretty pass.

Mr. WALSH of Massachusetts. And when it appears that the committee themselves could not make any recommendations for the construction of new school buildings because no estimates had come to them from the Treasury.

Mr. HARRISON. Certainly the Senator does not want to insist on his point of order.

Mr. CURTIS. Mr. President, the committee had a right, as the Senator from Massachusetts will see if he will study the rules, to report an item; and had it been reported from our committee, it would have been in order. I insist upon the point of order.

Mr. HARRISON. Let me further argue the point of order.

The PRESIDING OFFICER. Not so far as the Chair is concerned. The Chair is prepared to rule. The Chair will sustain the point of order.

Mr. HARRISON. Mr. President, I desire to ask a question. The Senator's committee has provided here numerous items touching new sites and touching various things. Did they pass through the hands of the Treasury Department?

Mr. CURTIS. Not one of them; but they came from a standing committee of the Senate, which is provided for in Rule XVI.

Mr. HARRISON. I understand the Senator had a perfect right to do it, and yet the Senator now would invoke the rule simply because the Treasury Department did not estimate for them.

I appeal from the decision of the Chair, Mr. President, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The Senator from Mississippi suggests the absence of a quorum. The Secretary will call the roll.

The roll was called, and the following Senators answered to their names:

Ball	Harris	Myers	Smoot
Beckham	Harrison	Nelson	Spencer
Brandegee	Heflin	New	Stanley
Calder	Henderson	Overman	Sutherland
Capper	Hitchcock	Owen	Swanson
Colt	Johnson, Calif.	Page	Townsend
Curtis	Jones, N. Mex.	Phipps	Trammell
Dial	Jones, Wash.	Poindexter	Underwood
Dillingham	Kellogg	Pomerene	Wadsworth
Edge	Kenyon	Ransdell	Walsh, Mass.
Fletcher	Keyes	Reed	Warren
Frelinghuysen	Kirby	Robinson	Williams
Gay	McCormick	Sheppard	Willis
Gerry	McCumber	Simmons	Wolcott
Glass	McKellar	Smith, Ariz.	
Gooding	McLean	Smith, Ga.	
Hale	Moses	Smith, Md.	

Mr. CURTIS. I was requested to announce that the Senator from Wisconsin [Mr. LA FOLLETTE] and the Senator from Maine [Mr. FERNALD] are detained on business of the Senate.

The PRESIDING OFFICER. Sixty-five Senators have answered to their names. A quorum is present.

Mr. HARRISON. Mr. President, I withdraw my appeal from the decision of the Chair. I have no more amendments to offer.

The amendments were ordered to be engrossed.

Mr. HARRISON. Mr. President, I offer the following motion to recommit the bill.

The PRESIDING OFFICER. The Secretary will read.

The READING CLERK. Mr. HARRISON moves to recommit House bill 15130 to the Committee on the District of Columbia with instructions to report the bill forthwith to the Senate with the following provisions added thereto:

For beginning the erection of a junior high school upon a site owned by the District of Columbia north of Taylor Street and east of Fourteenth Street, $160,000; and the commissioners are hereby authorized to enter into a contract or contracts for said building at a cost not to exceed $375,000.

For beginning the erection of a junior high school in the vicinity of the Gage, Emery, and Eckington Schools, $160,000; and the commissioners are hereby authorized to enter into a contract or contracts for said building at a cost not to exceed $375,000.

For beginning the erection of a 16-room building north of and in the vicinity of Lincoln Park, $120,000; and the commissioners are hereby authorized to enter into a contract or contracts for said building at a cost not to exceed $300,000.

For the erection of an 8-room extensible building adjoining the Buchanan School, $150,000.

For the construction of an 8-room addition to the S. J. Bowen School, $150,000.

For the erection of an 8-room extensible building in the immediate vicinity of the Mott School, $150,000.

For the erection of an 8-room addition to the John Eaton School, $150,000.

For the erection of a 4-room building to replace the Smothers School, $75,000.

For the erection of an 8-room addition to the Lovejoy School, $150,000.

For the erection of a 4-room addition to the Monroe School, $75,000.

The PRESIDING OFFICER. The question is on the motion of the Senator from Mississippi.

Mr. HARRISON. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. POMERENE (when his name was called). I have a general pair with the senior Senator from Iowa [Mr. CUMMINS]. I do not know how he would vote on this question, and I therefore withhold my vote.

Mr. WILLIAMS (when his name was called). I would like to ask if the Senator from Pennsylvania [Mr. PENROSE] has voted?

The PRESIDING OFFICER. He has not.

Mr. WILLIAMS. If he were present, and I were at liberty to vote, I would vote "yea." I have a pair with that Senator, and withhold my vote.

Mr. WOLCOTT (when his name was called). I have a general pair with the Senator from Indiana [Mr. WATSON]. I transfer that pair to the Senator from California [Mr. PHELAN] and vote. I vote "yea."

The roll call was concluded.

Mr. KING. I have a pair on this question with the Senator from Texas [Mr. CULBERSON] and withhold my vote.

Mr. FRELINGHUYSEN. I have a general pair with the junior Senator from Montana [Mr. WALSH]. I transfer my pair to the senior Senator from Massachusetts [Mr. LODGE] and vote "nay."

Mr. KNOX. I have a general pair with the senior Senator from Oregon [Mr. CHAMBERLAIN]. I transfer my pair to the junior Senator from Maryland [Mr. FRANCE] and vote "nay."

Mr. McCUMBER. I have a general pair with the senior Senator from Colorado [Mr. THOMAS]. I transfer that pair to the senior Senator from Illinois [Mr. SHERMAN] and vote "nay."

Mr. FALL. I have a general pair with the junior Senator from Wyoming [Mr. KENDRICK]. In his absence I withhold my vote.

Mr. GLASS (after having voted in the negative). I am informed that the senior Senator from Illinois [Mr. SHERMAN], if present, would vote as I have voted. I have a general pair with that Senator but will permit my vote to stand.

Mr. HARRISON (after having voted in the affirmative). I have a pair with the Senator from Oregon [Mr. MCNARY]. If he were present he would vote as I did, and I shall let my vote stand.

Mr. CURTIS. The senior Senator from South Dakota [Mr. STERLING] is attending a meeting of the Committee on the Judiciary. He is paired with the Senator from South Carolina [Mr. SMITH]. If present and not paired the senior Senator from South Dakota would vote "nay."

I also desire to announce the following pairs:

The Senator from West Virginia [Mr. ELKINS] with the Senator from Oklahoma [Mr. GORE];

The Senator from Wisconsin [Mr. LENROOT] with the Senator from Tennessee [Mr. SHIELDS]; and

The Senator from Indiana [Mr. WATSON] with the Senator from Delaware [Mr. WOLCOTT].

The result was announced—yeas 20, nays 45, as follows:

YEAS—20.

Dial	Johnson, S. Dak.	Owen	Stanley
Gerry	Kenyon	Reed	Trammell
Harrison	Kirby	Robinson	Underwood
Heflin	La Follette	Sheppard	Walsh, Mass.
Hitchcock	McKellar	Simmons	Wolcott

NAYS—45.

Ashurst	Gay	McCumber	Smith, Md.
Ball	Glass	McLean	Smoot
Beckham	Gooding	Moses	Spencer
Brandegee	Gronna	Myers	Sutherland
Calder	Hale	Nelson	Swanson
Capper	Harris	New	Townsend
Colt	Henderson	Overman	Wadsworth
Curtis	Jones, Wash.	Page	Warren
Dillingham	Kellogg	Phipps	Willis
Edge	Keyes	Poindexter	
Fernald	Knox	Ransdell	
Frelinghuysen	McCormick	Smith, Ga.	

NOT VOTING—31.

Borah	Gore	Newberry	Smith, Ariz.
Chamberlain	Johnson, Calif.	Norris	Smith, S. C.
Culberson	Jones, N. Mex.	Penrose	Sterling
Cummins	Kendrick	Phelan	Thomas
Elkins	King	Pittman	Walsh, Mont.
Fall	Lenroot	Pomerene	Watson
Fletcher	Lodge	Sherman	Williams
France	McNary	Shields	

So the Senate refused to recommit the bill with instructions.

Mr. KING. I move that the bill now before the Senate, House bill 15130, be recommitted to the Committee on Appropriations with instructions that they shall reduce the total amount not less than $2,000,000.

I called attention this morning to the appropriations which have been made from time to time for the District. I called attention to the fact that the bill this year carries nearly $5,000,000 more than it did in 1918, 1919, and 1920. I called attention to the fact that the Treasury is unable now to respond to the legitimate demands made upon it and that this is not the proper time to increase appropriations for the District. It seems to me that there can be no question in regard to what the action of the Senate should be upon the motion.

The motion was rejected.

The bill was ordered to a third reading, read the third time, and passed.

Mr. CURTIS. I move that the Senate request a conference with the House of Representatives on the bill and amendments, and that the conferees on the part of the Senate be appointed by the Chair.

The motion was agreed to; and the Presiding Officer appointed as conferees on the part of the Senate Mr. CURTIS, Mr. PHIPPS, and Mr. SMITH of Maryland.

FEDERAL CONTROL OF INDUSTRIES.

Mr. FERNALD. Mr. President, I wish to announce that on Friday next, immediately after the routine morning business, I shall desire to address the Senate on the Federal control of industries.

DISPOSITION OF CERTAIN PUBLIC LANDS.

The PRESIDING OFFICER laid before the Senate the amendments of the House of Representatives to the bill (S. 2379) to provide for the disposition of certain public lands withdrawn and improved under the provisions of the act of Congress approved June 25, 1910 (36 Stat. L., p. 847), as amended by the act of August 24, 1912 (37 Stat. L., p. 497), and which are no longer needed, which were, on page 2, line 4, after the word "same," to insert "to a citizen of the United States," and on page 2, line 16, after the word "person," to insert "*Provided further*, That any patent issued hereunder shall contain a reservation to the United States of all oil, gas, coal, and other mineral."

Mr. SMOOT. I move that the Senate concur in the amendments of the House.

Mr. KING. I should like to ask my colleague the nature of the amendments made by the House and the purpose of the same, as well as the purpose of the bill.

Mr. SMOOT. Wherever there is title to land of the description found in the bill, the House thinks we ought to reserve to the United States all oil and gas that may be discovered hereafter under those lands. I will say to my colleague that it is the usual amendment that is offered, and I do not know why we did not put it on in the Senate.

The motion was agreed to.

PUBLIC LAND ENTRIES.

The PRESIDING OFFICER laid before the Senate the amendments of the House of Representatives to the bill (S. 3994) validating certain applications for and entries of public lands, and for other purposes.

The amendments were, on page 2, after line 14, to insert:

Homestead entry, Sterling, Colo., No. 016335, made by Amelia P. Clark on August 14, 1911, under the act of February 19, 1909 (35 Stat. L., p. 639), for lots 6 and 7, and the east half of the southwest quarter and the southeast quarter of section 6, township 11 north, range 57 west, sixth principal meridian.

On page 2, after line 23, to insert:

Jennie Dunphy Meyer, for the following-described lands: The north half of the northeast quarter and the south half of the northwest quarter of section 10, township 33 north, range 47 east, Mount Diablo base and meridian, in the county of Lander, State of Nevada, upon the payment in advance therefor to the Secretary of the Interior for the Government of the United States of the full sum of $2.50 per acre for such lands, which patent shall confirm the conveyance of such lands to the said Jennie Dunphy Meyer by the State of Nevada: *Provided*, That proper application for the purchase of these lands be filed hereunder in the district land office within six months from the passage of this act, and that no adverse claim thereto be officially of record as pending when the application is allowed and the sale consummated.

On page 4, after line 11, to insert:

Homestead entry, Buffalo, Wyo., No. 08829, made by Donald Thompson on October 18, 1916, for the west half of the southwest quarter, section 3, and north half of the northwest corner, section 10, township 53 north, range 79 west, sixth principal meridian.

On page 4, after line 11, to insert:

Homestead entry, Durango, Colo., No. 07648, made by Mary A. Reim on May 28, 1918, for the northwest quarter of the southeast quarter, east half of the southwest quarter, southwest quarter of the southwest quarter, section 13, and west half of the northwest quarter, section 24, township 36 north, range 15 west, New Mexico principal meridian: *Provided*, That it be duly noted that this entry is made in accordance with and subject to the provisions and reservations of the act of June 22, 1910 (36 Stat. L., p. 583), as to the east half of the southwest quarter and the southwest quarter of the southwest quarter of section 13.

On page 4, after line 11, to insert:

Homestead entry, Glenwood Springs, Colo., No. 01497, made by Ladernia N. Lucore on May 10, 1918, under the act of February 19, 1909 (35 Stat. L., p. 639), for lots 3 and 4, section 1, and lots 1, 2, 3, and 4, and south half of the northeast quarter, section 2, township 10 north, range 93 west, sixth principal meridian.

On page 4, after line 11, to insert:

Homestead entry 013785, Dodge City series, made by Gustavus F. Gallagher, for south half section 28, township 24 south, range 40 west, of the sixth principal meridian, Kansas.

On page 5, after line 7, to insert:

Homestead application of Ralph B. Quinn, of Phoenix, Ariz., for lots 1 and 2 and the south half of the northwest quarter, section 6, township 1 south, range 3 east, Gila and Salt River meridian, subject to the provisions of the act of June 17, 1902 (32 Stat., p. 388), and acts amendatory thereof and supplementary thereto: *Provided*, That said Quinn tender a proper application therefor within 90 days from receipt of notice of the passage of this act from the register and receiver of the United States Land Office: *Provided further*, That the entryman shall not be entitled to receive water for irrigation until public announcement by the Secretary of the Interior that water is available for the irrigation of the land.

On page 5, after line 7, to insert:

Additional homestead application, Rapid City series 039141, to Edward E. Voedisch, embracing the east half northwest quarter section 3 and north half northeast quarter section 10, township 6 south, range 1 east, Black Hills meridian, subject to the requirements of the enlarged homestead act as to residence, cultivation, and improvement: *Provided*, That patent shall not issue for said east half of the northwest quarter of section 3 until said tract shall have been duly surveyed by the Government.

On page 5, after line 7, to insert:

Homestead application 037866, Rapid City series, of William Holsten, for the northeast quarter of the southeast quarter of section 15, township 2 north, range 5 east, Black Hills meridian, in the State of South Dakota.

On page 7, after line 22, to insert:

"SEC. 11. That the Secretary of the Interior be, and he is hereby, directed to change homestead entries Nos. 021565 and 021566, embracing all of section 27, township 35 north, range 80 west, sixth principal meridian, Douglas, Wyo., land district, made by Frank O. Kellman, on October 23, 1919, and November 11, 1919, respectively, and to transfer the payments made thereon to any other tract of 640 acres of land subject to entry under the act of December 29, 1916 (39 Stat. L., p. 862), and to issue patent thereon subject to the provisions and limitations of said act, without any showing of residence, cultivation, or improvement: *Provided*, That the said Kellman shall file application for said tract within 12 months from the date of the approval of this act."

On page 7, after line 22, to insert:

"SEC. 12. That the location No. 20, township 6 north, range 9 west, second principal meridian, Indiana, which has been surveyed in the name of Thomas Johnston, as appears from the field notes of survey on file in the General Land Office, be, and the same is hereby, confirmed to the said Thomas Johnston, and the Commissioner of the General Land Office shall issue his certificate as register ex officio and cause a patent to be issued for said claim to Thomas Johnston, his heirs, assigns, and legal representatives: *Provided*, That this act and the patent which may be granted in pursuance of the same shall only operate as a relinquishment on the part of the United States, and shall in no way prejudice any valid adverse right, if such exist, to the said land, the intent being that title shall issue to the true owners of the land under the laws of Indiana, including laws of limitation and prescription, as though patent had issued during the lifetime of said Thomas Johnston."

On page 7, after line 22, to insert:

"SEC. 13. The Secretary of the Interior is hereby authorized and directed to issue a patent to R. L. Douglass, of Fallon, Nev., for a certain tract of land now a part of the public domain, lying below the Carson Lake meander in the unsurveyed portion of section 19, township 17 north, range 29 east, Mount Diablo meridian, in the State of Nevada, more fully described as follows: Beginning at the meander corner south

of section corner common to sections 12 and 13, township 17 north, range 28 east, and sections 18 and 19, township 17 north, range 29 east, Mount Diablo meridian; thence south 9.6 chains; thence north 89 degrees 21 minutes east 21.9 chains; thence north 21.56 chains; thence north 73 degrees 30 minutes west .81 chain along Carson Lake meander; thence south 61 degrees 30 minutes west 24 chains to the point of beginning, containing 33.74 acres, more or less, on the express condition, however, that said R. L. Douglass shall first execute and deliver to the Secretary of the Interior a warranty deed satisfactory to such Secretary conveying to the Government of the United States, free of all encumbrance, a certain tract of land composed of portions of lots 2, 3, and 4 of section 19, township 17 north, range 29 east, Mount Diablo meridian, in the State of Nevada, more fully described as follows: Beginning at the meander corner of the section line common to sections 18 and 19, township 17 north, range 29 east, Mount Diablo meridian, running thence along the north boundary of section 19, south 89 degrees 21 minutes west 53.82 chains; thence south 1.34 chains to a point in the meander line of Carson Lake; thence south 73 degrees 30 minutes east 36.69 chains along Carson Lake meander; thence north 56 degrees 30 minutes east 22.40 chains to the point of beginning, containing 33.74 acres, more or less, which shall thereupon become a part of the public domain.

"That as a consideration for the issue of said patent, R. L. Douglass will construct a substantial fence around the tract of land conveyed to him under the provisions of this act."

Mr. SMOOT. I move that the Senate concur in the amendments made by the House.

The motion was agreed to.

MILK RIVER VALLEY GUN CLUB.

The PRESIDING OFFICER laid before the Senate the amendments of the House of Representatives to the bill (S. 793) authorizing the issuance of patent to the Milk River Valley Gun Club, which were, on page 1, line 9, after the word "acres," to insert "to be used for a game preserve"; on page 1, line 12, to strike out the word "the" and insert "for such"; on page 1, lines 12 and 13, to strike out the words "being fixed at 30 acres to be used for a game preserve" and insert "as may be determined by the said Secretary"; and on page 1, line 15, to strike out the words "six months from the date of approval of this act" and insert "one year from the passage of this act."

Mr. POINDEXTER. May I inquire where the land is situated that is referred to in the bill?

Mr. MYERS. I move that the House amendments be concurred in by the Senate.

The PRESIDING OFFICER. The Senator from Washington desires some information.

Mr. POINDEXTER. Where is the land located?

Mr. MYERS. It is in the State of Montana. The House amendments are not particularly material and are perfectly acceptable. I move that they be concurred in.

The motion was agreed to.

EMERGENCY TARIFF.

Mr. SMOOT. I move that the Senate proceed to the consideration of the bill (H. R. 15275) imposing temporary duties upon certain agricultural products to meet present emergencies, to provide revenue, and for other purposes.

Mr. SIMMONS. Before action is taken on the motion of the Senator from Utah, I desire to ask whether it is his purpose to take up the bill at once for consideration?

Mr. SMOOT. I will say to the Senator that it is not. Unless some one wishes to discuss it at this time, I shall ask that it may be temporarily laid aside.

Mr. SIMMONS. May I ask the Senator, further, if he is in a position to state when it is expected to take up the bill for consideration?

Mr. SMOOT. If the notices that are already given are to be followed out, there will be speeches to-morrow that will take up the whole day.

Mr. SIMMONS. Could we not, then, have an understanding that the bill will not be taken up until some subsequent day? I wish to say to the Senator that in conference with the chairman of the Committee on Finance I was led to believe that the bill would probably not be taken up until toward the close of the week.

Mr. SMOOT. I will say to the Senator that I expect to occupy some time upon what is known as the packers' bill. I know that the Senator from Illinois [Mr. SHERMAN] desires to speak three or four hours upon that bill, if not longer. I know that the Senator from Maine [Mr. FERNALD] expects to speak at least an hour and a half on Friday upon the Federal control of industries. I feel safe in saying to the Senator that there will not be much done with the bill until toward the close of the week.

Mr. SIMMONS. Then, I understand the Senator will lay aside temporarily the emergency tariff bill for the consideration of the packers' bill?

Mr. SMOOT. The speeches that are to be made will be made upon that bill.

Mr. SIMMONS. The Senator does not expect to take up the emergency tariff bill for consideration by the Senate until toward the close of the week?

Mr. SMOOT. I do not see how we can do so before that time.

Mr. KING. I wish to inquire of my colleague whether the testimony taken before the Committee on Finance is available to Senators now?

Mr. SMOOT. I think it is available. If the Senator will ask the clerk of the Committee on Finance, he can no doubt procure copies of it.

Mr. KING. I think Senators desire to have access to the testimony and an opportunity to read it before the bill shall be taken up for consideration.

Mr. SMOOT. I am sure if the Senator will inquire of the clerk of the committee he can secure a copy of the testimony.

Mr. HARRISON. Mr. President, will not the Senator withhold his motion until to-morrow? The reason why I make the request is because several days ago the Senator from Washington [Mr. POINDEXTER] stated that he was going to call up the motion to reconsider what is known as the Poindexter antistrike bill, immediately following the disposition of the District of Columbia appropriation bill. The Senator from California [Mr. JOHNSON], who is not now in the Senate Chamber, is very anxious to get before the Senate the minimum wage bill. He served notice on the Senate some days ago that immediately after we had finished the District of Columbia appropriation bill he would call up the minimum wage bill.

These are two bills which we have had notice served upon us would be called up, and we are now taking action when the Senator from Wisconsin [Mr. LA FOLLETTE] is not on the floor and the Senator from California [Mr. JOHNSON] is not here either, and they possibly do not know that the matter is now before the Senate, because I think they are busy here at a meeting of the Committee on Manufactures on a very important proposition. I see that the Senator from California has just entered the Chamber.

Then, too, I may say that the Senator from Maryland [Mr. FRANCE] has charge of a bill which in my opinion is one of the most important bills that the Senate can consider, and it should be passed at an early date. It is a bill that deals with disabled soldiers, providing hospitals for them. The Senator from Maryland served notice on the Senate only two or three days ago that immediately after we finished the District of Columbia appropriation bill he would try to make that bill the unfinished business. He is vitally interested in it. It is a matter on which the Senate ought to take immediate action and get through with it.

So I suggest to the Senator that he put off his motion until to-morrow, when the various Senators interested in these measures can be here, and then, if they consent to the course proposed, it is all right.

Mr. SMOOT. I will say to the Senator that as far as the hospitals for disabled soldiers are concerned, that question will be taken up by the Committee on Appropriations of the Senate, and I have not any doubt but that the program which has been mapped out by the Surgeon General of the Public Health Service will be put into an appropriation bill. I do not know whether the Senator was in the Chamber at the time I made that statement to the Senator from Maryland, and it was perfectly satisfactory to him.

Mr. HARRISON. I did not hear that statement.

Mr. SMOOT. All that the Senator from Maryland desires is to have an appropriation made for that purpose. The Surgeon General says it will take three years to carry out the program, and he asks for an appropriation of $30,000,000 for that purpose. He desires an appropriation for this year of $10,000,000, and I have not any doubt, I will say to the Senator, that that will be the program to be carried out.

Mr. HARRISON. I am very much in favor of the bill for the relief of disabled soldiers. I notice that it was reported out of the committee on June 2, 1920, and it has been on the calendar ever since. The bill ought to be considered, it would seem to me, and in fairness to the Senator from Maryland I think it would be best to consider and pass that measure. I did not hear the discussion in the Senate to which the Senator has called my attention.

Mr. SMOOT. As I have already stated, there is no desire on the part of any member of the Finance Committee to force the bill to consideration immediately. The morning hour will be open to the Senator from California [Mr. JOHNSON] at any time, or if he desires to call up his bill this afternoon I would be perfectly willing, as far as I am concerned, to lay the emergency tariff bill aside temporarily for that purpose.

Mr. HARRISON. The Senator from California gave notice several days ago that he was going to call it up immediately after we had finished the District of Columbia appropriation bill. So I call his attention to it now, because the Senator was absent at the time the matter came up, being in attendance upon a meeting of the Committee on Manufactures.

Mr. JOHNSON of California. Mr. President, I have no desire, of course, to interfere with any business that may be considered of extraordinary importance in the Senate, but here is a bill that I think in a very brief period may be disposed of. I ask the Senator from Utah if he will not permit it to come up and an endeavor made to dispose of it, which, I think, can be accomplished before adjournment time this evening. I may be in error as to that, however.

Mr. SMOOT. So far as I am concerned, I will ask that the emergency tariff bill be immediately laid aside temporarily, and then the Senator can call up his bill, if the Senate desires to do so, just as soon as the emergency tariff bill is made the unfinished business. I do not know of any speeches to be made upon it to-day, unless some one desires to speak that I do not know about.

Mr. HARRISON. Would the Senator object to allowing the minimum wage bill to be made the unfinished business, and let that be laid aside temporarily?

Mr. SMOOT. Yes; I would object to that. I desire to have the emergency tariff bill made the unfinished business, and then I shall ask to have it laid aside temporarily, if the Senate desires it to be laid aside.

Mr. HARRISON. The minimum wage bill has been on the calendar for six or eight months, I think, at least for a very long time, and it would seem to me that it ought to be made the unfinished business. It can then be laid aside temporarily and we can take up the tariff bill.

Mr. SMOOT. The same can be said of every bill on the calendar. The Senator knows that they can not all be passed.

Mr. JOHNSON of California. Do I understand the Senator from Utah to say that if the emergency tariff bill is made the unfinished business he has no objection to having it laid aside temporarily?

Mr. SMOOT. I have no objection to having it laid aside.

Mr. JOHNSON of California. And then take up the minimum-wage bill?

Mr. SMOOT. To take up any bill the Senate desires to take up.

Mr. KING. The Senator from California is aware of the fact that the senior Senator from Colorado [Mr. THOMAS] is detained from the Senate for a day or two on account of the very serious illness of his wife. The Senator from Colorado made the motion to reconsider, and I ask, as a favor to the Senator from Colorado, that the Senator from California defer his request until to-morrow in order that I may get in touch with the Senator from Colorado.

Mr. JOHNSON of California. If I could have the bill taken up to-morrow I should be perfectly willing to defer my request. All I wish to do is to have the bill taken up.

Mr. SMOOT. The Senator from California may have the bill taken up to-morrow morning for aught I know to the contrary.

Mr. JOHNSON of California. But let me say to the junior Senator from Utah [Mr. KING] that when the Senator from Colorado was interrogated by me about a month ago as to his attitude he then said—I do not quote him exactly but substantially—that he had said all he desired upon the subject of the bill. I may say further to the Senator from Utah that the bill comes to us not upon reconsideration now, because reconsideration was accorded upon the representation that certain Senators were not present when the bill was passed. So the bill is here in its entirety. I think the Senator will recall—I speak only from the RECORD, because I was not present—that the bill was not passed at the last session, or, rather, a final vote was not taken upon it, because the session expired substantially during the debate upon the bill.

Mr. KING. I do not recall just exactly the various stages of the bill. I am only asking that the Senator from California will let the bill go over until to-morrow. I will in the meantime get in touch with the Senator from Colorado and shall have no objection to taking the bill up to-morrow.

Mr. JOHNSON of California. I shall be very glad if I can have the bill taken up to-morrow; but what I want to do is to have the bill taken up and disposed of. If the Senate in its wisdom does not see fit to pass the bill, then I want it defeated, and if the Senate thinks it ought to be passed, as I believe, then I want it passed.

Mr. KING. I shall join with the Senator from California to-morrow.

Mr. JOHNSON of California. Is that satisfactory to the senior Senator from Utah?

Mr. SMOOT. It is perfectly satisfactory to me.

Mr. JOHNSON of California. May I not in some fashion, so that there will be no misunderstanding to-morrow, have unanimous consent that the bill will be taken up to-morrow?

Mr. SMOOT. I do not think the Senator from California could have unanimous consent to take up a bill that is not before the Senate.

Mr. JOHNSON of California. Then let us put the bill before the Senate, and have unanimous consent now for its consideration to-morrow.

Mr. SMOOT. Let the bill for which I have asked consideration be made the unfinished business, and then I shall consent that it be temporarily laid aside.

Mr. JOHNSON of California. To-night, so that the bill for which I asked consideration may come up to-morrow?

Mr. SMOOT. So that it may come up at once, if that is desired.

Mr. JOHNSON of California. Very well; that is all right.

Mr. SMOOT obtained the floor.

Mr. HARRISON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Mississippi?

Mr. SMOOT. I yield.

Mr. HARRISON. On behalf of the Senator from Colorado [Mr. THOMAS], I desire to submit an amendment intended to be proposed by him to the emergency tariff bill. I ask that the proposed amendment may be printed and be considered pending.

Mr. SMOOT. Very well.

The PRESIDING OFFICER. Without objection, the proposed amendment will be printed and lie on the table.

The question is on the motion of the senior Senator from Utah [Mr. SMOOT] to proceed to the consideration of the bill, the title of which will be stated.

The ASSISTANT SECRETARY. A bill (H. R. 15275) imposing temporary duties upon certain agricultural products to meet present emergencies, to provide revenue, and for other purposes.

The motion was agreed to; and the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Finance with amendments.

Mr. SMOOT. Now I ask unanimous consent that the unfinished business may be temporarily laid aside.

The PRESIDING OFFICER. The Senator from Utah asks unanimous consent that the unfinished business be temporarily laid aside. Is there objection? The Chair hears none, and it is so ordered.

COMPENSATION OF UNITED STATES EMPLOYEES.

Mr. JOHNSON of California. The unfinished business having been laid aside, I move that the Senate proceed to the consideration of House bill 5726, the so-called minimum wage bill.

Mr. SMOOT. I would rather have the Senator ask unanimous consent to proceed to the consideration of the minimum wage bill, without a direct vote of the Senate.

Mr. JOHNSON of California. Very well. I ask unanimous consent that the minimum wage bill be taken up for consideration.

The PRESIDING OFFICER. The Senator from California asks unanimous consent that the Senate proceed to the consideration of House bill 5726. Is there objection?

Mr. UNDERWOOD. Mr. President, I should like to know whether the Senator intends to attempt to get a vote on the bill this evening?

Mr. JOHNSON of California. No; that is not my intention.

Mr. UNDERWOOD. Then I will suggest to the Senator that taking the bill up this evening will not accomplish anything, because, another measure being the unfinished business, to-morrow morning he would have to move to take the bill up in any event.

Mr. SMOOT. If we recess, that would not be necessary.

Mr. UNDERWOOD. I did not know it was contemplated to take a recess.

Mr. SMOOT. It was the understanding that we should take a recess.

Mr. JOHNSON of California. I will say to the Senator from Alabama that a suggestion was made that unanimous consent be accorded to take up the measure, and then that we recess until to-morrow, at which time the bill in which I am interested may be taken up.

Mr. UNDERWOOD. Of course, then it would be in order.

Mr. JOHNSON of California. I hope the Senator from Alabama will not object to that.

Mr. UNDERWOOD. I will say to the Senator that, so far as I am concerned, I am not for the bill and expect to vote against it, but I have no desire to object and do not intend to object to its consideration. The only thought I was suggesting was that I understood we were going to adjourn, and if we

should adjourn, I thought the motion would not accomplish anything.

Mr. JOHNSON of California. I renew my request for unanimous consent that the Senate proceed to the consideration of the so-called minimum wage bill.

The PRESIDING OFFICER. Is there objection to the request of the Senator from California?

Mr. POINDEXTER. What is the request?

The PRESIDING OFFICER. The request is for unanimous consent that the Senate proceed to the consideration of House bill 5726, being what is known as the minimum wage bill.

Mr. POINDEXTER. I will ask the Senator from California what is the program in the event that is done?

Mr. JOHNSON of California. To take a recess until 12 o'clock to-morrow, when the bill will be taken up.

The PRESIDING OFFICER. Is there objection?

There being no objection, the Senate resumed the consideration of the bill (H. R. 5726) to fix the compensation of certain employees of the United States, which had been reported from the Committee on Education and Labor with amendments.

ADJUSTMENT AND LIQUIDATION OF MINERAL CLAIMS.

Mr. ROBINSON. Mr. President, I ask leave, out of order, to submit a resolution, which I ask may be printed and lie on the table.

The PRESIDING OFFICER. If there be no objection, the resolution submitted by the Senator from Arkansas will be read.

The resolution (S. Res. 429) was read, as follows:

Be it resolved, etc., That the Secretary of the Interior be, and he is hereby, directed to furnish the Senate the following information, if available:

1. A complete list of all claims filed or presented under section 5 of the act of Congress entitled "An act to provide relief in cases of contracts connected with the prosecution of the war, and for other purposes," approved March 2, 1919, including the names of claimants and amounts of their claims and when filed.

2. A list of all claims allowed under said act, including the names of claimants whose claims have been allowed and the amounts of the respective claims allowed.

3. A list of all claims presented and disallowed, together with the names of the claimants and the amounts of said claims and the reasons for the disallowance of each.

4. Information as to all legal constructions placed upon said act by the Secretary of the Interior, or by the Attorney General, together with copies of formal opinions rendered, if any, involving the construction of said act.

Mr. ROBINSON. I should like to have present consideration of the resolution, if there is no objection.

The PRESIDING OFFICER. The Senator from Arkansas asks unanimous consent for the present consideration of the resolution which has just been read. Is there objection?

Mr. SMOOT. Mr. President, will the Senator from Arkansas explain the resolution, or else permit the Secretary again to read it?

Mr. ROBINSON. I can state the object of the resolution in just a moment.

Mr. GRONNA. Mr. President, I may not want to object to the adoption of the resolution, but I should like to hear the explanation of the Senator from Arkansas.

Mr. ROBINSON. Mr. President, the resolution calls for information from the Secretary of the Interior as to what proceedings have been had under an act passed by Congress authorizing him to adjust and liquidate certain claims asserted by citizens who were alleged to have been induced by the Government or by some of its departments to engage in the business of mining manganese, chrome, pyrites, or tungsten in order to meet the requirements of the Government in the conduct of the war. A large number of these claims have been filed, and a construction has been placed upon the statute, as I have heard, that is very important and that has had the effect of denying most of the claims that have been presented.

I desire to bring to the Senate the information regarding the matter which is in the hands of the Secretary of the Interior, together with the opinion of the Attorney General which has been rendered upon the subject, so that if the Senate desires to do so it may hereafter take further action regarding the matter. The resolution merely calls for information.

Mr. GRONNA. I have no objection to the resolution.

The PRESIDING OFFICER. Without objection, the resolution is agreed to.

INTERFERENCE WITH COMMERCE.

Mr. POINDEXTER. I should like to make a request for unanimous consent in connection with the matter which I gave notice I would call up at this time. I refer to Senate bill 4204. There is a motion for reconsideration pending. I ask unanimous consent that the motion for reconsideration be granted and that the bill remain upon the calendar in the status in which it formally was.

The PRESIDING OFFICER. Is there objection?

Mr. GRONNA. I shall have to object to that.

PETITIONS AND MEMORIALS.

Mr. LODGE presented a memorial of the Union Park Street Temple, of Brookline, Mass., remonstrating against the enactment of legislation restricting the immigration of aliens, which was referred to the Committee on Immigration.

He also presented a resolution adopted by the Massachusetts Society of the Sons of the American Revolution, of Boston, Mass., favoring the enactment of legislation restricting the immigration of aliens, which was referred to the Committee on Immigration.

Mr. McLEAN presented a memorial of the Hearthstone Club, of Hartford, Conn., remonstrating against the enactment of legislation commercializing the national parks, which was referred to the Committee on Commerce.

He also presented petitions of J. Edmund Miller, president Federation of Federal Employees, of Hartford, Conn.; William R. Pollock, president Local No. 162, Federal Employees, of New London, Conn.; George G. Hummel, of Naugatuck, Conn.; Edward J. Hummel, of Naugatuck, Conn.; and Henry Merhoff, of Naugatuck, Conn., praying for the enactment of legislation continuing the $240 bonus to Federal employees for the next fiscal year, which was referred to the Committee on Appropriations.

He also presented a memorial of sundry citizens of Bridgeport, Conn., protesting against present conditions in the occupied zone of the Rhine in respect to the presence and action of French colonial troops, which was referred to the Committee on Foreign Relations.

Mr. PHIPPS presented a resolution of La Veta Post, No. 32, Grand Army of the Republic, of Walsenburg, Colo., opposing any further increase of pensions for the soldiers of the Civil War until the condition of the country's finances will warrant such an increase, which was referred to the Committee on Pensions.

Mr. CAPPER presented a resolution adopted by the American Farm Bureau Federation at its recent annual meeting held in the city of Indianapolis, Ind., favoring the truth in fabric bill, which was referred to the Committee on Interstate Commerce.

REPORT OF COMMITTEE ON CLAIMS.

Mr. CAPPER, from the Committee on Claims, to which was referred the bill (S. 2682) for the relief of Blanche Winters, reported it favorably without amendment and submitted a report (No. 701) thereon.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SWANSON:

A bill (S. 4885) granting an increase of pension to Rose B. Isaac; to the Committee on Pensions.

By Mr. CALDER:

A bill (S. 4886) to extend the time of the Hudson River Connecting Railroad Corporation for the completion of its bridge across the Hudson River, in the State of New York; to the Committee on Commerce.

By Mr. TRAMMELL:

A bill (S. 4887) to designate Tampa, Fla., as a port at which a marine school may be established and maintained under the act of Congress approved March 4, 1911; to the Committee on Naval Affairs.

AMENDMENT TO SUNDRY CIVIL APPROPRIATION BILL.

Mr. FLETCHER submitted an amendment proposing to appropriate $250,000 for purchasing a site for and constructing and equipping a lighthouse depot for the seventh lighthouse district, and also $17,500 for establishing and improving aids to navigation in Tampa Bay, Fla., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

RECESS.

Mr. CURTIS. I move that the Senate take a recess until 12 o'clock to-morrow.

The motion was agreed to; and (at 3 o'clock and 30 minutes p. m.) the Senate took a recess until to-morrow, Thursday, January 20, 1921, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

WEDNESDAY, *January 19, 1921.*

The House met at 12 o'clock noon.

Rev. John Brittan Clark, D. D., of the First Presbyterian Church, Washington, D. C., offered the following prayer:

Most holy and eternal God, we come again to dip our emptiness into Thy limitless fullness. Speak again the words that dispelled the darkness brooding over the world at first—let there be light. So much of our light is shrouded in confusion and uncertainty, and our paths we do not always know. Let there be light, and when it dawns may we recognize that it always was and is and ever will be the light of the world. Amen.

The Journal of the proceedings of yesterday was read and approved.

APPORTIONMENT OF REPRESENTATIVES.

Mr. SIEGEL. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 14498) for the apportionment of Representatives in Congress amongst the several States under the Fourteenth Census.

The question was taken.

Mr. GARD. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER. Evidently there is no quorum present. The Doorkeeper will close the doors, the Sergeant at Arms will notify absentees. The question is on the motion of the gentleman from New York that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the apportionment bill.

The question was taken; and there were—yeas 335, not voting 95, as follows:

YEAS—335.

So the motion was agreed to.

The Clerk announced the following pairs:

Until further notice:

Mr. DUNBAR with Mr. MONTAGUE.

Mr. WINSLOW with Mr. GODWIN of Arkansas.

Mr. SANDERS of Indiana with Mr. BELL.

Mr. REED of West Virginia with Mr. GALLIVAN.

Mr. RIDDICK with Mr. DAVEY.

Mr. EMERSON with Mr. BLANTON.

Mr. FISH with Mr. DONOVAN.

Mr. GRAHAM of Pennsylvania with Mr. STEELE.

Mr. WALSH with Mr. STEVENSON.

Mr. MCPHERSON with Mr. MAJOR.

Mr. HULINGS with Mr. CASEY.

Mr. KREIDER with Mr. BLACKMON.

Mr. LEHLBACH with Mr. KITCHIN.

Mr. ROSE with Mr. MILLIGAN.

Mr. TAYLOR of Tennessee with Mr. JOHN W. RAINEY.

Mr. EDMONDS with Mr. HAYDEN.

Mr. SMITH of Illinois with Mr. CANTRILL.

Mr. CROWTHER with Mr. CONNALLY.

Mr. FOSTER with Mr. GODWIN of North Carolina.

Mr. JEFFERIS with Mr. HAMILL.

Mr. STINESS with Mr. SABATH.

Mr. NELSON of Wisconsin with Mr. MCKINLEY.

Mr. GOOD with Mr. FERRIS.

Mr. HARDY of Colorado with Mr. O'CONNELL.

Mr. SELLS with Mr. MCLANE.

Mr. MERRITT with Mr. SANDERS of Louisiana.

Mr. KENNEDY of Iowa with Mr. RANDALL of California.

Mr. FORDNEY with Mr. HENRY T. RAINEY.

Mr. ANDREWS of Maryland with Mr. SMITH of New York.

Mr. PATTERSON with Mr. BABKA.

Mr. DALLINGER with Mr. BLAND of Missouri.

Mr. COPLEY with Mr. MANN of South Carolina.

Mr. VARE with Mr. ROWAN.

Mr. SMITH of Michigan with Mr. KINCHELOE.

Mr. LAMPERT with Mr. MAHER.

Mr. BAER with Mr. OVERSTREET.

Mr. SANFORD with Mr. RAINEY of Alabama.

Mr. ELLSWORTH with Mr. DOUGHTON.

Mr. JAMES of Michigan with Mr. MOONEY.

Mr. RANDALL of Wisconsin with Mr. HUDSPETH.

Mr. HAMILTON with Mr. DOOLING.

Mr. KELLEY of Michigan with Mr. RIORDAN.

Mr. LUHRING with Mr. GANLY.

Mr. MORIN with Mr. MOON.

Mr. COSTELLO with Mr. WATKINS.

The result of the vote was announced as above recorded.

The SPEAKER. A quorum is present. The Doorkeeper will open the doors and the gentleman from Kansas [Mr. CAMPBELL] will resume the chair.

Accordingly the House resolved itself in the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 14498, with Mr. CAMPBELL of Kansas in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 14498, the congressional apportionment bill, which the Clerk will report by title.

The Clerk read as follows:

A bill (H. R. 14498) for the apportionment of Representatives in Congress among the several States under the Fourteenth Census.

The CHAIRMAN. The Clerk will read the bill for amendment.

Mr. BLAND of Indiana. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BLAND of Indiana. At what time would it be proper to move to strike out the enacting clause?

The CHAIRMAN. After the reading of the first section of the bill that motion will be in order. The Clerk will read.

The Clerk read as follows:

Be it enacted, etc., That after the 3d day of March, 1923, the House of Representatives shall be composed of 483 Members, to be apportioned among the several States as follows:

Alabama, 11; Arizona, 1; Arkansas, 8; California, 16; Colorado, 4; Connecticut, 6; Delaware, 1; Florida, 4; Georgia, 13; Idaho, 2; Illinois, 30; Indiana, 13; Iowa, 11; Kansas, 8; Kentucky, 11; Louisiana, 8; Maine, 4; Maryland, 7; Massachusetts, 18; Michigan, 17; Minnesota, 11; Mississippi, 8; Missouri, 16; Montana, 2; Nebraska, 6; Nevada, 1; New Hampshire, 2; New Jersey, 14; New Mexico, 2; New York, 47; North Carolina, 12; North Dakota, 3; Ohio, 26; Oklahoma, 9; Oregon, 4; Pennsylvania, 40; Rhode Island, 3; South Carolina, 8; South Dakota, 3; Tennessee, 11; Texas, 21; Utah, 2; Vermont, 2; Virginia, 11; Washington, 6; West Virginia, 7; Wisconsin, 12; Wyoming, 1.

Mr. BLAND of Indiana. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman from Indiana rise?

Mr. BLAND of Indiana. Mr. Chairman, I desire to move to strike out the enacting clause, which I understand is a preferential motion.

The CHAIRMAN. The gentleman from Indiana is recognized to make that motion.

Mr. BLAND of Indiana. Mr. Chairman, I move to strike out the enacting clause, and I would like to be heard.

The CHAIRMAN. The gentleman from Indiana moves to strike out the enacting clause of the bill. The gentleman from Indiana.

Mr. GARRETT. Mr. Chairman, I make the point of order the gentleman from Indiana does not make his motion in the right form.

Mr. BLAND of Indiana. I will send it up in writing, if necessary.

Mr. GARRETT. I did not mean in writing. I make no question on that, but the gentleman has not made his motion in the correct form. The Committee of the Whole House on the state of the Union does not strike out the enacting clause.

Mr. BARBOUR. Mr. Chairman, I desire to offer an amendment as a member of the committee.

The CHAIRMAN. A point of order is pending.

Mr. BARBOUR. Mr. Chairman, a parliamentary inquiry?

The CHAIRMAN. The gentleman will state it.

Mr. BARBOUR. Can I offer the amendment and have it pending?

The CHAIRMAN. The gentleman from California will withhold his amendment until the gentleman from Indiana perfects his motion.

Mr. BLAND of Indiana. Mr. Chairman, I would like to amend the motion or make a substitute motion. I move that the bill be recommitted—no; reported back to the House with the enacting clause stricken out.

Mr. GARRETT. Mr. Chairman, I make the point of order that a motion to recommit is not in order in the Committee of the Whole.

The CHAIRMAN. The Chair understood the gentleman made a correction. The gentleman from Indiana will state his motion.

Mr. BLAND of Indiana. I have so many suggestions I do not know which to take, Mr. Chairman. I felt it was in order to move to strike out at this time. I will let the Chair rule on the first motion.

Mr. ASWELL. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman from Louisiana rise?

Mr. ASWELL. Mr. Chairman, I ask unanimous consent that a letter addressed to the committee this morning be read that is explanatory of the desire of the gentleman from Indiana to make the motion to strike out the enacting clause. I ask unanimous consent that the letter may be read by the Clerk.

Mr. BARBOUR. I object, Mr. Chairman.

The CHAIRMAN. Objection is heard.

Mr. ASWELL. Mr. Chairman, I ask unanimous consent that I may explain the letter, then.

The CHAIRMAN. The gentleman from Louisiana asks unanimous consent that he may explain the letter. Is there objection?

Mr. BARBOUR. I object.

The CHAIRMAN. Objection is heard.

Mr. SIEGEL. Mr. Chairman, I move to strike out the last two words. Mr. Chairman, I withdraw that.

The CHAIRMAN. A preferential motion is pending.

Mr. MANN of Illinois. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MANN of Illinois. What is now pending before the committee?

The CHAIRMAN. A point of order on the motion of the gentleman from Indiana, to strike out the enacting clause or that the committee report the bill back to the House with the enacting clause stricken out.

Mr. BLAND of Indiana. Mr. Chairman, page 46 of the procedure of the House of Representatives——

Mr. GARRETT. Mr. Chairman, I did not make a point of order on the proposition as stated by the Chairman, but made the point of order——

The CHAIRMAN. The Chair understood in the confusion the gentleman from Indiana to include the form in which the Chair stated the motion. The Chair thinks in the confusion the gentleman from Tennessee did not hear. [Laughter.] The gentleman from Indiana has the floor.

Mr. MANN of Illinois. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman from Illinois rise?

Mr. MANN of Illinois. To submit a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MANN of Illinois. I do not quite understand yet what is pending before the committee.

The CHAIRMAN. The gentleman from Indiana [laughter] made a motion to strike out the enacting clause and to that motion the gentleman from Tennessee made a point of order. Then the gentleman from Indiana undertook to make his motion in order, and, as the Chair understood, made a motion that the committee recommend to the House that the enacting clause be stricken out of the bill. That, as the Chair understands, is the parliamentary situation.

Mr. SNELL. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. SNELL. As I understand the rules of the House, when a member of the committee desires recognition and at the same time another Member, he is entitled to the first recognition. Why was not Mr. BARBOUR recognized at that time?

The CHAIRMAN. The motion to strike out the enacting clause is a preferential one.

Mr. GARD. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. GARD. My understanding was that the gentleman first made what he said was an effort to strike out the enacting clause, and then abandoned that and made a motion to recommit. Has that point been abandoned, or has the first motion been renewed, or what has happened?

Mr. BLAND of Indiana. I understand that is water that has passed over the mill.

The CHAIRMAN. The gentleman from Indiana will state his motion as he desires to make it.

Mr. BLAND of Indiana. I will state it as I originally stated it. I want to strike out the enacting clause, and I desire to call the Chair's attention to the rule.

Mr. WINGO. Mr. Chairman, the regular order. Let us have the amendment regularly reported.

The CHAIRMAN. The gentleman from Indiana [Mr. BLAND] moves to strike out the enacting clause of the bill.

Mr. DYER. Mr. Chairman, I ask for the regular order. I ask that the amendment be reported.

The CHAIRMAN. The Clerk will report the amendment of the gentleman from Indiana.

The Clerk read as follows:

Mr. BLAND of Indiana moves to strike out the enacting clause.

Mr. GARRETT. I make the point of order, Mr. Chairman, that it is not stated in the regular form.

The CHAIRMAN. The gentleman from Tennessee will state his point of order.

Mr. BLAND of Indiana. On page 46 of the "Procedure in the House of Representatives," which has been handed me, I wish to read from, as follows:

> Mr. Speaker, I move to strike out the enacting clause.
> It is held that it is:
> Not in order until the first section of the bill has been read.
> Not in order after the reading for amendment has been concluded. (Is in order at any time after the reading of the first section up to but not after the reading of the last section.)

Mr. MADDEN. Mr. Chairman, I make the point of order that we are not in the House, and that the motion can not be made in the Committee of the Whole. The Speaker is not presiding.

Mr. BLAND of Indiana. Mr. Chairman, a simple reference to the rules ought to govern the matter. Clause 7 of Rule XXIII provides:

> A motion to strike out the enacting words of a bill shall have precedence of a motion to amend, and, if carried, shall be considered equivalent to its rejection. Whenever a bill is reported from a Committee of the Whole with an adverse recommendation and such recommendation is disagreed to by the House, the bill will stand recommitted to the said committee—

And so forth. That plainly provides a motion to strike out the enacting clause is in order in the Committee of the Whole. And the practice has been several times followed where the House rejected the motion to strike out the enacting clause, submitted as an amendment in the Committee of the Whole, and it was immediately resolved back into the House.

Mr. HICKS. Is it not a fact that in Volume V of Hinds' Precedents, paragraph 5332, it states:

> The motion to strike out the enacting clause applies in Committee of the Whole.

Mr. MANN of Illinois. I do not know about that, but I do know that it does apply.

Mr. BLAND of Indiana. And it also so states this in several other places in the same volume.

The CHAIRMAN. The Chair is inclined to think the motion is in order. He has not found the exact language before him. The Chair overrules the point of order.

Mr. GARRETT. Mr. Chairman, I will say that the form of the gentleman's motion should be that the committee rise and report the bill to the House with the recommendation that the enacting clause be stricken out.

Mr. MANN of Illinois. That motion is not in order, Mr. Chairman.

The CHAIRMAN. The gentleman from Indiana [Mr. BLAND] is recognized.

Mr. BLAND of Indiana. Mr. Chairman, I think Congress should have the courage to regulate the size of this House by submitting a constitutional amendment. I believe it is a bad time to undertake to determine the size of this House, after the census has been taken in the peculiar time and manner in which it has been taken. I think evidence could be submitted here that will show conclusively that errors in the census, on which this proposed action is to be taken, would probably change the representation in as many as six States. Surely we do not want to act upon such an important matter on an erroneous census, and which action will last for 10 years.

Mr. MONDELL. Will the gentleman yield?

Mr. BLAND of Indiana. In just a minute.

During the war the great activities in the big cities of this country drew men from the farming communities of the Nation like a magnet. In fact, some of those communities are drained of their help. Necessarily, there is an increase of population in the great cities. The time must come when this tide must flow back. But this census shows that men have left the farm. Therefore the great industrial centers will, in my judgment, receive undue representation in Congress after the tide sets back to the farm. Some say that because such large numbers of the people are temporarily in the big cities they ought to have more representation than other sections. But no one will contend but that the industrial centers of the United States are ardently and enthusiastically represented here on the floor of this House. If you will look over the steering committee of the majority party, you will conclude that the industrial centers are certainly very powerfully represented here. To apportion the Members of Congress, as proposed in this bill, at 483, giving the lion's share to the industrial centers of the country, is to further denude the agricultural sections of their power in this country. I am opposed to increasing the number of Members of the Congress at this time when agriculture and increased production are so important to the welfare and life of the Nation. I say it is very essential that we do not further build up the power of the congested centers in this House so as to absolutely trample on the rights of the people in the more sparsely settled communities. Therefore I move to strike out the enacting clause, with the hope that there will be no legislation on the subject upon an admittedly erroneous census, and a census which by reason of war conditions is not a fair basis to figure from. The Constitution says we must reduce representation where they deprive anyone of voting, but we have not the courage to do that. If we have not the courage to perform our constitutional functions in one instance, we do not have to take this step now. Therefore I am opposed to 483 Members, to be selected as the majority bill provides here, and I would be in favor later of a constitutional amendment for the purpose of determining the size of this House, and I would be for a House no larger than the present one.

Now I yield to the gentleman from Wyoming.

Mr. SIEGEL. Mr. Chairman, I rise in opposition to the amendment, and in that connection I desire to state that I have received a letter this morning from Prof. Edward Huntington, the head of the Harvard Engineering School, calling my attention to certain facts in——

Mr. GARRETT. Mr. Chairman, I want to submit a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. GARRETT. Mr. Chairman, do I understand that the gentleman from New York favors the motion of the gentleman from Indiana?

Mr. SIEGEL. No; I am opposing the motion. A letter wherein he endeavors to establish that under the method adopted by the committee there is some doubt, and grave doubt, whether the States would receive in their reapportioned number of Members the correct number, if 435 should be finally decided upon. In that connection I desire to read the letter. Therefore I ask unanimous consent to proceed for 10 minutes, in order that the whole letter may be read by me, if desired.

The CHAIRMAN. Is there objection to the request of the gentleman that the Clerk shall read the letter?

There was no objection.

Mr. SIEGEL. I will read the letter myself. It says——

Mr. CARAWAY. Mr. Chairman, I object to the gentleman reading it.

The CHAIRMAN. Unanimous consent was granted.

Mr. CARAWAY. Did the Chairman submit that request?

The CHAIRMAN. The unanimous request was that the Clerk read the letter.

Mr. SIEGEL. I did not put it in that way, Mr. Chairman. I asked unanimous consent to proceed for 10 minutes, and the request was granted; and I propose to read this letter in my own way, and I do not propose to have any Member of the House, no matter where he comes from, say who is to read it.

Mr. MANN of Illinois. Mr. Chairman, I move that the gentleman be permitted to read the letter in his own time.

The CHAIRMAN. The gentleman from Illinois moves that the gentleman from New York be permitted to read the letter in his own time. The question is on agreeing to that motion.

Mr. CARAWAY. Is the motion to do that?

The CHAIRMAN. Yes. The motion is in order. The question is, Shall the gentleman from New York be permitted to read the letter?

The question was taken, and the motion was agreed to.

Mr. SIEGEL. The letter reads:

HARVARD UNIVERSITY,
THE HARVARD ENGINEERING SCHOOL,
Cambridge, Mass., January 17, 1921.

Hon. ISAAC SIEGEL,
Chairman Committee on the Census,
House of Representatives, Washington, D. C.

DEAR SIR: I thank you for your letter of January 14 in reply to mine of January 8, and am glad that you took the matter up with Dr. Hill. It was indeed through his request that the need of a strictly mathematical solution of this problem was first called to my attention a few weeks ago.

At the time I wrote to you I had not yet had opportunity to lay my theory before Dr. Hill, so that I am not surprised that he advised you that Prof. Willcox's method (the method of major fractions) was deemed the fairest up to the present time.

Within the last few days, however, I have finished the formal exposition of my method and its application to the 1920 census, and only yesterday sent a copy to Dr. Hill.

Prof. Persons, Prof. Holcombe, and other statistical experts in the university who have examined my plan have pronounced it the only scientific method, and have given me permission to state so. I have, therefore, every reason to hope that Dr. Hill also will indorse my plan as soon as he has had time to examine it.

I shall be in Washington on Friday of this week, attending a statistical conference of the National Research Council, and if your committee or any members of it would be willing at this late date to let me lay my plan before you, I should gladly meet any appointment you wish to make for Friday afternoon, January 21, or for Saturday, January 22.

I am preparing some simple charts and tables by which, without going into any mathematical technicalities, I believe I can make the reasonableness of my plan entirely evident.

The importance of the problem is increased by the possible adoption of 435 as the total, for the Willcox tables for 435 are incorrect (according to my view) in the case of no less than three pairs of States.

1920	New Mexico.	New York.	Rhode Island.	North Carolina.	Vermont.	Virginia.
Willcox method.....	1	43	2	11	1	10
Improved method...	2	42	3	10	2	9

I can be reached by telegram at 27 Everett Street, Cambridge, Mass., up to Thursday noon, or by letter at the Cosmos Club, Washington, on Friday.

Thanking you again for your courteous attention to this matter, I am,

Sincerely, yours, EDWARD V. HUNTINGTON.

Mr. Chairman and gentlemen of the committee, I feel, regardless of the fact that by the method proposed in this letter the State of New York might be reduced to 42, that in justice to gentlemen who have been claiming that the method adopted by the committee may not be correct, based upon the census figures—and these experts from Harvard claim there is a doubt—it should be placed before this House and this committee to determine what it desires to do under those circumstances.

Mr. FLOOD. Mr. Chairman, will the gentleman yield?

Mr. TINCHER. Mr. Chairman, will the gentleman yield there?

Mr. SIEGEL. Yes.

Mr. TINCHER. Did the gentleman's committee this morning take any action upon that matter or based upon that letter?

Mr. SIEGEL. The committee took certain action this morning, but the committee finds itself in the position where the matter must be brought before the Committee of the Whole House in order to determine the question.

Mr. TINCHER. Let me ask you this question: Did not your committee this morning determine unanimously to withdraw this question from the consideration of the House at present and have the benefit of further information in your committee in order to raise it under certain conditions?

Mr. DYER. Mr. Chairman, I make the point of order that the chairman is not permitted under the rules to answer the question. He can not answer it under the rules.

Mr. SIEGEL. There is no question but that the point of order is well taken. I recognize that such is the rule.

Mr. FLOOD. Mr. Chairman, will the gentleman yield for a question?

Mr. SIEGEL. Yes.

Mr. FLOOD. Did your committee consider these figures carefully before you made such an elaborate report to the House?

Mr. SIEGEL. The committee had before it first Dr. Joseph A. Hill, who is the expert of the Census Bureau, a couple of weeks ago. Then it recalled him and he frankly admitted that in the first computation he was wrong in several particulars. Then we printed the second document, which is before the House.

Mr. FLOOD. Did you make a careful examination of the correctness of the figures before you made the report?

Mr. SIEGEL. We based it on what Dr. Hill stated. But it is a fact that 10 years ago and 20 years ago other experts were called in, and it was in a desire to save money that we proceeded solely upon the testimony of the Census Bureau. We have no reason to doubt the accuracy of his computation except this letter.

Mr. FLOOD. You come before the House now and acknowledge that the report was not correct?

Mr. SIEGEL. I do not.

Mr. FLOOD. Then you claim you are correct?

Mr. SIEGEL. It is as correct as any committee can make it. When certain experts declare that it is incorrect, and experts differ, then it is my duty to report it to the House.

Mr. LANGLEY. Mr. Chairman, will the gentleman yield?

Mr. SIEGEL. Yes.

Mr. LANGLEY. Is it a fact or not that the gentleman talked over the telephone this morning with the Director of the Census, and that he advised that this matter be further considered by the committee?

Mr. SIEGEL. This letter was received in the second mail this morning. I talked with the director over the telephone, and he stated there was no doubt that these persons mentioned were high authorities, and that he could see no reason why Dr. Hill should not come before us as well as these gentlemen.

Mr. MOORE of Virginia and Mr. BARBOUR rose.

The CHAIRMAN. Does the gentleman yield, and to whom?

Mr. SIEGEL. I yield to the gentleman from California, a member of the committee.

Mr. BARBOUR. Did the chairman telephone to Dr. Hill this morning?

Mr. SIEGEL. No. The letter was received by me, as I say, in the second mail. I telephoned to Mr. Rogers, the head of the census, and I summoned a meeting of the committee as quickly as I could get them together. There was some trouble in getting them together on account of the short notice. I believe that Dr. Hill would favor our having these other experts appear, as they are probably following some other system than major fractions, the one we adopted.

Mr. BARBOUR. Did not Dr. Hill, the statistical expert of the Census Bureau, testify before the committee, in answer to a question of the chairman of the committee, which I shall read:

You need not testify, Dr. Hill, as to how the changes have been made. But I want you to testify that these are the corrected figures, if such be the fact.

Dr. Hill said:

Well, these figures are based on the final population returns and will stand; there will be no further change. The others—

Referring to former figures that he had given—

were based on preliminary population figures, which were subject to revision.

Mr. SIEGEL. That is correct. We made every effort to get the correct figures.

The CHAIRMAN. The question is on the motion of the gentleman from Indiana [Mr. BLAND] to strike out the enacting clause of the bill.

Mr. TINKHAM. Mr. Chairman, I desire to favor the motion.

Mr. GARRETT. I ask unanimous consent that the gentleman from Georgia [Mr. LARSEN], who is opposed to the motion, may be recognized for 10 minutes.

The CHAIRMAN. The gentleman from Tennessee asks unanimous consent that the gentleman from Georgia [Mr. LARSEN] be permitted to address the committee upon this motion. It there objection?

Mr. ASWELL. Reserving the right to object, unless 10 minutes can be given to those favoring the bill, I shall have to object.

SEVERAL MEMBERS. Regular order!

Mr. GARRETT. Mr. Speaker, I will put it in this way then. I will ask unanimous consent that the gentleman from Georgia may have five minutes. The gentleman from Indiana made a speech against it. I think it is fair that the gentleman from Georgia should have time.

The CHAIRMAN. The gentleman from Tennessee asks unanimous consent that the gentleman from Georgia [Mr. LARSEN] be permitted to address the House for five minutes. Is there objection?

Mr. TINKHAM. I object unless I may have five minutes.

The CHAIRMAN. The gentleman from Massachusetts objects.

SEVERAL MEMBERS. Vote! Vote!

The CHAIRMAN. The question is on the motion of the gentleman from Indiana [Mr. BLAND] to strike out the enacting clause.

The question being taken, the Chairman announced that he was in doubt, and that those in favor of the motion would rise and stand until they were counted.

Pending the count,

Mr. DYER. Mr. Chairman, I ask for tellers.

Tellers were ordered; and the Chairman appointed Mr. BLAND of Indiana and Mr. SIEGEL.

The committee divided; and the tellers reported—ayes 92, noes 197.

Accordingly the motion to strike out the enacting clause was rejected.

Mr. BARBOUR. Mr. Chairman, I offer the amendment which I send to the Clerk's desk.

The CHAIRMAN. The gentleman from California offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. BARBOUR: Page 1, lines 4 and 5, strike out "483" and insert in lieu thereof "435."

Also, strike out from and including line 7, page 1, to and including line 17, page 3, and insert in lieu thereof the following:

Alabama, 10; Arizona, 1; Arkansas, 7; California, 14; Colorado, 4; Connecticut, 6; Delaware, 1; Florida, 4; Georgia, 12; Idaho, 2; Illinois, 27; Indiana, 12; Iowa, 10; Kansas, 7; Kentucky, 10; Louisiana, 7; Maine, 3; Maryland, 6; Massachusetts, 16; Michigan, 15; Minnesota, 10; Mississippi, 7; Missouri, 14; Montana, 2; Nebraska, 5; Nevada, 1; New Hampshire, 2; New Jersey, 13; New Mexico, 1; New York, 43; North Carolina, 11; North Dakota, 3; Ohio, 24; Oklahoma, 8; Oregon, 3; Pennsylvania, 36; Rhode Island, 2; South Carolina, 7; South Dakota, 3; Tennessee, 10; Texas 19; Utah, 2; Vermont, 1; Virginia, 10; Washington, 6; West Virginia, 6; Wisconsin, 11; Wyoming, 1.

Mr. SWEET. Mr. Chairman, I offer an amendment to the amendment.

The CHAIRMAN. The gentleman from Iowa offers an amendment to the amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. SWEET:
As a substitute for the amendment offered to section 1 strike out all after the enacting clause in section 1 and substitute the following in lieu thereof:
That after the 3d day of March, 1923, the House of Representatives shall be composed of 460 Members, to be apportioned among the several States as follows:
Alabama, 10; Arizona, 1; Arkansas, 8; California, 15; Colorado, 4; Connecticut, 6; Delaware, 1; Florida, 4; Georgia, 13; Idaho, 2; Illinois, 28; Indiana, 13; Iowa, 11; Kansas, 8; Kentucky, 11; Louisiana, 8; Maine, 3; Maryland, 6; Massachusetts, 17; Michigan, 16; Minnesota, 10; Mississippi, 8; Missouri, 15; Montana, 2; Nebraska, 6; Nevada, 1; New Hampshire, 2; New Jersey, 14; New Mexico, 2; New York, 45; North Carolina, 11; North Dakota, 3; Ohio, 25; Oklahoma, 9; Oregon, 3; Pennsylvania, 38; Rhode Island, 3; South Carolina, 7; South Dakota, 3; Tennessee, 10; Texas, 20; Utah, 2; Vermont, 2; Virginia, 10; Washington, 6; West Virginia, 6; Wisconsin, 11, Wyoming, 1.

Mr. JONES of Texas. Mr. Chairman, I offer an amendment to the substitute, to strike out the figures indicated and insert the following, which I send to the desk.

The CHAIRMAN. The gentleman from Texas offers an amendment to the substitute offered by the gentleman from Iowa, which the Clerk will report.

The Clerk read as follows:

Amendment to the substitute offered by Mr. JONES of Texas: That after the 3d day of March, 1923, the House of Representatives shall be composed of 307 Members, to be apportioned among the several States as follows:
Alabama, 7; Arizona, 1; Arkansas, 5; California, 10; Colorado, 3; Connecticut, 4; Delaware, 1; Florida, 3; Georgia, 8; Idaho, 1; Illinois, 19; Indiana, 8; Iowa, 7; Kansas, 5; Kentucky, 7; Louisiana, 5; Maine, 3; Maryland, 4; Massachusetts, 11; Michigan, 10; Minnesota, 7; Mississippi, 5; Missouri, 10; Montana, 2; Nebraska, 4; Nevada, 1; New Hampshire, 1; New Jersey, 9; New Mexico, 1; New York, 30; North Carolina, 7; North Dakota, 2; Ohio, 16; Oklahoma, 6; Oregon, 3; Pennsylvania, 25; Rhode Island, 2; South Carolina, 5; South Dakota, 2; Tennessee, 7; Texas, 13; Utah, 2; Vermont, 1; Virginia, 7; Washington, 4; West Virginia, 4; Wisconsin, 8; Wyoming, 1.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas to the substitute offered by the gentleman from Iowa.

The question was taken; and on a division (demanded by Mr. MCARTHUR) there were—ayes 27, noes 203.

So the amendment was rejected.

The CHAIRMAN. The question now recurs upon the substitute offered by the gentleman from Iowa.

Mr. SWEET. Mr. Chairman, I desire to be heard upon my substitute. I do not expect to take much time in discussion, but simply wish to explain what the amendment that I am offering signifies. The number suggested by me in this amendment is 460, instead of 483. As I view it, if the membership of the House is placed at 460, it will disturb less States in the matter of redistricting than any other plan. In other words, there will be only 18 States affected. Thirty States will not be affected in any way. It means that 16 States will receive, in a sense, an increase and 2 States—Maine and Missouri—will lose 1 each. When the whole matter is considered, it seems to me that 460, an increase of 25, is the happy medium that this House should adopt at the present time.

The CHAIRMAN. The question is on the substitute offered by the gentleman from Iowa.

The question was taken; and on a division (demanded by Mr. SWEET), there were—ayes 55, noes 189.

So the substitute was rejected.

The CHAIRMAN. The question now recurs upon the amendment offered by the gentleman from California [Mr. BARBOUR].

Mr. GREEN of Iowa rose.

The CHAIRMAN. The gentleman from Iowa is recognized.

Mr. GREEN of Iowa. Mr. Chairman, I am not so much concerned about the number of Representatives as I am about whether the rural districts shall receive fair treatment.

The Committee on the Census has come here this morning and they admit, not a Member denies, that they do not know whether their figures on which the computation has been made are correct or not.

Mr. LARSEN. Mr. Chairman, will the gentleman yield?

Mr. GREEN of Iowa. No; I can not.

Mr. LARSEN. I am a member of the committee, and the gentleman has misstated my position.

Mr. GREEN of Iowa. Then I will withdraw that, if that makes any difference to the gentleman, but I will say that it is quite evident to the House that they do not know whether their figures are correct. Will anyone deny that?

Mr. SIEGEL. Mr. Chairman, will the gentleman yield?

Mr. GREEN of Iowa. No; I can not yield further. It is further evident to the House that there is a large number of gentlemen here who do not care whether the rural districts get fair treatment or not. The last census was taken under circumstances that were utterly unfair to the rural districts. The population of the cities had been greatly augmented by people who are not going to stay in the cities. They merely resided in the city temporarily. Already they have left the cities in large numbers and are returning to the rural districts. But gentlemen care nothing about that. They care nothing about what becomes of the rural districts, whether they are represented fairly here or not. I repeat that the last census was taken under circumstances peculiarly unfair to the rural districts. There are cities that have lost 100,000, or more, in population since this census was taken. Large numbers of people are already going back to the country, and even on that basis, even taking the basis of the census figures, gentlemen are not willing that the rural districts should receive fair treatment. They are not willing that this enumeration should be gone over, and that we should ascertain whether the Representatives are really apportioned in accordance with the population which the cities actually have, under the figures of the census, unfair as they may be to the rural districts. Here is the situation: You are going to act on this bill without sufficient knowledge, you are going to act on it under circumstances which will not do justice to the rural districts, and at the proper time, if I am permitted to do so, I shall move to recommit the bill to the Committee on the Census in order that they may ascertain what the true basis is, and give the rural districts not simply fair treatment, because they can not get that under this census, but something that somewhere near approaches fair treatment, which any action at this time will deny.

Mr. KENNEDY of Rhode Island, Mr. SIEGEL, and Mr. BARBOUR rose.

The CHAIRMAN. The gentleman from California, who offered the amendment, is entitled to recognition.

Mr. BARBOUR. Mr. Chairman, I merely desire to take a moment of the time of the committee to reply to statements made by the gentleman from Iowa [Mr. GREEN]. He stated that no member of the Committee on the Census would deny the assertion that the members of the committee do not know whether their figures are correct. As a member of the Committee on the Census, I do deny that assertion. Dr. Hill, the statistical expert of the Census Bureau, our own Government institution for the gathering of statistics, appeared before our committee and assured the committee that these figures are correct.

This letter which is presented here this morning is merely the statement of some statistician who differs with Dr. Hill's method. I submit to this committee, Are we going to follow the recommendations of our Census Bureau or are we going to take the word of some theoretical man who disagrees with our own officials?

Mr. BEE. Will the gentleman yield?

Mr. BARBOUR. I decline to yield at this time, Mr. Chairman. The statement is made that this amendment will deprive the rural districts of representation. There is absolutely nothing in that. It makes no difference whether you fix the membership of this House at 200 or 500 or 5,000, the urban districts and the rural districts will have the same proportional representation.

Mr. SIEGEL. Mr. Chairman, I will not permit to go unchallenged the statements made here that members of the Census Committee were uncertain with reference to whether the figures which they presented to this House were correct. It is very easy for these critics to glibly criticize without justification. I say those figures were correct as given to us by Dr. Hill. Dr. Hill followed the same method pursued 10 years ago. The reason this letter was presented here this morning was because the statistical authorities of Harvard University disagree with Dr. Hill as to what the effect of following the major fraction method might be. The gentleman from California [Mr. BARBOUR] read a few moments ago from the record of hearings wherein I asked Dr. Hill whether he was certain that the figures were correct as he presented them a second time to the committee, and he answered affirmatively. I repeated that question several times, because I wanted to be sure in my mind that they were the correct figures. At page 25 of the hearings we find the following:

The CHAIRMAN (continuing). You need not testify, Dr. Hill, as to how the changes have been made. But I want you simply to testify that these are the corrected and final figures, if such be the fact.
Mr. HILL. Well, these figures are based on the final population returns and will stand; there will be no further change. The others were based on preliminary population figures, which were subject to revision.

Mr. BEE. Will the gentleman yield?

Mr. SIEGEL. I do.

Mr. BEE. Is it not true that Dr. Hill made a statement to the committee, first bringing in a report and subsequently bringing in a corrected report, and stating to the committee, in

answer to the gentleman's question time and time again, that the figures were now absolutely correct as the final figures of the Census Bureau?

Mr. SIEGEL. There is no doubt about that. I asked him that several times, because the thought ran through my mind that there might be some question about it. It was raised 10 years ago, raised 20 years ago, and in every debate when the question came up, the same issue is brought before the committee.

Mr. LARSEN. Is it not also a fact that in the correction made by Dr. Hill the statement was made that the mistake was not made in the calculations, but the mistake was made in the footing up of the total population of the United States?

Mr. SIEGEL. That is true, and Dr. Hill was not responsible if an error has occurred, because it was an error in the final calculation of the figures.

Mr. LITTLE. Will the gentleman yield for a question?

Mr. LONGWORTH. I make the point of order that debate is exhausted.

Mr. SIEGEL. I yield to the gentleman.

Mr. LITTLE. Do I understand that Dr. Hill's first report was incorrect for some reason——

Mr. SIEGEL. The report was incorrect for the reason that the final computations were not correct.

Mr. LITTLE. I did not ask that——

Mr. SIEGEL. The gentleman wanted to learn——

Mr. LITTLE. I wanted an answer.

Mr. SIEGEL. The gentleman is going to get the truth from me, no matter who it hurts.

Mr. LITTLE. I can make an explanation for myself. [Laughter.]

Mr. SIEGEL. I recognize the gentleman's capacity to both hear and explain.

Mr. KENNEDY of Rhode Island. Mr. Chairman, I understand the Chairman has recognized me to strike out the last word.

The CHAIRMAN. The gentleman from Ohio has just made the point of order that debate on the amendment is exhausted, but a motion to strike out the last word is in order.

Mr. TINCHER. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. TINCHER. I want to know how debate is now exhausted when two men have spoken in favor of the amendment and one against it? What rule is there that give two 5-minute speeches for an amendment and one against an amendment?

The CHAIRMAN. The rule is this: That at the end of 10 minutes, 5 on each side of the question, debate is closed if a point of order is made.

Mr. TINCHER. But there have been two speeches for the amendment and one against it. I would like to make one against it myself.

The CHAIRMAN. The point of order has been made. The gentleman from Rhode Island.

Mr. KENNEDY of Rhode Island. Mr. Chairman, I realize that if held down to a strict application of the rules of the House I can not discuss this proposition on an amendment to strike out the last word; but I hope that the committee will hear me, because my State is one of the States that are very seriously affected by the pending amendment proposed by the gentleman from California. I notice, Mr. Chairman, that when the gentleman from Texas made his amendment to the substitute offered by the gentleman from Iowa practically the entire membership here, knowing that their States would thereby be deprived of a considerable portion of their representation in this House, stood up in protest against that amendment. [Applause.] Now, that brings me precisely to the subject of my own State as affected by the pending amendment, which I intend to discuss very briefly at this time.

I am opposed to the amendment proposed by the gentleman from California, whose purpose is to increase the ratio and keep the membership of this House where it is at the present time. One argument offered in support of this amendment, as disclosed in the minority report, is that there is no public demand for increasing the membership of the House. I am not aware whether there is or whether there is not a public demand for increased or decreased membership. Personally I can say that I have heard no comment from my section of the country one way or the other.

The main reason advanced by the minority of the committee for retaining the present number is one of efficiency. They claim that an increase in membership will make this body more unwieldy and cumbersome. To say that an increase will make this body more unwieldy and cumbersome means that it is unwieldy and cumbersome to-day; otherwise these words would not be used. If the House is to-day unwieldy and cumbersome, why did not the minority members of the committee in their report recommend a substantial decrease in the present membership and thus carry their ideas of efficiency a little further along?

The minority report states that the effect of reapportionment upon any particular State or district should not be considered; that we should consider the general welfare alone—the welfare of the entire country. But the welfare of the entire country means the welfare of every part of the country, and, consequently, view this question as you will, there is and always will be a local consideration involved whenever this controversy appears. Members of the House affirm that they have no personal interest in this matter. Personally I join in this affirmation. I am not concerned with the question of personalities of the candidates for this House. Candidates may come and candidates may go, but the State remains forever.

I am opposed to any plan that takes away one-third of the representation of my State in this House and I feel certain that the people of my State are opposed to it. Gentlemen who come here from some of the larger States whose representation would be decreased by the proposed amendment—and, I observe, there are two such Members who signed the minority report of the committee—may be magnanimous in supporting the minority view and possibly their action may be considered the better part of statesmanship. Let them remember, however, that reducing the membership of a State one-eighth or one-thirteenth is quite different from reducing it one-fourth, one-third, or one-half as is proposed in the case of Maine, Rhode Island, and Vermont.

Yesterday I heard the gentleman from Wyoming, the majority leader, repeatedly point out that, under the plan of retaining the House at its present membership the proportionate representation of the various sections remains the same. This is undoubtedly true; but, I submit, that though the proportion of Representatives is not disturbed the proportion of population represented is considerably affected, at least in the State of Rhode Island. To-day each of the three Representatives from that State is representing over 200,000 people. Take away one Representative and each of the two Representatives for 10 years to come will represent more than 300,000 people. Thus your minority arrangement will put into each district in Rhode Island 60,000 people or more above and beyond the ratio proposed by the minority, and this number will be ever increasing in the 10 years to come. You can not find another case like it in the entire country in any State in which Representatives are apportioned by districts.

I am not exactly complaining. I am simply showing this anomaly, so that you may realize that there is something local to consider in this business apart from the high motives of statesmanship which you claim to be displaying in your regard for the general welfare.

The membership of the House to-day is not as great in proportion to population as it was over a century ago.

In 1800 the population was 5,308,483 and the membership of the House was 142. To-day the population is 105,683,108 with a proposed membership of 488 under the pending bill. In a century and a quarter it will thus be seen that the House membership has increased approximately fourfold while the population has increased approximately twentyfold.

I am not aware that any claim was made in 1800 that the House, with its then membership much larger in proportion to the population than the present House, was unwieldy and cumbersome; and yet we were then an agricultural country with no such vastly diversified and complicated interests as we have to-day, when our people are engaged so extensively in commercial and manufacturing as well as agricultural pursuits which have caused in the advancing years, and notably in the last decade, their concerns to become largely multiplied and interwoven.

In the last 10 years, especially during the war, the people of this country have come into closer touch with their Government than they have during any previous period, and therefore they need to-day in the House of Representatives, the popular branch, a larger representation than ever before. It is a well-known fact that the Members of this House have become and must remain in the future special advocates for the rights of their constituents in the various departments of this Government whose bureaus, year by year, are becoming more numerous.

I am inclined to pay very little, if any, attention to the argument of economy in this matter. It is not tenable. Paying its legislators can never become an abuse which will seriously run up the measure of the public debt, and I am not disposed to believe that any serious injury can ever happen to the country through paying its legislators their salaries. The fact is that you are cheating representative government unless you en-

UMI

deavor to fix a ratio that will at least assure some degree of intimate relationship with your constituents. By advancing the ratio from 211,877 to 242,415 as proposed by the pending amendment you are making a hasty transition which will, without sufficient justification, reduce the membership of about a dozen important States of this Union. [Applause.]

The CHAIRMAN. The time of the gentleman from Rhode Island has expired.

Mr. KENNEDY of Rhode Island. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. The gentleman from Rhode Island asks unanimous consent to proceed for five minutes more. Is there objection?

Mr. FAIRFIELD. Mr. Chairman, I object.

Mr. KENNEDY of Rhode Island. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Rhode Island asks unanimous consent to extend his remarks in the RECORD. Is there objection? [After a pause.] The Chair hears none.

Mr. TINCHER. Mr. Chairman, I rise in opposition to the amendment.

Mr. SIEGEL. Mr. Chairman, I move that debate on this amendment and all amendments thereto close in five minutes.

The CHAIRMAN. The gentleman from New York moves that all debate on this amendment and all amendments thereto close in five minutes.

The motion was agreed to.

Mr. TINCHER. Mr. Chairman and gentlemen, I am glad to avail myself of this opportunity to express my contempt for the Barbour amendment, which amounts to a transfer of a few Congressmen from one section of the country to another and taking advantage of an emergency growing out of the World War that called men from the producing sections of this country to the industrial sections, and taking advantage of an inaccurate census taken under those conditions to perpetuate the most unholy and unheard of and unjust reapportionment that was ever known in the American Congress. I say that it is deliberately taking advantage of the emergency that grew out of this war. I have no apology for what I said when I predicted that my distinguished friend from California [Mr. BARBOUR] would increase the number of California Representatives and decrease the number of Representatives in States like my own, and Iowa, Indiana, and Nebraska. I say that this House will rue the day that they are doing this. Even my friend who is the proponent of this amendment objected to inserting in the RECORD a letter from a man that accused us with proceeding on false premises and using inaccurate and improper figures in making a distribution of the Congressmen to represent the United States during the next 10 years. It may be all right. Maybe your conscience warrants you in taking advantage of this emergency to remove the proper representation from the agricultural sections. But do not say you are doing it in the interests of economy. None of you voted for the Jones amendment to actually reduce the representation in Congress.

I refer to most of the proponents of this amendment that is going to carry here and be permanent law for 10 years. I am impressed with the statesmanship of some of the argument that says, "My State will gain and your State will lose, and I am for a small Congress." I was particularly pleased with the statements of the gentlemen from Ohio Mr. LONGWORTH and Mr. FESS. [Laughter.] They were together. I do not think this House can afford to proceed without giving the committee the time to consider this matter that they unanimously voted for this morning.

I want to say that it does not affect my district. The district has too big a population and too big an area for redistricting for this to reach my section, but it does take one of our Representatives away from us, by reason of the fact that an emergency existed and our men were willing to go to the industrial centers, even to France. And you are providing because of that to take a Representative away from that great State. I am against the amendment, and I am not afraid to say so. [Applause.]

Mr. JONES of Texas. Mr. Chairman, I move to strike out the last two words.

The CHAIRMAN. The Chair will state that that would be an amendment in the third degree.

Mr. JONES of Texas. Debate was closed on the pro forma amendment and all amendments thereto.

The CHAIRMAN. On all amendments.

Mr. JONES of Texas. All amendments to that amendment, and he did not specify the original amendment. He simply moved that the debate be closed on the pending amendments and all amendments thereto, and the amendment pending at that time was the pro forma amendment of the gentleman from Rhode Island [Mr. KENNEDY].

The CHAIRMAN. The amendment was still pending, and the motion was to close debate on the amendment and all amendments thereto.

Mr. JONES of Texas. The pending amendment was the pro forma amendment, and the motion was to close debate on the pro forma amendment and amendments thereto.

The CHAIRMAN. There was the Barbour amendment pending.

Mr. JONES of Texas. He did not specify the Barbour amendment.

The CHAIRMAN. The pro forma amendment of the gentleman from Rhode Island [Mr. KENNEDY] was not pending, the Chair understanding that the motion of the gentleman from New York [Mr. SIEGEL] referred to the amendment offered by the gentleman from California [Mr. BARBOUR].

Mr. JONES of Texas. He might have so intended it, but he did not so specify it.

Mr. SIEGEL. Mr. Chairman, I move to close debate on this section and all amendments thereto.

The CHAIRMAN. The gentleman from New York now moves to close——

Mr. JONES of Texas. I move an amendment that the debate shall close in five minutes.

Mr. BLAND of Indiana. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BLAND of Indiana. At what time will it be proper to submit a motion to strike out the enacting clause? [Laughter.]

Mr. TINKHAM. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. TINKHAM. Does the motion of the honorable gentleman from New York [Mr. SIEGEL] cut off any amendment to the original paragraph?

The CHAIRMAN. It does not cut off amendment to the original paragraph. The gentleman from New York moves to close debate on this section and all amendments thereto.

Mr. JONES of Texas. I move to amend by closing the debate in five minutes.

The CHAIRMAN. And to that motion the gentleman from Texas moves an amendment that the debate close in five minutes. The question is on the amendment of the gentleman from Texas.

The question was taken, and the amendment was rejected.

The CHAIRMAN. The question now is on the motion of the gentleman from New York to close debate on this section and all amendments thereto.

The motion was agreed to.

The CHAIRMAN. The question now recurs on the amendment offered by the gentleman from California [Mr. BARBOUR].

Mr. PELL. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman rise?

Mr. PELL. Can we have that amendment read? [Cries of "No!" "No!"]

The CHAIRMAN. Is there objection to the reading of the amendment?

Mr. CARTER. It is a big amendment, and I object.

The CHAIRMAN. Objection is heard. The question is on the amendment of the gentleman from California [Mr. BARBOUR].

The question was taken, and the Chair announced that the ayes seemed to have it.

Mr. MADDEN. Division, Mr. Chairman.

The committee divided; and there were—ayes 198, noes 77.

So the amendment was agreed to.

The CHAIRMAN. The Clerk will read.

Mr. TINKHAM. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The gentleman from Massachusetts offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. TINKHAM: Insert, on page 3, between lines 17 and 18, after the words "Wyoming, 1," the following: "*Provided further*, That if any State deny or abridge the right of any inhabitants thereof, being 21 years of age and citizens of the United States, to vote at any election named in the amendment to the Constitution, Article XIV, section 2, except for participation in rebellion or other crime, the number of Representatives apportioned to that State shall be reduced in proportion to the number which such citizens shall bear to the whole number of citizens 21 years of age in such States."

Mr. LONGWORTH. Mr. Chairman, I make the point of order that the amendment comes too late. It is not in order to amend a paragraph that has been inserted in the bill.

Mr. MANN of Illinois. This is an amendment to add to the end of the section.

Mr. GARRETT. Mr. Chairman, I reserve a further point of order.

The CHAIRMAN. The Chair did not understand the gentleman from Ohio.

Mr. LONGWORTH. I make the point of order that the amendment is not germane to the bill. But I further insist that the amendment comes too late, as it is an amendment to a paragraph that has been inserted.

Mr. MANN of Illinois. Mr. Chairman, the gentleman from Ohio, if he will just consider for a moment, will realize that it is quite in order to offer an amendment and agree to it and to offer another amendment to follow the original amendment on the same subject matter. It is in order, although the two amendments would conflict with each other. This amendment is offered to follow the amendment already agreed to. It is to insert a new provision following the amendment which has been agreed to. It might have been offered as an amendment to that amendment, possibly, but it was not, and it is not required to be.

Mr. MONDELL. Mr. Chairman, will the gentleman yield?

Mr. MANN of Illinois. Yes.

Mr. MONDELL. Would the gentleman from Illinois consider this a new section?

Mr. MANN of Illinois. It is not a new section. It is offered to follow the provision of the first section already agreed to. There would be no debate.

Mr. GARRETT rose.

The CHAIRMAN. For what purpose does the gentleman from Tennessee rise?

Mr. GARRETT. I desire to press the point of order last made by the gentleman from Ohio [Mr. LONGWORTH], at the proper time, that it is not germane. If the Chair cares to rule upon the first proposition, I will wait until he rules on that, and then I would like to be heard on the other, if the Chair overrules it.

The CHAIRMAN. The Chair would like to hear the gentleman from Ohio on his first point of order.

Mr. LONGWORTH. Mr. Chairman, the general rule is that where a paragraph has been inserted in a bill it is not in order to amend it. This, while it purports to follow and come after this paragraph, is in fact an amendment to the paragraph, and that has been adopted by the House. It does not seem to me that it makes any difference whether the amendment merely follows the paragraph or whether it changes the words in the paragraph. It is an amendment to the paragraph, and is offered as such; and the general procedure of the House is that a paragraph that has been inserted in the Committee of the Whole by amendment is not afterwards subject to amendment. The previous occupant of the chair, I think, within three or four days, has ruled on that point. It changes the amendment, the paragraph which has just been adopted by the House. It makes no difference whether it is offered to follow it or whether it is offered to change certain words in it. It does change that paragraph, and the rules of the House provide that you can not amend a paragraph which has been adopted or inserted by order of the House.

Mr. TILSON. Mr. Chairman, I do not believe that the gentleman from Ohio [Mr. LONGWORTH] will seriously insist that this is a new paragraph inserted here. The Barbour amendment states that it is an amendment to the first section of the bill. It begins at line 7, so that all the lines preceding line 7 remain in the original section. The remaining lines are stricken out, and this amendment is inserted in lieu thereof.

What remains of the original text is from the first line down to the seventh. It can not be that it is not permissible to add a proviso or an additional paragraph to the original section, even though a prior paragraph of the section may have been previously amended.

Mr. MADDEN. Mr. Chairman, I maintain that the point of order raised by the gentleman from Ohio [Mr. LONGWORTH] can not under the rules of the House be sustained, first, because section 1 of the bill still stands, except that it has been amended by the amendment offered by the gentleman from California [Mr. BARBOUR], but has not been adopted as amended; and therefore, pending the final adoption of the section in its amended form, the paragraph is still open to further amendment, and there can be no question that further amendment to the paragraph as amended, but not approved by the House in its amended form, may be offered.

I believe the amendment offered by the gentleman from Massachusetts [Mr. TINKHAM] is not only in order under the rules of the House but it is germane to the subject matter of the amendment proposed.

Mr. HUSTED. I would submit, Mr. Chairman, that the rule invoked by the gentleman from Ohio [Mr. LONGWORTH] applies only where there is an actual change of the substance of the matter inserted by the amendment; where there is an actual substantial change in the matter actually inserted. In this case something has been added to it, but the matter actually inserted has not been changed. On that ground I submit the amendment is in order and according to the usual practice of the House.

Mr. SNELL. Mr. Chairman, will the gentleman yield?

Mr. HUSTED. Yes.

Mr. SNELL. Is it not a fact that if this amendment were adopted at this time it would change the subject matter of the amendment and what is therein contained?

Mr. HUSTED. No; it does not actually change the substance of the matter inserted by the original amendment. It does not change that at all. It adds something to it; but it must go further than merely adding something to it. It must actually change it, in order to come within the rule invoked by the gentleman from Ohio [Mr. LONGWORTH].

Mr SNELL. I agree with the gentleman on that point, but it seems to me this does actually change the proposition.

Mr. TINKHAM. Mr. Chairman, as there is some controversy in relation to this amendment I will withdraw it and submit the following as a new section to be called section 2.

The CHAIRMAN. The Chair was ready to rule on the point of order made by the gentleman from Ohio. The gentleman from Massachusetts now withdraws his amendment and offers the following as a new section.

Mr. BLAND of Indiana. I object to the withdrawal of it.

The CHAIRMAN. The gentleman from Indiana objects to the withdrawal of the amendment.

SEVERAL MEMBERS. Rule!

The CHAIRMAN. The Chair overrules the point of order made by the gentleman from Ohio, and will call the attention of the gentleman to the rule.

Mr. LONGWORTH. I reserve a further point of order.

The CHAIRMAN. The further point of order is reserved.

It is quite true that an amendment that has been agreed to may not be stricken out by another amendment. That has been held again and again. This motion does not come within the rule that would prohibit it so far as affecting the amendment offered by the gentleman from California is concerned. The Chair overrules that point of order and holds that the amendment is offered in time. The gentleman from Ohio will state his further point of order.

Mr. LONGWORTH. The merits or demerits of the amendment offered by the gentleman from Massachusetts have nothing at all to do with the point of order I am making, which is only as to the question whether it infringes the rules of the House or not.

It seems to me, Mr. Chairman, that the amendment offered by the gentleman from Massachusetts [Mr. TINKHAM] is not germane to this bill, because it introduces an entirely new element.

This bill fixes the representation of the various States, based on population and population alone. The amendment of the gentleman from Massachusetts [Mr. TINKHAM] would provide a test by which that representation might be diminished, notwithstanding the fact that the population would remain the same.

The gentleman cites Article XIV of the Constitution, which provides, among other things—

> When the right to vote at any election for the choice of electors for President and Vice President of the United States, Representatives in Congress, the executive and judicial officers of a State, or the members of the legislature thereof is denied to any of the male inhabitants of such State, being 21 years of age and citizens of the United States—

and so forth, that the representation shall be correspondingly reduced. In other words, it introduces into this bill an entirely new and separate proposition, to wit, the question as to whether the inhabitants of certain States do or do not do certain things when participating in elections, not only for Members of Congress but for local and State officers and members of the legislature.

Within the very limited time that I have had to look up any precedents I do not know that I can cite the Chair to any large number of them, but I do cite the Chair to the decision on March 26, 1897, when a tariff bill was under consideration in the Committee of the Whole House on the state of the Union.

This decision is referred to in the decision of Mr. Alexander, and is found on page 518 of the Manual.

In that case an amendment was offered to a tariff bill, which provided that when it is shown to the satisfaction of the Secretary of the Treasury that articles are manufactured, controlled, or produced in the United States by a trust or trusts the importation of such articles from foreign countries shall

be free of duty until such manufacture, control, or production shall have ceased, in the opinion of the Secretary of the Treasury.

It seems to me that the precedent comes very close to the proposition now before the committee. There they were considering the general subject of a tariff bill. The amendment offered related to the tariff, just as this amendment relates to representation, but it introduced a new element and provided a test under which certain articles should go on the free list if, in the opinion of the Secretary of the Treasury, their production was controlled by a trust.

In that case the amendment was held not to be germane to the bill, and the point of order against it was sustained.

This case provides a new test, under which certain States, regardless of their population, would not have the same representation that other States with the same population would have. If the Chair should hold this amendment of the gentleman from Massachusetts to be in order, why might it not be in order to offer an amendment to provide that where a State, for instance, interfered with the nineteenth amendment, giving the right of suffrage to women, the representation of that State should be reduced; or where any State failed to follow the constitutional provision as to the enforcement of any other amendment why might it not be reduced?

Mr. TILSON. Does the gentleman think that might be applied to a failure to enforce the eighteenth amendment? [Laughter.]

Mr. LONGWORTH. I should not be surprised if it would, although I did not mention the eighteenth amendment specifically.

But it seems to me, Mr. Chairman, that a distinctly new element is introduced into this bill, one which is not germane to the question of population, which is the underlying rule by which representation is determined under this bill.

I submit, therefore, that the amendment of the gentleman from Massachusetts [Mr. TINKHAM] is not germane to the bill and that the point of order should be sustained.

Mr. SNELL. Mr. Chairman, I desire to say just a word on this matter. I agree with the gentleman from Ohio that the merits of the amendment have nothing to do with the point of order. It seems to me we have before the House now a general proposition fixing the number of Representatives in Congress according to the provisions of the Constitution. This is a constitutional matter, and when a gentleman offers an amendment that is a copy of a certain section of the Constitution dealing with that matter, I can not see how it can possibly be ruled out of order.

Mr. MASON. Mr. Chairman, as I understood it, when I took the oath of office here I swore to support and obey the Constitution of the United States. If there is any rule of this House which overrides and overrules the constitutional provision which we have sworn to obey, viz, to make an apportionment, as suggested by the amendment of the gentleman from Massachusetts [Mr. TINKHAM], I think it would be the duty of the Chair to sustain the Constitution and override the rules of the House and to hold that they can not repeal the Constitution. The question is one of apportionment, apportionment as provided for in the Constitution, which I propose to insert here, and that directs what we shall do under certain circumstances. Whether it amounts to discrimination against a black man or against a woman, there is a certain duty to perform. Let us not be afraid to vote our convictions; give us a chance. To rule this out of order would be a violation of the spirit of the Constitution, which we have sworn to support, and a very strained construction of the rules of the House.

Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD upon this subject.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent to extend his remarks in the RECORD upon this question. Is there objection?

Mr. MADDEN. Mr. Chairman, I make the same request.

The CHAIRMAN. Is there objection.

Mr. BEE. Mr. Chairman, reserving the right to object, does the gentleman from Illinois [Mr. MASON] propose to extend his remarks on the subject of the point of order or upon the general subject matter of the resolution? I think there is no objection to his extending his remarks on the point of order which has been made.

Mr. MASON. I expect to extend my remarks upon the whole proposition.

Mr. ROMJUE. Mr. Chairman, I object.

The CHAIRMAN. The gentleman from Missouri objects.

Mr. ROMJUE. Mr. Chairman, I withdraw the objection.

Mr. LARSEN. Mr. Chairman, I object.

The CHAIRMAN. Objection is made by the gentleman from Georgia.

Mr. MADDEN. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD upon this subject.

The CHAIRMAN. Is there objection?

Mr. LARSEN. I object.

Mr. MASON. In other words, the gentleman does not want us to express our convictions upon this subject?

Mr. LARSEN. Do I understand the proposed extension on the part of the gentleman from Illinois [M. MADDEN] is to apply to the point of order or——

Mr. MADDEN. My remarks would apply to the point of order and anything incident to the point of order.

Mr. LARSEN. Mr. Chairman, I object.

Mr. TINKHAM. Mr. Chairman, the rule involved is the seventh paragraph of Rule XVI, which I quote:

> And no motion or proposition on a subject different from that under consideration shall be admitted under color of amendment.

The proposed amendment is in relation to representation. Therefore it is not different. To be sure, it relates to a constitutional amendment, but whether it related to a constitutional amendment or not would not violently affect its relativity. The House, if it wished, aside from any constitutional amendment, might incorporate a provision which said where States had outrageously and continuously and persistently disfranchised their citizens so that it became a scandal in these United States it would give to those States a certain representation, and it might add a proviso that if those States did not correct their laws, did not correct their practices, then there should be a reduction of such representation. I think there is no question that it is perfectly relevant for this Congress to add a provision, in proper language, that the nineteenth amendment shall be enforced. The nineteenth amendment gives in terms to Congress the authority to enforce it, and in passing a bill in relation to apportionment of Representatives among the several States there is no question, in my opinion, that a legislating proviso might be made providing that unless the nineteenth amendment is obeyed the States should suffer a penalty perhaps of reduction of representation, for any section of the Constitution concerning constitutional franchise rights is relevant to a bill which seeks to carry out the rights of the States to their votes or representation in Congress. But in this particular matter we have, in addition to the question of relativity, an exact constitutional provision. We not only have a constitutional provision, but the very constitutional provision under which this bill is authorized and has been reported to this House. What is the House now doing? This House is now doing what the fourteenth amendment to the Constitution requires in this bill. Section 2 of Article XIV provides:

> Representatives shall be apportioned among the several States according to their respective numbers, counting the whole number of persons in each State, excluding Indians not taxed.

That is the very thing that is being done here at this time by this bill. Then the rest of this very section provides:

> But when the right to vote at any election for the choice of electors for President and Vice President of the United States, Representatives in Congress, the executive and judicial officers of a State, or the members of the legislature thereof, is denied to any of the male inhabitants of such States, being 21 years of age and citizens of the United States, or in any way abridged except for participation in rebellion or other crime, the basis of representation therein shall be reduced in the proportion which the number of such male citizens shall bear to the whole number of male citizens 21 years of age in such State.

Is it possible that the question of germaneness or relativity can be raised as to this proposed amendment of mine, when it merely proceeds to enact into statute law, as a part of this bill, a provision which is required, which is mandatory, which is a part of the very constitutional authority under which this bill is before the House, and in accordance with the rules under which the House is now proceeding?

The CHAIRMAN. The Chair would ask the gentleman a question. The Chair wants to be clear as to just what the gentleman from Massachusetts is insisting upon. The provision of the Constitution which the gentleman has read provides that where States deny the right of suffrage to certain citizens the representation of that State shall be reduced, and that provision is mandatory. Does the amendment of the gentleman from Massachusetts accomplish anything in the direction of advising the House or the Committee on the Census or any body authorized to act with respect to the denial of the right of franchise, so as to reduce the membership of those States in the Congress? The Chair would like to get just what the gentleman from Massachusetts has in mind with respect to his amendment. He is proposing to enact as a part of the statute law what is already a part of the Constitution.

Mr. TINKHAM. Mr. Chairman, I do not know how much good or how much virtue there may be in adding to a statute what is a part of the Constitution, when it is a mandatory part of the Constitution, and when it has not been obeyed by this House or by preceding Houses; but it will give, first, the

authority of statute law, if it is adopted, in support of constitutional law, and if it be adopted it will also add to this bill the weight of an expression of this Congress to the effect that what the fourteenth amendment calls for, what the fourteenth amendment demands, has the approval and not the disapproval of this House.

It adds a statute law to a mandatory constitutional law, and if it expresses the opinion of this House, surely there is some advance made by adopting it in the direction of constitutional enforcement, in the direction of law and order and justice in this Republic.

Mr. Chairman, the most luminous opinion in relation to the question of germaneness or relativity is one which was made by Speaker John D. Carlisle, which has been so often quoted, and I read now from Hinds' Precedents, volume 5, section 5825, page 423. In a long and very carefully and clearly stated opinion the philosophy of this rule of the House is given.

The sentence is as follows:

When, therefore, it is objected that a proposed amendment is not in order because it is not germane, the meaning of the objection is simply that it—the proposed amendment—is a motion or proposition on a subject different from that under consideration. This is the test of admissibility prescribed by the express language of the rule; and if the Chair, upon an examination of the bill under consideration and the proposed amendment, shall be of the opinion that they do not relate to the same subject, he is bound to sustain the objection and exclude the amendment, subject, of course, to the revisory power of the Committee of the Whole on appeal.

In other words, can it be fairly said that the amendment I have offered is on a different subject than that of representation in this House under the Constitution? It can not be, Mr. Chairman, because it applies to representation in this House; it applies to nothing else. It reenacts into statute law merely the purpose and the spirit of the Constitution—almost the very words. If anything can be relative, if anything is of the warp and woof of relativity, surely such an amendment is germane to this proposition. It would not be germane to any other proposition except this proposition.

The CHAIRMAN. Would not the gentleman from Massachusetts under the mandate of the Constitution be permitted at any time to bring in a resolution as a matter of privilege reducing the representation in any State that had denied the right of suffrage as prohibited by the fourteenth amendment?

Mr. TINKHAM. Mr. Chairman, there is not any question but what under the fourteenth amendment at any time a resolution can be brought in and Congress may take action in accordance with its judgment. I might say that a resolution on that matter is now before the committee over which presides the Chairman who is now presiding over this House. That, however, does not affect the question of relativity of this amendment which I have offered, that it can be done in another way or at another time. The question is, Does the amendment relate to the subject matter? It relates to nothing else but the apportionment of Representatives, because in the very section providing for apportionment in the Constitution there is provided what shall occur upon the contingency of disfranchisement. Mr. Chairman, again I will say that my theory is this: The House can act in reducing representation at any time, but now the House is passing a general apportionment act for 10 years, therefore the amendment to the Constitution which is general, too, should be applied in a general way. The fourteenth amendment apportions Representatives on a population basis among each State, and then says if the right to vote is denied or abridged in any way such State shall have its representation reduced, which, of course, means any or all States which disfranchise shall be reduced in representation, and we are passing a general bill.

Mr. GARRETT. Mr. Chairman, the remarks of the gentleman from Illinois [Mr. MASON] lead me to call the attention of the Chair, and of course of the gentleman from Illinois, to the fact that this is not a question of enforcing the Constitution. This question is merely whether the legislative proposition is in order to be offered in the place it is offered and at the time it is offered. If the reasoning of the gentleman from Illinois [Mr. MASON] were good, why, it would be in order at any time to offer such a proposition as this upon one of the regular appropriation bills, and the Chair would be subject to the charge, as implied by the gentleman from Illinois, that he would be overruling the Constitution of the United States if he refused to give him an opportunity to vote upon what he conceived to be a proper construction of that instrument, although such opportunity was offered upon an appropriation bill. Another thing I think gentlemen should understand, and this is also induced by the remark made by the gentleman from Illinois [Mr. MASON] when he referred to the colored voter. The gentleman from Illinois must be of opinion that this proposed amendment is predicated upon the fifteenth amendment to the Constitution. It is not. This amendment is not predicated upon the "race, color, or previous condition of servitude" amendment to the Constitution. It is predicated upon the fourteenth amendment. At least I presume it is, because it quotes almost the exact language of the fourteenth amendment. Now, the simple question before the Chair is whether or not it is germane, and there are a few observations I should like to make in that particular. Clause 7 of Rule XVI provides:

No motion or proposition on a subject different from that under consideration shall be admitted under color of amendment.

This rule was adopted in 1789 and superseded the provisions of parliamentary law as given in Jefferson's Manual, paragraph 460 of the House Manual, from which I read:

Amendments may be made so as totally to alter the nature of the proposition; and it is a way of getting rid of a proposition by making it bear a sense different from what it was intended by the movers, so they vote against it themselves.

That was the parliamentary law up to the adoption of the first rules of the House in 1789 when the provision which I quoted a moment ago was inserted, and it was to meet that very parliamentary practice. This rule has always been strictly construed. In the very case which the gentleman from Massachusetts [Mr. TINKHAM] cited the decision of Mr. Speaker Carlisle—he was not then Speaker but Chairman of the Committee of the Whole—in that very case he sustained the point of order, the very case which the gentleman quoted, on the ground that the proposition was different and was therefore not germane.

I say it has always been strictly construed, and in construing it it is not only legitimate, but it is essential that the Chair should consider the legislative effect of the amendment, if adopted, upon the bill as reported. I do not mean that the Chair should consider the policy—that is not the Chair's duty or function—but he must consider the effect to the extent of determining whether it is germane. Therefore these principles have been laid down. I am reading from section 778 of the House Manual:

(a) One individual proposition may not be amended by another individual proposition, even though the two belong to the same class.

That is one principle.

(b) A specific subject may not be amended by a provision general in nature, even when of the class of the specific subject.

I ask the Chair to bear the language which I have just read particularly in mind.

A specific subject may not be amended by a provision general in nature, even when of the class of the specific subject.

And again:

(d) Two subjects are not necessarily germane because they are related.

Mr. MOORE of Virginia. Will the gentleman yield right there for a question?

Mr. GARRETT. I will yield to the gentleman.

Mr. MOORE of Virginia. Looking at the Constitution, would it not be equally germane, if this proposition is true, to provide that each Representative shall be 21 years of age, shall have been an inhabitant of the United States for seven years, shall be a resident of the State, and so on?

Would it not be equally germane to put provisions of that sort in this bill, or go further and provide that, in the case of a vacancy occurring, a writ of election shall be issued by the Speaker? Are there not, in other words, a large number of requirements in Article I of the Constitution, and in its amendments, which might properly be incorporated in this bill, if the views expressed by the gentleman from Massachusetts and the gentleman from Illinois are tenable?

Mr. GARRETT. The gentleman is correct. In fact, it would be more nearly in order to include the several subjects which the gentleman has itemized as amendments to this bill than would be this amendment proposed by the gentleman from Massachusetts, and for this reason——

Mr. TINKHAM. Will the honorable Representative from Tennessee yield?

Mr. GARRETT. In just a moment. Let me express this thought, and then I will be glad to yield to the gentleman. The proposed amendment is an effort to attach a general provision, in principle, if you please, and wholly indefinite in character and scope, to a measure which, while general in terms, is specific in detail. If admitted and adopted it would render uncertain and chaotic every specific provision of the section which it is attempting to amend.

I now yield to the gentleman from Massachusetts.

Mr. TINKHAM. Is the honorable Representative from Tennessee aware that in the apportionment bill of 1872 this very language was used and stood as the statute law under that act for 10 years?

Mr. GARRETT. So far as I know, that is still the law. It appears in the Revised Statutes.

Mr. TINKHAM. It not only is the law, but on the 20th of December, in the recodification of laws, this House approved its reenactment.

Mr. GARRETT. With all possible respect, that is entirely aside from the question we have before us now.

Mr. TINKHAM. There is no question about that. [Laughter.]

Mr. GARRETT. Of course, it is a familiar principle of parliamentary law, as practiced in the House, that an amendment may be offered which is inconsistent with one already agreed to, if germane, and the Chair is not called upon or permitted to draw questions of consistency within the vortex of order, but that principle has no application to the question now before the Chair. I respectfully submit that it is a sound principle of practice that an amendment which is proposed, whereby the character of the measure to which offered is to be altered, must in its terms be as specific and certain as are the provisions that it is proposed to amend.

And the Chair may legitimately determine whether this test is met. Now, the amendment proposed by the gentleman from Massachusetts does not meet this requirement. It is readily discerned that it would if adopted throw the entire apportionment act into confusion and chaos. If attention is paid to it, no State, no individual, could know what the State's representation in Congress is to be or what its electoral vote is to be for the next 10 years.

Mr. TINKHAM. Will the honorable Representative from Tennessee yield?

Mr. GARRETT. Yes.

Mr. TINKHAM. In relation to a question of relativity or germaneness, what does uncertainty have to do with it if the amendment is relevant? A point of order might be sustained on account of uncertainty, but if it were relevant how can uncertainty bear upon the question?

Mr. GARRETT. Because it is not germane. A thing may be relative without being germane to a proposed law.

Mr. TINKHAM. Can a thing not be germane and yet be uncertain?

Mr. GARRETT. I do not understand the gentleman's question.

Mr. TINKHAM. I say, can not an amendment be germane and at the same time uncertain?

Mr. GARRETT. Oh, I think that is possible, of course. But I trust I am having better success with the Chair in making myself clear than I am with the gentleman from Massachusetts.

Beyond creating this utter confusion and chaos, the amendment which is offered by the gentleman from Massachusetts presents nothing that is clear or discernible at this time. It presents no specific number of Representatives to be apportioned to any State, and that is what this section of this bill to which it is offered as an amendment does. It offers nothing certain for the certainty which it would destroy.

It is a mandatory duty of the Congress under the Constitution to determine the number of its Members and to apportion them among the several States under the Constitution, "according to their respective number, counting the whole number of persons in each State, excluding Indians not taxed." No other governmental body or agent has the power to do this, and that is what this bill is for, and it does it specifically and exactly. The amendment of the gentleman from Massachusetts, if adopted and heeded, will do nothing but confound the measure, without offering any specific thing in its place. And therefore I submit that it does not come within the rule of germaneness, and is subject to the point of order made by the gentleman from Ohio [Mr. LONGWORTH].

Mr. FISH. Mr. Chairman, I submit that this House has precedents in support of the amendment offered by the gentleman from Massachusetts. At the time the Southern States were permitted to reenter the Union similar amendments, practically word for word, to that presented by the gentleman from Massachusetts were incorporated in legislation passed by both Houses, making it necessary for those States to ratify not only the Constitution but in particular and specifically the thirteenth and fourteenth amendments. I submit, therefore, gentlemen of the committee, that we have an established principle, an established precedent, which has been used not once but many times in this House. [Applause.]

Mr. MONDELL. Mr. Chairman, we have before us a bill which proposes the apportionment of Representatives in the various States on the basis of the recent census. We are proceeding to provide this new apportionment under a mandate of the Constitution. The Committee on the Census might have included in its bill much more than they did include. It might have included in its bill any related subject matter within the jurisdiction of the committee. But what the committee did was to confine itself strictly to carrying out the constitutional mandate contained in Article I of the Constitution for the reapportionment of Representatives in Congress on the basis of the census figures and a few simple provisions with regard to redistricting and nominations. Nothing contained in the bill or any of its sections relates to any other matter. The subject matter of the bill is the apportionment of Representatives on the basis of the census figures.

The gentleman from Massachusetts has offered an amendment the purpose of which it is quite difficult to judge. We may only surmise, for, as a matter of fact, from my view of the matter, the amendment he has offered would have no effect whatsoever; would serve no purpose whatsoever. It is a mere recitation of words taken largely from the fourteenth amendment to the Constitution, without any provision whatever for the enforcement of the objects and purposes of the said fourteenth amendment.

We must assume in a case of this kind that the gentleman from Massachusetts had some object or purpose in presenting the amendment, even though in our opinion the amendment accomplishes nothing, would accomplish nothing, and would serve no useful purpose if it were a part of the bill.

The only possible reason or excuse that one can imagine or assume for the interjection of the amendment at this point or in this bill is that the gentleman from Massachusetts [Mr. TINKHAM] believes or imagined that in some way or other it would affect the propositions of the fourteenth amendment. He may have thought or imagined that in some way or another it would have some effect in the enforcement of the provisions of the fourteenth amendment; and while it would have no such effect, would standing by itself accomplish no purpose, we can not discuss the point of order in connection with it without assuming that it was intended to accomplish some purpose. It is rather a violent assumption that any good purpose would be served, but——

Mr. TINKHAM. Mr. Chairman, will the honorable Representative yield to a question?

Mr. MONDELL. We must assume that some purpose was intended. Yes; I yield.

Mr. TINKHAM. Does the honorable Representative from Wyoming think that it does not serve a good purpose to bring to the attention of the House constitutional mandates that are ignored and defied, no matter how they are brought before this body?

Mr. MONDELL. Well, I assume that the gentleman from Massachusetts in presenting the amendment had some further object than a mere reminder of the words of the fourteenth amendment. Most of us who love the Constitution, and revere it, frequently read that great instrument, and we are, most of us, more or less familiar with its provisions, and therefore we do not understand that any particular useful purpose is subserved by injecting into a piece of legislation the language of the Constitution, even those provisions of the Constitution which we most revere and approve.

Mr. TINKHAM. Will the gentleman yield for another question?

Mr. MONDELL. I yield.

Mr. TINKHAM. Has this House ever attempted, so far as you know, to enforce the fourteenth amendment, and is not the fourteenth amendment as much a living and vital part of the Constitution as any other part?

Mr. MONDELL. Mr. Chairman, I am attempting to confine my remarks to the point of order that has been raised. I am not attempting, and it would not be proper for me to express any opinion in regard to the fourteenth amendment at this time, to speculate as to what might or ought to be done in regard to it, and how it should be done. Under the rules of the House I am confining myself to the discussion of the point of order. That is what I am trying to do. If the amendment offered by the gentleman from Massachusetts has any purpose whatever, and would serve any purpose whatever, and would be in any wise effective, which it would not, it would be in the enforcement of the fourteenth amendment to the Constitution in the event of a certain contingency.

Now, the committee might, in reporting the bill, have gone into the matter of the fourteenth amendment to the Constitution, in my opinion; it might have made an effort to enforce the provisions of the fourteenth amendment, or to place them in the position, or on the road, or in the way of an enforcement. The committee did not see fit to do that, and no amendment is germane to this bill, first, which treats of a subject matter different from that contained in the bill; second, that treats of a matter in the bill, but not in the manner provided for in the

bill as reported by the committee. The committee did not invoke the provisions of the fourteenth amendment. The committee specifically provided for an apportionment based on the census. It injected no further question into its legislation; and it certainly is not in order on a bill providing simply for an apportionment of Representatives among the States based upon the census to present an amendment the purpose of which may be assumed to be an attempt to enforce an amendment to the Constitution dealing with an entirely different matter or dealing with the same matter in an entirely different way from that in which the bill deals with it.

Mr. TINKHAM. Mr. Chairman, will the gentleman yield?

Mr. MONDELL. I yield.

Mr. TINKHAM. Does the honorable Representative from Wyoming think that the committee proceeded in the face of a mandatory amendment to the Constitution to make a reduction in representation legal if it did not in good faith make some attempt to enforce the constitutional amendment?

Mr. MONDELL. Oh, well, Mr. Chairman, that is not a discussion of the point of order.

Mr. TINKHAM. I would like an opinion.

Mr. MONDELL. That is a criticism of the committee.

Mr. TINKHAM. It surely is; and I am asking you, as leader of the dominant party here, whether you approve of that action? That is my question.

Mr. MONDELL. It is very evident, Mr. Chairman, that I did not approve this bill as the committee brought it in, but I hope to be able to entirely approve it as it shall pass the House.

Now, Mr. Chairman, let me again emphasize this thought: Of course, the amendment would have no effect; it is not self-executing; it is simply a recitation of a part of an amendment to the Constitution. That amendment can not be enforced without legislation. It would not be wise to attempt to enforce it without some basis of information, and I assume that is why the committee did not treat of the matter at all. It is, I think, well known that the committee lacked information on which it could act wisely and intelligently. In fact, my understanding is that there is no information available on which we could now act intelligently, and that is no doubt the reason why the gentleman from Massachusetts [Mr. TINKHAM] has presented no plan or provision for the carrying out of the provisions of the fourteenth amendment.

Mr. LONGWORTH. Mr. Chairman, will the gentleman yield?

Mr. MONDELL. I yield.

Mr. LONGWORTH. As a matter of fact, would it have been in the jurisdiction of the Committee on the Census to treat on any subject except population, as provided?

Mr. MONDELL. For the sake of the argument, I am willing to admit that it might have been possible for the committee to have legislated upon other subjects. That, of course, as the gentleman knows, would not change the situation.

Mr. LONGWORTH. Of course not.

Mr. MONDELL. Because a committee does not run the entire gamut of its jurisdiction, but confines itself closely to one particular feature of it, does not justify or authorize the offering of amendments not germane to the measure the committee reports, though they may be within the jurisdiction of the committee. So that it really matters not whether or no this committee has jurisdiction of the general question of the fourteenth amendment, the question of the denial of the right of citizens to vote, and of the action that might be taken were there such a denial and the facts were established before the committee. That is a wide field, entirely outside of and beyond anything the committee has attempted. The committee is performing its duty under Article I of the Constitution. The gentleman might just as well have offered in any other amendment to the Constitution, the eighteenth, the nineteenth, the tenth, the twelfth, or all of them, as to bring in this particular provision, which has to do with a provision of the Constitution not in any way invoked in this legislation, and refers to a reduction of representation based upon a contingency the existence of which has not been established and could not be established by any provision in the amendment.

I perhaps have said enough on the proposition that the amendment would be perfectly innocuous if it were in the bill. It would be simply confusing. It is not self-enforcing. No machinery is provided for the enforcement of the fourteenth amendment, but a matter entirely unrelated to the provision of section 1 is presented here in the form of an amendment which is in fact a mere recitation of the words of a section of the Constitution.

Mr. TOWNER. Mr. Chairman, I desire to call the attention of the Chair to this amendment, which I believe is not germane to the bill and has no connection with it.

It is quite unnecessary to call the attention of the Chair to the fact that section 2 of the fourteenth amendment consists of two entirely different propositions. The first sentence provides and makes mandatory that Congress shall every 10 years make an apportionment among the States of the number of Representatives according to population. That proposition ends there. That is a duty that has been performed. The bill under consideration complies with that requirement.

Mr. TINKHAM. Will the gentleman yield?

Mr. TOWNER. No; I can not yield to the gentleman.

Mr. TINKHAM. For a question?

Mr. TOWNER. No; not for a question. That proposition is entire and finished. The committee has performed that duty when it has brought in this bill at this time. We have brought in a bill providing for an apportionment according to the Constitution. Now, what follows? I ask the careful attention of the Chair to this proposition. The statement is then made—and that is the commencement of the next proposition, the second proposition, which is an entirely distinct one—that in any election, if any citizen of the United States or if citizens of the United States shall have their right to vote denied or abridged, then Congress may reduce their representation in Congress in proportion to that reduction.

I call the attention of the Chair to the fact that the language is that it may be reduced. Reduced from what? Certainly from some standard. From what standard? The standard that the Constitution provides, and which we have already established in this bill, the standard which fixes the apportionment according to the number of people in the United States. The Constitution provides that it shall be done according to that, and it is the first thing to be done. Then afterwards, after that standard has been established, and never until some standard shall have been established and enacted into law, can reductions be made.

How can reductions be made when we are called upon here to make the standard from which reductions shall be made? They can be made and will be made possibly if the gentleman from Massachusetts [Mr. TINKHAM] is as insistent on performing his duty as he asserts that he is.

At any time after the standard has been fixed, as it has been fixed in this bill, if he can show that in any State of the Union the right to vote has been denied or abridged, then Congress may reduce the standard which is here established in this bill in proportion to the amount that he shows that the right to vote has been denied or abridged. If that is not clear, then it seems to me I do not understand the language of the Constitution.

Mr. TINKHAM. Will the gentleman yield?

Mr. TOWNER. No; I decline to yield. I do not want to take up the time in answering questions. Gentlemen who argue here that this provision should be enforced should try to do so both intelligently and effectively. If they claim that in any State of this Union there has been a denial or abridgment of the right to vote, let them come in and show that at some election—because the provision of the Constitution says "any election"—the right to vote has been denied or abridged. Probably it has. Probably they can show it. But what good is there in coming here and asking that a bill be amended by inserting a repetition of the Constitution that, as has been suggested here again and again, has no force and effect whatever in itself; and in how ridiculous a position does it place the Congress of the United States to reenact a provision of the Constitution already existent by inserting it as a mere act of the legislature. It certainly seems to me that there is no pertinency or relevancy to it, and that this proposed amendment is not germane to the proposition, because until it can be shown that it has something to do with what has been done in this bill, certainly it has no germaneness to this bill.

SEVERAL MEMBERS. Rule! Rule!

Mr. TINKHAM. Mr. Chairman——

The CHAIRMAN. The Chair will hear the gentleman from Massachusetts briefly.

Mr. TINKHAM. In reply to the honorable Representative from Iowa [Mr. TOWNER], who has just taken his seat and who has stated that this is an unrelated matter at this time, because we are passing a general bill in relation to representation among the several States, let me read what Representative Garfield, subsequently President of the United States, said on the 6th day of December, 1871, in relation to the bill putting into effect the first apportionment of Representatives after the passage of the fourteenth amendment.

He said:

In the State of Massachusetts people are deprived of suffrage on account of inability to read and write. All such persons under the constitutional amendments which I have indicated must be subtracted from the total population of Massachusetts before we can know what is her representative population. If in the Southern States men are still denied the right to vote in consequence of race or color or for lack of property qualification, their total must be reduced accordingly. I do not know what sum may be subtracted in any State. I am aware

that the facts are very difficult to ascertain, and perhaps the result may not change the number of representatives in any State, but it is clear that we ought to have all the facts before we proceed to fix the relative number of Representatives of the States.

The gentleman is a member of the Census Committee. What has he done to obtain the facts in relation to disfranchisement; what has he done in order to carry out the constitutional mandate? There is no necessity of this bill being here at this time. It can be passed at the next Congress. The honorable Representative has brought a bill here plainly and completely unconstitutional and unlawful.

Mr. SIEGEL. Mr. Chairman, I make the point of order that the gentleman is not discussing the point of order.

Mr. LONGWORTH. Mr. Chairman, I submit that the argument just made by the gentleman from Massachusetts [Mr. TINKHAM] is conclusive proof that his amendment is not germane to this bill.

The CHAIRMAN. The Chair is ready to rule. The committee has under consideration the bill (H. R. 14498) for the apportionment of Representatives in Congress amongst the several States under the Fourteenth Census. The first section of the bill provides, as amended by the amendment offered by the gentleman from California [Mr. BARBOUR], a definite number of Representatives from the several States. We are proceeding under Article I of the Constitution to apportion Representatives in Congress among the several States according to population ascertained by the Fourteenth Census. The gentleman from Massachusetts [Mr. TINKHAM] offers this amendment to section 1 of the bill:

Provided further, That if any State deny or abridge the right of any inhabitants thereof, being 21 years of age and citizens of the United States, to vote at any election named in the amendment to the Constitution, Article XIV, section 2, except for participation in rebellion or other crime, the number of Representatives apportioned to that State shall be reduced in proportion to the number which such citizens shall bear to the whole number of citizens 21 years of age in such State.

The gentleman from Ohio [Mr. LONGWORTH] makes the point of order that this amendment is not germane to the section under consideration.

The question as to whether or not this amendment is germane to section 1 of the bill demands an inquiry into the purpose of that section and, as far as can be ascertained, the purpose of this amendment. That section fixes a definite number of Members from the several States according to the census returns. The amendment does not fix or relate to a definite number of Members; on the contrary, it leaves the number of Members apportioned to any State to a contingency that may arise in the future. It has been held by well-considered decisions that even though a subject relates to the same matter, yet if it introduces a new element or an element of uncertainty, or if it provides a future action upon the happening of something indefinite, the matter so offered is not then germane as an amendment.

A very well considered opinion was delivered upon that subject by a former Vice President of the United States, Mr. Sherman, when a Member of this House. The House had under consideration a tariff bill. An amendment was offered to the dutiable list by the gentleman from Missouri, Mr. Dockery, providing that articles contained in the section providing for the dutiable list should, upon the ascertainment of a certain fact, be placed on the free list. A point of order was made by Mr. Dingley that the amendment was not germane. The Chairman decided that the element of uncertainty introduced in the amendment offered by the gentleman from Missouri made it not germane to the section in question and sustained the point of order.

In this case the amendment offered by the gentleman from Massachusetts provides:

That if any State deny or abridge the right of any inhabitants thereof, being 21 years of age and citizens of the United States, to vote at any election named in the amendment to the Constitution, Article XIV, section 2—

The Chair finds on referring to that section that it relates to the following matters:

But when the right to vote at any election for the choice of electors for President and Vice Precident of the United States, Representatives in Congress, the executive and judicial officers of a State, or the members of the legislature thereof is denied to the male inhabitants of said State, being 21 years of age and citizens of the United States, or in any way abridge, except for participation in rebellion or other crime, the basis of representation therein shall be reduced in the proportion which the number of such male citizens shall bear to the whole number of male citizens 21 years of age in such State.

Is the enactment into law on an apportionment bill under the Fourteenth Census of those provisions of the Constitution germane as an amendment? The Chair is unable to arrive at the conclusion that the amendment is germane, and therefore sustains the point of order.

The Clerk read as follows:

SEC. 3. That in case of an increase in the number of Representatives in any State under this apportionment such additional Representative or Representatives shall be elected by the State at large and the other Representatives by the districts now prescribed by law until such State shall be redistricted in the manner provided by the laws thereof and in accordance with the rules enumerated in section 2 of this act; and if there be no change in the number of Representatives from a State, the Representatives thereof shall be elected from the districts now prescribed by law until such State shall be redistricted as herein prescribed.

Mr. BARBOUR. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Mr. BARBOUR moves to amend by striking out all of section 3 of said act and by inserting in lieu thereof the following:

"SEC. 3. That in case of an increase in the number of Representatives in any State under this apportionment, such additional Representative or Representatives shall be elected by the State at large and the other Representatives by the districts now prescribed by law until such State shall be redistricted in the manner provided by the laws thereof and in accordance with the rules enumerated in section 2 of this act. If there be no change in the number of Representatives from a State, the Representatives thereof shall be elected from the districts now prescribed by law until such State shall be redistricted as herein prescribed, and if there be a decrease in the number of Representatives from any State and the legislature thereof in session after the passage of this act fails to redistrict such State and the laws of such State make no other provision therefor, then the governor of such State is hereby empowered to redistrict such State as provided in section 2 herein, provided the failure of any legislature to redistrict any State is not caused by the veto of the governor thereof."

Mr. BARBOUR. Mr. Chairman, this amendment is in the nature of a perfecting amendment made necessary by the one previously adopted retaining the membership of the House at 435.

The bill which was reported by the committee fixed the membership at 483, and with a total membership of 483 the representation of no State was reduced. Under the amendment adopted fixing the membership at 435 the numerical representation of 11 States will be reduced, and it is therefore necessary to provide a method for redistricting those States. That is the purpose of the amendment.

Mr. GARRETT. Will the gentleman yield?

Mr. BARBOUR. I will yield to the gentleman from Tennessee.

Mr. GARRETT. I presume that it is the case in every State, as it is in mine I am sure, that the constitution of that State makes provision as to the districting, and conferred that power upon the legislative body. If that is true, how could this Congress by an act prescribe in the face of a State constitution that the governor shall do it? He is given no such power by the constitution of his State.

Mr. BARBOUR. I will state in reply to the gentleman from Tennessee that there is a constitutional provision that the State shall prescribe the time, manner, and places of electing Representatives. That is followed by the provision that the Congress has power to make or alter those regulations. In other words, the absolute power is in the Congress to redistrict States if it should see fit to do so under the provisions of the Federal Constitution.

Mr. GARRETT. May I continue this just a moment; will the gentleman yield further?

Mr. BARBOUR. I will yield.

Mr. GARRETT. Does the gentleman think, even assuming that he is right and that the right does exist in the Congress to redistrict the States, a power which I am not prepared to admit, but assuming that it does exist, does the gentleman think that the Congress can delegate that power to a governor?

Mr. BARBOUR. I think under the provisions of the Constitution that we can make or alter regulations prescribed by the State. This gives absolute power and control over the election of Representatives.

Mr. ASWELL. Will the gentleman yield?

Mr. BARBOUR. I will yield to the gentleman.

Mr. ASWELL. As I understood the reading of the gentleman's amendment, the gentleman made no provision for the governor appointing in case of an increase. Why make one in case of a decrease?

Mr. BARBOUR. I can not hear the gentleman from Louisiana.

Mr. ASWELL. As I understood the reading of the gentleman's amendment, he proposed to provide in case of a decrease that the governor appoint, but in the case of an increase the gentleman makes no such provision?

Mr. BARBOUR. No.

Mr. ASWELL. Why not?

Mr. BARBOUR. In the event the legislature does not act and there is no provision of law, then the governor shall act.

This is to provide for the contingency in which there is no exercise of the power to district a State.

Mr. ASWELL. Why did not the gentleman say in case of an increase?

Mr. BARBOUR. In the case of an increase they are elected at large. Here we have the case of a decrease, where we are up against an entirely different proposition.

Mr. ASWELL. Why not elect them at large in these districts?

Mr. BARBOUR. Does the gentleman wish an entire State delegation elected at large?

Mr. SANDERS of Louisiana. Will the gentleman yield?

Mr. BARBOUR. I will.

Mr. SANDERS of Louisiana. Would it not be fairer to the State to add to section 3, as it is at present written in the bill, the following amendment:

Strike out the period at the end of the word "prescribe"——

The CHAIRMAN. The time of the gentleman has expired.

Mr. GARD. Mr. Chairman, I desire to offer an amendment.

Mr. SIEGEL. Mr. Chairman, I ask unanimous consent that the time of the gentleman be extended for five minutes.

The CHAIRMAN. The gentleman from New York asks unanimous consent that the time of the gentleman from California [Mr. BARBOUR] be extended for five minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. SANDERS of Louisiana. Would it not be fairer, I suggest to the gentleman from California, to make this provision:

And in case of a decrease in the number of Representatives in any State under this apportionment the Representatives from said State shall be elected by the State at large until such State shall be redistricted as herein prescribed.

Mr. BARBOUR. I do not think so.

Mr. KEARNS. Suppose the governor refuses to act, what happens? The gentleman says if the legislature refuses to act it will authorize the governor to redistrict. Suppose he would not act?

Mr. BARBOUR. I suppose he could be mandamused, or the Representatives could be elected at large.

Mr. SIEGEL. Will the gentleman yield to me?

Mr. BARBOUR. I will.

Mr. SIEGEL. Under this condition, then, would come the question for the House to determine who should be seated in the event an election took place. That occurred once, as far as California was concerned, where they elected three instead of two, and the House determined the question.

Mr. NEWTON of Minnesota. As I understand, the purpose of the gentleman's amendment is this, to allow the States to continue to provide through their legislatures how they shall act, but in the event they fail to act, in order to prevent a manifest miscarriage of the intent of Congress, then the authority is delegated to the governor of the State?

Mr. BARBOUR. That is the sole purpose of the amendment.

Mr. ROMJUE. I do not know that I correctly gather the meaning of the amendment the gentleman has offered.

Mr. SANDERS of Louisiana. Mr. Chairman, I offer the following amendment.

Mr. SIEGEL. I make the point of order that the gentleman from California has the floor.

The CHAIRMAN. The gentleman from California has the floor.

Mr. DYER. Mr. Chairman, the gentleman from California has yielded to my colleague from Missouri to ask a question.

The CHAIRMAN. The Chair is aware of that.

Mr. DYER. I do not think the House is.

Mr. ROMJUE. I do not know that I have the true interpretation of the amendment. I understand from the amendment that in that event the legislature does not designate the redistricting in case of a decrease in membership?

Mr. BARBOUR. Yes. And there is no other provision in the law of the State.

Mr. ROMJUE. And in the case of the law of Missouri, where the constitution vests authority in the governor, the secretary of state, and the attorney general, your amendment would not affect it?

Mr. BARBOUR. No. I take it from the gentleman's statement that the constitution of his State does provide a method.

Mr. ROMJUE. Yes. And this amendment only affects such States where the legislature fails to act and where no other authority is provided?

Mr. BARBOUR. Where there is no other method of doing it.

Mr. SUMNERS of Texas. Will the gentleman from California yield?

Mr. BARBOUR. I will.

Mr. SUMNERS of Texas. Has the gentleman considered the advisability of leaving to the discretion of the State the election of the membership at large, even if it did not desire to choose them in the method indicated here?

Mr. BARBOUR. We have considered it, and we did not think it advisable. The theory is that the election of Congressmen should be by districts, that they should be so elected. There might be some political advantage that could be gained in the way the gentleman has suggested. If the State is districted according to the theory of the Constitution and according to the practice of times hitherto, no harm can be done or any injustice result. We are simply providing——

Mr. SUMNERS of Texas. Just another suggestion. I realize the difficulty if you should elect at large, but if the people in the State are very definitely of one political faith it is to be presumed that the governor would be of that same faith.

Mr. BARBOUR. I presume so.

Mr. SUMNERS of Texas. And it would be a fair presumption that the governor would appoint such a one as the people might elect? I am trying to get information.

Mr. BARBOUR. I did not hear the gentleman's question as there is so much noise. In my opinion the Constitution at least contemplates, if it does not expressly state, that the Representatives shall be elected by districts. That is the provision of section 2 of the bill. If there is an increase, and the State is not districted, the additional Representatives shall be elected at large until the State is districted. That is provided in section 3 of the bill and follows the language of previous bills of this kind. Now, we are confronted by a situation where the representation of certain States will be reduced. This the bill as reported did not contemplate at all, and it is for the purpose of meeting this situation that the amendment is offered.

Mr. SUMNERS of Texas. I have great confidence in the judgment of the gentleman——

The CHAIRMAN. The time of the gentleman has expired. [Cries of "Vote!" "Vote!"]

Mr. LARSEN. Mr. Chairman, I rise in opposition to the amendment. So far as my recollection goes, this proposition was not brought to the attention of the committee. The members of the committee did not have, as I understand, opportunity to consider it. As one member of the committee, I am opposed to it. The governors of the various States are clothed with the veto power. If we leave to the governors of the States the right to make apportionment in the event the legislatures do not exercise that function, they would also have the right to veto any apportionment that was made by the legislature. Therefore the governor would practically have control of the reapportionment in the State.

Mr. FAIRFIELD. Will the gentleman yield?

Mr. LARSEN. For a question.

Mr. FAIRFIELD. The amendment expressly states that the legislature shall have acted, and that it can not be done if the governor has vetoed the action of the legislature. So that is taken care of in the amendment.

Mr. LARSEN. Then, Mr. Chairman, what are you going to do with the condition where the legislature fails to act, or tries to act, and the governor will not let them?

Mr. MONDELL. How could the governor prevent the legislature from acting, except by veto?

Mr. LARSEN. There would be no power that I know of.

Mr. MONDELL. The governor has no authority to prevent the legislature from acting, except by veto.

Mr. LARSEN. Very well. Would not the governor, unless the legislature wanted to redistrict the State in accordance with his views, be allowed to veto the proposition and block the legislative action entirely?

Mr. SIEGEL. He would not have any power to reapportion.

Mr. LARSEN. He would not have any power to reapportion, but he would have power to veto the action of the legislature.

Mr. SIEGEL. It all would depend on what the constitution provided in that particular State regarding reapportionment.

Mr. BARBOUR. The amendment expressly states if the governor vetoes an apportionment bill——

Mr. LARSEN. The States have the power of exercising this right, and have statutes authorizing the redistricting of States according to their own judgment. Is it not wise to leave it where it has heretofore been, and let the States themselves decide how they will make the reapportionment, without any action on the part of Congress?

Mr. WHEELER. If the legislature did pass a reapportionment act, and the governor would veto it, he would have no power to reapportion it. Under such circumstances, would the State go without representation?

Mr. LARSEN. I think not. We can trust the State to take care of this in the future as in the past. Does the gentleman know of any mischief that has been done because the States have failed to make reapportionment? In some States of the

Union they have had their representation decreased many times. In my own State, Georgia, it has been decreased three times; in the State of Virginia it has been decreased three or four times, and there has never been any trouble.

Mr. WHEELER. In case the governor did have the power to reapportion, would not there be danger, in some cases, where he was prejudiced, of his giving an unfair apportionment?

Mr. LARSEN. In my judgment, no legislature would wish to invite the governor into a controversy of this kind. The States can take care of themselves in this matter without direction of the Congress. I am against the amendment and trust it may be defeated.

Mr. CLARK of Missouri. Mr. Chairman, I move to strike out the last word. I would like to ask the gentleman from California [Mr. BARBOUR] if election by general ticket was not universal in this country until 1840?

Mr. BARBOUR. Until 1840?

Mr. CLARK of Missouri. Yes; or until 1841. What harm would there be to leave it so that they can elect them in that way, if they desire to do so?

Mr. BARBOUR. Well, we had fewer Representatives at that time than we have now, and many more people to represent.

Mr. CLARK of Missouri. I do not think it would make any difference if you did have.

Mr. SANDERS of Louisiana. Mr. Chairman, I have offered an amendment.

The CHAIRMAN. The gentleman from Louisiana offers an amendment, which the Clerk will report.

Mr. GARD. Mr. Chairman, I desire to amend the Barbour amendment.

Mr. SANDERS of Louisiana. That is the purpose of my amendment. I do not desire to have it read at this time. I simply want to speak to it.

The CHAIRMAN. The gentleman from Louisiana asks unanimous consent to address the House for five minutes. Is there objection?

There was no objection.

Mr. SANDERS of Louisiana. Mr. Chairman and gentlemen of the House, the entire difference between the proposition advanced by the gentleman from California [Mr. BARBOUR] and the proposition advanced by myself is this: The gentleman from California presents a proposition to this House that, so far as my reading and inquiry go, has never been presented before. His amendment would permit the governor of a State under certain circumstances to say what shall be the congressional districts in a State.

Now, the Constitution of the United States expressly provides that a governor can not name a Member of this House to fill a vacancy, and the purpose of that was to keep this House absolutely free from executive influence. The governor can and does fill vacancies in another chamber, because that chamber represents the State. The Members here represent the people. And yet the amendment of the gentleman from California proposes to do indirectly that which the Constitution says can not be done directly.

Now, the amendment that I propose to the amendment of the gentleman from California simply provides this, that you use the same methods in electing Members to the House when there is a decrease and the legislature does not act as you have already provided in case of an increase when the legislature does not act. In other words, when there is an increase and the legislature does not act, you elect the increased membership from at large. My amendment simply provides that when there is a decrease in the membership and the legislature does not act, then you elect your decreased membership from at large. Now, that is the whole proposition in a nutshell.

Mr. BRITTEN. Mr. Chairman, will the gentleman yield?

Mr. SANDERS of Louisiana. No; I can not in five minutes.

One other proposition, and on that I want to ask the attention of the gentleman from California [Mr. BARBOUR]. Under the amendment of the gentleman from California it is possible that a State will not know how to elect its Representatives. Under the original amendment offered by the gentleman from California my State loses a Member. If the legislature meets, under his pending amendment, and redistricts the State, and the governor vetoes the bill, the legislature has sought to act and the governor has vetoed it, and under the Barbour amendment the governor can not then redistrict. Will you tell me, then, how Louisiana can elect seven men when there is no provision of this act and no provision of the State to elect seven men?

Mr. BARBOUR. If the gentleman will yield, you will have to elect them at large in that case.

Mr. SANDERS of Louisiana. Well, if you have to elect them at large, in that case, I say, my amendment ought to carry, because it is a logical thing to do, to elect the decreased membership on the same basis as you elect the increased membership, and not put yourselves in the position, gentlemen of the House, where a State or a people will not know how to elect the Members that have been allotted to them under the apportionment that you have already adopted.

The CHAIRMAN. The time of the gentleman from Louisiana has expired.

Mr. GARD. Mr. Chairman, I desire to offer an amendment to the Barbour amendment. It is on the table.

The CHAIRMAN. The gentleman from Ohio offers an amendment to the Barbour amendment, which the Clerk will report.

Mr. JOHNSON of Mississippi. Mr. Chairman, I ask that the Sanders amendment be reported. It has never been reported. The gentleman offered it and asked that it be reported.

The CHAIRMAN. The gentleman from Louisiana said he did not desire his amendment to be reported.

Mr. WILSON of Louisiana. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. WILSON of Louisiana. Is the amendment offered by the gentleman from Louisiana now pending?

The CHAIRMAN. It has not been reported, on the request of the gentleman from Louisiana himself.

Mr. WILSON of Louisiana. I understand it was not read on his request?

The CHAIRMAN. It was not read, at his request.

Mr. JOHNSON of Mississippi. I ask that it be read if it has been offered.

Mr. GARD. Mr. Chairman, I ask that my amendment be reported.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Ohio.

The Clerk read as follows:

Amendment offered by Mr. GARD to the amendment offered by Mr. BARBOUR: Strike out the words "redistrict such State" on the fourth line of the Barbour amendment and insert in lieu thereof the words "and shall call an extraordinary session of the legislature of such State to redistrict such State," so that as amended the language will read: "And if there be a decrease in the number of Representatives from a State, and the legislature thereof in session after the passage of this act fails to redistrict such State, and the laws of such State make no other provision therefor, then the governor of such State is hereby empowered to, and shall, call an extraordinary session of the legislature of such State to redistrict such State, as provided in section 2 herein."

Mr. WINGO. Mr. Chairman, a point of order.

The CHAIRMAN. The gentleman will state it.

Mr. WINGO. My point of order is, first, that the amendment is not germane and, second, it is beyond the power of Congress to control the constitutional power of a governor of a State as to when and for what purpose he shall call an extra session of the State legislature. We are certainly going far afield when we seek to do that. We have no power to do that.

The only power that Congress has is set out in section 4 of Article I, and that is as to regulations by the legislatures of the time, place, and manner of holding the elections. We have no control over the time when a legislature shall meet. We have no control of how it shall redistrict the State. We can only legislate upon the questions of regulation by legislatures of the time, place, and manner of holding elections.

Section 4 of Article I reads as follows:

SEC. 4. The times, places, and manner of holding elections for Senators and Representatives shall be prescribed in each State by the legislature thereof; but the Congress may at any time by law make or alter such regulations, except as to the places of choosing Senators.

The sole question we are considering here is the question of fixing the number of Congressmen and apportioning that number among the States. That is the subject matter both of the bill and of the amendment.

The CHAIRMAN. The amendment to which the amendment of the gentleman from Ohio [Mr. GARD] is offered is the amendment offered by the gentleman from California [Mr. BARBOUR], which provides for redistricting in the States, and so forth.

Mr. WINGO. It provides that if the legislature fails to redistrict the State, then the governor shall be authorized to redistrict the State. The amendment of the gentleman from Ohio proposes to substitute for the power that Congress attempts, without constitutional authority, to delegate to the governor to redistrict the State, the power to call a special session of the legislature.

The CHAIRMAN. The question raised by the amendment offered by the gentleman from California [Mr. BARBOUR] relates to redistricting the State. It directs the governor to redistrict the State. The amendment offered by the gentleman from Ohio [Mr. GARD] says that it shall be done by the legislature

when called together by the governor. The Chair thinks the two propositions are related.

Mr. WINGO. They are related but not germane. The amendment of the gentleman from Ohio proposes a different method entirely.

The CHAIRMAN. It relates to the matter of redistricting the States. If Congress has the right to direct the governor to redistrict, it has the right also to direct him to call the legislature together. It is for the House to decide whether or not it wants to take the responsibility of enacting the legislation.

Mr. WINGO. We have no constitutional power to do either; and while both are related to the same general subject they are not germane to each other.

Mr. SUMNERS of Texas. Mr. Chairman, I desire to make a point of order.

The CHAIRMAN. The gentleman will state it.

Mr. SUMNERS of Texas. The point of order is this: That the proposed amendment suggests to the Congress of the United States that it shall authorize the governor of a State to do a thing with regard to which the Congress of the United States has no authority either to authorize or to deny the governor of the State the right to do. This amendment says that the governor of the State is by the Congress of the United States authorized to do that with regard to which the Congress has no right to speak, with regard to which the constitution of the State alone may control.

The CHAIRMAN. The Chair thinks that the point of order not having been made to the Barbour amendment, the amendment offered by the gentleman from Ohio simply provides another method of redistricting the State, and therefore the Chair overrules the point of order.

Mr. DYER. Mr. Chairman, the Barbour amendment simply authorizes the governor to act. The amendment of the gentleman from Ohio [Mr. GARD] directs the governor to do a certain thing, which is different, and I say, with the gentlemen who have spoken in favor of the point of order, that Congress has no authority to direct the governor to do a thing of this kind.

The CHAIRMAN. Is not that rather an argument against the propriety of the amendment than an argument in favor of the point of order?

Mr. SUMNERS of Texas. I desire to make another observation. I direct my point of order now against the part of this proposed amendment which undertakes, by authority from the Congress, to authorize the governor of a sovereign State to call the legislature of that State in session. I say that the Congress of the United States has no authority with regard to that subject matter. It is controlled entirely by the constitutions of the several States, and Congress ought not to establish the precedent which this legislation would establish, and I respectfully submit to the Chair that the Chair ought not, as against the point of order raised, to permit to go into the language of a law enacted by Congress the words included in this proposed amendment.

The CHAIRMAN. The Chair does not feel called upon to decide whether or not the House is acting wisely in directing the governor of a State to call the legislature together. That is a matter for the House and not for the Chair to decide.

Mr. SUMNERS of Texas. If the Chair pleases, I am not challenging the wisdom or unwisdom of the amendment, but I am challenging the authority of Congress to deal with the subject matter.

The CHAIRMAN. This is a matter that should be decided by action of the committee rather than by the Chair on a point of order, and therefore the Chair overrules the point of order.

SEVERAL MEMBERS. Let us vote!

Mr. GARD. Mr. Chairman, as the committee has doubtless been well advised by the preliminary discussion on the point of order, the difference between the amendment proposed by me and the amendment of the gentleman from California [Mr. BARBOUR] is that my amendment strikes out the words which empower the governor of the State to redistrict the State in the event that the legislature be not in session, and authorizes instead that the governor shall call an extraordinary session of the legislature for the purpose of redistricting the State in accordance with the provisions of section 2, not of the Barbour amendment but of this act.

Mr. GARRETT. Will the gentleman yield?

Mr. GARD. Yes.

Mr. GARRETT. Does the gentleman think seriously that the Congress has the authority either to empower or direct the governor of a State to call a special session of the legislature?

Mr. GARD. I say that when the original text is brought in as it has been brought in by the Barbour amendment, which provides an unusual method in conferring upon the governor of a State the authority to redistrict the State into congressional districts, then both as a matter of law and as an appropriate matter of legislation the Congress may direct the governor of the State to carry out the method which it prescribes.

Mr. GARRETT. Suppose the governor fails to do it. What is the Congress going to do?

Mr. CLARK of Missouri. Mandamus him.

Mr. GARD. In the event that the governor fails to do it, then a mandamus proceeding brought on the relation of any elector in the State would compel the governor to do that which the Congress of the United States has directed him to do.

Mr. OLIVER. Mr. Chairman, I have an amendment at the desk which I desire to have reported.

The CHAIRMAN. There is an amendment already pending.

Mr. ASWELL. Mr. Chairman, I offer the following as a substitute for the amendment offered by the gentleman from Ohio.

The CHAIRMAN. The Clerk will report the amendment offered in the nature of a substitute by the gentleman from Louisiana for the amendment offered by the gentleman from Ohio.

The Clerk read as follows:

Amendment offered by Mr. ASWELL: Page 4, after line 2, insert a new section as follows:

"SEC. 3. That in case of an increase in the number of Representatives in any State under this apportionment such additional Representative or Representatives shall be elected by the State at large and the other Representatives by the districts now prescribed by law until such State shall be redistricted in the manner provided by the laws thereof and in accordance with the rules enumerated in section 2 of this act; and if there be no change in the number of Representatives from a State the Representatives thereof shall be elected from the districts now prescribed by law until such State shall be redistricted as herein prescribed, and that in case of a decrease in the number of Representatives in any State under this apportionment the Representatives from such State shall be elected by the State at large until such State shall be redistricted as herein prescribed."

Mr. ASWELL. Mr. Chairman, I merely want to call the attention of the committee to the fact that it is very doubtful procedure to authorize the governor of a State to redistrict a State. I think it is a wholly absurd proposition, and if a State loses representation and the legislature does not act, then the Members should be elected at large until the State has had an opportunity to act, and it would be rare indeed that the State did not act. Two years or more will elapse before the election would be held, and it would be an extraordinary situation if any State should have to elect any Representatives at large.

Mr. GARRETT. Mr. Chairman, I shall certainly support the amendment offered by the gentleman from Louisiana [Mr. ASWELL]. I do not think the Congress has ever at any time in any one of these apportionment acts passed any legislation to meet the situation created by a decrease in membership. Following the census of 1840 there was a decrease in membership. Of course, decreases have occurred in some of the States at other times, but there was a general decrease in membership at that time, and that is the only time in the history of the country when that occurred. At that time the Congress did not deem it necessary to take any action whatever, but left the matter to the States. Let me venture to suggest that we are treading upon very serious constitutional ground. So far as I am concerned, I do not believe there is any efficacy or force in section 2 of this bill, which provides that the districts shall be laid out of contiguous territory, and I do not believe that the Congress has any power to make or enforce even that provision. The section of the Constitution cited by the gentleman from California relative to the times, places, and manner of election, being section 4, Article I, of the Constitution, does not, in my opinion, in any way whatsoever authorize the Congress to redistrict a State. That deals with the question of elections. It provides that the times, places, and manner of holding elections for Senators and Representatives shall be prescribed in each State by the legislature thereof, but that the Congress may at any time by law make or alter such regulations, except as to the place of choosing Senators. Congress may make and alter what regulations? Regulations covering the districting of a State? Indeed not. Regulations covering the time, the place, the manner of electing Members of the House of Representatives.

In my judgment if the committee should present to the House a bill which would undertake to confer upon the governor of a State the power of redistricting that State, it would be a very active trenching upon the Constitution; it would not be merely the expression of an opinion such as is contained in section 2 of the bill, which is harmless; but it would be a proposition that might result in real harm. Viewing it as I do, I do not see how I could possibly vote for any apportionment bill that was, in my opinion, to this extent violative of the fundamental law of the land.

Mr. JOHNSON of Mississippi. Mr. Chairman, will the gentleman yield?

Mr. GARRETT. Yes.

Mr. JOHNSON of Mississippi. I call the attention of the gentleman to Article X of the Constitution:

The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States, respectively, or to the people.

That bears out the statement just made.

Mr. GARRETT. Mr. Chairman, I doubt if there is a single thing in this bill after section 1 that is of the slightest consequence. When we reach it I intend to move to strike out section 4. Certainly the House of Representatives is not willing to commit itself to the proposition laid down in the amendment offered by my friend from Ohio [Mr. GARD] and declare that it will undertake to require or direct the governor of a sovereign State to call a session of the legislature of his Commonwealth. I think we better go very carefully about these matters.

The CHAIRMAN (Mr. MANN of Illinois). The time of the gentleman from Tennessee has expired.

Mr. BARKLEY. Mr. Chairman, I desire to call the attention of the committee to the fact that in the reapportionment act of 1901, which was enacted subsequent to the census of 1900, the same situation confronted the House which confronts it now. In the act of January 16, 1901, after providing how the increased number of Members should be elected from the States, and after providing that where there was no change the existing districts should remain until the legislature should redistrict, it had this provision:

And if the number hereby provided for shall in any State be less than it was before the change hereby made, then the whole number to such State hereby provided for shall be elected at large, unless the legislatures of said States have provided or shall otherwise provide before the time fixed by law for the next election of Representatives therein.

So that Congress has never yet undertaken to provide by law that the governor of a State shall call an extra session for the purpose of redistricting, nor to empower the governor himself to redistrict the State, and by that silence it is fair to presume that heretofore Congress has never assumed that it had the power either to direct the governor to call the legislature into session or to empower the governor of a State to do what Congress itself can not do, to wit, redistrict a State. This involves a very serious matter. Where there is a decrease in representation it means that some districts within a State must be merged together so as to create a smaller number of districts. If the amendment offered by the gentleman from California [Mr. BARBOUR] shall prevail, it means that any governor of any State in the United States where the legislature fails to act shall have the power to merge the districts by changing the boundaries of all of them so as to not only create a redistricting of the State but he may exercise that power, if he is so disposed, so as to throw three or four Members of Congress into the same congressional district, which may be changed in less than two years by subsequent session of the legislature. Therefore, under a redistricting which might be put into operation by the governor of a State the State would have no knowledge as to what its districts might be in the future, because those districts as created by the governor might be entirely changed within less than the term of office for which the man was elected by an act of a subsequent legislature.

Aside from the confusion that this may work in all the States that are redistricted, aside from the fact it will bring about unnecessary confusion in all those States, it seems to me very dangerous exercise of the power of a governor to permit him to redistrict a State in such a manner as he may see fit to do it. If he does it arbitrarily in order that he might create districts for certain friends of his or for the purpose of unfairly enlarging the representation of his own party in this body, there is no power in the State laws to punish him for that, and certainly Congress has no power to go into the question of the exercise of that power, and for that reason I think it would be very unwise to confer such a power upon the governor. I therefore hope both the amendments—that of the gentleman from Ohio [Mr. GARD] and that of the gentleman from California [Mr. BARBOUR]—may be defeated and that the amendment of the gentleman from Louisiana [Mr. ASWELL] may be adopted.

The CHAIRMAN. There is pending the amendment offered by the gentleman from California [Mr. BARBOUR], the substitute amendment offered by the gentleman from Louisiana [Mr. ASWELL], and an amendment to the substitute offered by the gentleman from Ohio [Mr. GARD]. The first question is on the amendment offered by the gentleman from Ohio.

The question was taken, and the amendment was rejected.

The CHAIRMAN. The question now recurs on the substitute offered by the gentleman from Louisiana.

The question was taken, and the Chair announced the noes seemed to have it.

On a division (demanded by Mr. ASWELL and others) there were—ayes 90, noes 128.

So the substitute was rejected.

The CHAIRMAN. The question now is on the amendment offered by the gentleman from California.

Mr. MONDELL. Mr. Chairman, I desire to discuss that amendment. Mr. Chairman, when this amendment was first proposed——

Mr. CANNON. Mr. Chairman, I would like to have the amendment read; a number of us were not in.

The CHAIRMAN. Without objection, the Clerk will again report the amendment offered by the gentleman from California.

There was no objection.

The amendment was again reported.

Mr. MONDELL. Mr. Chairman, when this amendment was first prepared it was presented to me, and while I had some doubts about the authority of the Congress to delegate to a State executive authority to district a State my doubts were not sufficiently well grounded that I felt I could maintain them against the opinion of gentlemen to the contrary, but as the debate has gone on my first opinion in the matter has been strengthened. I am now of the opinion that we would jeopardize this entire important legislation mandatory under the Constitution, we would raise an important constitutional question affecting the validity of the entire act if we should amend section 3 as is here proposed. I think it is highly important that we should carry out the mandatory provisions of the Constitution relative to the apportionment of Representatives in Congress. It is highly important that we do it in a clearly and unquestionably constitutional way, else our labors shall be in vain. We can not afford to endanger the legislation by putting into it a provision of doubtful constitutionality. I therefore shall feel that it is my duty to vote against the so-called Barbour amendment to section 3. [Cries of "Vote!"]

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from California.

The question was taken, and the Chairman announced the noes seemed to have it.

On a division (demanded by Mr. NEWTON of Missouri) there were—ayes 75, noes 148.

So the amendment was rejected.

The Clerk read as follows:

SEC. 4. That candidates for Representative or Representatives to be elected at large in any State shall be nominated in the same manner as candidates for governor, unless otherwise provided by the laws of such State.

Mr. GARRETT. Mr. Chairman, I move to strike out section 4.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. GARRETT: Page 4, line 14, strike out section 4.

Mr. GARRETT. Mr. Chairman, this is in the exact language that was carried in the last bill. So far as I can ascertain, no such language was ever carried in any bill prior to that time. I have not examined all of them, but none of them I have examined contains any such provision.

Mr. SIEGEL. Will the gentleman yield?

Mr. GARRETT. I will.

Mr. SIEGEL. The reason why this section has been put in this bill was to prevent, if possible, the selection of men by convention where there are primary laws. That was the reason for putting it in 10 years ago, I believe, as I learn from an examination of the debate and discussion, and that is why our committee put it in again, because you can readily see what will happen——

Mr. GARRETT. Mr. Chairman, of course, I can see what might happen, but I can also see that the question of the nomination of a candidate for Congress is something with which the House of Representatives has absolutely nothing to do. Now, the language was carried in the bill the last time, for which my side of the House was responsible. Perhaps I was not giving as close attention to the bill then as now, but I certainly would not be willing to stand for any proposition that either this House or the Congress has authority to determine the method whereby one shall be nominated and——

Mr. SIEGEL. Will the gentleman yield?

Mr. GARRETT. I will.

Mr. SIEGEL. The gentleman 10 years ago—I have the roll call before me of April 27, 1911—voted for the same provision.

Mr. GARRETT. On this, independent of the bill itself?

Mr. SIEGEL. On section 4.

Mr. GARRETT. Some one moved to strike it out?

Mr. SIEGEL. The gentleman voted for the entire bill at that time.

Mr. GARRETT. I voted for the entire bill; yes.

I repeat what I said a moment ago: I probably was not giving close attention to the bill at that time, and I did not know such a provision was in it. That was the first time it was ever carried, and I think it was a mistake.

Mr. SIEGEL. It was not the first time. I want to say that the bill which Mr. Crumpacker, of Indiana, introduced in the previous Congress had the same provision.

Mr. GARRETT. It did not become the law though.

Mr. SIEGEL. It did not pass the Senate, it is true.

Mr. GARRETT. I have looked to the laws of 1900 and the law of 1890. That is as far back as I have gone. It does not seem to me to be a question that admits of argument as to us having no authority to direct that there shall be a nomination or how the nomination shall be made.

Mr. SIEGEL. Mr. Chairman, I rise in opposition to the amendment of the gentleman from Tennessee [Mr. GARRETT]. This section, as contained in the act of 10 years ago, and the committee was unanimous upon the question of putting it in the bill. It provides how candidates for Representatives shall be nominated if no provision is made by the State in its laws. We have jurisdiction over the primaries to be held in each State. We have jurisdiction as to how these men may be elected and how those elections shall be conducted.

Mr. JOHNSON of Mississippi. Will the gentleman yield?

Mr. SIEGEL. I will.

Mr. JOHNSON of Mississippi. Would the gentleman agree with so eminent an authority as the Hon. Charles Evans Hughes?

Mr. SIEGEL. Not always, because in some instances he has not been followed by the Supreme Court of the United States.

Mr. JOHNSON of Mississippi. Will the gentleman yield for another question?

Mr. SIEGEL. Certainly.

Mr. JOHNSON of Mississippi. Before the Supreme Court in the Newberry case the other day he cited authority to substantiate his position that the Congress of the United States had no authority over States in primary elections.

Mr. SIEGEL. Let me answer the gentleman by saying this, that many a time have I known the distinguished gentleman from my State, Charles Evans Hughes, to cite authorities before the New York appellate courts, and yet they have not adopted them.

Mr. CLARK of Florida. Will the gentleman from New York yield?

Mr. SIEGEL. I will.

Mr. CLARK of Florida. Suppose the law in a State provided for a primary, and the governor should be nominated by a primary, and the candidate for Congress should be nominated by primary——

Mr. SIEGEL. It says unless otherwise provided by the laws of such State.

Mr. CLARK of Florida (continuing). And later on the candidate for Congress should die, when it is too late to hold a primary, and he should be nominated by petition, as is frequently the case; now, under this, he would not have to be nominated in the same way as the governor was nominated.

Mr. SIEGEL. The section reads, "unless otherwise provided." If the laws of Florida provide that he can be nominated by petition he would be nominated by petition. I ask for a vote on the amendment and urge that it be beaten.

The CHAIRMAN. The question is on the amendment of the gentleman from Tennessee [Mr. GARRETT] to strike section 4 from the bill.

The question was taken, and the Chair announced that the noes seemed to have it.

Mr. GARRETT. Mr. Chairman, I ask for a division.

The committee divided; and there were—ayes 104, noes 124.

So the amendment was rejected.

Mr. SIEGEL. Mr. Chairman, I move that the committee do now rise and report the bill to the House with the amendment, with the recommendation that the amendment be agreed to, and that the bill as amended do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. MANN of Illinois, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill H. R. 14498, had directed him to report the same to the House with an amendment, with the recommendation that the amendment be agreed to and the bill as amended do pass.

Mr. SIEGEL. Mr. Speaker, I move the previous question on the bill and amendment to final passage.

The previous question was ordered.

The SPEAKER. Is a separate vote demanded on any amendment?

Mr. AYRES. Mr. Speaker, I demand a vote on the amendment.

Mr. SWEET. Mr. Speaker, I ask for a vote on the Barbour amendment.

The SPEAKER. The question is on agreeing to the amendment.

The question was taken, and the Speaker announced that the ayes seemed to have it.

Mr. SWEET. Mr. Speaker, I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 269, nays 76, answered "present" 3, not voting 82, as follows:

YEAS—269.

So the amendment was agreed to.

The Clerk announced the following additional pairs:

Mr. WINSLOW (for) with Mr. REAVIS (against).

Mr. BLACK (for) with Mr. HOWARD (against).

Mr. ROBINSON of North Carolina (for) with Mr. HARDY of Texas (against).

Mr. DALLINGER (for) with Mr. KING (against).

Mr. MONTAGUE (for) with Mr. DUNBAR (against).

Mr. KITCHIN (for) with Mr. RANDALL of California (against).

Mr. BLANTON (for) with Mr. BEE (against).

General pairs:

Mr. FOSTER with Mr. CONNALLY.

Mr. EMERSON with Mr. GOODWIN of Arkansas.

Mr. HUTCHINSON with Mr. NEELY.

Mr. KENNEDY of Iowa with Mr. BLAND of Missouri.

Mr. EDMONDS with Mr. GALLAGHER.

Mr. MERRITT with Mr. EAGLE.

Mr. KAHN with Mr. GANLY.

Mr. LEHLBACH with Mr. DAVEY.

Mr. KREIDER with Mr. DONOVAN.

Mr. MACGREGOR with Mr. SCULLY.

Mr. RANDALL of Wisconsin with Mr. MANN of South Carolina.

Mr. SANDERS of Indiana with Mr. WISE.

Mr. BACHARACH. Mr. Speaker, my colleague Mr. PATTERSON is unavoidably absent to-day. If he were present, he would vote for the bill.

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

Mr. ASWELL. Mr. Speaker, I move to recommit the bill to the Committee on the Census for the purpose of correcting the errors which have been presented to the committee to-day; and on that I move the previous question.

The SPEAKER. The gentleman moves to recommit the bill to the Committee on the Census, and on that he moves the previous question.

Mr. MANN of Illinois. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MANN of Illinois. The Speaker stated the proper motion. The proper motion was not made by the gentleman from Louisiana.

Mr. ASWELL. I moved to recommit the bill to the Committee on the Census, and after that I made a statement.

Mr. MANN of Illinois. But the statement was out of order.

The SPEAKER. The question is on ordering the previous question.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the motion of the gentleman from Louisiana to recommit the bill.

The question was taken, and the Speaker announced that the noes appeared to have it.

Mr. ASWELL. Mr. Speaker, I ask for the yeas and nays on the motion to recommit.

The SPEAKER. The yeas and nays are demanded. Those in favor of taking this vote by yeas and nays will rise and stand until they are counted. [After counting.] Thirty-five gentlemen have risen in the affirmative—not a sufficient number. The yeas and nays are refused.

So the motion to recommit was rejected.

The SPEAKER. The question is on the passage of the bill.

The question was taken, and the Speaker announced that the ayes seemed to have it.

Mr. ASWELL. Mr. Speaker, I ask for the yeas and nays on the passage of the bill.

The SPEAKER. The gentleman from Louisiana asks for the yeas and nays on the passage of the bill. As many as are in favor of taking the vote by yeas and nays will rise and stand until they are counted. [After counting.] Forty-five gentlemen have risen—not a sufficient number.

Mr. ASWELL. Mr. Speaker, I ask for the other side.

The SPEAKER. The Chair will count. [After counting.] The Chair counts 271 Members. Forty-five is not a sufficient number, and the yeas and nays are refused.

So the bill was passed.

On motion of Mr. SIEGEL, a motion to reconsider the vote whereby the bill was passed was laid on the table.

AGRICULTURAL APPROPRIATION BILL.

Mr. ANDERSON, by direction of the Committee on Appropriations, reported the bill (H. R. 15812) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1922, which was read a first and second time, and, with the accompanying report, ordered printed and referred to the Committee of the Whole House on the state of the Union.

Mr. RUBEY. Mr. Speaker, I desire to reserve all points of order on the bill.

The SPEAKER. The gentleman from Missouri reserves all points of order on the bill.

ENROLLED BILL SIGNED.

Mr. RAMSEY, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bill of the following title, when the Speaker signed the same:

H. R. 12469. An act to authorize the award of a medal of honor to Chief Gunner Robert Edward Cox, United States Navy.

BRIDGE ACROSS THE ALABAMA RIVER, ALA.

Mr. DENT. Mr. Speaker, I ask unanimous consent to take from the Speaker's table Senate bill 4519, to authorize the Louisville & Nashville Railroad, its successors and assigns, to construct and maintain a bridge across the Alabama River at or near a point approximately 4 miles from the city of Montgomery, Ala.

The SPEAKER. The gentleman from Alabama asks unanimous consent to take from the Speaker's table the bill S. 4519, which the Clerk will report.

The Clerk read as follows:

A bill (S. 4519) to authorize the Louisville & Nashville Railroad, its successors and assigns, to construct and maintain a bridge across the Alabama River at or near a point approximately 4 miles from the city of Montgomery, Ala.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. MANN of Illinois. Reserving the right to object, is there a similar bill on the House Calendar?

Mr. DENT. It is not on the House Calendar, but the committee has acted favorably upon it, as I understand from the chairman of the committee.

Mr. ESCH. It has been favorably reported by the committee.

Mr. MANN of Illinois. Favorably reported to whom?

Mr. ESCH. To the House.

Mr. MANN of Illinois. Then it is on the House Calendar.

Mr. ESCH. The gentleman from Tennessee [Mr. SIMS] was authorized to report it.

Mr. MANN of Illinois. Is it reported?

Mr. ESCH. I assume that it is.

The SPEAKER. It is on the calendar the Chair is informed.

Mr. ESCH. Number 240 on the calendar.

Mr. MANN of Illinois. The gentleman from Tennessee [Mr. SIMS] knows whether he made the report or not.

Mr. SIMS. The gentleman from Kentucky [Mr. BARKLEY] made the report.

Mr. MANN of Illinois. Somebody ought to know.

Mr. GARNER. The Speaker says it is on the calendar.

The SPEAKER. The attention of the Chair is called to the fact that it was reported by Mr. BARKLEY.

Mr. MANN of Illinois. Gentlemen who make these requests ought to know. It is a matter of right, not a matter of unanimous consent.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the Louisville & Nashville Railroad, its successors and assigns, be, and they are hereby, authorized to construct, maintain, and operate a bridge and approaches thereto across the Alabama River at a point suitable to the interests of navigation, one end of said bridge to be in the county of Montgomery, Ala., and the other in the county of Elmore, Ala., at or near a point approximately 4 miles from the city of Montgomery, Ala., in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The SPEAKER. The question is on the third reading of the bill.

The bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. DENT, a motion to reconsider the vote whereby the bill was passed was laid on the table.

ADJOURNMENT.

Mr. SIEGEL. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 4 minutes p. m.) the House adjourned until to-morrow, Thursday, January 20, 1921, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

353. A letter from the Secretary of the Treasury, transmitting from the Secretary of War proposed paragraphs of legislation authorizing the expenditure of funds from current appropriations for "Ordnance service, 1921," and for "Transportation facilities, inland and coastwise waterways, 1921," to cover payment of civilian personnel employed in the District of Columbia (H. Doc. No. 984); to the Committee on Appropriations and ordered to be printed.

354. A letter from the Secretary of the Treasury, transmitting supplemental estimate of appropriation required for the maintenance of buildings under the Superintendent of the State, War, and Navy Department Buildings for the remainder of the fiscal year 1921 (H. Doc. No. 985); to the Committee on Appropriations and ordered to be printed.

355. A letter from the Secretary of the Treasury, transmitting estimate of appropriation for the relief of the estate of Joseph Matthews, of Solvay, N. Y.; to the Committee on Claims.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. CARAWAY, from the Committee on the Judiciary, to which was referred the bill (H. R. 15396) to amend section 1 of an act approved February 26, 1919, entitled "An act to fix the salaries of the clerks of the United States district courts and to provide for their office expenses, and for other purposes," reported the same without amendment, accompanied by a report (No. 1208), which said bill and report were referred to the House Calendar.

Mr. ANDERSON, from the Committee on Appropriations, to which was referred the bill (H. R. 15812) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1922, reported the same without amendment, accompanied by a report (No. 1212), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. MOONEY, from the Committee on War Claims, to which was referred the bill (H. R. 7187) for the relief of Mrs. D. Montgomery, reported the same without amendment, accompanied by a report (No. 1207), which said bill and report were referred to the Private Calendar.

Mr. EDMONDS, from the Committee on Claims, to which was referred the bill (S. 4326) for the relief of George F. Ramsey, reported the same with amendments, accompanied by a report (No. 1209), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (S. 4327) for the relief of H. B. Banks, reported the same with amendments, accompanied by a report (No. 1210), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (S. 4328) for the relief of Roach, Stansell, Lowrance Bros. & Co., reported the same with amendments, accompanied by a report (No. 1211), which said bill and report were referred to the Private Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. PORTER: A bill (H. R. 15804) to authorize the President to present certain ordnance and ammunition to the Portuguese Republic; to the Committee on Foreign Affairs.

Also, a bill (H. R. 15805) to authorize the payment of an indemnity to the Norwegian Government for the detention of three subjects of Norway in Hudson County, N. J.; to the Committee on Foreign Affairs.

By Mr. KINKAID: A bill (H. R. 15806) to amend section 2 of the act of August 9, 1912 (37 Stat., p. 265), relating to liens in patents and water-right certificates; to the Committee on Irrigation and Arid Lands.

By Mr. PETERS: A bill (H. R. 15807) to authorize the Secretary of the Navy to sanction the use of certain titles on tablets or other memorials; to the Committee on Naval Affairs.

By Mr. BUTLER: A bill (H. R. 15808) to authorize the President to relieve certain officers and enlisted men from the disabilities which they have heretofore or would hereafter suffer through the charge of desertion standing on their records, and for other purposes; to the Committee on Naval Affairs.

By Mr. PORTER: A bill (H. R. 15809) to authorize the payment to the Government of France of $13,511.13 as an indemnity requested in behalf of Mme. Crignier for losses sustained by her as the result of a search for the body of Admiral John Paul Jones; to the Committee on Foreign Affairs.

By Mr. GRIGSBY: A bill (H. R. 15810) establishing an additional division of the district court of Alaska; to the Committee on the Judiciary.

By Mr. FIELDS: A bill (H. R. 15811) making an appropriation for the payment of special assessment for paving, curbing, and guttering of Lock Avenue, Louisa, Ky., adjacent to real estate owned by the United States and occupied by Government Lock No. 3; to the Committee on Public Buildings and Grounds.

By Mr. ANDERSON: A bill (H. R. 15812) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1922; to the Committee on the Whole House on the state of the Union.

By Mr. BUTLER: Joint resolution (H. J. Res. 451) authorizing the Secretary of the Navy to receive for instruction at the United States Naval Academy at Annapolis Mr. Jose A. de la Torriente, a citizen of Cuba; to the Committee on Naval Affairs.

By Mr. McKEOWN: Joint resolution (H. J. Res. 452) providing that one term of the United States District Court for the Eastern Judicial District of Oklahoma shall be held annually at Ada, Okla.; to the Committee on the Judiciary.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BLAND of Indiana: A bill (H. R. 15813) granting a pension to Ida Taylor; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15814) granting a pension to Louisa Watson; to the Committee on Invalid Pensions.

By Mr. COPLEY: A bill (H. R. 15815) for the relief of William R. Peck; to the Committee on Claims.

By Mr. HERNANDEZ: A bill (H. R. 15816) granting a pension to Mary E. Harwood; to the Committee on Invalid Pensions.

By Mr. IGOE: A bill (H. R. 15817) granting a pension to Fred Wellmann; to the Committee on Pensions.

By Mr. IRELAND: A bill (H. R. 15818) granting an increase of pension to Valentine B. Proehl; to the Committee on Pensions.

By Mr. PORTER: A bill (H. R. 15819) for the relief of Mie Uratake; to the Committee on Foreign Affairs.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

5071. By Mr. BARBOUR: Petition of Madera Branch of the Association for the Recognization of Irish Independence, favoring official recognization of the new Irish republic; to the Committee on Foreign Affairs.

5072. By Mr. BEGG: Petition of the Retail Grocers and Butchers' Association, of Norwalk, Ohio, protesting against the volume tax of 1 per cent on total sales; to the Committee on Ways and Means.

5073. By Mr. CULLEN: Petition of Civil Service Forum of New York City, favoring legislation for the benefit of civil-service employees; to the Committee on Reform in the Civil Service.

5074. Also, petition of American Bottlers of Carbonated Beverages, favoring a repeal of the 10 per cent tax on soft drinks; to the Committee on Ways and Means.

5075. By Mr. ESCH: Petition of board of directors of the Beavers Reserve Fund Fraternity, relative to forced increase of intrastate railroad rates by the Federal Government; to the Committee on Interstate and Foreign Commerce.

5076. Also, petition of Wisconsin State Conference of Near East Relief delegates, asking Congress to provide relief for the Armenians; to the Committee on Foreign Affairs.

5077. By Mr. FULLER: Petition of the Holy Name Society of St. Patrick's Parish, the St. Ann Sodality, and the Sodality of the Blessed Virgin Mary, of St. Patrick's Church, La Salle, Ill., protesting against the Smith-Towner bill; to the Committee on Education.

5078. Also, petition of Chicago Cooks and Pastry Cooks' Association, favoring resumption of friendly relations and trade with Soviet Russia; to the Committee on Foreign Affairs.

5079. Also, petition of the ladies of Waterman (Ill.) Domestic Science Club, favoring the passage of the Sheppard-Towner maternity bill; to the Committee on Interstate and Foreign Commerce.

5080. Also, petition of Critchfield & Co., of Chicago, Ill., favoring increased protection on the manufacture of porch shades; to the Committee on Ways and Means.

5081. Also, petition of Shevlin Hixon Co., of Minneapolis, Minn., protesting against a tariff on lumber; to the Committee on Ways and Means.

5082. By Mr. GALLIVAN: Petition of Proctor Ellison Co., of Boston, Mass., asking that the duty on hides be eliminated from the emergency tariff bill; to the Committee on Ways and Means.

5083. Also, petition of National Association of United States customs inspectors, of Boston, Mass., favoring House bill 15089 by Representative FORDNEY and Senate bill 4693 by Senator CALDER; to the Committee on Ways and Means.

5084. Also, petition of Eastern Clay Goods Co., of Boston, Mass., favoring House bill 13854 by Mr. SELLS and Senate bill 4593 by Senator KEYES of New Hampshire; to the Committee on Agriculture.

5085. By Mr. KLECZKA: Petition of the common council of the city of Milwaukee, urging the Congress of the United States to enter into business relations with Soviet Russia; to the Committee on Foreign Affairs.

5086. Also, petition of common council of the city of West Allis, relating to legislation affecting the production, sale, and distribution of coal; to the Committee on Interstate and Foreign Commerce.

5087. By Mr. LINTHICUM: Petition of Curtis Bay Towing Co., Baltimore, regarding Senate bill 4607; to the Committee on the Merchant Marine and Fisheries.

5088. Also, petition of William S. N. Wallis and William P. Wittmer, Baltimore, Md., regarding Senate bill 4487; to the Committee on the Merchant Marine and Fisheries.

5089. Also, petition of Terminal Shipping Co., Atlantic Transport Co., and W. R. Wiest & Co., all of Baltimore, Md., regarding House bill 13591; to the Committee on the Judiciary.

5090. Also, petition of Charles County Sheep Growers' Association, La Plata, Md., regarding French-Capper fabric bill; to the Committee on Interstate and Foreign Commerce.

5091. Also, petition of Mrs. Mary B. Carroll, Baltimore, Md., regarding daylight saving; to the Committee on Interstate and Foreign Commerce.

5092. Also, petition of Dr. and Mrs. C. M. Kepner, Baltimore, Md., regarding House bill 12466, Yellowstone Park; to the Committee on the Public Lands.

5093. Also, petition of Mrs. Arthur B. Bibbins and Women's Christian Temperance Union, both of Baltimore, Md., regarding disarmament; to the Committee on Military Affairs.

5094. Also, petition of Dr. D. Z. Dunnott, D. A. Stickell, Dr. Hugh Birckhead, J. M. Gill, Henry S. West, and Dr. J. H. Mason Knox, all of Baltimore, Md., regarding appropriation for social hygiene; to the Committee on Appropriations.

5095. Also, petition of Mrs. Llewellyn I. Barker and Mrs. Katherine F. Worthington, both of Baltimore, regarding Senate bill 4485; to the Committee on Public Buildings and Grounds.

5096. Also, petition of R. M. Kennedy, Sisterhood Oheb Shalom, Miriam Lodge, Women's Club of Irvington, John Paul Guckert, Thomas B. Gresham, and Ray A. Pindell, all of Baltimore, regarding Smith-Towner bill; to the Committee on Education.

5097. By Mr. MURPHY: Memorial of Salem, Ohio, Retail Grocers' Association, opposing passage of proposed volume tax on retail sales; to the Committee on Ways and Means.

5098. Also, memorial of Benjamin Firestone Post, No. 290, American Legion, Columbiana, Ohio, praying for the passage of the Langley bill (H. R. 14135); to the Committee on Immigration and Naturalization.

5099. Also, memorial of Retail Grocers' Association of Bellaire, Ohio, asking that volume tax of 1 per cent be placed on wholesaler instead of retailer; to the Committee on Ways and Means.

5100. By Mr. O'CONNELL: Petition of the Woman's Municipal League of New York City, favoring the passage of the Sheppard-Towner bill; to the Committee on Interstate and Foreign Commerce.

5101. By Mr. TEMPLE: Petition of Woman's Club of New Brighton, Pa., opposing the passage of the Yellowstone Park bill (H. R. 12466); to the Committee on Water Power.

5102. Also, petition of the Twentieth Century Club of Rochester, Pa., supporting the Sheppard-Towner bill; to the Committee on Interstate and Foreign Commerce.

5103. Also, petition of Woman's Club of Freedom, Pa., in support of the Smith-Towner bill, the Sheppard-Towner bill, and the Yellowstone National Park bill; to the Committee on Interstate and Foreign Commerce.

5104. Also, petition of Woman's Club of New Brighton, Pa., supporting the Smith-Towner and the Sheppard-Towner bills; to the Committee on Interstate and Foreign Commerce.

5105. By Mr. YATES: Petition of George P. Puttnam, jr., the Prairie Club, Chicago, Ill., protesting against legislation to secure rights to the water power and other natural assets for money-making purposes of our national parks; to the Select Committee on Water Power.

5106. Also, petition of Mrs. Emma A. Gere, president Chapter A. R., P. E. O., Urbana, Ill., urging support of Sheppard-Towner bill; to the Committee on Interstate and Foreign Commerce.

5107. Also, petition of Mrs. Elizabeth Fryman, 1336 East Leafland Avenue, and Mr. Martin Mercer, 526 East Prairie Street, Decatur, Ill., urging passage of Elkins bill (S. 4596) for relief of Spanish War veterans, their widows, and dependents; to the Committee on Pensions.

5108. Also, petition of Mrs. F. Metzer, 624 East Eldorado Street, Decatur, Ill., urging passage of Elkins bill (S. 4596) for relief of Spanish War veterans, their widows and dependents; to the Committee on Pensions.

5109. Also, petition of Mr. John W. Dunn, general chairman the Commercial Telegraphers' Union, room 504, No. 44 Broad Street, New York City, opposing passage of House bill 14657; to the Committee on Agriculture.

5110. Also, petition of National Industrial Conference Board, 10 East Thirty-ninth Street, New York, urging the attention of Congress to the discussion of the Federal tax problem contained in report of the tax committee of said board; to the Committee on Ways and Means.

5111. Also, petition of First Joint Stock Land Bank of Chicago, care of Continental & Commercial Bank Building, Chicago, by Guy Huston, president, protesting against amendment of the farm loan act; to the Committee on Banking and Currency.

SENATE.

THURSDAY, *January 20, 1921.*

(Legislative day of Tuesday, January 18, 1921.)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Gore	McCumber	Smith, Ga.
Ball	Hale	McKellar	Smoot
Beckham	Harris	McLean	Spencer
Borah	Harrison	Nelson	Stanley
Brandegee	Heflin	New	Sterling
Capper	Hitchcock	Overman	Sutherland
Colt	Johnson, Calif.	Owen	Swanson
Culberson	Jones, N. Mex.	Page	Trammell
Curtis	Jones, Wash.	Penrose	Underwood
Dial	Kellogg	Phipps	Wadsworth
Dillingham	Kenyon	Poindexter	Walsh, Mass.
Edge	Keyes	Pomerene	Walsh, Mont.
Fletcher	King	Reed	Warren
France	Knox	Robinson	Willis
Gay	Lenroot	Sheppard	Wolcott
Gerry	Lodge	Sherman	
Gooding	McCormick	Simmons	

Mr. CURTIS. I was requested to announce the absence of the Senator from North Dakota [Mr. GRONNA], the Senator from Wisconsin [Mr. LA FOLLETTE], and the Senator from New York [Mr. CALDER] on official business of the Senate.

I was also requested to announce the absence of the Senator from West Virginia [Mr. ELKINS], the Senator from Oregon [Mr. MCNARY], and the Senator from Indiana [Mr. WATSON] on account of official business.

Mr. UNDERWOOD. I was requested to announce the absence of the senior Senator from South Carolina [Mr. SMITH] on account of important business.

Mr. SWANSON. I wish to announce that my colleague [Mr. GLASS] is detained on account of illness in his family.

Mr. GAY. I was requested to announce the absence of the senior Senator from Louisiana [Mr. RANSDELL], who is detained on official business.

Mr. GERRY. I desire to announce that the Senator from Oregon [Mr. CHAMBERLAIN] and the Senator from South Dakota [Mr. JOHNSON] are detained from the Senate by reason of illness.

The VICE PRESIDENT. Sixty-six Senators have answered to the roll call. There is a quorum present.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by D. K. Hempstead, its enrolling clerk, announced that the House had passed the bill (H. R. 14498) for the apportionment of Representatives in Congress amongst the several States under the Fourteenth Census, in which it requested the concurrence of the Senate.

The message also announced that the House had passed the bill (S. 4519) to authorize the Louisville & Nashville Railroad, its successors and assigns, to construct and maintain a bridge across the Alabama River at or near a point approximately 4 miles from the city of Montgomery, Ala.

ENROLLED BILL SIGNED.

The message further announced that the Speaker of the House had signed the enrolled bill (H. R. 12469) to authorize the award of a medal of honor to Chief Gunner Robert Edward Cox, United States Navy, and it was thereupon signed by the Vice President.

CREDENTIALS.

The VICE PRESIDENT laid before the Senate the credentials of JAMES E. WATSON, elected a Senator from the State of Indiana for the term beginning March 4, 1921, which were read and ordered to be filed, as follows:

THE STATE OF INDIANA,
Executive Department.

To all to whom these presents shall come, greeting:

Whereas it has been certified to me by the proper authority that JAMES E. WATSON has been elected to the office of United States Senator for the State of Indiana:

Therefore, know ye, that in the name and by the authority of the State aforesaid I do hereby commission the said JAMES E. WATSON United States Senator for the State of Indiana for the term of six years, from the 4th day of March, 1921, until his successor shall have been elected and qualified.

In witness whereof I have hereunto set my hand and caused to be affixed the seal of the State at the city of Indianapolis this 18th day of January, in the year of our Lord 1921, the one hundred and fifth year of the State, and of the independence of the United States the one hundred and forty-fifth year.

[SEAL.] WARREN T. McCRAY.

By the governor:

ED JACKSON,
Secretary of State.

COAST GUARD ACADEMY, NEW LONDON, CONN. (S. DOC. NO. 356).

The VICE PRESIDENT laid before the Senate a communication from the Secretary of the Treasury, transmitting a supplemental estimate of appropriation in the sum of $281,345 for central heating and power plant, quarters for commissioned officers and warrant officers, remodeling and relocating certain buildings, providing facilities for small boats, filling and grading and retaining walls, and purchase of additional necessary land at the Coast Guard Academy, New London, Conn., which was referred to the Committee on Appropriations and ordered to be printed.

HOUSE BILL REFERRED.

The bill (H. R. 14498) for the apportionment of Representatives in Congress amongst the several States under the Fourteenth Census was read twice by its title and referred to the Committee on the Census.

PETITIONS AND MEMORIALS.

Mr. BECKHAM presented a petition of the Kentucky Society, Sons of the American Revolution, of Louisville, Ky., praying for the enactment of legislation restricting the immigration of aliens, which was referred to the Committee on Immigration.

Mr. SMITH of Georgia presented petitions of the Carroll County Trade Board, of Carrollton; the Carroll County Board of Commissioners of Roads and Revenues, of Carrollton; and the Moultrie Chamber of Commerce, of Moultrie, all in the State of Georgia, praying for the enactment of legislation to continue the distribution of Federal aid to rural post roads in the respective States through the Bureau of Public Roads, which were referred to the Committee on Post Offices and Post Roads.

Mr. HARRIS presented petitions of the Rotary Club, of Athens; the Kiwanis Club, of Savannah; the Moultrie Chamber of Commerce, of Moultrie; the Carroll County Trade Board, of Carrollton; and the Carroll County Board of Commissioners of Roads and Revenues, of Carrollton, all in the State of Georgia, praying for the enactment of legislation to continue the distribution of Federal aid to rural post roads in the respective States through the Bureau of Public Roads, which were referred to the Committee on Post Offices and Post Roads.

Mr. SMITH of Maryland presented a resolution of the Charles County Farmers' Federation, of La Plata, Md., favoring the truth in fabric bill, which was referred to the Committee on Interstate Commerce.

He also presented a resolution of the Woman's Christian Temperance Union of Baltimore, Md., favoring the reduction of armaments and the settlement of international disputes by arbitration, which was referred to the Committee on Foreign Relations.

Mr. CAPPER presented a resolution adopted at the annual meeting of the Farmers' Equity Union, held at St. Louis, Mo., favoring the enactment of legislation widening the scope of the Federal farm loan act, which was referred to the Committee on Banking and Currency.

REPORTS OF COMMITTEES.

Mr. SHEPPARD, from the Committee on Military Affairs, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

A bill (H. R. 6301) for the relief of Nathan Manzer (Rept. No. 702); and

A bill (H. R. 11377) for the relief of Warren V. Howard (Rept. No. 703).

Mr. OWEN, from the Committee on Indian Affairs, to which were referred the following bills, reported them each with amendments and submitted reports thereon:

A bill (S. 4039) to amend section 3 of the act of Congress of June 28, 1906, entitled "An act for the division of the lands and funds of the Osage Indians in Oklahoma, and for other purposes" (Rept. No. 704); and

A bill (S. 4879) to amend section 1 of the act of Congress approved March 2, 1895 (28 Stat. L., p. 907), and to extend restrictions against alienation of lands allotted to and inherited by certain Quapaw Indians, and for other purposes (Rept. No. 705).

Mr. STERLING, from the Committee on the Judiciary, to which was referred the joint resolution (H. J. Res. 382) declaring that certain acts of Congress, joint resolutions, and proclamations shall be construed as if the war had ended and the present or existing emergency expired, reported it favorably with an amendment, and submitted a report (No. 706) thereon.

Mr. NEW, from the Committee on Claims, to which was referred the bill (S. 3308) for the payment of certain claims of general officers of volunteers for three months' pay proper for Civil War service as reported by the Court of Claims, submitted an adverse report (No. 707) thereon, which was agreed to, and the bill was indefinitely postponed.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. JONES of Washington:

A bill (S. 4888) to amend section 5 of an act entitled "An act to provide for the lading or unlading of vessels at night, the preliminary entry of vessels, and for other purposes," approved February 13, 1911, as amended by an act entitled "An act to amend an act entitled 'An act to provide for the lading or unlading of vessels at night, the preliminary entry of vessels, and for other purposes,' approved February 13, 1911," approved February 7, 1920; to the Committee on Commerce.

By Mr. WADSWORTH:

A bill (S. 4889) authorizing the Secretary of War to furnish free transportation and subsistence from Europe to the United States for certain destitute discharged soldiers and their wives and children; to the Committee on Military Affairs.

By Mr. REED:

A bill (S. 4890) for the repeal of certain war-time legislation, and for other purposes; and

A bill (S. 4891) to amend section 1 of an act approved February 26, 1919, entitled "An act to fix the salaries of the clerks of the United States district courts and to provide for their office expenses, and for other purposes"; to the Committee on the Judiciary.

By Mr. CAPPER:

A bill (S. 4892) for the relief of Samuel M. Robinson (with accompanying papers); to the Committee on Claims.

By Mr. SPENCER:

A bill (S. 4893) to authorize the coinage of a 50-cent piece in commemoration of the one hundredth anniversary of the admission of Missouri into the Union; to the Committee on Banking and Currency.

By Mr. GORE:

A joint resolution (S. J. Res. 247) proposing an amendment to the Constitution of the United States; to the Committee on the Judiciary.

AMENDMENTS TO LEGISLATIVE, ETC., APPROPRIATION BILL.

Mr. STERLING submitted an amendment intended to be proposed by him to the legislative, etc., appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed, as follows:

On page 112, after line 5, insert: "South Dakota: Surveyor general, $2,000; clerks, $3,100; contingent expenses, $200; in all, $5,300."

Mr. STERLING submitted an amendment intended to be proposed by him to the legislative, etc., appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed. The amendment was in the items for the Pension Office, on page 104, line 2, to strike out the proviso and insert in lieu thereof the following:

Provided, That no person shall be employed hereunder at a rate of compensation exceeding $2,000 per annum except 2 actuaries, and 1 at $3,000 and 1 at $2,400 each.

Mr. STERLING submitted an amendment intended to be proposed by him to the legislative, etc., appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed, as follows:

On page 66, after line 24, to insert: "Deadwood, S. Dak., assay office: Assayer in charge, who shall also perform the duties of melter, $1,800; assistant assayer, $1,200; clerk, $1,000; in all, $4,000.

"For wages of workmen and other employees, $2,000.

"For incidental and contingent expenses, $1,200."

COMPENSATION OF UNITED STATES EMPLOYEES.

Mr. JOHNSON of California. I ask that House bill 5726, the minimum wage bill, may be laid before the Senate.

The Senate resumed the consideration of the bill (H. R. 5726) to fix the compensation of certain employees of the United States.

Mr. JOHNSON of California. Mr. President, I desire to proceed with the business which was made a special order for this morning. I shall take but a very brief time in explanation of that which already, I assume, is familiar to the Members of the Senate.

In beginning my remarks, at the suggestion of the Senator from Illinois [Mr. SHERMAN], who gave notice that to-day he would speak upon a pending measure in charge of the Senator from Iowa [Mr. KENYON], the so-called packers bill, I wish to advise the Senate that at the conclusion of my very brief remarks the Senator from Illinois will proceed with his speech.

The bill which comes to us to-day, H. R. 5726, to fix the compensation of certain employees of the United States, has had rather a troubled career during the last few years in the Congress of the United States. It is the bill commonly known as the Nolan minimum wage bill. Under its provisions it is sought to give to every individual in the employment of the United States a minimum wage of $3 per day, $90 per month, $1,080 per annum. To those who work but partial time, the rate fixed is 37½ cents per hour.

A similar bill has passed the House of Representatives on two occasions, the last occasion with substantial unanimity. The bill came into the Senate during the last session, was passed by the Senate, after its passage was reconsidered by consent, and then in the closing hours of the session was debated and, because of final adjournment, did not reach a definite conclusion. It is here to-day with the amendments which were proposed and adopted just at the conclusion of the last session, and here now, having been reconsidered, as originally presented to the Senate during last May and the early part of June.

I do not propose to enter into an academic discussion of the necessity for this sort of a measure, nor do I propose, except as addenda to my remarks, in explanation of the bill, to take the statistical reports of the various organizations concerning the necessary cost of living to-day. I wish, however, to impress upon the Senate one paramount fact, and that is that any man who gives a decent day's work is entitled to a decent day's pay, and $3 is scarcely that. After all, it is ordinary people who determine the necessary cost of living. It is the ordinary man's life which determines finally what is a living wage, what is, indeed, a sum under which, as an American citizen, he may be permitted to pursue his vocation and may be permitted to live as an American and to enjoy those things which Americans ought to enjoy.

In the last analysis I take it those of us who are only ordinary men in the Senate will pass upon the question of whether or not $3 per day should be accorded as a living wage to those who are in Government employment. And in deciding this question each of us can do so readily from his own knowledge and experience. Permit me to say that the wages of some of those affected by the pending bill originally were fixed in 1854, and there has been from that date to this, except in instances where bonuses have been allowed, no new salaries for some of the individuals who come within the purview of the bill.

The question which I would ask every Senator to ask himself is this, Is not any man or woman who performs an efficient day's work in these times entitled to a wage of $3 per day? If the answer be in the affirmative, that a man or a woman doing an efficient day's work is entitled to $3 per day in these times, the pressing necessities of which all of us who have not much of this world's goods understand, you have answered the query presented by the bill and of necessity it must become a law.

The reasons for a measure of this sort are twofold—ethical and economic; ethical because no man ought to wish his fellows to labor for less than a living wage; ethical because no government on earth, least of all a government such as ours, no democracy should wish its employees to labor for it for less than a living wage; economic because only by giving a living wage to employees, only by permitting those who labor to live decently and in the enjoyment of the ordinary comforts that Americans ought to enjoy, shall we attain the efficiency that is so necessary for the maintenance of a particular employment and for the maintenance of the Government itself.

The bill presents the appeal of the very weakest in our social structure to the greatest power that there is in the Nation. It presents the appeal of those who are unable to help themselves to those who have the ultimate power over them. It presents that appeal as no other bill that has been pending before Congress has presented it in recent days.

The number affected, so far as the estimates brought up to the latest moment afforded any indication, are about 50,000. I have to take estimates, because the departments have been unable to give me and have been unable to give to the committee the exact figures as to those who might be affected.

The cost is at the minimum estimate $5,000,000 and at the maximum estimate $10,000,000; measured in dollars from five to ten million; measured in progress, unlimited are the possibilities of the bill; measured in human happiness, it is unbounded. Justice and humanity alike are represented by it.

I said in the beginning that I would not endeavor to give to Senators in detail the statistical information which has been given to the various committees and which I assume is in the hands of the Members of this body, but those statistics up to date, so far as they relate to the total cost of a family budget in various cities, I have been furnished this morning. These family budgets—that is, the lowest cost on which a family, the family being taken as a husband, wife, and three children, can live in any sort of decency in various cities of the Union—are as follows:

In Washington for a Government employee and his family, $2,430.

These budgets, let me say to you, are not prepared alone by friendly hands; the budgets come not only from the Bureau of Statistics of the Labor Department of the Government, but they come as well from the National Industrial Conference Board, an organization of manufacturers and not particularly in sympathy with the Labor Department.

Mr. DIAL. Mr. President, I should like to ask the Senator from California how many compose the family in the figures he is presenting?

Mr. JOHNSON of California. A husband, wife, and three children under 14 years of age were the first figures which I gave, and the family budget in the first instance required an expenditure of $2,430 per annum.

For Philadelphia, Pa., the budget prepared by the Philadelphia Bureau of Municipal Research, brought down to December, 1920, fixes $1,860 as the minimum.

For Fall River, Mass., the budget prepared by the National Industrial Conference Board, brought down to December, 1920, places the figure at $1,610.

For San Francisco, a statement by Dr. Jessica Peixotto, of the faculty of the University of California, brought down to December, 1920, establishes the minimum of $2,440.

For the bituminous coal mining region of Pennsylvania and Illinois a statement prepared by Prof. W. F. Ogburn, of Columbia University, formerly with the United States Bureau of Labor Statistics, shows $2,119 to be the minimum.

The cost of living for a single woman, without dependents, in Washington, D. C., according to figures prepared by the

United States Bureau of Labor Statistics on the basis of prices of 1919, brought down to date of December, 1920, is $1,200.

These statistical figures will prove the case, of course; but is it necessary with men who understand what has been transpiring in this country in the last few years, with those who have had to deal with mounting costs of living, to stand anywhere in this land and say that $3 per day should be a living wage for a decent day's work? It is incredible in these days of difficulty that any can be found who will assert $3 per day an excessive wage for a day's work.

The argument which has been made again and again—and it was made upon this floor when the bill was here in May and June last—is that there are many people who do not earn anything in Government employment; that there are drones and sloths; that there are those who do not do a day's work at all. Grant it, if you will; but they should not be in Government employment at all, then. If they are of the sort described upon this floor during the prior debate upon this bill, they should instanter be discharged. It is as wicked for the Government to give them $620 or $840 or $960 as it would be for the Government to give them $1,080 under a minimum wage bill. That is a matter of maladministration, for which those who are in charge of the certain departments where such things occur are wholly responsible, and it is not an argument in any aspect against a bill of this kind.

I repeat, we ask a minimum wage of $3 per day for those who perform a decent day's work, and in our country, under the circumstances which confront us to-day, that is the least that the governing body of the Nation ought to accord to those who are in its employment.

I leave this bill now, but during the time of its discussion on this day—and I trust it will be continued to be discussed until a vote shall have been had upon it—I think that we shall be able to answer any suggestions that may be made which it is thought militate against the measure. I appeal to you in closing with just this thought: Three dollars a day for a man working alone or a woman working alone is none too much to be accorded to them, but when we realize that from 70 to 90 per cent of those affected by this bill have dependents, it would seem in a body of this sort a work of supererogation to argue at all for the passage of such a measure.

MEAT-PACKING INDUSTRY.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 3944) to create a Federal live-stock commission, to define its powers and duties, and to stimulate the production, sale, and distribution of live stock and live-stock products, and for other purposes.

Mr. SHERMAN addressed the Senate. After having spoken for several hours,

Mr. KING. Mr. President, the branch of the case which the Senator is now developing is very important. It seems to me that more Senators should be advised upon this important matter. I beg to suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. KELLOGG in the chair). The Secretary will call the roll.

The roll was called, and the following Senators answered to their names:

Ball	Hale	McKellar	Smith, Ga.
Brandegee	Harris	McLean	Smith, Md.
Calder	Harrison	Moses	Smoot
Capper	Heflin	Myers	Spencer
Colt	Johnson, Calif.	Nelson	Stanley
Curtis	Jones, Wash.	New	Sutherland
Dial	Kellogg	Overman	Swanson
Fernald	Kendrick	Owen	Trammell
Fletcher	Keyes	Phelan	Underwood
France	King	Poindexter	Wadsworth
Gay	Knox	Pomerene	Walsh, Mass.
Gerry	Lenroot	Robinson	Warren
Gooding	McCormick	Sheppard	Willis
Gronna	McCumber	Sherman	Wolcott

Mr. WALSH of Massachusetts. The Senator from Missouri [Mr. REED], the Senator from Wisconsin [Mr. LA FOLLETTE], the Senator from New Mexico [Mr. JONES], and the Senator from Iowa [Mr. KENYON] are absent on official business of the Senate.

Mr. HARRISON. The Senator from Kentucky [Mr. BECKHAM] is absent on official business.

The PRESIDING OFFICER. Fifty-six Senators have answered to the roll call. There is a quorum present.

Mr. SHERMAN resumed his speech. After having spoken, in all, for more than four hours he said:

Mr. President, I can not conclude to-day. It is 5 o'clock and I shall defer the continuance of my remarks until to-morrow. I wish to cover completely the condition of the export trade and the proof that I have before me of the very grave damage that has been done to that trade by the Federal Trade Commission's report.

RECESS.

Mr. JOHNSON of California. I move that the Senate take a recess until 12 o'clock to-morrow.

The motion was agreed to; and (at 5 o'clock p. m.) the Senate took a recess until to-morrow, Friday, January 21, 1921, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

THURSDAY, *January 20, 1921.*

The House met at 12 o'clock noon.

Rev. James Shera Montgomery, D. D., pastor of Calvary Methodist Church, Washington, D. C., offered the following prayer:

Almighty God, our Heavenly Father, we acknowledge Thee to be our Lord, working out the pleasure of Thy holy will.

Direct us ever by the precepts and examples so thoroughly incarnated and taught by Jesus of Nazareth. Amen.

The Journal of the proceedings of yesterday was read and approved.

PURCHASE OF GERMAN AEROPLANES.

Mr. MADDEN. Mr. Speaker, I ask unanimous consent for the present consideration of a privileged resolution which I send to the Clerk's desk.

The SPEAKER. The gentleman from Illinois asks unanimous consent for the present consideration of a resolution, which the Clerk will report.

The Clerk read as follows:

House resolution 648.

Resolved, That the Postmaster General, the Secretary of War, and the Secretary of the Navy each be requested to report to the House the number of German aeroplanes purchased by his department in 1920, the fund out of which payment for such planes was made, the authority for their purchase, the agency through which such planes were purchased, the price paid per plane, the use to which these planes have been put, the number of such planes destroyed by fire or otherwise, the number of pilots killed as the result of such destruction, the number of planes of American make in the possession of the respective departments, and the number in use.

The SPEAKER. Is there objection to the present consideration of the resolution?

Mr. RUCKER. Mr. Speaker, reserving the right to object, is this a rule from the Committee on Rules?

Mr. MADDEN. No; this is not a rule. This is a privileged resolution asking for information.

Mr. RUCKER. Still further reserving the right to object, the gentleman knows of a rule reported by the Committee on Rules?

Mr. MADDEN. There is no rule about this.

Mr. RUCKER. That is in another case, and somebody has been carrying it around in his pocket for about four weeks. When may we expect that rule to be called up?

Mr. MADDEN. I do not know about the Committee on Rules. I really do not know when it will be called up, I will say to the gentleman from Missouri.

Mr. RUCKER. The gentleman ought to know about it.

Mr. MADDEN. I am not a member of the Committee on Rules.

Mr. RUCKER. The gentleman is very much interested in that other matter.

Mr. MADDEN. I can not tell when it is likely to come up.

Mr. RUCKER. It is supposed to be a very important matter.

Mr. MADDEN. I would be very glad to have it come up to-day, if I could get it up.

Mr. RUCKER. The gentleman is on the steering committee.

Mr. MADDEN. The steering committee has nothing at all to do with it.

Mr. RUCKER. Oh!

Mr. MADDEN. Absolutely.

Mr. RUCKER. I am glad to know that.

Mr. CLARK of Missouri. Will the gentleman yield? Is there any reason why the various resolutions dealing with this subject can not be consolidated into one?

Mr. MADDEN. I do not see any reason why, except that our committee can not, but I should be glad to tell about the thing that prompted me to introduce this resolution.

Mr. GARNER. When was the gentleman's resolution introduced?

Mr. MADDEN. Just introduced.

Mr. GARNER. I can not see that it is privileged.

The SPEAKER. It is not privileged.

Mr. GARNER. The gentleman from Illinois just remarked that it was not from the Committee on Rules, but was a privileged resolution.

The SPEAKER. The Chair put it as a request for unanimous consent.

Mr. MADDEN. I have asked unanimous consent for its consideration.

Mr. GARNER. I have just come into the Chamber. What is the resolution?

Mr. MADDEN. It is a resolution asking information from the Postmaster General, the Secretary of War, and the Secretary of the Navy as to the number of German aeroplanes purchased by each of these departments within the year 1920.

Mr. CLARK, of Missouri. From whom did they purchase them?

Mr. MADDEN. They purchased them from an agency controlled by a man named Larsen.

Mr. GARD. I reserve the right to object. I have no objection to the gentleman going ahead with his statement, but after that I think I shall object to the consideration of the resolution.

Mr. MADDEN. That is all right. I ask unanimous consent to address the House for five minutes.

Mr. GARD. On this subject?

The SPEAKER. The gentleman from Illinois asks unanimous consent to address the House for five minutes. Is there objection?

There was no objection.

Mr. MADDEN. Some time ago information came to me, through an ex-service man who was in the Air Service in the Great War, to the effect that the Post Office Department had purchased a number of German aeroplanes, that the War Department had purchased a number of German aeroplanes, and that the Navy Department had purchased a number of German aeroplanes. I made inquiry from the Post Office Department as to whether that information was correct or not. The Second Assistant Postmaster General told me that they had purchased eight German metal monoplanes, which they were using in the mail service. I inquired from him how they came to buy them, and he said that the English Government had been taking a great many of the German planes, and one of the American representatives over there cabled the Post Office Department and suggested that they take some of them. Then through this man Larsen, who is not an American citizen, they purchased eight aeroplanes, and he said they paid $12,500 each for those planes and put them into the mail service. Three of them burned up because of faulty construction, and the pilots burned up with them.

Then I made inquiry from the War Department as to whether they had purchased any of these planes, and they said they had purchased three, and with some additional equipment they had paid $33,333.33 a piece for the same planes which the Post Office Department had purchased for $12,500 each.

Then I made inquiry from the Navy Department as to whether they had purchased any of these planes, and they said they had purchased three, and that they had paid the same price for each plane that the War Department paid. So that each department seems to have expended $100,000 for aeroplanes made in Germany, shipped to America in violation of the treaty obligations, which aeroplanes are being used by the American Government and paid for out of the United States Treasury.

Mr. GARNER. Will the gentleman yield?

Mr. MADDEN. Certainly.

Mr. GARNER. I understood the gentleman to say that the Post Office Department purchased eight planes at $12,500 each.

Mr. MADDEN. Mr. Praeger so stated.

Mr. GARNER. And the War Department paid $33,333 for the same planes.

Mr. MADDEN. The same plane, but it had a little additional equipment.

Mr. GARNER. But they were practically the same planes?

Mr. MADDEN. The same plane which the Post Office Department got for $12,500.

Mr. GARNER. Well, the gentleman has given us all the facts that he expects to get from the resolution. Will he not let the resolution go over?

Mr. MADDEN. I am willing to let the resolution go to the committee and will call it up later. I want a detailed statement in connection with the purchase of these German aeroplanes.

Mr. GARNER. Since the gentleman has had an opportunity to make his speech, I think the resolution ought to go over.

The SPEAKER. The gentleman from Texas objects.

THE INDIAN APPROPRIATION BILL.

Mr. ELSTON. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 15682) making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1922.

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. LONGWORTH in the chair.

The CHAIRMAN. The House is in the Committee of the Whole House on the state of the Union for the further consideration of the Indian appropriation bill. The question is on the amendment submitted by the gentleman from New York [Mr. SNYDER].

Mr. SNYDER. Mr. Chairman, I desire to be heard on the amendment.

The CHAIRMAN. The Chair will recognize the gentleman.

Mr. SNYDER. Mr. Chairman, the amendment I offered at the close of the session the other day had reference to the reduction of appropriation carried in the bill for the irrigation project in the Flathead Reservation. My amendment is based wholly on an extensive investigation as to the physical condition of the project by a committee and myself not later than June of last year.

It will be recalled that there was considerable discussion over this particular item a year ago when the appropriation bill was before the House. It was disclosed at that time that there was actually under the project up there 99,000 acres; that there were 800 miles of ditches and laterals and only 32,000 acres of land under the colonized project and 22,000 acres ahead of the necessity. Later compilations of facts show there are still 14,000 acres beyond the necessity, and the physical condition of the proposition is such there that the report of our investigation, volume 3, will clearly satisfy any Member of this House that not another cent of money should be spent on the project, except a sufficient amount to maintain and operate the plant, until the whole scheme has been reorganized.

And since it is possible that legislation may be enacted in this House which will eventually take this tremendous irrigation scheme, upon which $4,000,000 has already been spent and upon which it is proposed to spend $4,000,000 more, and finally put it in the hands of the Irrigation Service, where it should be—in responsible hands, under men who can be held answerable for the project. It is my belief, and I think every member of this committee who has made the investigation thinks, that no further money should be spent on the project until it is turned over to responsible hands and the whole scheme reorganized.

Mr. Chairman, this is a project which covers the section of country where 226,000 acres are involved. There are only 150 Indians cultivating about 2,500 acres of this land, and it is clearly a white man's project. Nearly 20,000 acres are being operated by lessees of white owners in the interest of white owners, and it is only last year that we were able to institute the policy of collections from the users of water for maintenance and operation expenses, and nowhere in the investigation does it show that one penny has been collected. I am firmly of the belief that eventually this will be, under favorable circumstances, only a fair irrigation project. It will never be a good one. Much of the money expended has been wasted and much of the additional money to be expended for the project, if the project is ever completed, will be wasted, due to the fact that it will require many years to take up the land where the ditches have been completed to supply that land with water, and that before it is under cultivation the whole system will have to be rebuilt. The money asked for, or the bulk of it, is to be used to rebuild the system built 10 years ago out of wood, mud, and junk, which should never have been put in. It is not to furnish new water and new ditches, but to build up those which are either gone or useless. Therefore I hope, Mr. Chairman, that my amendment will be adopted, for by it sufficient money will be provided to carry over the work to such time as it can be reorganized.

Mr. ELSTON. Mr. Chairman, the estimate for 1921 on this item was $1,000,000 and last year the act carried $200,000 for this item.

Mr. SNYDER. Mr. Chairman, will the gentleman yield?

Mr. ELSTON. Yes.

Mr. SNYDER. Of course, it carried only $100,000 when the bill left the House.

Mr. ELSTON. I am speaking of the appropriation act. The House itself reduced the item to $100,000 upon the basis that that was the minimum sum necessary for maintenance and operation of the system. Under the present estimate there was asked for these projects $300,000, and your committee on full examination of the data submitted by the department, and in view of the hearings had in the field on this project, decided to reduce the item to $200,000 carried in the bill. That was done on mature consideration of the physical condition of the system, upon which about $4,000,000 have already been spent. I am not going into the merits now of whether or not the project ever should have been started. It was started over 20 years ago under an act opening up this reservation to white settlement. A broad plan of reclamation was then adopted for putting the lands under irrigation and work was commenced under that very comprehensive plan. I am not going to argue with the gentleman as to how adequately or efficiently those appropriations have been expended on this land. The question now before the House is whether or not we shall reduce the amount to be used on the system, upon which $4,000,000 has been spent, to $50,000 or allow $200,000. Either figure is absolutely inadequate for completing that system in an efficient way.

Mr. SNYDER. Mr. Chairman, will the gentleman yield?

Mr. ELSTON. Not now. The committee decided on $200,000 on the basis that at least $100,000 will be needed for maintenance and operation, in order to put the water available there now upon the land. The extra $100,000 was provided upon the theory that it will be necessary to keep the system in statu quo pending this new proposition of covering it into the Reclamation Service. Nobody will argue that it is not necessary now to complete that system according to the original plans. The system is now 60 per cent complete. The engineers estimate that if $1,250,000 were immediately available it could be completed. They estimate that $300,000 is absolutely needed to keep it as a going concern, in order not to scrap material and equipment on hand. If we reduce the appropriation to $50,000, we lose absolutely the advantage of the equipment, of the machinery, of the operating force there, and we will have to begin anew. I contend that it is better economy to expend the very limited amount of $200,000 rather than to reduce it to $50,000.

Mr. SNYDER. Mr. Chairman, will the gentleman now yield?

Mr. ELSTON. Yes.

Mr. SNYDER. I call the gentleman's attention to the fact that operation and maintenance charges during the last fiscal year in his own report are stated at $27,435.

Mr. ELSTON. That is not correct. The operation and maintenance charge has never been below $80,000, and it is estimated this time to be nearly $100,000.

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. ELSTON. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. SNYDER. The total amount of maintenance of operation charges to date is only $236,000, and it has been in existence for 10 years or more.

Mr. ELSTON. I have the figures here, and the figures for operation and maintenance in the hearings are given at $80,000.

The gentleman from New York [Mr. SNYDER] speaks about the advantage of covering this into the Reclamation Service. This is one of the few projects maintained under the general direction of the Indian Bureau, but operated under the Reclamation Service. There are now reclamation engineers upon the land, who are superintending the construction of the system, so that we have now in use the efficient methods that the gentleman says we would get from the Reclamation Service. I am not partial in any way to the continuance of such projects under the administration of the Indian Bureau. I would not be fulfilling my duty unless I stated candidly to the House that it will be necessary to appropriate $200,000 in order to avoid a tremendous waste. Here are nearly 90,000 acres capable of irrigation if we only keep the system going. If we cut the amount down to $50,000, the whole project will deteriorate and it will be a miserable failure.

Mr. SINNOTT. Mr. Chairman, will the gentleman yield?

Mr. ELSTON. Yes.

Mr. SINNOTT. How is this project being operated in the way of repayments?

Mr. ELSTON. Under a clause inserted in the last Indian appropriation act, for which the gentleman from New York [Mr. SNYDER] was largely responsible, and for which I give him great credit, the Indian Bureau was directed to make a plan for installment reimbursement, and I understand that the Secretary of the Interior has issued regulations in conformity with that direction. Hereafter we shall have regular reimbursement for the expenditures made.

Mr. SINNOTT. Are the settlers on the project paying anything toward the operating expenses?

Mr. ELSTON. They have not heretofore.

Mr. SINNOTT. What is the farm unit on this project?

Mr. ELSTON. Forty acres, I believe.

Mr. EVANS of Montana. Mr. Chairman, will the gentleman from California yield to me for a moment?

Mr. ELSTON. Yes.

Mr. EVANS of Montana. The settlers are paying a dollar an acre a year for such land as is irrigated, for maintenance. They paid last year $22,000.

Mr. SINNOTT. What is the construction charge per acre?

Mr. EVANS of Montana. The estimate is that it will be about $51.

Mr. SINNOTT. Are they making any repayments for that?

Mr. EVANS of Montana. None at all as yet.

Mr. SINNOTT. Why not?

Mr. EVANS of Montana. Because the law provides that when the project is completed it shall be paid for in 15 annual payments.

Mr. SINNOTT. Not until the project is completed.

Mr. EVANS of Montana. That is correct.

Mr. SINNOTT. Although the individual settler is getting the advantage of the irrigation.

Mr. EVANS of Montana. Yes; but he is paying a certain water rent, a dollar an acre per year.

Mr. ELSTON. The gentleman from New York has spoken of the fact that a subcommittee visited this project last year. I was a member of that subcommitee, and I do not believe that the gentleman from New York will contradict the statement that the situation of the white settlers there is deplorable. They have taken up their lands under the invitation of the Government, when it subdivided that country for irrigation purposes, and they have not had any use of their land by reason of the inadequacy of the system. This $200,000 is the minimum amount required to keep the system intact without loss and waste. The gentleman from New York at various meetings in that Indian country expressed himself as being sympathetic with the distressing situation of the settlers there.

Mr. HASTINGS. Will the gentleman yield?

Mr. ELSTON. I will yield.

Mr. HASTINGS. This amount is reimbursable to the Government?

Mr. ELSTON. Yes.

Mr. HASTINGS. Has the gentleman any doubt but what the entire amount will be reimbursed?

Mr. ELSTON. I have none whatever.

Mr. HASTINGS. In other words, the lands are of sufficient value to reimburse the Government?

Mr. ELSTON. The lands would be rich lands when the water is put upon them, and there is no question whatever as to the eventual reimbursement to the Government. These charges for maintenance and operation and for capital account are a lien upon the land and no mortgage can be made upon these lands, and no sale can be made that will disturb the basic lien for reimbursement. The question is not as to reimbursement eventually, but when reimbursement will occur. The committee has reduced this amount from $300,000 to $200,000. It has made this appropriation the same as last year, and the appropriation last year was made upon the basis of keeping this project going without giving any additional amount for larger construction until the whole system is reorganized.

Mr. EVANS of Montana. Mr. Chairman and gentleman of the committee, it appears to me it would be deplorable to cut off this appropriation and stop the carrying on of this project. The project was established under Mr. Roosevelt 12 or 15 years ago. The first appropriation was made in 1908, I think. We have appropriated at the rate of $200,000 or $250,000 a year to complete a project costing $7,000,000. We have appropriated now about $4,000,000. We have reclaimed 90,000 acres of land and have the water available for that amount of land. And yet continually annually we appropriate scarcely enough to keep the project alive instead of going on in a businesslike manner and appropriate enough money to complete it and let the people pay for it. The people are perfectly willing to pay for it and the lands are substantial and well worth the money. The question is whether we will eat it all up in overhead by simply making a pittance of an appropriation from year to year. Last year the Reclamation Service and the Indian Service asked a million dollars in order to go on with the project and contemplated asking a million dollars each year for three years until completed and we got a pittance through this House of $100,000. The Reclamation Service says that it costs $90,000

for maintenance alone. If you appropriate $50,000 instead of $90,000, which is actually the cost, you will not have half enough to keep up the property much less go on with the development of this $7,000,000 project. The people are anxious and willing to pay for it, but they can not pay for it until it is finished and they obtain title to the land. The title to every foot of the land rests in the Government. They can not sell or mortgage it or do anything except sit and wait for the Government to go on and complete the project. I recall the chairman of the Committee on Indian Affairs last year suggested that we would carry only $100,000 appropriation that year. The committee would visit the project and if it was a worthy project we would appropriate enough to go on and complete it in a businesslike manner. Now they go and see the project—I do not know what the findings were—now the appropriating committee brings in a report, largely, I dare say, controlled by the two men from the Committee on Indian Affairs, recommending $200,000. The reclamation people recommend $1,250,000 to carry on this work. You appropriate $100,000 and you waste it. You have wasted half your money last year and half the year before dilly-dallying along with a project when we should make an adequate appropriation to finish the job and let the people pay for it. I think it would be shameful, Mr. Chairman, I think it would be a crime on the part of this House to continue doing business as we are doing it on this project.

Mr. TILSON. Will the gentleman yield?

Mr. EVANS of Montana. I will.

Mr. TILSON. Does the gentleman think it ought to be transferred from the Indian reclamation service to the regular Reclamation Service?

Mr. EVANS of Montana. I am perfectly willing, but I do not think it makes a particle of difference in the world, because the same people are doing the work, the reclamation people are doing the work and they recommend how much will be appropriated, and the only difference is the Indian Office will have the right of veto instead of the Secretary of the Interior.

Mr. TILSON. It is all being done, however, under the direction of the Secretary of the Interior?

Mr. EVANS of Montana. Yes; and I do not think it makes a particle of difference, and I am perfectly willing it should be done in any way to get a business method of handling the project. If you were building an arsenal and building it for 15 years at $250,000 a year and your overhead costs were eating that up, you would say go ahead and complete the job.

Mr. TILSON. What is the nature of the work yet to be done? Is it in a way increasing the storage capacity, laterals, or what?

Mr. EVANS of Montana. Considerable increase in storage capacity and some slight increase in laterals. There are 800 miles of ditches now, more ditches actually than they have reservoir for. They want to use out of this $300,000, which they recommend, $130,000 for building storage. They actually wanted $1,250,000 for it.

Mr. TILSON. Is all the water being used?

Mr. EVANS of Montana. No; all the water is not being used at present, but in the dry season all the water is used and more demanded.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MONDELL. Mr. Chairman, I do not know enough about the situation on this project to know whether the $200,000 asked is essential for the maintenance of the project and for such repairs and restorations as are necessary for the project as it is now built. I understand that the committee which prepared the bill believe that this sum was needed for the purposes I have suggested, and if so, I think it ought to be appropriated. I agree entirely with the gentleman from New York, however, that there should not be further large appropriations made for construction on this project until the matter has been somewhat investigated, and until more lands have been settled upon and cultivated.

I rose particularly——

Mr. ELSTON. The figures in covering the estimate of $300,000 do not show any new construction. The committee reduced it to $200,000, which would reduce still more what is needed, practically, to keep the system intact without any new construction.

Mr. MONDELL. Of course, if the sum is needed and essential to keep the system that is now constructed in such a condition that the water can be utilized by the people who are there or likely to come, then I think the appropriation ought to be made.

Mr. SNYDER. Will the gentleman from Wyoming yield?

Mr. MONDELL. I will yield.

Mr. SNYDER. When this committee was at the Flathead Reservation it put on the stand the engineer who was operating the plant, a Mr. Sharp. He was asked this question:

The CHAIRMAN. You, of course, having been here three years, must have formed an opinion with regard to how much of this acreage will finally be taken up. You must know how much acreage there is under the ditches that have water, that is ready to be cultivated, on which there are no farmers, either Indians or whites. I am going to put the same question to you that I did to Secretary Lane, after we had listened to all the other experts, with regard to how far these irrigation projects ought to be constructed ahead of the necessity. I asked the Secretary this: "I am going to ask you one final question on the proposition, to get your idea. Do you think, where an irrigation project is 10,000 acres ahead of the amount actually being cultivated, that more money, except a sufficient amount to keep everything on the project in working order, should be expended?" I have set the figure at 10,000 acres, because I think that is too much, but I thought that was a figure on which we might agree.

Mr. SHARP. I would like to understand that clearly. Do you mean to say whether more money should be expended to extend the project?

The CHAIRMAN. Ten thousand acres ahead of the necessity, the necessity meaning land not being taken up and put under cultivation?

Mr. SHARP. No; I can not say that I would see any necessity for that.

There is the whole thing in a nutshell.

Mr. MONDELL. Mr. Chairman, there seems to be ground for some difference of opinion in the matter, I admit. But what I want to particularly emphasize at this time with regard to this project and other irrigation projects is this: That it will be, and ought to be, increasingly difficult to secure appropriations for irrigation projects in the West unless all of us who have some influence in the region in which these lands are situated impress upon the people benefited by these projects the necessity of not only meeting their obligations in the matter of maintenance, but also their obligations in the matter of construction charges. Now, I am not sufficiently familiar—I do not recall with sufficient clearness—the language of the act under which this project was inaugurated, to know just what the provisions were with regard to the beginning of the payment of the building charge. I have no doubt, however, but that it would have been entirely practicable and legal for the bureau to have established the building charge on one or more of the units of this project. I do not understand this to be of those projects where there can be no intelligent estimate of cost until all of the works connected with it are completed. It is, I understand, a project composed of several more or less independent units.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MONDELL. Mr. Chairman, I ask unanimous consent for two minutes more.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. MONDELL. There must be a time before the completion of a project of this kind when the construction cost per acre of the lands of certain units can be determined and fixed, and whenever that time arrives the unit cost should be determined and fixed and the settler should begin to pay his construction cost under the terms of the law. I regret to say that in certain sections of the West there are men who have been so unmindful of the interests of the West as to encourage settlers under some of these projects to believe that in some way or other they may avoid payment of the construction charge. Nothing can be more fatal to the development of irrigation, to the extension of irrigation and irrigation projects under Government control and management and through the use of Government funds than to have the Congress begin to question the ultimate repayment of these costs. And while no one desires to press unduly the settlers under any project, when any unit of a project is completed there should be a fixing of the costs per acre of the construction which should begin to run. Any other plan is unfair to other sections of the West which desire the beginning of projects and unfair to the settlers on those projects where they are meeting the construction cost.

Mr. KELLY of Pennsylvania. Mr. Chairman, a study of the Flathead project by anyone who will go into it as did the Committee on Indian Affairs gives conclusive evidence of the justice of the amendment offered by the gentleman from New York [Mr. SNYDER] to decrease this appropriation from the $200,000 authorized by the subcommittee to $50,000 for carrying on the actual needs of the project. This Flathead irrigation plan now is 20,000 acres ahead of the need; 20,000 acres that are not used by those for whom they were developed. Only 4,000 acres have been cultivated by the Indians. The whole proposition, it seems to me, comes to a decision about these reimbursable items. Commissioner Sells testified before the committee that, out of the $20,000,000 appropriated for irrigation projects that were reimbursable, less than $3,000,000 had been paid and $17,000,000 remained to be paid. We should decide what is to be the policy in these reimbursements. The gentleman from Wyoming [Mr. MONDELL] says certain units must be finished before assessments can be determined. The commissioner says the projects must be completed in toto before the machinery of assessments can be set in motion. Before going further we should know exactly what we are doing. Fifty thousand dollars will take care of all the immediate require-

ments of this Flathead project. Two hundred thousand dollars means a continuation——

Mr. SNYDER. Will the gentleman yield?

Mr. KELLY of Pennsylvania. I yield.

Mr. SNYDER. The gentleman will recall when we were making up the appropriation bill a year ago we had Secretary Lane before the committee, and that he distinctly said it was his judgment that when an irrigation project was 10,000 acres ahead of the necessity it was far enough ahead.

Mr. KELLY of Pennsylvania. Absolutely; and Commissioner Sells repeated that statement.

Mr. SNYDER. And also the superintendent upon this project up there stated the same thing.

Mr. KELLY of Pennsylvania. And stated that it was of very doubtful propriety to continue new construction. Here is a project of 138,000 acres in all, with a cost of $6,300,000 to complete. We have spent $3,890,000 without arriving at any definite conclusion as to the policy. Surely it is time for Congress to call a halt on expending these large sums and lay down a fundamental policy as to how the money is to be paid. They will not be reimbursed by putting the word "reimbursable" in these appropriation bills.

Mr. ELSTON. Will the gentleman yield?

Mr. KELLY of Pennsylvania. I yield to the chairman of the subcommittee.

Mr. ELSTON. Is it not true that the laterals and canals for this system have been built beyond the irrigation possibilities, and if no money is spent on keeping those canals and laterals intact the investment made in them will be practically a loss?

Now, what the gentleman says is true, that this system has been built beyond the present requirements; but you can not put water into the present laterals unless you spend some money, and then if you cut it to $50,000 you practically make inoperative a system made ready by the settlers over lands adjacent to the ditches, and I controvert the statement of the gentleman that $50,000 is sufficient for maintenance and operation. The hearings disclose the fact that $80,000 is necessary, and a revised statement that I have from the Department of the Interior this morning shows that $90,000 is necessary to put the water on the land. It will be a disaster to cut it down to $50,000.

Mr. KELLY of Pennsylvania. The gentleman knows that the bureau proved that they ought to have $300,000 instead of $200,000. The bureau officials are expert in that direction. In some of those laterals and canals and ditches the sides are falling down right now and are not fit for use and will have to be reconstructed entirely. Certainly the $50,000 suggested by the gentleman from New York [Mr. SNYDER] will take care of all the actual needs of this project and give us a chance to get down to a definite policy.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from New York [Mr. SNYDER].

The question was taken, and the Chairman announced that the noes appeared to have it.

Mr. SNYDER. Let us have a division, Mr. Chairman.

The CHAIRMAN. A division is demanded.

The committee divided; and there were—ayes 17, noes 43.

So the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

That the Secretary of the Interior be, and he is hereby, authorized to withdraw from the Treasury of the United States the sum of $200,000 of any tribal funds on deposit to the credit of the Crow Indians in the State of Montana, and to expend the same for improvements, maintenance, and operation of the irrigation systems of the Crow Reservation, Mont., including maintenance assessments payable to the Two Leggings Water Users' Association, and including the proportionate part of the cost of constructing the Bozeman trail ditch on the Crow Reservation, Mont., properly assessable against lands allotted to the Indians irrigable thereunder, said sum, or such part thereof as may be used for the purpose indicated, to be reimbursed to the tribe under such rules and regulations as may be prescribed by the Secretary of the Interior.

Mr. SNYDER. Mr. Chairman, I make the point of order on the section, particularly on the language contained in lines 9 and 10, "and he is hereby, authorized to withdraw from the Treasury of the United States." There is no authorization in law for it.

The CHAIRMAN. Does the gentleman from California desire to be heard on the point of order?

Mr. ELSTON. Mr. Chairman, this project was inaugurated under the authority of a treaty consummated between the Crow Indians and the United States Government, dated March 3, 1881. I have the references here, and I shall mark the pertinent parts and refer them to the Chair as authority for appropriating upon this item.

In the treaty there is a clause relating to the expenditure for an irrigation system, and the treaty provides:

That there is hereby appropriated under the terms of the treaty and set apart $200,000, to be expended under the direction of the Secretary of the Interior in the building of dams, canals, ditches, and laterals for the purpose of irrigation in the valleys of the Big Horn and Little Horn Rivers and Pryor Creek, and such other streams as the Secretary of the Interior may deem proper.

There are other clauses that relate to this matter, and there is an initial clause in the treaty authorizing this irrigation system and expenditures upon it.

I would further direct the Chair's attention to the act of March 1, 1889, Thirtieth Statutes, 947, where this proviso is found:

That with the consent of the Crow Indians in Montana the Secretary of the Interior may use the annuity moneys due or to become due to said Indians to complete the irrigation system commenced on said Crow Indian Reservation.

There is the authority to the Secretary of the Interior to use the Indian money. This is "to complete the irrigation system heretofore commenced on said Crow Indian Reservation."

Now, in addition to that, if the Chair please, the Chair can take cognizance of the fact that appropriations have been made for this project in many previous Indian appropriation bills, and the Chair may take notice of the fact that this work is a work in progress, and that the appropriation is for the continuance of a work in progress.

The CHAIRMAN. May the Chair ask the gentleman from California why, in this project authorized by the statute, there was not a direct appropriation instead of an authorization?

Mr. ELSTON. That is just a form of phraseology. If the Chair wishes to have the authority pointed out to him for appropriations out of this fund for a purpose of this kind, I would direct the Chair to another statute, which gives very inclusive authority to this Congress to appropriate out of Indian tribal funds for very general purposes, of which this would be one; and to that end I would direct the attention of the Chair to the following statute, an act approved May 18, 1916, to be found in Thirty-ninth Statutes, page 158, where general authority is given to the Congress to appropriate money on deposit in the United States Treasury belonging to these Indians.

Mr. HAYDEN. Mr. Chairman, if the Chair please, I would like to quote from section 27 of the Indian appropriation act approved May 18, 1916, relating to the disposal of tribal funds. The particular language dealing with the amount of these funds reads as follows:

Third. The amounts which the Secretary of the Interior recommends to be spent from each of the tribal funds held in trust or otherwise, and the purpose for which said amounts are to be expended, and said statement shall show the amounts which he recommends to be disbursed—

And so forth. That is clearly an authorization to make an estimate, and if there is an authorization in the law to make an estimate, that same law is authority for making an appropriation.

Mr. ELSTON. There is a provision further on in the act authorizing the Congress to appropriate for this purpose.

Mr. KELLY of Pennsylvania. Mr. Chairman, if the Chair will permit, I would like to call the attention of the Chair to the language in this section providing that authority shall be given to take money out of tribal funds for maintenance assessments payable to the Two Leggings Water Users' Association, a private organization, which has made a ditch across the reservation against the protest, in many instances, of the allottees. This water ditch runs across allotments under which full title is vested in the allottees, and yet, in spite of their protests, it was built. This section proposes for the first time to recognize this Two Leggings Waters Users' Association, a private concern, and take money out of the tribal funds to pay to an association that never was approved by many of the allottees. Therefore I point out that, since this one clause is new legislation, it vitiates the entire paragraph. There is no authority whatever in law for recognizing this water users' association.

Mr. HASTINGS. Will the gentleman yield?

Mr. KELLY of Pennsylvania. I yield to the gentleman from Oklahoma.

Mr. HASTINGS. If the gentleman will refer to the appropriation bill of two years ago, he will see that this same language is contained in it, and that this water users' association is recognized in practically the same language as in this bill.

Mr. KELLY of Pennsylvania. That does not make it an authorization.

Mr. HASTINGS. No; but the gentleman stated that it had not been recognized before, and that this was the first time it had been recognized. I am stating to the gentleman that it was recognized in the Indian appropriation bill two years ago in practically the same language.

Mr. KELLY of Pennsylvania. I understood that the committee had taken it out in committee the last time; but it never was authorized by Congress.

UMI

The CHAIRMAN. The Chair is ready to rule. If this were a direct appropriation from the Treasury, it seems to the Chair that it might possibly present a somewhat different question. This is a provision for the withdrawal of tribal funds on deposit to the credit of the Crow Indians, and it seems to the Chair to be perfectly clear that it is a change of existing law. Therefore the Chair sustains the point of order. The point of order being made to the entire paragraph, it goes out.

Mr. SNYDER. I made the point of order simply for the purpose of obtaining the ruling. I have no objection whatever to the paragraph if the appropriation item is properly amended.

Mr. ELSTON. I intend to offer an amendment.

The CHAIRMAN. The Chair sustained the point of order against the entire paragraph as now worded.

Mr. ELSTON. I offer the paragraph with the first two sentences changed to read as follows:

That there is hereby appropriated from the Treasury of the United States the sum of $200,000—

And so forth.

Mr. CANNON. Is not that subject to a point of order as well as the other?

Mr. SNYDER. Yes; it is clearly subject to a point of order.

Mr. CANNON. The point of order ought to be made to that.

Mr. SNYDER. I reserve the point of order.

Mr. ELSTON. In order to put the language in the usual phraseology which accompanies such appropriations, and in order to meet the objection of the gentleman from New York, I withdraw the amendment I have proposed and offer the following. Beginning at line 13—

For improvement, maintenance, and operation of the irrigation systems on the Crow Reservation, Mont.—

and continuing down to the bottom of the paragraph in the words of the text of the bill.

The CHAIRMAN. The gentleman from California offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. ELSTON: Page 28, after line 8, insert:

"For improvement, maintenance, and operation of the irrigation systems on the Crow Reservation, Mont., including maintenance assessments payable to the Two Leggings Water Users' Association, and including the proportionate part of the cost of constructing the Bozeman trail ditch on the Crow Reservation, Mont., properly assessable against lands allotted to the Indians irrigable thereunder, said sum, or such part thereof as may be used for the purpose indicated, to be reimbursed to the tribe under such rules and regulations as may be prescribed by the Secretary of the Interior, $200,000."

Mr. SNYDER. Mr. Chairman, unless the gentleman from California [Mr. ELSTON] wants to be heard, I should like to be heard on that amendment.

Mr. CANNON. I reserve a point of order.

The CHAIRMAN. The gentleman from Illinois reserves a point of order on the amendment.

Mr. SNYDER. Mr. Chairman, I desire to discuss the merits of this appropriation.

Mr. ELSTON. Will the gentleman yield for just a moment? I think this can be reframed, and I believe the gentleman from New York [Mr. SNYDER] is agreeable to putting the language in a form that will meet his objections. I ask that this item be passed temporarily, to be returned to.

The CHAIRMAN. The gentleman from California asks unanimous consent that this item may be passed over temporarily. Is there objection?

There was no objection.

The Clerk read as follows:

For road and bridge construction on the Mescalero Indian Reservation, in New Mexico, including the purchase of material, equipment, and supplies; the employment of labor; and the cost of surveys, plans, and estimates, if necessary, $15,000, to be reimbursed from any funds of the Indians of said reservation now or hereafter on deposit in the Treasury of the United States: *Provided*, That Indian labor shall be employed as far as practicable.

Mr. HUDSPETH. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Texas offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. HUDSPETH: Page 31, line 6, after the word "practicable," strike out the period and insert a colon and add the following: "*Provided*, That in the sale or the consummation of any executory contract of sale of any timber growing or upon this reservation the authority of Congress shall first be obtained.

Mr. CANNON. I reserve a point of order on the amendment.

The CHAIRMAN. The gentleman from Illinois reserves a point of order.

Mr. HUDSPETH. On this reservation in the State of New Mexico is an immense forest of pine. Some of the timber is very small. My information is that not a great deal of this timber is fit for lumber. I notice in the report that Mr. Meritt states that they have sold this timber for $2,000,000.

I also notice that $68,000 is appropriated for the building of roads and bridges in this reservation. As I understand, money derived from the sale of timber or other products upon a reservation is placed to the credit of the Indians of that reservation. Now, I should like to ask the gentlemen of the committee, what are you going to do with $2,000,000 lying idle in the Treasury that does not seem to be needed for these Indians, while you are denuding a forest of timber that in years to come will be worth many millions of dollars and will be a source of pride and pleasure to the people in that State and in my city? It occurs to me, gentlemen of the committee, that it is a great waste of this timber to sell at this time. As I understand, it has been sold or contracted for sale to some corporation for this sum. I also have heard from citizens living in that section that this timber has been sold to this corporation at less than its value. This reservation is only about 50 or 60 miles north of the city of El Paso, where I make my home. I do not care what becomes of this amendment as to the point of order, but I feel that it should be called to the attention of this committee that this timber on the Mescalero Indian Reservation is probably going to be wasted; that the money derived from the sale of the timber is not needed for any purpose except to the amount of the $68,000 that I understand has been appropriated for the building of roads.

Mr. ELSTON. My attention was distracted when the gentleman first proposed his amendment. May I ask the gentleman what his amendment is?

Mr. HUDSPETH. I simply offered an amendment saying that before any sale shall be authorized the authority for that sale shall be obtained from Congress. I do not think that a man down in the Interior Department ought to contract for the sale of $2,000,000 worth of timber without first having gotten authority from Congress, especially where it is shown by the report that only $68,000 is needed for the purpose of building roads, or, in fact, for any purpose.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. HUDSPETH. I ask for two minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. HAYDEN. Will the gentleman yield?

Mr. HUDSPETH. Yes.

Mr. HAYDEN. I would like to direct the gentleman's attention to the report made by Lieut. Ernest Stecker, superintendent of this reservation, in which he says:

The revenue derived from sale of timber will amount to a total of $500,000. I recommend that Congress be requested to appropriate this amount, to remain available until expended for the benefit of the Mescalero Indians, the Government to be refunded for this loan as collections are made from the contracting lumber company.

Sufficient cattle to be immediately purchased to establish a breeding herd of at least 6,000 cows and necessary number of registered bulls. The former plan for feeding and selling 3-year-old steers should be dropped and a market of yearlings established. By proper supervision a thoroughbred herd of Hereford cattle would result within a reasonable time.

Mr. HUDSPETH. Let me say that the reservation is leased out and they have it stocked to the limit with steers for several years, and where are you going to get any thoroughbred herd in there?

Mr. HAYDEN. If the money was available from the sale of the timber—and I do not believe any of the leases of Indian reservations run beyond five years——

Mr. HUDSPETH. Taking the age of the gentleman from Arizona and myself, five years is a good deal of time.

Mr. HAYDEN. When those leases expire, if a tribal herd is purchased, the idea of the superintendent is that they will own their own herd and manage their own cattle business so that they can be amply provided for.

Mr. HUDSPETH. According to my information the Mescalero Indians have never made a success of any business they have undertaken. My idea is that timber ought not to be destroyed when only a small amount is needed.

Mr. ELSTON. Mr. Chairman, I hope that this amendment will not be adopted.

Mr. HAWLEY. The point of order has been reserved.

Mr. ELSTON. Then, Mr. Chairman, I make the point of order that it is a change of existing law.

The CHAIRMAN. The point of order is sustained.

The Clerk read as follows:

To enable the Secretary of the Interior to provide for the drainage of Pueblo Indian land in the Rio Grande Valley, N. Mex., in connection with operations for the drainage of lands in white ownership, in accordance with the provision contained in section 13 of the act approved February 14, 1920 (41 Stat. L., p. 423), $6,500, reimbursable in accordance with such rules and regulations as the Secretary of the Interior may prescribe.

Mr. CANNON. Mr. Chairman, I reserve a point of order on the paragraph, lines 7 to 14, inclusive, page 31.

Mr. ELSTON. That item is authorized by the act of February 14, 1920, Forty-first Statutes at Large, page 423, where a cooperative irrigation project was authorized and the proportionate amount to be furnished were set out. I will yield to the gentleman from New Mexico to explain further.

Mr. HERNANDEZ. Mr. Chairman, the gentleman from Illinois will understand that these people have a cooperative irrigation system with their neighbors. Their lands lying along the Rio Grande Valley about 12 miles from the city of Albuquerque have become waterlogged. In order to drain these lands along with the cooperative assistance of their white neighbors they have got to have some appropriation made for the purpose. They have no money of their own.

Mr. HASTINGS. Will the gentleman yield?

Mr. HERNANDEZ. Yes.

Mr. HASTINGS. We have the authority on the last Indian appropriation bill.

Mr. CANNON. The gentleman says it is authorized by law. Has the gentleman got the act?

Mr. HAYDEN. I will read the portion of the act authorizing the appropriation:

To enable the Secretary of the Interior to provide for the drainage of Pueblo Indian land in the Rio Grande Valley, N. Mex., in connection with operations for the drainage of lands in white ownership, $6,500, the total cost of draining the Indian land not to exceed $130,000; reimbursable in accordance with rules and regulations which the Secretary of the Interior shall prescribe: *Provided*, That the Secretary of the Interior shall enter into arrangements with the proposed drainage district, or other body which may be organized to carry on the work, only after he shall be satisfied that the plans for the work are adequate for the purpose intended; and that, should it appear to him at any time that construction work is not being carried out in accordance with approved plans, he may withhold payment of any sums due until such work shall have been corrected.

That seems to me is ample authority for this appropriation.

Mr. CANNON. By that act.

Mr. HAYDEN. By that act and a limit of cost is fixed for the project.

Mr. CANNON. Mr. Chairman, I shall let the Chair rule on the question.

The CHAIRMAN. Does the gentleman from Illinois make the point of order?

Mr. CANNON. Yes.

The CHAIRMAN. The Chair thinks that the gentleman from Arizona [Mr. HAYDEN] has shown that it is authorized by law and the Chair overrules the point of order.

The Clerk read as follows:

NORTH CAROLINA.

SEC. 15. For support and education of 200 Indian pupils at the Indian school at Cherokee, N. C., including pay of superintendent, $40,000; for general repairs and improvements, $10,000; in all, $50,000.

Mr. CANNON. Mr. Chairman, I reserve the point of order on the item. This does not read to me like something that has been authorized by law. I would ask the gentleman if there is authorization in law for this?

Mr. ELSTON. Yes; the item is authorized by a statute passed June 29, 1888, in the form of substantive law.

Mr. CANNON. Let us have it. Has the gentleman got it?

Mr. ELSTON. I can get the statute and bring it to the gentleman's attention. This reference was supplied to me by the legal department of the Indian Bureau, and I have no doubt that it is correct. Under that authority sums have been appropriated for the support and civilization of these Indians for the last 20 years. I would state further that this item of $50,000 is to maintain a school and agency in North Carolina, and is the only sum that is spent in that State, although there are a large number of Indians there.

Mr. CANNON. Yes; but there is nothing on the face of this to show that it is authorized by law.

Mr. ELSTON. I have just given the gentleman the reference. I have sent for the book. Mr. Chairman, in view of the fact that it is impossible for the chairman of this subcommittee to have piled before him every volume of the various statutes that contain the authorization for these items, I think I would be warranted in asking unanimous consent to pass this item over until the authority can be furnished.

Mr. CARTER. Mr. Chairman, this is clearly authorized by law.

Mr. ELSTON. I have just stated so, but I have not the volume here. If the gentleman has the reference, I wish he would read it.

Mr. CARTER. It is section 2071 of the Revised Statutes and it provides there as follows:

The President may in every case where he shall judge improvement in the habits and conditions of such Indians practicable, and that the means of instruction can be introduced with their own consent, employ capable persons of good moral character to instruct them in the mode of agriculture suited to their station, and for the teaching of their children in reading, writing, and arithmetic, and performing such other duties as may be enjoined, according to such instructions and rules as the President may make and prescribe for the regulation of their conduct in the discharge of their duties.

Mr. CANNON. That does not apply to these, if the gentleman has read it correctly, and I presume he has.

Mr. CARTER. I understood the gentleman to be objecting to the item for the support and education of the Indians in North Carolina?

Mr. CANNON. It is for the support and education of 200 Indian pupils at the Indian school at Cherokee, N. C., including the pay of the superintendent, $40,000, and for general repairs and improvements, $10,000; in all, $50,000.

Mr. CARTER. This would apply to the education of the children.

Mr. CANNON. I do not know. The item authorizes construction.

Mr. CARTER. Education may require the construction of buildings.

Mr. CANNON. Will the gentleman please read that again?

Mr. CARTER. Certainly—

The President may, in every case where he shall judge improvement in the habits and condition of such Indians practicable——

Mr. CANNON. All Indians?

Mr. CARTER. This would apply to all Indians under Federal supervision.

Mr. CANNON. All in the United States?

Mr. CARTER. Yes—

and that the means of instruction can be introduced with their own consent, employ capable persons of good moral character to instruct them in the mode of agriculture suited to their station, and for the teaching of their children in reading, writing, and arithmetic, and performing such other duties as may be enjoined according to such instruction and rules that the President may make and prescribe for the regulation of their conduct in the discharge of their duties.

Mr. CANNON. Then, under that act, if the gentleman's construction of it is correct, we will be authorized in appropriating $100,000 for any Indian in the United States.

Mr. CARTER. I think that is true. I think the authorization is practically unlimited, and it is left to Congress to decide how much shall be appropriated. During the Sixty-second Congress, in 1910, and again in 1915, as I recall, similar points of order were made against educational items. During the Sixty-second Congress the gentleman from South Dakota, Mr. Burke, was in charge of the Indian bill, and during the Congress in 1915 the gentleman from Texas, Mr. Stephens, and myself were on the Indian Committee. We presented these arguments to the Chair, and the Chair held at that time, in both instances, that appropriations for the support and education of the Indians were in order under this provision.

Mr. CANNON. That is a separate act.

Mr. CARTER. Yes. This is the Revised Statutes, section 2071. The Chair held right along that appropriations for civilization of Indians and other such items were not in order, and they were stricken from the bill, and it was necessary for the committee to rewrite the items and propose amendments changing the language to support and education.

Mr. CANNON. Then, if the point of order is overruled, I think I might move to amend and appropriate $1,000,000.

Mr. CARTER. Then I would object to that myself.

Mr. CANNON. I make the point of order.

The CHAIRMAN. The Chair thinks that under the legislation cited by the gentleman from Oklahoma, a reasonably broad construction of it would authorize expenditures for the support and education of the Indians, and therefore overrules the point of order.

The Clerk read as follows:

For support and civilization of Turtle Mountain Band of Chippewas, North Dakota, including pay of employees, $13,000.

Mr. YOUNG of North Dakota. Mr. Chairman, I move to amend by making that $23,000.

The CHAIRMAN. The gentleman from North Dakota offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. YOUNG of North Dakota: Page 32, line 12, strike out "$13,000" and insert in lieu thereof "$23,000."

Mr. YOUNG of North Dakota. Mr. Chairman, I appreciate the fact that this committee has given careful consideration to the requests for an appropriation that have been made by the Turtle Mountain Agency. At the time the request for the appropriation was made the condition that the Indians would be in at this time was not known, and perhaps could not be foreseen. I have now information to show that they are in a very destitute condition. A gentleman at Rolla, a few miles away, whom I have known for many years, has written me

to say that in his judgment they are in as bad shape as the people in central Europe, and from the detailed information that is given to me I should say that they are in worse shape than are many of the poor people in central Europe.

This situation has arisen from two reasons. In that whole section of country the crops were short on account of drought, and in this particular county they were cut down still further by grasshoppers, so that there were practically no crops. They have had four drought-stricken crops in a row. It is a real emergency, and I hope the gentleman from California, the chairman, will soften his heart. In former years these Indians had opportunity to make some money by cutting firewood and selling it to the settlers, but this year the settlers are so hard up that they can not pay for it, and they have been cutting their own firewood and hauling it to their own farms. For the reasons stated they are really in a seriously bad condition at this time, and I hope that the committee will consent to this very modest and moderate increase in the appropriation.

May I call your attention, too, to the fact that the appropriation has remained the same for several years notwithstanding the fact that the number of Indians has increased and the expenses of living have greatly increased?

Mr. ELSTON. Mr. Chairman, the gentleman from North Dakota has urged this matter before us with great vigor and presented some very appealing arguments, and I do not doubt at all that he feels that there is great distress there. But the bureau submitted their estimate on this proposition, and it would be hardly advisable to pass on an increase here of $10,000 merely on the statement of the gentleman from North Dakota. I know the situation among the Indians is not what it ought to be, but this item has been carried in this amount for many years and the bureau believes it is adequate to provide for the basic needs of the Indians. I can not see my way to approve the amendment, and I ask that it be defeated.

Mr. YOUNG of North Dakota. Would the gentleman consider in conference or elsewhere further information if filed by me?

Mr. ELSTON. I do not see how that could be considered now, as the bill is about ready——

Mr. YOUNG of North Dakota. I mean hereafter in conference or elsewhere——

Mr. ELSTON. The committee would be very glad to consider it in any supplemental bill, and I am sure the conferees will take it into consideration if the Senate acts.

Mr. CANNON. Is the gentleman going to make a promise that if another body would increase the appropriation that it would be considered?

Mr. YOUNG of North Dakota. I did not ask him to do that.

Mr. ELSTON. The chairman of the subcommittee made no promise of any kind.

Mr. CANNON. I understand he intimated that is what he desires.

Mr. YOUNG of North Dakota. I did not ask for that.

Mr. ELSTON. Through whatever proper means the gentleman should bring information to the conferees I believe proper courtesy would demand that it be received and considered. Now, if that remark can be taken to mean that your committee would adopt it, I want to disavow that meaning.

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Dakota.

The question was taken, and the amendment was rejected.

The Clerk read as follows:

For the support and education of 125 Indian pupils at the Indian school, Bismarck, N. Dak., including pay of superintendent, $29,725; for general repairs and improvements, $6,000; in all, $35,725.

Mr. CANNON. Mr. Chairman, is this estimated for?

Mr. ELSTON. That was the exact estimate of the department.

Mr. CANNON. Was there any hearing on this item?

Mr. ELSTON. Yes; there was a hearing.

Mr. CANNON. How much increase?

Mr. ELSTON. None whatever.

Mr. CANNON. None whatever? That is for the current year. That is the amount that was appropriated?

Mr. ELSTON. The present appropriation is the same as it was last year. I think that I am wrong in stating that the committee allowed the exact estimate. It may be that there was an additional amount estimated for under the item of general repairs and improvements, because it is cut down. Every request for increase in that item of general repairs and improvements was cut down, but in this case they asked for the same amount, I understand.

Mr. CANNON. All right.

The Clerk read as follows:

For support and education of 400 Indian pupils at Fort Totten Indian School, Fort Totten, N. Dak., and for pay of superintendent, $82,000; for general repairs and improvements, $8,000; in all, $90,000.

Mr. CANNON. Is this appropriation increased from what it is for the current year?

Mr. ELSTON. This appropriation is $2,000 less than the estimates and exactly in the amount appropriated last year.

Mr. CANNON. Mr. Chairman, I move to strike out the last word. These appropriations are pretty liberal. This is, in all, $90,000. This money is to be raised, if the appropriation is made, by borrowing or otherwise. Up in North Dakota they are kicking and kicking on account of the price of wheat and on many other accounts. Does the gentleman consider the proposition that these people, who, I take it, are not a money-making people, are not a working people; but here is an appropriation of $90,000. I move to reduce the appropriation in line 19, page 32, to $50,000.

The CHAIRMAN. The gentleman from Illinois offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. CANNON: Page 32, line 19, strike out "$82,000" and insert in lieu thereof "$50,000."

Mr. CANNON. Does the gentleman agree to the amendment? I would like to hear his objections, and then I will take my five minutes if I want it.

Mr. ELSTON. I will say that I can not agree to the amendment, because it would practically destroy the school. If the gentleman wishes to consume five minutes now in support of the amendment, I will wait until he has finished, but if he wishes me to make an explanation I think I can convince him that the full amount of the appropriation is necessary.

Mr. CANNON. Well, yes.

Mr. ELSTON. This school is one of the oldest schools in the Indian Service, and is located in the country where the Indians are more plentiful and less advanced than in practically any other part of the United States. The appropriation of $82,000 is made on the basis of $200 per capita for 400 students attending this school. That makes a total of $80,000. The other item of $2,000, making up the whole of this amount of $82,000, is for the pay of the superintendent.

The gentleman must realize that $200 per annum for the subsistence, tuition, and clothing of a single pupil at that school is remarkably low. It is but a little over $15 a month for everything. Nobody can say that that is an extravagant use of money for educational purposes in the Indian country.

Mr. FAIRFIELD. For how many months in the year?

Mr. ELSTON. Nine months, I believe.

Mr. LAYTON. Do I understand the gentleman to say that this appropriation of $82,000 includes subsistence and clothing?

Mr. ELSTON. It includes everything.

Mr. LAYTON. As well as the educational cost?

Mr. ELSTON. The gentleman is right.

The CHAIRMAN. The time of the gentleman has expired.

Mr. CANNON. Mr. Chairman, I ask unanimous consent to proceed for five minutes.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. CANNON. I want to call attention to this whole bill. Up in North Dakota the white men are kicking and kicking. Canada is shipping its wheat over. Wheat does not bring half the price that it costs to raise it. Do the Indians do anything up there, or the parents of Indians, toward their support? How long has this school been running?

Mr. ELSTON. Judging by the table of appropriations made in the preceding sessions of Congress it has been running for over 25 years.

Mr. CANNON. For 25 years the Indians have been educated up there and have been maintained from the Treasury of the United States. It does seem to me that under existing conditions, with the burden of taxation and the return that comes from the people who pay these taxes, this appropriation ought to be reduced.

Now, what do you pay to the superintendent?

Mr. ELSTON. Two thousand dollars a year.

Mr. CANNON. I made a motion to reduce the appropriation and I will ask for a vote upon that in a few seconds. The truth of the matter is, the times and conditions in this country seem to affect the people but do not affect the representatives of the people. I do not find any disposition to reduce appropriations. It is pretty good to be an Indian, I guess, up there—better than to be a white man.

This school seems to have ample support. Do they give any evidence of improvement? Are the Indians industrious? The lands are cheap up there. They have a reservation. I will just ask, if the gentleman knows, whether we are permanently to maintain this support from year to year, without regard to the conditions of the whole country, that pays the expenses?

The CHAIRMAN. The time of the gentleman from Illinois has expired. The question is on the amendment offered by the gentleman from Illinois [Mr. CANNON].

Mr. LAYTON. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. Does the gentleman from Delaware ask for recognition?

Mr. LAYTON. Yes.

The CHAIRMAN. The gentleman is recognized.

Mr. LAYTON. Do I understand there is any past obligation or present obligation on the part of the Government of the United States to provide for these Indian children?

Mr. ELSTON. There is a moral obligation, and the Government has recognized it from the beginning of its history.

Mr. LAYTON. Does that obligation rest upon any lands which the Government has taken from these Indians?

Mr. ELSTON. In the case of these particular Indians the obligation is very strong, inasmuch as they have no money in the Treasury. They are a very poor tribe.

Mr. LAYTON. And we have been doing this for years?

Mr. ELSTON. That is true.

Mr. CANNON. For 25 years.

Mr. LAYTON. And these 400 children are there?

Mr. ELSTON. That is our information.

Mr. LAYTON. And the cost is $82,000 to feed, clothe, and educate them?

Mr. ELSTON. Yes.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois [Mr. CANNON].

The question was taken, and the amendment was rejected.

The Clerk read as follows:

For support and education of 200 Indian pupils at the Indian school, Wahpeton, N. Dak., and pay of superintendent, $46,800; for general repairs and improvements, $7,000; in all, $53,800.

Mr. CANNON. Mr. Chairman, this is another item concerning another school in North Dakota. How long has that been in operation?

Mr. HASTINGS. Since 1904. About 15 years.

Mr. CANNON. What is the Indian population in North Dakota?

Mr. ELSTON. The Indian population in North Dakota is 9,018.

Mr. CANNON. Have they reservations?

Mr. ELSTON. There are several reservations in North Dakota.

Mr. CANNON. What quantity of land in the aggregate is in the various reservations?

Mr. ELSTON. I can give it to the gentleman in a moment. The information is available. The land aggregates a very large acreage, but in most cases it is very poor land.

Mr. CANNON. I did not think they had any poor lands in North Dakota. Of course, there are bad lands everywhere. Where is Wahpeton and Fort Totten? Are they not up there in the northern part, and is not the land well watered?

Mr. ELSTON. Not so very well watered.

Mr. CANNON. And they have railroads, and good wheat land?

Mr. ELSTON. As a general rule these Indian reservations are not tapped by the railroads.

Mr. CANNON. Well, there are a good many railroads, among them the Great Northern and the Northern Pacific, all through there. In a single sentence I will just state my opinion about the matter in which we are appropriating. There are these people, who seem to be making no improvement, and who are paying nothing themselves. Their children are supported. I dare say they are not industrious, and are not helping to bear the burden either in North Dakota or any place else in the United States. And as I read this bill through I come to the conclusion that we are paying to pauperize the Indians, because the Indian, like the white man, if he can have his children cared for, with something to eat and to wear—and I am quite as severe in criticism of my own race as I am of the Indians—do not do anything wherewith to feed and clothe them, as a general rule.

The CHAIRMAN. The time of the gentleman has expired. The Clerk will read.

The Clerk read as follows:

The Secretary of the Interior is hereby authorized to withdraw from the Treasury of the United States, at his discretion, the sum of $30,000, or so much thereof as may be necessary, of the funds on deposit to the credit of the Kiowa, Comanche, and Apache Tribes of Indians in Oklahoma, for the support of the agency and pay of employees maintained for their benefit.

Mr. CANNON. Mr. Chairman, where is the Clerk reading?

Mr. DOWELL. Mr. Chairman, I reserve a point of order on the paragraph.

The CHAIRMAN. The Clerk has just read the paragraph beginning with line 6 on page 33.

Mr. DOWELL. Mr. Chairman, I make the point of order that there is no authorization.

The CHAIRMAN. The gentleman from Iowa makes the point of order on the paragraph.

Mr. FERRIS. Mr. Chairman, will the gentleman from Iowa withhold his point of order until I can explain it?

The CHAIRMAN. Does the gentleman from Iowa withhold his point of order?

Mr. DOWELL. I will reserve my point of order.

Mr. FERRIS. Mr. Chairman, this is the only appropriation which they have for the conduct of the Indian agency at Anadarko. To strike it out leaves the Indians without protection. It does not come out of the Government funds. It comes out of the Indian funds, and it is the only source of maintenance for the Government agency. They are all civil-service employees, and they have been there for a half century or more, and unless the gentleman from Iowa wants to close and abandon the agency he surely will not want to make the point of order striking it out.

That is the only agency they have there. It costs the Government absolutely nothing. The expenses are paid out of the tribal funds. There has been some oil discovered there on their lands, and that agency has been an efficient one, and it has saved the Indians a lot of money and has served them well. To close that agency, which has been there for years and years, even before statehood came, would be disastrous.

The item may or may not be subject to a point of order. A few years ago Congress decided that because these Indians had trust funds they should supply from their funds the money for the support of the agency rather than the Government. The Indians felt that that was of doubtful propriety. We did not dissent from it here because the Indians did have the money. I should think the gentleman from Iowa would not want to divest the Indians of protection that they themselves are paying for.

The CHAIRMAN. The Chair will hear the gentleman from Iowa.

Mr. DOWELL. Mr. Chairman, I make the point of order.

The CHAIRMAN. The Chair thinks the paragraph as it appears in the bill is subject to a point of order.

Mr. ELSTON. Mr. Chairman, I offer an amendment in the following words. I will read the paragraph as I amend it:

The sum of $30,000, or so much thereof as may be necessary, is hereby appropriated out of the funds in the United States Treasury on deposit to the credit of the Kiowa, Comanche, and Apache Tribes of Indians in Oklahoma for the support of the agency and the pay of employees maintained for their benefit.

Mr. CANNON. The gentleman confesses the point of order.

Mr. ELSTON. The point of order was sustained.

The CHAIRMAN. The point of order against the paragraph was sustained. The Clerk will report the amendment offered by the gentleman from California.

The Clerk read as follows:

Amendment offered by Mr. ELSTON: Page 33, after line 5, insert: "The sum of $30,000, or so much thereof as may be necessary, is hereby appropriated out of the funds in the United States Treasury on deposit to the credit of the Kiowa, Comanche, and Apache Tribes of Indians in Oklahoma for the support of the agency and the pay of employees maintained for their benefit."

Mr. CARTER. Mr. Chairman, will the gentleman from California yield to me for just a moment?

Mr. ELSTON. Yes.

Mr. CARTER. I suggest that it is not necessary to say "there is hereby appropriated." That is carried in the first paragraph of the bill. If the amendment should simply provide "$30,000 from the tribal funds of the Kiowa, Comanche, and Apache," that would be sufficient.

Mr. ELSTON. I do not believe that that appropriating clause at the beginning of the bill applies to these items. It may apply to all the items in the bill. But I am willing to have the amendment re-formed if the gentleman from Oklahoma thinks it necessary.

Mr. CANNON. A point of order is made to the gentleman's amendment. It is an independent amendment. The language from line 6 to line 12, inclusive, went out.

Mr. CARTER. I did not understand that the point of order was made against this amendment but against the item in the bill.

Mr. DOWELL. It was against the paragraph.

The CHAIRMAN. The Chair understands that no point of order was made so far as the amendment of the gentleman from California goes.

Mr. DOWELL. I understand that the amendment has been completed. If it has been, I would like to have it reported.

The CHAIRMAN. The Clerk will again report the amendment offered by the gentleman from California.

Mr. ELSTON. Mr. Chairman, of course the mere repetition of the words "there is hereby appropriated," if they are the same general words as those used in the first section of the bill, does not alter the situation with regard to the application of the point of order, because the Chair in ruling upon any point of order that might be made to this amendment would take into consideration the initial clause, "There is hereby appropriated," so that for the mere purpose of making the sentence complete I used a phraseology which I think is not redundant, and it puts the amendment in exactly the same shape as the gentleman from Oklahoma [Mr. CARTER] would wish to put it himself.

Mr. CARTER. It means the same thing.

Mr. ELSTON. Yes; it means the same thing.

Mr. CARTER. The gentleman from California had offered an amendment, Mr. Chairman, and——

Mr. CANNON. The point of order was made to his amendment, as I understand.

Mr. CARTER. Oh, no.

Mr. CANNON. Yes; I think it was.

Mr. CARTER. If the gentleman will let me make a statement——

Mr. CANNON. I think I reserved a point of order to the gentleman's amendment; that is, as a legislative proposition.

The CHAIRMAN. The Chair will state the situation. The gentleman from Iowa [Mr. DOWELL] made a point of order against this paragraph as it appeared in the bill, and the Chair sustained the point of order. Thereafter the gentleman from California [Mr. ELSTON] has offered an amendment, to which no point of order was made.

Mr. CANNON. I will reserve it now.

Mr. FERRIS. I make the point of order, Mr. Chairman, that it comes too late. There has been debate and another amendment offered.

Mr. DOWELL. This amendment has only been completed just now. There has been a controversy as to what it should contain, but there has been no debate.

The CHAIRMAN. The Chair thinks that the debate that has been had has not been on the merits, but simply on the form in which it was offered. The Chair does not think gentlemen are to be deprived of the opportunity of reserving points of order.

Mr. FERRIS. Mr. Chairman, the gentleman from Oklahoma [Mr. CARTER] was recognized and went on for two or three minutes, and no point of order was made.

The CHAIRMAN. The Chair thinks that such debate as has been had was simply in the form of suggestion as to the form in which the amendment should be offered. The Chair thinks that the right of Members to reserve points of order has not been lost. Does the gentleman from Illinois make the point of order?

Mr. CANNON. Yes.

Mr. DOWELL. The point of order was only reserved. It was not made.

The CHAIRMAN. The gentleman spoke on the reservation of the point of order, but not on the amendment.

Mr. DOWELL. May I inquire of the chairman of the committee with reference to this expenditure? I note it is for two purposes, one for the support of the agency and the other for the pay of employees. What distinction is there between the two?

Mr. ELSTON. In what regard?

Mr. DOWELL. In regard to the expenditure of money. I note that first it says "for the support of the agency," and then "pay of employees maintained for their benefit." Is there a distinct appropriation for support? What is that for?

Mr. ELSTON. There are certain subsistence supplies that the agency has, materials to keep the agency going.

Mr. DOWELL. What do they consist of?

Mr. ELSTON. I will read some of the items to the gentleman.

Mr. DOWELL. No; the gentleman need not do that; but does it mean the support and maintenance, the food and clothing?

Mr. ELSTON. Partly; and also covering traveling expenses, transportation of supplies, telephone and telegraph, stationery, printing, school supplies, subsistence supplies, forage, fuel, power, light, medical supplies, and so on.

Mr. DOWELL. Can the gentleman give the committee the actual amount to be used for the employees at this place?

Mr. ELSTON. The amount is $16,600 for salaries of employees and $5,020 for wages.

Mr. DOWELL. What is meant by wages?

Mr. ELSTON. Occasional and temporary labor.

Mr. FAIRFIELD. Manual labor?

Mr. ELSTON. Manual labor.

Mr. DOWELL. Are these Indians employed?

Mr. ELSTON. Mostly. There is a direction in the statute that wherever it can be done Indians shall be employed.

Mr. DOWELL. Then about $16,000, or about half of this sum, is for the employees?

Mr. ELSTON. That is right.

Mr. DOWELL. And there are no others that apply to the Indians, except the laborers who have been suggested?

Mr. ELSTON. A great many of the clerks and other employees of the service are Indians, in addition to the mere day laborers, but there is no classification here from which I can answer the gentleman's question.

Mr. CANNON. I make a point of order against the paragraph. I reserved it.

Mr. ELSTON. I did not understand that the point of order was made. I understood it was reserved.

The CHAIRMAN. Does the gentleman from Illinois make the point of order?

Mr. CANNON. Yes; I do.

Mr. CARTER. I should like to be heard on the point of order.

The CHAIRMAN. The Chair will hear the gentleman on the point of order.

Mr. CARTER. Prior to 1915 we had been using tribal funds from continuing or standing appropriations without the necessity of making annual appropriations. In 1915 we placed a provision in the Indian appropriation bill prohibiting the further use of tribal funds without specific appropriation, and we placed in the bill this language:

On the first Monday in December, 1917, and annually thereafter, the Secretary of the Treasury shall transmit to the Speaker of the House of Representatives estimates of the amounts of the receipts and expenditures which the Secretary of the Interior recommends to be made for the benefit of the Indians from all tribal funds of Indians for the ensuing fiscal year; and such statement shall show (first) the total amounts estimated to be received from any and all sources whatsoever, which will be placed to the credit of each tribe of Indians, in trust or otherwise, at the close of the ensuing fiscal year, (second) an analysis showing the amounts which the Federal Government is directed and required by treaty stipulations and agreements to expend from each of said funds or from the Federal Treasury, giving references to the existing treaty or agreement or statute, (third)—

And this is the language to which I ask the Chair's attention—

the amounts which the Secretary of the Interior recommends to be spent from each of the tribal funds held in trust or otherwise, and the purpose for which said amounts are to be expended, and said statement shall show the amounts which he recommends to be disbursed (a) for per capita payments in money to the Indians, (b) for salaries or compensation of officers and employees, (c) for compensation of counsel and attorney fees, and (d) for support and civilization: *Provided*, That thereafter no money shall be expended from Indian tribal funds without specific appropriations by Congress except as follows—

And so forth.

Now, there is an authorization as clear as can be made for an estimate to be made by the Secretary of the Treasury, and why should not this language carry with it the authority of Congress to appropriate?

Mr. CANNON. Then it would be by the grace of the Secretary of the Treasury in making the estimate that it would be bound or loosed, and as I listened I did not hear anything that would provide that it should be legal or that it was authorized, except that the estimate was authorized.

Mr. CARTER. The gentleman is correct about that. The Secretary of the Treasury is directed to make an estimate to the House. For what purpose? For the purpose of making appropriations.

Mr. CANNON. That does not give any authority of law, because then the Secretary of the Treasury would have the power to bind or loose. Now, if there was a law that authorized this expenditure, the Secretary of the Treasury need not make an estimate.

Mr. CARTER. Why, Mr. Chairman, the gentleman is mistaken about that.

Mr. CANNON. I think not.

Mr. CARTER. The Secretary of the Treasury certainly has to make an estimate for every dollar that Congress appropriates in an appropriation bill.

Mr. CANNON. Oh, not at all. You can not find any such authority. The law fixes the amount and the purpose for which appropriations may be made.

Mr. CARTER. But the law requires the Secretary of the Treasury to make estimates to Congress on the first day of its session, upon which estimates the Congress may make appropriations, and that is exactly what is undertaken to be done by the act of 1915.

Mr. CANNON. Well, then, the Secretary of the Treasury is bigger than the President.

Mr. CARTER. Oh, no; the Secretary of the Treasury is simply required to do with the tribal funds the same thing that is required with Federal funds.

Mr. CANNON. Then, what is the necessity of action by the Congress?

Mr. CARTER. The same as when we appropriate money out of the Federal Treasury.

Mr. CANNON. It does not require an estimate if it is authorized by law, and if no estimates were made Congress would have the power to appropriate the money.

Mr. CARTER. Certainly; the gentleman is correct about that, but the gentleman well knows that the law does require the Secretary of the Treasury to make estimates on which the annual appropriation shall be made and in like manner he is by this language required to make an estimate to Congress for what purpose? For the amount to be appropriated from the tribal funds. We have all through the bill instances of that. Formerly he had the right to spend the money without specific appropriation, but that right has been taken away, and since then we require payments to be submitted to Congress, just as they are out of the Treasury fund.

Mr. CANNON. Then, it is within the power of a Cabinet officer and not in Congress to appropriate to enforce the law. A law has to be passed by the House and the Senate and be approved by the President.

Mr. CARTER. This law was passed by the two Houses and approved by the President.

Mr. CANNON. The Secretary of the Treasury might not make any estimate.

Mr. CARTER. Well, Mr. Chairman, the only question is whether the law requiring the Secretary of the Treasury to submit an estimate to the Congress is broad enough to include within its scope an authorization which would give Congress the authority to appropriate. I think it does. I think it gives Congress the right to use its discretion.

Mr. FERRIS. Mr. Chairman, independent of the point of order, I want to ask the gentleman from Illinois if he is aware that there are 4,100 full-blooded Indians who come under this provision. They are not mixed; they are full blood; they are mostly blanket Indians. This is the only appropriation they have for fuel and light and to pay salaries for that agency.

Mr. CANNON. Yes; and I am told that they are the richest people on earth, these Indians in the Indian Territory.

Mr. FERRIS. That may or may not be true. Some of them are rich. But on what theory does the gentleman want to strike out the service down there which would put this agency out of action?

Mr. CANNON. If the gentleman wants a reply, because we have so treated the Indian in the years that have passed that we have paid him a premium to become, in many instances, of no account at all.

Mr. FERRIS. I agree with the gentleman in that to some extent. But here are 4,000 full-blooded Indians, mostly, as I say, blanket Indians, and it does not cost the Government a penny; it comes out of their own funds; it has been paid to these Indians for 30 or 40 years, before I was born. I wish the gentleman would read the hearings, pages 480 and 489, and let him see if he wants to do this thing.

Mr. CANNON. If the gentleman will allow me, let the legislative committee report the legislation. Consider it has become a pastime for gentlemen to get up on the floor of the House and say that the Appropriations Committee recommends legislation in all this, that, and the other. I want to hold the Appropriations Committee down to a compliance with the law.

Mr. FERRIS. The gentleman may be right in wanting to chastise the Appropriations Committee, but he does not want to do a violence to these Indians, and it is doing a violence to them.

Mr. CANNON. I want to protect the rights of the Committee on Indian Affairs. Let them perform their functions, let them consider and report a proposition and let it be considered under the rules of the House.

Mr. HASTINGS. If the gentleman will pardon me, let me say that this is in exactly the same language that the Committee on Indian Affairs, the legislative committee that the gentleman speaks of, reported in the bill last year and the year before.

Mr. CANNON. There was probably no point of order made upon it.

Mr. HASTINGS. No; but the point I am trying to make is that the legislative committee did consider it and must have O. K'd it by putting it into the Indian appropriation bill.

Mr. CANNON. Where is the law authorizing the appropriation? The appropriation of money does not amount to legislation except for that bill.

Mr. ELSTON. Mr. Chairman, in connection with the interpretation of the statute which was submitted to the Chair in support of the authority to appropriate out of tribal funds I think the Chair can take cognizance of the fact that Congress, through the Indian Affairs Committee, has been in the habit for 50 years of passing appropriations in a lump sum of millions of dollars out of the tribal funds deposited in the Treasury. The obvious purpose of the statute was not to limit the authority of appropriation. That was expressly admitted in the statute. It was to make the Secretary of the Interior segregate the amounts taken from tribal funds into proper subheadings. The reading of this act would convince the Chair, I have no doubt, that its purpose was to continue the practice of appropriating out of tribal funds, but under a somewhat modified procedure. If that statute has any purpose at all, it has the purpose of authorizing the appropriations out of tribal funds under a different rule. In fact, it provides that specific appropriations, in effect, can be made out of tribal funds.

The CHAIRMAN. The Chair in the first place does not think that the statute cited by the gentleman from Oklahoma [Mr. CARTER] would grant sufficient authority to support this item, but if the Chair could be referred to the statute which authorizes the President to appoint from time to time, by and with the advice and consent of the Senate, certain Indian agencies, and was convinced that this agency was included among those which the President was authorized to provide for, that there would be authority to hold this in order. The Chair has before him a list of those agencies for which the President is authorized to provide, but he does not find among them the agency at this point.

Mr. CARTER. The Chair will notice under that paragraph the provision for an agency of the Wichitas——

The CHAIRMAN. And the neighboring tribes west of the Chickasaws and Choctaws.

Mr. CARTER. The Kiowas and the Comanches are directly west of the Chocktaws and the Chickasaws and are affiliated with the Wichita Indians.

Mr. FERRIS. Fourteen hundred Wichitas are affiliated with this agency.

The CHAIRMAN. The paragraph reads as follows, among others which the President has the right to appoint:

> One for the Wichitas and neighboring tribes west of the Choctaws and Chickasaws.

Does the gentleman from Oklahoma assert that the Kiowa and Comanche Tribes of Indians are those tribes?

Mr. FERRIS. They are the wild tribes that had a reservation immediately adjoining the Chickasaws on the west, and this agency is located about 30 miles west of the line. Fourteen hundred of the Wichita Indians are a part of this agency, and are administered upon by this agency. I feel almost chagrined that we should have to make a contention as serious as this over a proposition of this sort, and I say that not with the idea of criticizing anybody, other than merely the assertion of the fact that here is an agency created half a century ago, where there are 4,100 full-blood blanket Indians. These are real Indians. They are not mixed bloods. Six years ago, departing from the rule that applies to practically every other agency in the country, Congress proposed to take the money out of the Indian funds and pay the administration expenses in order to shield the Government Treasury. It is the only fund they have; it is to be used for administration, medical aid, fuel, and so forth. I have before me the hearings. This fund is to be used to provide fuel and light and pay the agency expenses of the Wichita, the Kiowa, and Comanche Tribes. There are fourteen hundred of the Wichitas and about 2,700 of the Kiowas and Comanches, and I read from page 480 of the hearings:

> "This appropriation covers the expense of the administration of the affairs of about 1,400 Wichita and Caddo Indians, under the jurisdiction of the Kiowa Agency, Okla., and, as will be seen by the analysis of expenditures, is used for the pay of necessary employees, medical supplies, miscellaneous equipment, and materials, etc.
>
> "This is the only appropriation available for the support and civilization of these Indians."
>
> You will note that we are asking for the same amount that was appropriated last year.
>
> Mr. ELSTON. What is their financial condition?
>
> Mr. MERITT. Those Indians are without any funds to their credit, but the Kiowa Indians have considerable moneys.

The reason for taking it out of the Kiowas and not the Wichitas is because the Wichitas do not have money, so that the Wichitas get administration from the Kiowas from that fund. There are fourteen hundred of the Wichitas, and 4,100 of all these Indians put together. Down below there is a further

item for the Kiowas, the Comanches, and the Apaches, another paragraph, which might aid the Chair. I read now from the hearings, and what I read has a direct application to the next paragraph:

This item provides for the authorization from tribal funds of $30,000 for the support and civilization of the Kiowa, the Comanche, and Apache Indians under the jurisdiction of the Kiowa Agency.

The Kiowa Agency has steadily increased its activities in the past several years, due to the oil and gas developments on the reservations and the leasing and collecting of rentals therefrom. In addition, the handling of the farming operations and approximately $1,500,000 of individual Indian moneys has entailed work of large proportions.

The analysis of expenditures shows that the fund is used for the paying of employees, purchase of fuel and illuminants, miscellaneous materials, etc., required in the conduct of the agency.

They are all civil-service employees. The agency was created by the President of the United States under the original organic act of 1832. These people are merely conducting the functions of the Government regarding the Indians, and they require these Indians to pay for the regular Indian service there. I do not think it is subject to the point of order, but if it is, it ought not to be made by the gentleman.

Mr. CANNON. Mr. Chairman, will the gentleman yield?

Mr. FERRIS. Yes; certainly.

Mr. CANNON. The gentleman determines the authority by a hearing before a committee?

Mr. FERRIS. No; I do not. I understand full well that what I read from the hearings goes to the merits, but what I say now goes to the point of order. In 1832 the Congress of the United States authorized the establishment of a new Indian Bureau, and it authorized the Indian Bureau to create sundry agencies. This agency was created long before statehood, long before Oklahoma was organized as a Territory, was created by the President of the United States under that direct authority. The proposal now is to carry along the work originally provided for by the original organic act, and under this provision they propose to take the Indian's money to do it.

Mr. RHODES. Mr. Chairman, will the gentleman yield?

Mr. FERRIS. Yes.

Mr. RHODES. Suppose the agency should be abolished, how would the affairs of those Indians be administered?

Mr. FERRIS. They would not be administered at all. This is the only agency they have. This would strike down their medical aid, their Indian farmers, their fuel, their superintendent, and it would turn designing persons loose on the 4,100 blanket Indians. It merely demonstrates what it means to have some one unacquainted with the service jump in and make a point of order, even if from a parliamentary standpoint it should be held good, without giving some attention to those who know the facts. This agency is right in the middle of my district. It is not a political matter. Probably the Indians would be glad if they could be relieved of the agency. They would like to have their money and land given over to them, so that they could gamble with it and debauch themselves; but it ought not to be done en bloc. I think the Chair may well be justified in holding that this is a direct result of the original organic act of 1832, which authorized the Indian Bureau.

It is too bad the House has to be held up on a question of this sort. It is clearly a just and proper item from every viewpoint, and I can not follow the logic of Members who would strike it down.

The CHAIRMAN. The Chair is prepared to rule, unless the gentleman from Illinois desires further recognition.

Mr. CANNON. Mr. Chairman, I just want a single word. The gentleman says it is within the power, without legislation, to authorize this expenditure. I do not agree with him. Evidently it is proposed to offer it here; they felt the need of authorization. So far as the policy goes, if you withdraw without authority of law from the Treasury of the United States a tribal fund and you spend the money of the Indian as it has been spent for a generation or two generations and they come to be in some instances paupers, from the standpoint of Christianity and genuine charity they will come and say, "Well, you have taken the poor Indian's land and this, that, and the other; now support him." If we have tribal funds in the Treasury, I believe in keeping them there unless the law authorizes the utilization of them.

The CHAIRMAN. The Chair is ready to rule. The Chair, of course, can not take into consideration the question of the merits or demerits of this proposition. The Chair has before him section 2052 of the Revised Statutes, which says:

And the President is authorized to appoint from time to time, by and with the advice and consent of the Senate, the following Indian agents.

Enumerating, and another section of the statute provides for their compensation and everything connected with the subject of Indian agencies. The gentleman from Oklahoma, in whose district this particular agency is, states to the Chair, on his responsibility, that this particular agency described in the paragraph, to which the gentleman from Illinois has made the point of order, is in fact an agency which is definitely prescribed in the statute, to wit, "one—that is, Indian agent—for the Wichita and neighboring tribes west of the Choctaws and Chickasaws." Under those circumstances the Chair thinks that there is specific authority of law for the creation of this agency, and therefore thinks that the paragraph is not subject to the point of order, and overrules the point of order.

Mr. FERRIS. Mr. Chairman, there is an amendment pending.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Oklahoma.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

That the Secretary of the Interior be, and he is hereby, authorized to withdraw from the Treasury of the United States, at his discretion, the sum of $250,000, or so much thereof as may be necessary, of the funds on deposit to the credit of the Kiowa, Comanche, and Apache Tribes of Indians in Oklahoma, and pay out the same for the benefit of the members of said tribes for their maintenance and support and improvement of their homesteads for the ensuing year and in such manner and under such regulations as he may prescribe: *Provided*, That the Secretary of the Interior shall report to Congress on the first Monday in December, 1922, a detailed statement as to all moneys expended as provided for herein.

Mr. DOWELL. Mr. Chairman, I make the point of order on the paragraph. I am making it merely on the form of this language, that it is an authorization and not an appropriation.

The CHAIRMAN. The Chair sustains the point of order.

Mr. CARTER. Mr. Chairman, I hope the Chair will hear me on the point of order. There is specific authority for this.

The CHAIRMAN. The Chair will hear the gentleman.

Mr. CARTER. If the Chair will turn to article 6 of the treaty of June 6, 1900, volume 1 of Kappler's Laws and Treaties, page 711, he will see that this per capita payment is specifically authorized. It is authorized in this language——

The CHAIRMAN. The Chair has twice ruled that the form of authorization to withdraw from the Treasury is not in order.

Mr. CARTER. I think if the Chair will read this citation I have given he will see——

Mr. DOWELL. The point I made is that this is not an appropriation but an authorization.

Mr. ELSTON. Mr. Chairman, I offer the following amendment, to read as follows:

The sum of $250,000, or so much thereof as may be necessary, is hereby appropriated out of the funds on deposit to the credit of the Kiowa, Comanche, and Apache Tribes of Indians in Oklahoma—

And so forth, repeating the words of the paragraph.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. ELSTON: Page 33, after the amendment adopted, insert the following: "The sum of $250,000, or so much thereof as may be necessary, of the funds on deposit to the credit of the Kiowa, Comanche, and Apache Tribes of Indians in Oklahoma, and pay out the same for the benefit of the members of said tribes for their maintenance and support and improvement of their homesteads for the ensuing year and in such manner and under such regulations as he may prescribe: *Provided*, That the Secretary of the Interior shall report to Congress on the first Monday in December, 1922, a detailed statement as to all moneys expended as provided for herein."

Mr. HAYDEN. Mr. Chairman, I offer a perfecting amendment. After the word "and," in line 18 of the printed bill, which has been reoffered, insert "and the Secretary of the Treasury is hereby authorized to."

The CHAIRMAN. The gentleman offers that to the paragraph?

Mr. HAYDEN. Yes.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Mr. HAYDEN offers the following amendment: On line 18, page 33, after the word "and," insert the words "and the Secretary of the Interior is hereby authorized to."

The amendment was agreed to.

The CHAIRMAN. The question now is on the amendment offered by the gentleman from California.

The question was taken, and the amendment was agreed to.

MESSAGE FROM THE SENATE.

The committee informally rose; and the Speaker having taken the chair, a message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had passed with amendments the bill (H. R. 15130) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1922, and for other purposes, had requested a conference with the House of Representatives on the bill and amendments, and had appointed Mr. CURTIS, Mr. PHIPPS, and Mr. SMITH of Maryland as the conferees on the part of the Senate.

The message also announced that the Senate had agreed to the amendments of the House of Representatives to the bills of the following titles:

S. 3994. An act validating certain applications for and entries of public lands, and for other purposes;

S. 793. An act authorizing the issuance of patent to the Milk River Valley Gun Club; and

S. 2379. An act to provide for the disposition of certain public lands withdrawn and improved under the provisions of the act of Congress approved June 25, 1910 (36 Stat. L., p. 847), as amended by the act of August 24, 1912 (37 Stat. L., p. 497), and which are no longer needed.

INDIAN APPROPRIATION BILL.

The committee resumed its session.

The Clerk read as follows:

The Secretary of the Interior is hereby authorized to withdraw from the Treasury of the United States, at his discretion, the sum of $35,000, or so much thereof as may be necessary, of the funds on deposit to the credit of the Cheyennes and Arapahoes, who have been collected on the reservations set apart for their use and occupation in Oklahoma, for the support of said Indians and pay of employees maintained for their benefit.

Mr. DOWELL. Mr. Chairman, I make the point of order against the paragraph.

Mr. FERRIS. Mr. Chairman, I hope the chairman will offer the usual amendment.

Mr. ELSTON. If the Chair has ruled on the point of order, I am not going to address myself to that.

The CHAIRMAN. The gentleman from Iowa, the Chair thinks, withheld the point of order.

Mr. DOWELL. I make the point of order.

The CHAIRMAN. The point of order is sustained.

Mr. ELSTON. Mr. Chairman, I offer an amendment in such a way that the paragraph shall read as follows:

The sum of $35,000 or so much thereof as may be necessary—

Then continuing the words of the paragraph.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Mr. ELSTON offers the following amendment: Page 34, at the top of the page insert:

"The sum of $35,000, or so much thereof as may be necessary, of the funds on deposit to the credit of the Cheyennes and Arapahoes, who have been collected on the reservation set apart for their use and occupation in Oklahoma, for the support of said Indians and pay of employees maintained for their benefit."

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

For support and education of 550 pupils at the Indian school at Chilocco, Okla., including pay of superintendent, $94,600; for general repairs and improvements, $15,000; in all, $109,600.

Mr. SWINDALL. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 34, line 20, after the word "improvement," strike out "$15,000; in all, $109,600," and insert "$244,000; in all, $338,600."

Mr. HAYDEN. Mr. Chairman, I reserve a point of order against that.

Mr. SWINDALL. Mr. Chairman, this amendment is in keeping with the report of the honorable Commissioner of Indian Affairs with his estimate for this particular school. This school is the only nonreservation Indian school in the State of Oklahoma. It has at the present time 500 students enrolled in the institution. By making these additional improvements, this school can accommodate 800 students without any additional expenditure of money in the future, except a nominal sum in keeping up repairs and employing a few instructors.

It will be noticed that heretofore in this appropriation bill provision has been made for the abolishment of certain schools where the enrollment of pupils was less than a certain number. Now, it is the policy of the department to transfer those pupils to this particular school. This is not particularly an Oklahoma school; it is not particularly a school that relates to my district or to the Ponca Indians, but there are in this institution at this time Indian pupils from 29 different tribes in the United States. It is not only an Oklahoma school, but it is a national school as well. It is conducted for the purpose of trying to build up the Indian children to make them develop into more useful citizens. It teaches the girls home arts and economics, the boys agriculture and manual training. It has been charged that the Indians were extravagant. One of the purposes of this school is to teach the Indian boys and girls economy, so that when they go out into the world they will not become a charge upon the Government of the United States; but, on the contrary, become useful, industrious, and thrifty citizens.

By making this additional appropriation for these buildings we will be able to educate 300 more Indian children in this school each year in the future. It is a well-known fact that one of the great causes of the disturbances in Russia and great disturbances in Mexico is that the citizenship of those countries was not properly educated.

Now, let us start out by assisting these Indian children in educating themselves on this reservation and in this magnificent school, and make of them useful and beneficial citizens to the State of Oklahoma and the United States. The purpose of this school is not to give these children a classical education, but to educate the boys along the lines of agriculture and manual training and the girls in home arts and economy. And for that reason I think we would be making a great improvement in the Indian Service by allowing this additional appropriation.

So I ask the Members of this body to consider this amendment to support this school and increase the educational facilities of this great institution in northwestern Oklahoma.

Now, there are 8,500 acres of land set apart for the purpose of teaching these children agriculture on this reservation. There is not a plant or a vegetable, there is not any agricultural product produced in the northern or western portion of the United States but what can be successfully grown on this reservation. The same is true of live stock. By giving these children education along these lines we will be improving the Indian citizenship in the State of Oklahoma and the Nation, I think, to the greatest extent of any school in the United States. For these reasons I request this increase, because, as I have said before, it is not an Oklahoma school alone, but relates to 29 tribes of Indians in the United States that have children in this institution being educated by the Government. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. SWINDALL. Mr. Chairman, I ask unanimous consent to revise and extend my remarks.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. ELSTON. Mr. Chairman, the gentleman from Oklahoma made a very strong argument before the subcommittee on this matter, and I have heard from him at various times. His interest is great, and he has urged this matter with much ability. The proposition, however, is a very ambitious one, involving new construction to enlarge this school in a very large degree. The committee did not see fit to bring in the items, inasmuch as the $109,000 provided is the usual amount for carrying on the current work of the school. It can now go forward as it has always been doing, possibly with not the degree of efficiency it could if it had all of this new construction. Considering the fact that the amendment covers new construction entirely, I am compelled to make the point of order on the amendment.

The CHAIRMAN. The point of order is sustained. The Clerk will read.

The Clerk read as follows:

That the Secretary of the Interior is hereby authorized to withdraw from the Treasury of the United States, at his discretion, not to exceed the sum of $45,000, or so much thereof as may be necessary, of the money on deposit to the credit of the Osage Tribe of Indians in Oklahoma, to be expended for the support, education, and systematic vocational instruction of Osage children: *Provided*, That the expenditure of said money shall include the renewal of the present contract with the St. Louis Mission Boarding School, except that there shall not be expended more than $300 for annual support and education of any one pupil.

Mr. DOWELL. Mr. Chairman, I reserve a point of order on the paragraph.

Mr. ELSTON. Mr. Chairman, may I ask if this is for the purpose of re-forming the appropriating clause?

Mr. DOWELL. Yes. On that part I desire to make a point of order, but I wish to make an inquiry with reference to the proviso. I take it that that is new legislation, and I am desiring to make an inquiry. What is the contract that this proviso seeks to renew?

Mr. ELSTON. A great many schools are maintained in the Indian country that are not regularly Indian schools, but were started by various charitable organizations for the good of the Indians. This is a school that was started originally that way, and for some reason the sums sufficient to maintain it are inadequate, and under authority of law the Secretary of the Interior made a contract for its continuance. There are only four pupils in the school, so that the total outlay on this item will be only $1,200 per annum. But that question has been gone into a good many times in the House, and the policy of this system has been adopted by the House.

Mr. DOWELL. The gentleman says there are only four people affected by this legislation?

Mr. ELSTON. Yes. That is the record.

Mr. DOWELL. Mr. Chairman, I desire to make the point of order on the first part of the paragraph, but not on the proviso.

Mr. HASTINGS. Will the gentleman withhold it for a moment?

Mr. DOWELL. I will withhold it.

Mr. HASTINGS. I want to say to the gentleman from Oklahoma that this appropriation comes out of the Osage fund. The main school——

Mr. DOWELL. I am not making a point of order on that.

Mr. HASTINGS. I am trying to make an explanation, if the gentleman will permit me.

This appropriation comes out of the tribal funds. Now, there are some three or four Osage children that desire to go to this mission school, 3 or 4 miles distant in the country.

Mr. DOWELL. The explanation is entirely satisfactory, and I will not make a point of order on the proviso, but I desire to make it merely to lines 13 and 14, in order that the appropriation may be properly stated in the paragraph.

The CHAIRMAN. The Chair sustains the point of order.

Mr. ELSTON. Mr. Chairman, I offer an amendment reading as follows:

The sum of $45,000, or so much thereof as may be necessary, is hereby appropriated out of all the money on deposit—

And so forth, in the language of the paragraph.

The CHAIRMAN. The gentleman from California offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. ELSTON: Page 35, after line 12, insert: "The sum of $45,000, or so much thereof as may be necessary, is hereby appropriated out of the money on deposit to the credit of the Osage Tribe of Indians in Oklahoma, to be expended for the support, education, and systematic vocational instruction of Osage children."

The CHAIRMAN. The question is on the amendment offered by the gentleman from California [Mr. ELSTON].

The amendment was agreed to.

Mr. ELSTON. Mr. Chairman, I do not believe the whole amendment was read. I intended to have the amendment include the whole paragraph, outside of the first three lines.

The CHAIRMAN. The gentleman from Iowa did not make his point of order against the proviso.

Mr. DOWELL. The point of order was only against the first two lines.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

The Secretary of the Interior is hereby authorized to withdraw from the Treasury of the United States, at his discretion, not to exceed the sum of $75,000, or so much thereof as may be necessary, of the funds on deposit to the credit of the Osage Tribe of Indians in Oklahoma for the support of the Osage agency and pay of tribal officers, the tribal attorney and his stenographer, and employees of said agency.

Mr. DOWELL. Mr. Chairman, I reserve a point of order. I make the point of order.

Mr. ELSTON. Mr. Chairman, I offer an amendment in substitution for the paragraph that appears in the text: "The sum of $75,000, or so much as may be necessary, is hereby appropriated out of," and so forth.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from California.

The Clerk read as follows:

Amendment offered by Mr. ELSTON: Page 36, at the head of the page, insert "The sum of $75,000, or so much thereof as may be necessary, is hereby appropriated out of the funds on deposit to the credit of the Osage Tribe of Indians in Oklahoma for the support of the Osage agency and pay of tribal officers, the tribal attorney and his stenographer, and employees of said agency."

The CHAIRMAN (Mr. MAPES). The question is on agreeing to the amendment offered by the gentleman from California.

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

The Secretary of the Interior is hereby authorized to withdraw from the Treasury of the United States, at his discretion, not to exceed $50,000 of the funds on deposit to the credit of the Osage Tribe of Indians in Oklahoma and to pay out the same for necessary expenses in connection with oil and gas production on the Osage Reservation, including salaries of employees, rent of quarters for employees, traveling expenses, printing, telegraphing and telephoning, and purchase, repair, and operation of automobiles.

Mr. ELSTON. Mr. Chairman, I offer an amendment as follows: "Fifty thousand dollars of the funds on deposit to the credit of the Osage Tribe of Indians in Oklahoma is hereby appropriated for necessary expenses in connection with oil and gas production on the Osage Reservation, including salaries of employees, rent of quarters for employees, traveling expenses, printing, telegraphing and telephoning, and purchase, repair, and operation of automobiles."

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from California.

The Clerk read as follows:

Amendment offered by Mr. ELSTON: Strike out the paragraph from lines 8 to 16, inclusive, and insert in lieu thereof the following: "Fifty thousand dollars of the funds on deposit to the credit of the Osage Tribe of Indians in Oklahoma is hereby appropriated for necessary expenses in connection with oil and gas production on the Osage Reservation, including salaries of employees, rent of quarters for employees, traveling expenses, printing, telegraphing and telephoning, and purchase, repair, and operation of automobiles."

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from California.

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

The use of the sum of $10,000, or so much thereof as may be necessary, the same to be immediately available, is hereby authorized from funds belonging to the Osage Tribe to defray expenses heretofore or hereafter incurred in connection with visits to Washington, D. C., by the Osage Tribal Council and other members of said tribe, when duly authorized or approved by the Secretary of the Interior.

Mr. DOWELL. Mr. Chairman, I reserve a point of order. Of course, the paragraph is subject to a point of order.

The CHAIRMAN. The gentleman from Iowa reserves a point of order on the paragraph.

Mr. DOWELL. I desire to make an inquiry with reference to the necessity for this appropriation.

Mr. ELSTON. Mr. Chairman, I am very glad the gentleman has phrased it that way, because if there is any tribe of Indians that can bear an expense of this kind it is the Osage Indians. They have rich properties and a per capita income for each man, woman, and child approximating $10,000 per annum. The business they have with the department is tremendous, and it is necessary for members of their tribe to come back and forth between Oklahoma and Washington several times annually. They have millions every year in the way of income, and this item relatively amounts to nothing.

Mr. DOWELL. Has not an appropriation already been made available for the year, and is this to continue or rather to increase the appropriation for the present year?

Mr. ELSTON. It was carried last year.

Mr. DOWELL. In what amount was it carried?

Mr. HASTINGS. The same amount.

Mr. DOWELL. Ten thousand dollars?

Mr. HASTINGS. Yes.

Mr. DOWELL. Then I understand $10,000 has not been sufficient for the present, and this is to make up that deficit?

Mr. HASTINGS. Let me explain it to the gentleman from Iowa. There is some very important legislation pending here with reference to the Osage Tribe of Indians. It involves the extension of the mineral period, and it has been necessary for the Secretary of the Interior to call the Osage Tribal Council to Washington. Their members or representatives have been appearing before the Senate and House committees with reference to this pending legislation, and they have incurred, I expect, more expense than the $10,000 appropriated last year. This amount comes out of their own funds. I think it is fully justified. It has already been explained to the gentleman.

Mr. DOWELL. But the gentleman understands, does he not, that this is simply an addition to the annual appropriation that was made last year?

Mr. HASTINGS. No additional appropriation was made this year. This will cover the expenses of the tribal council this year and next year, so that there will be no additional appropriation above the $10,000——

Mr. DOWELL. Unless the committee comes in next year with another $10,000 and makes it available at once.

Mr. HASTINGS. If pending legislation is enacted now, perhaps there will be no necessity for that council to appear here next year.

Mr. DOWELL. Mr. Chairman, I do not desire to make the point of order. I withdraw the reservation.

The CHAIRMAN. The reservation is withdrawn. The Clerk will read.

The Clerk read as follows:

FIVE CIVILIZED TRIBES.

SEC. 18. For expenses of administration of the affairs of the Five Civilized Tribes, Oklahoma, and the compensation of employees, $190,000: *Provided*, That a report shall be made to Congress by the Superintendent for the Five Civilized Tribes through the Secretary of the Interior, showing in detail the expenditure of all moneys appropriated by this provision.

Mr. DOWELL. Mr. Chairman, I reserve a point of order on the paragraph.

Mr. HASTINGS. I will say to the gentleman that it is not subject to a point of order.

Mr. DOWELL. I desire to make an inquiry as to when the Secretary of the Interior shall make this report. I am heartily

in accord with that provision of the paragraph, but there is no time specified in the paragraph as to when the report shall be made.

Mr. HASTINGS. I will say to the gentleman that it is understood that the report is to be made on or before the convening of Congress; and the report has been made, and I have it here on my desk.

Mr. DOWELL. But this is for the following year.

Mr. HASTINGS. Yes.

Mr. DOWELL. And it makes no provision whatever for any time when the Secretary shall make this report.

Mr. HASTINGS. If the gentleman wants to add an amendment providing that it shall be made on or before any certain date, we shall be glad to accept it.

Mr. DOWELL. I think the committee ought to fix a time when the Secretary shall report.

Mr. HASTINGS. Will it be agreeable to the gentleman that the report shall be made on or before December 1?

Mr. DOWELL. I think that should be added.

Mr. HASTINGS. I offer an amendment, with the permission of the chairman of the committee.

Mr. ELSTON. I have no objection.

Mr. HASTINGS. In line 5, page 37, after the word "Congress," add the words "on the first Monday of December, 1922."

The CHAIRMAN. The gentleman from Oklahoma offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. HASTINGS: Page 37, line 5, after the word "Congress," insert the words "on the first Monday of December, 1922."

The amendment was agreed to.

The Clerk read as follows:

The Secretary of the Interior is hereby authorized to use not to exceed $8,000 out of the Choctaw and Chickasaw tribal funds for the expenses and the compensation of all necessary employees for the distribution of per capita payments.

Mr. DOWELL. Mr. Chairman, I desire to reserve a point of order on that paragraph in order that it may be corrected.

Mr. CARTER. If the gentleman wants to make the point of order I will offer an amendment.

Mr. DOWELL. I make the point of order.

The CHAIRMAN. The point of order is sustained.

Mr. CARTER. I offer an amendment.

The CHAIRMAN. The gentleman from Oklahoma offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. CARTER: Page 37, after line 8, insert a new paragraph as follows:

"Eight thousand dollars from the Choctaw and Chickasaw tribal funds to defray the expenses of per capita payments to the enrolled members of such tribes."

Mr. ELSTON. I reserve a point of order on that, and I would like to have the gentleman explain the effect of his amendment.

Mr. CARTER. The amendment is authorized by law. It simply provides for the appropriation of $8,000 for the per capita payment.

Mr. ELSTON. The gentleman is merely making an amendment to obviate the objection made on account of the authority?

Mr. CARTER. That is all.

Mr. ELSTON. I withdraw the reservation.

The CHAIRMAN. The gentleman from California withdraws the reservation of the point of order.

Mr. BLANTON. Mr. Chairman, I move to strike out the last word. Numerous paragraphs in this bill have been stricken out on points of order made by Members who are seeking to protect the legislative functions of their various committees. I voted for the change in the method of preparing the appropriation bills, and several instances which have lately occurred make me believe that it is a good change in our method of appropriating, to centralize the power in this one committee. I will call attention to just one item that of itself is of importance to the people of this country.

The new Appropriations Committee that has had in charge the Agricultural appropriation bill has at last seen fit to strike out of that annual appropriation this year an item of waste and extravagance amounting to $239,000 for sending out these measly little packages of garden seeds to our constituents. That is something that I have been trying to see stricken out of that appropriation every year since I have been here. Last year we succeeded in getting it stricken out of the bill, and it went to the conferees, and the bill was held up for several months until it was finally placed back into the bill.

Mr. DOWELL. I rise to a point of order.

The CHAIRMAN. The gentleman will state his point of order.

Mr. DOWELL. The matter under discussion is not a lecture to the House on the seed question. We are discussing the Indian appropriation bill.

Mr. BLANTON. I am discussing the very action of the gentleman from Iowa on this last paragraph that necessitated the making of this amendment. He has stricken it out on a point of order. Surely the gentleman is familiar with the rule that there is some latitude in debate.

Mr. DOWELL. I insist on my point of order.

Mr. BLANTON. I am discussing the amendment made necessary by the gentleman's point of order.

The CHAIRMAN. The point of order to the paragraph was sustained, and the gentleman from Oklahoma [Mr. CARTER] has offered an amendment.

Mr. BLANTON. I will call attention to the parliamentary situation.

The CHAIRMAN. The Chair is familiar with the parliamentary situation. The Chair will ask the gentleman from Texas to proceed in order.

Mr. BLANTON. I will, Mr. Chairman; and in order that I may proceed in order, I just want to reiterate that I congratulate the Appropriations Committee for saving this $239,000 for the people. I am glad that the garden-seed waste is at an end. It has never done the people any substantial good.

The CHAIRMAN. The question is on the amendment of the gentleman from Oklahoma [Mr. CARTER].

The amendment was agreed to.

The Clerk read as follows:

For salaries and expenses of such attorneys and other employees as the Secretary of the Interior may, in his discretion, deem necessary in probate matters affecting restricted allottees or their heirs in the Five Civilized Tribes and in the several tribes of the Quapaw agency, and for the costs and other necessary expenses incident to suits instituted or conducted by such attorneys, $50,000.

Mr. DOWELL. Mr. Chairman, I reserve a point of order, and I desire to inquire of the chairman of the committee just the status of the investigation on this matter and the necessity for this paragraph.

Mr. ELSTON. I will state to the gentleman that this legislation and the appropriations made under it arose from what appeared to be conditions in the Indian country that were intolerable. There were cases of exploitation and robbery of the estates of minors, or so it was alleged, and it came to such a pass that the Congress, in its position as guardian of these unprotected people, decided to provide them with probate attorneys, who should watch the probating of Indian estates and see that the Indians were not robbed of their property. The appropriations for this purpose heretofore have gone as high as $85,000 annually. Last years' bill carried $75,000. Your committee has reduced the estimates of the department and the amount carried last year by $25,000, which will necessarily reduce the number of probate attorneys in the Five Civilized Tribes.

Mr. DOWELL. It is not the wealth of the Indian, but the necessity for this appropriation.

Mr. ELSTON. It was necessary to afford protection to the Indian in addition to that afforded by the probate court.

Mr. DOWELL. Did the committee make any investigation to ascertain what benefit the attorneys were giving to the Indians by this appropriation?

Mr. ELSTON. The committee did so, and got much information and a great deal of detail, which is available to the gentleman, if he wishes. On the whole, it shows that these probate attorneys have been active and that they have done a great deal of good. In view of the increase of civilization in this Indian country and the fact that the population is increasing and that more whites are intermixing with the Indians, it was felt that we could begin to decrease the number of such attorneys.

Mr. DOWELL. Is it the purpose of the committee to reduce it to a minimum?

Mr. ELSTON. To reduce it to nothing eventually.

Mr. DOWELL. Mr. Chairman, I withdraw the reservation of a point of order.

The Clerk read as follows:

That the Secretary of the Interior be, and he is hereby, authorized to use not exceeding $7,500 of the proceeds of sales of unallotted lands and other tribal property belonging to any of the Five Civilized Tribes for payment of salaries of employees and other expenses of advertising and sale in connection with the further sales of such tribal lands and property, including the advertising and sale of the land within the segregated coal and asphalt area of the Choctaw and Chickasaw Nations, or of the surface thereof, as provided for in the act approved February 19, 1912, entitled "An act to provide for the sale of the surface of the segregated coal and asphalt lands of the Choctaw and Chickasaw Nations, and for other purposes" (37 Stat. L., p. 67), and of the improvements thereon, which is hereby expressly authorized, and for other work necessary to a final settlement of the affairs of the Five Civilized Tribes: *Provided*, That not to exceed $2,500 of such

amount may be used in connection with the collection of rents of unallotted lands and tribal buildings: *Provided further*, That hereafter no money shall be expended from tribal funds belonging to the Five Civilized Tribes without specific appropriation by Congress, except as follows: Equalization of allotments, per capita and other payments authorized by law to individual members of the respective tribes, tribal and other Indian schools for the current fiscal year under existing law, salaries and contingent expenses of governors, chiefs, assistant chiefs, secretaries, interpreters, and mining trustees of the tribes for the current fiscal year at salaries at the rate heretofore paid, and one attorney each for the Choctaw, Chickasaw, and Creek Tribes employed under contract approved by the President, under existing law, for the current fiscal year: *Provided further*, That the Secretary of the Interior is hereby authorized to continue during the ensuing fiscal year the tribal and other schools among the Choctaw, Chickasaw, Creek, and Seminole Tribes from the tribal funds of those nations, within his discretion and under such rules and regulations as he may prescribe: *And provided further*, That the Secretary of the Interior is hereby empowered, during the fiscal year ending June 30, 1922, to expend funds of the Choctaw, Chickasaw, Creek, and Seminole Nations available for school purposes under existing law for such repairs, improvements, or new buildings as he may deem essential for the proper conduct of the several schools of said tribes.

Mr. McKEOWN. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 40, line 5, after the period, insert "For repair of barn building at Mekusukey Academy, Seminole Nation, Okla., $1,000, payable out of the funds of the Seminole Tribe.

Mr. ELSTON. Mr. Chairman, I reserve a point of order on the amendment.

Mr. HASTINGS. If the Chairman will permit, I will say that this was brought to my attention and follows out an amendment that has been prepared by the gentleman from Arizona. This is for the rebuilding of a barn that was burned. The insurance money has been collected, but they are not authorized to use it. This is to rebuild the barn upon the same foundation in connection with this school.

The gentleman that represents the district understands the facts. It is not subject to a point of order and I hope the chairman will have no objection to it. It is the amount of money that was gotten from the insurance.

Mr. ELSTON. Is this in the land of the Choctaws?

Mr. HASTINGS. It is in the land of the Seminoles, and this appropriation is for the continuance of the school.

Mr. CARTER. If the gentleman will yield to me, I think the gentleman's proposition is taken care of in the last paragraph, which provides:

And provided further, That the Secretary of the Interior is hereby empowered, during the fiscal year ending June 30, 1922, to expend funds of the Choctaw, Chickasaw, Creek, and Seminole Nations available for school purposes under existing law for such repairs, improvements, or new buildings as he may deem essential for the proper conduct of the several schools of said tribes.

Mr. HASTINGS. But there is a limitation on the amount that he may expend, and this is in addition to that amount that they desire to expend. This is to rebuild a barn that has been burned. The insurance money has been covered into the funds of the tribe, and they desire authority to expend this money collected from the insurance and use it in rebuilding the barn on the same foundation.

Mr. LAYTON. Is this thousand dollars a part of the insurance money?

Mr. HASTINGS. It is, but let me explain. There is a limitation of the amount that may be expended in any one year. The department is not authorized to expend over and above that amount. If they expend this thousand dollars they would have to reduce the amount that they could expend for other purposes by a thousand dollars.

Mr. ELSTON. The limit is not in this paragraph.

Mr. HASTINGS. There is a provision of limitation as to the amount that can be expended.

Mr. CARTER. Day before yesterday the Indian Bureau gave me the amount expended and the limitation, and the amount expended was only $200,000, while the limitation is something over $400,000. I do not know just how it is placed, but it is possible that the gentleman is right and that they are now expending to the full limit for the Seminole Tribe because it applies to each tribe.

Mr. HASTINGS. Mr. Chairman, the provision beginning on line 24, page 39, is:

That the Secretary of the Interior is hereby empowered, during the fiscal year ending June 30, 1922, to expend funds of the Choctaw, Chickasaw, Creek, and Seminole Nations available for school purposes under existing law for such repairs, improvements, or new buildings as he may deem essential for the proper conduct of the several schools of said tribes.

This is not the correct provision.

That may not be in this section, but I assure the chairman of the committee that there is a law which limits the Secretary of the Interior to expending no more out of the Seminole tribal fund for the coming year than he did for the past year. Without this authority he would not be authorized to expend the money for this purpose, because it would exceed perhaps the amount required to run the schools for another year.

Mr. ELSTON. Has the gentleman any figures as to how much is available for school purposes for 1922 in support of his statement that there is not enough to rebuild the building?

Mr. HASTINGS. I have no doubt about that. This amendment was submitted to us. We did not think we had a right to permit it to be inserted in the bill, because we thought it was a new item, but under the amendment and under the ruling of the Chair in the Arizona case, presented by the gentleman from Arizona [Mr. HAYDEN], namely, that it was for the rebuilding of a barn, I think it is clearly in order.

Mr. ELSTON. The Chair ruled against the first amendment offered by the gentleman from Arizona, who framed his amendment upon the theory that it was for a new building, but he submitted another amendment for the repair of the building.

Mr. HASTINGS. This is phrased in exactly the same language. It is for the repair of a barn which was burned, so as to come within the ruling of the Chair in the Arizona amendment.

Mr. CARTER. I call the attention of the gentleman to the fact that this amendment takes $1,000 from the Federal Treasury when all expenses of schools for the Five Civilized Tribes are paid for from tribal funds.

Mr. HASTINGS. Is not this to be paid out of the tribal funds?

Mr. CARTER. No; it is from the Federal Treasury.

Mr. McKEOWN. This amendment is supposed to provide for pay from the tribal funds.

Mr. CARTER. I suggest that the gentleman change the amendment so as to take the money out of the tribal funds.

Mr. McKEOWN. That is the purpose of it. If the amendment does not do that, I want to amend it.

Mr. HASTINGS. Of course, it ought to come from the tribal funds.

Mr. McKEOWN. Mr. Chairman, I ask unanimous consent to modify my amendment by adding the words "payable out of the funds of the Seminole Tribe."

The CHAIRMAN. Is there objection?

There was no objection.

The CHAIRMAN. The Clerk will report the amendment as modified.

The Clerk read as follows:

Amendment offered by Mr. McKEOWN: Page 40, line 5, after the period insert. "For repair of barn buildings at Mekusukey Academy, Seminole Nation, Okla., $1,000, payable out of the funds of the Seminole Tribe."

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Oklahoma.

The amendment was agreed to.

The Clerk read as follows:

For support and civilization of the Indians of the Umatilla Agency, Oreg., including pay of employees, $3,000, payable from tribal funds of said Indians.

Mr. KELLY of Pennsylvania. Mr. Chairman, it would be difficult to put more of irony and mockery into words than are contained in this provision: "For the support and civilization of the Indians of the Umatilla Agency, Oreg., $3,000." There are 20 more like it in this bill, and each and every one violates every fundamental of American ideals.

This $3,000 goes, every cent of it, for the pay of employees of the Indian Bureau. This reservation has been allotted, the Indians have their own farms and homes in a rich and fertile territory. All they need for "civilization and support" is to be made members of America and given the rights of American citizenship. Better than all this hothouse protection and orphan-asylum methods are liberty and law.

But this appropriation serves the purpose of keeping these original Americans under the Indian Bureau. It enables this self-perpetuating agency to restrict and repress those who should, in all justice, be facing their problems as free men. It is amazing to see how few Indians are set free, once they have been taken in by this agency. Only a few hundred are declared competent to become citizens each year, while thousands of the Indian youth reach the age of maturity in the same period.

The money belonging to these Indians is spent in ways they know not of and desire not. They get only an infinitesimal benefit from such expenditures, and they are helpless to prevent their own funds from becoming the means of imposing new fetters upon them. In the land of the free they must live in bondage from birth until death. In a Nation where questions of right and wrong are settled by equal and impartial laws they must bow to arbitrary decrees and despotic commands framed by individuals whose natural desire is to extend their own power.

Mr. Chairman, the peoples of the earth come here to America, without knowledge of the American language and with no

idea of our institutions. We make them citizens in five years and they become a part of the Nation. They are not herded off into reservations and dealt with through special agents who make rules day by day. If they were, the second generation would be as foreign as the newcomers and would remain alien stock forever.

But we take these native-born, real Americans and refuse to permit them to become Americanized. They are encouraged to remain on the reservations, and always there are restrictions and regulations. When finally, after many years, the lands are allotted and each Indian owns his own home, we still insist that there must be employees of the Indian Bureau to hold a heavy hand over them. There is but one reason for such a policy, and that is that the Indian Bureau can not exist without the Indians. There is another fact, however, which should weigh still more forcibly with the American Congress, and that is that a vast majority of the Indians in America to-day can exist and prosper much better without the Indian Bureau.

It is high time to prove that the Indian Bureau was organized for the sole purpose of freeing the Indians, not for enslaving them forever. It is time now, after 90 years of bureaucracy, to raise again the old cry of Moses to the taskmaster in Egypt, "Let this people go." [Applause.]

Mr. HASTINGS. Mr. Chairman, I desire to detain the committee for three or four minutes to make some general observations along the line of those made by the gentleman from Pennsylvania [Mr. KELLY]. The difficulty is that you can not get through this House by separate, independent bills the kind of legislation that ought to be gotten through. If we come in here with a separate bill that affects one particular tribe, a Member from that district offers it; it is referred to the Indian Committee; and if that committee favorably reports it, it is placed upon the calendar and then placed on the Calendar for Unanimous Consent. When it comes up for consideration, some sentimentalist in the East will object to its consideration. How are you going to get legislation? That is the difficulty.

I have had something to do with Indian matters, and I flatter myself that I know a little something about them. I have not been in harmony with the policy of the Indian Bureau with reference to how the Indians throughout the country should be controlled. I have been in favor of giving more authority to Indian agents throughout the country. I do not believe anyone should be employed except able, competent, and upright men. I believe the details of that work ought to be intrusted to the representatives of the department in the field and that the Indian Bureau here should confine itself to the broad policy of generally superintending Indian affairs throughout the country. When the Indian Committee makes an investigation and comes back and reports unanimously a bill to that effect, when we come on the floor of the House and try to get the legislation enacted, after the bill is favorably reported and comes up for consideration, some Member who never saw an Indian in his life objects to the consideration of the bill, and as a result we do not get the legislation.

That is the reason why the Indian Bureau has been so powerful. It has been able to have some man upon the floor who is not acquainted with the particular situation to raise an objection to the consideration of the remedial legislation designed to correct a good many of those things complained of by the gentleman from Pennsylvania. Of course, if this committee had brought in legislation upon this Indian appropriation bill it would have been subject to objection, and therefore we can not correct it in that way. And whenever you introduce a separate, independent bill in the House with reference to any one of the Indian tribes you will find somebody who never saw a real Indian in all his life say, "Well, I saw them down here at a moving picture show or some wild-west show." Some Members believe all Indians are one and the same; that you ought to legislate the same for the Indians in Oklahoma as you do for the wild tribes out West, and thinks there is no distinction whatever; and when Members from Oklahoma or Members from the State where the Indian reservation is located come in here with proper legislation so as to give the Indian superintendents and representatives some authority in the field, so as to accomplish the work expeditiously and lessen the cost to the Government, be of more benefit to the Indians themselves—when they come with that kind of legislation, let me say, Mr. Chairman and gentlemen of the committee, somebody on the floor objects to it because the Indian Bureau is opposed to it and wants to centralize all the authority in Washington, and are opposed, of course, to giving additional authority to representatives in the field. They always have somebody upon the floor upon unanimous-consent days who will object to the legislation.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HASTINGS. One minute more.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. HASTINGS. I want to call the attention of the membership of the House to the report of the Board of Indian Commissioners we provided for in this bill. They have made an exhaustive study of the Indian question and have strongly advised against this centralization in their last report, and, with the permission of the House, I want to put a few excerpts from the report of the commissioners, which condemns the things I am complaining of here to-day. The board of commissioners strongly recommend giving the agents and superintendents more authority in the field and protest against "paper work" and protest against the centralization of so much work and review here in Washington. I trust that some members of this committee and some Members of Congress will give some little attention to this part of the report of the Board of Indian Commissioners, which I heartily indorse. [Applause.]

The board of commissioners say in their report:

> There has been an unnecessary amount of centralization in Washington of the details of work which should be attended to in the field. Superintendents should be given more authority as respects many details which now are referred to Washington for decision, a course involving much unnecessary delay as well as labor. A well-developed organization by which superintendents are held responsible for results would lead to efficiency and saving of expense. But, with it all, proper salaries are absolutely essential.
>
> REDUCING "PAPER" WORK.
>
> The board consistently maintains an attitude of noninterference with the strictly administrative affairs of the Indian Service, although its members, from time to time, with the desire to cooperate in efforts to advance the welfare of the Indians, have given information to the Commissioner of Indian Affairs and offered suggestions touching the conduct of schools and reservation administration. When, however, the result of Indian Office administration may adversely affect the Indians, the board feels it properly may offer recommendations for remedial action.
>
> Entirely in this spirit of cooperation we therefore recommend that the Washington office make such modifications in its rules and regulations affecting the field service as will reduce the routine "paper" work now required of superintendents. The accounting system, the circulars sent out from Washington, the limited authority granted superintendents, the many calls for additional justification for pending transactions originating in reservations and schools require the making of so many reports and the writing of so many letters that altogether too much time of the superintendents is given to "paper" work to the detriment of their field activities.
>
> This is a common complaint, made to members of the board by the people in the field service and by many Indians. We have found the complaints amply justified by the facts; superintendents do not have the time to do all the routine office work necessitated by rules and regulations and also to properly supervise the affairs of the Indians. Superintendents are bonded officials, bonded to the United States which holds them to strict accountability for all Government and Indian money and property placed in their charge. It is only natural that the instinct of self-preservation should inspire them to do those things first which will protect them even though self-protection subordinates the sole reason for superintendencies and superintendents—the Indians, their welfare, health, education, progress, and the fact that they are wards of the Government.
>
> We realize that much of the office routine in reservations and schools springs from acts of Congress, but we confidently believe that the Indian Office can lessen the amount of "paper" work in the field without neglecting duties arising from legislation. The provision in the current Indian appropriation act, authorizing the appointment of deputy special disbursing agent, will go far toward relieving the situation, but more relief is needed if the Indian Service people are to give the Indians the personal attention which ought to be the prime requisite in Federal administration of Indian affairs.
>
> If superintendents were given wider discretionary powers; if their original authority were increased; if the keeping of accounts and the making of reports were simplified; if, in short, more confidence were reposed in superintendents, there would be such a reduction in office work that more hours a day and more days a week would be available for personal service among the Indians, not only to their benefit but to the betterment of the whole service, for much time would be saved in many transactions which are now subject to delays frequently adversely affecting the Indians and their property.

This has been my contention since I have been a Member of Congress.

The Clerk read as follows:

> For support and civilization of Indians at Grande Ronde and Siletz Agencies, Oreg., including pay of employees, $2,500.

Mr. HAYDEN. Mr. Chairman, I move to strike out the last word. In the Indian appropriation bill of last year there was a provision which directed the Secretary of the Interior to report upon the necessity for the construction of a road across the Papago Indian Reservation in Arizona. That report is now available and I ask unanimous consent to extend my remarks in the RECORD by printing the same.

The CHAIRMAN. The gentleman from Arizona asks unanimous consent to extend his remarks in the RECORD. Is there objection? [After a pause.] The Chair hears none.

The Clerk read as follows:

> For support and education of 275 Indian pupils at the Indian school, Rapid City, S. Dak., including pay of superintendent, $63,875; for general repairs and improvements, including construction and repair of roads, $8,000; for completing new school building and assembly hall, $5,000; in all, $76,875.

Mr. GANDY. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. GANDY: Page 42, line 10, insert after the semicolon "for equipment, dining hall and kitchen, new school building and assembly hall, $5,000," and correct the total to read "$81,875."

Mr. ELSTON. Mr. Chairman, I reserve the point of order on the amendment.

Mr. GANDY. Mr. Chairman and gentlemen of the committee, specific improvements have heretofore been appropriated for at the Rapid City School, which is located in my home city. The new school building was practically completed when I left home two weeks ago. In addition to the new school building, work is under way on the remodeling of the old school building and assembly hall, making a kitchen and dining room out of it, the money for which was appropriated some time ago. Appropriation was also made for remodeling the boys' dormitory, in which is now located the kitchen and dining room. This item was regularly estimated for, and, I think, from not understanding the local situation or through inadvertence, it was overlooked by the committee. The Assistant Commissioner of Indian Affairs in presenting the justification of the Rapid City Indian School advised the committee as follows:

When the new school building and assembly hall are completed it is proposed to remodel the old school building and assembly hall into a kitchen, bakery, and dining hall. The equipment now in use in the bakery and kitchen is inadequate and practically worn out and new equipment will be needed. Also chairs for the dining room, etc.

He also mentions some new desks for the school building. It seems to me a matter of just good business procedure that inasmuch as the new school building will be ready for occupancy in the near future the equipment be provided. It will not serve any good purpose when the new school building shall have been completed to delay the installation of the equipment. It will not be a matter of economy to move into the new kitchen, dining room, and bakery the old equipment that has been in use for now more than 20 years, which the Commissioner of Indian Affairs said is practically worn out and not sufficient to supply the needs of the school. So, fully understanding the local situation and knowing that this equipment is needed for the buildings which have already been heretofore provided, I hope that the committee will be disposed to include this item, so that the improvements which have been made may be at once put to use and the school may go on and continue its work of further usefulness.

Mr. ELSTON. Mr. Chairman, I reserved the point of order and I think the point may be good. This is probably one of the very, very few items which were proposed that the committee, invoking the rule in regard to limitation of its jurisdiction, felt it could not entertain. The committee took as its authority for the present bill the framework of last year's bill, which had been recognized by the Indian Affairs Committee as permissible items of appropriation, but where additional items were proposed in the estimates which were in the nature of new matter not contained in the body of the old bill the committee felt that it should not entertain them.

I would say further that the argument of the gentleman that Congress has completed this new building, and that it is ready for occupancy, and that it can not be made of use unless it is equipped, is convincing that provision should be made here for its equipment. I am not disposed to press the point of order, although I would if this were an item for a project which had not been commenced or in progress or involved an appropriation supplementary to some appropriation already made which could not be used by reason of its inadequacy. Here is a case, however, where the money has been spent and the building put up, and the building is not capable of use unless something further is done. I do not feel like pressing my point of order.

The CHAIRMAN. The question is on the amendment of the gentleman from South Dakota [Mr. GANDY].

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

For support of Sioux of different tribes, including Santee Sioux of Nebraska, North Dakota, and South Dakota: For pay of 5 teachers, 1 physician, 1 carpenter, 1 miller, 1 engineer, 2 farmers, and 1 blacksmith (art. 13, treaty of Apr. 29, 1868), $10,400; for pay of second blacksmith, and furnishing iron, steel, and other material (art. 8 of same treaty), $1,600; for pay of additional employees of the several agencies for the Sioux in Nebraska, North Dakota, and South Dakota, $95,000; for subsistence of the Sioux and for purposes of their civilization (act of Feb. 28, 1877), $243,000: *Provided*, That this sum shall include transportation of supplies from the termination of railroad or steamboat transportation, and in this service Indians shall be employed whenever practicable; in all, $350,000.

Mr. DOWELL. Mr. Chairman, I move to strike out the last word.

My objection to the bill has been merely in reference to the form of appropriation, and which has been corrected in a number of instances. But in this case I call attention to the fact that in addition to all of the items of appropriation heretofore there is contained in this paragraph, for pay of additional employees of the several agencies for the Santee Sioux of Nebraska, North Dakota, and South Dakota, $95,000.

Now, as I have understood the committee, in each paragraph there has been an appropriation of what was thought sufficient to take care of items in the paragraph. But now, in addition to all of the employees, the committee is recommending in this paragraph an addition of $95,000, for which they appear to have found no place in any of the other items. If it be correct that the committee has been giving to the House exactly what was necessary in these other paragraphs, they should not ask for an additional sum of $95,000.

Mr. HASTINGS. Will the gentleman yield?

Mr. DOWELL. I yield.

Mr. HASTINGS. This is a treaty item, and the Government of the United States is obligated in making the appropriation.

Mr. DOWELL. This item is merely for the additional employees. It has no reference to treaties. This item is for the pay of an additional number of employees to that provided for in any other part of the bill.

Mr. HASTINGS. The provision simply carries out the obligation of the Government of the United States with the several tribes in their treaties.

Mr. ELSTON. Will the gentleman yield a moment? I think I can explain this.

Mr. DOWELL. But the gentleman has made provision in the other paragraphs for employees to carry out these treaties, and to that I certainly have no objection. The Government ought to carry out in good faith every treaty that it makes. But, as I have understood it, this sum was appropriated in the other items; but this item covers a number of items and says it is for additional employees.

Mr. ELSTON. Will the gentleman yield?

Mr. DOWELL. I do.

Mr. ELSTON. I can see where the gentleman might be led to make his observation, because there are classifications in the fore part of the bill indicating that the appropriations under them are to cover the whole of the activities mentioned. But that is not the case. All additional amounts necessary to continue the activities are appropriated from tribal funds of the Indians affected, where they have any tribal funds. Now this item, while it is an item for which money is appropriated from the Treasury, is one where supplemental moneys are appropriated out of tribal funds. There is no duplication of any kind, as the gentleman will see when we come to a much larger omnibus appropriation out of tribal funds to supplement appropriations out of the Treasury. I can assure the gentleman that his theory is not well grounded.

The CHAIRMAN. The time of the gentleman has expired.

Mr. DOWELL. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. DOWELL. May I inquire—and I assume the gentleman's statement is correct—why is this placed in a lump sum? Why did not the committee provide for the items where they belonged? If these are necessary, I have no objection to them.

Mr. ELSTON. The Indian Affairs Committee commenced that very process last year, and this subcommittee intends to carry it forward. We were operating in such a limited time that we were bound more or less by the practices and traditions of the old committee. If this subcommittee functions in the future, it will see that as an item covering certain activities is approached, and appropriations from the United States Treasury are made under that item, that all other supplemental appropriations out of tribal funds shall appear under that item, so that the total appropriations from the Treasury and from tribal funds will appear under that one subhead, and it will become perfectly apparent then how much is spent for the activity.

Mr. DOWELL. Then, as I understand the gentleman, the reason it has not been apportioned at this time is because the committee did not know exactly what the amount would be?

Mr. ELSTON. Not at all.

Mr. DOWELL. Therefore you put it in a lump sum at the end of this paragraph so that the department could use it wherever it saw fit?

Mr. ELSTON. That is not the fact. It is perfectly possible now to take the spread or break-up of this amount submitted by the Indian Bureau in the Book of Estimates and apply that spread or break-up of items to each of the subheads where the appropriation was made from the United States Treasury and arrive at the total. I refer the gentleman to the Book of

Estimates where this one item is distributed, and he will see that that is the case.

Mr. DOWELL. The gentleman promises that he will not do this any more?

Mr. ELSTON. The gentleman says that the making of appropriations in this manner was inaugurated by the Indian Affairs Committee 50 years ago and has been continued by that distinguished committee up to date, and what little departure has been made from it has been inaugurated in recent years and has been carried forward by this subcommittee.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

The Secretary of the Interior is hereby authorized to withdraw from the Treasury of the United States, within his discretion, the sum of $325,000 of the principal funds to the credit of the Confederated Bands of Ute Indians and to expend the sum of $75,000 of said amount for the benefit of the Ute Mountain (formerly Navajo Springs) Band of said Indians in Colorado, and the sum of $175,000 of said amount for the Uintah, White River, and Uncompahgre Bands of Ute Indians in Utah, and the sum of $75,000 of said amount for the Southern Ute Indians in Colorado, which sums shall be charged to said bands, and the Secretary of the Interior is also authorized to withdraw from the Treasury the accrued interest to and including June 30, 1921, on the funds of the said Confederated Bands of Ute Indians appropriated under the act of March 4, 1913 (37 Stat. L., p. 934), and to expend or distribute the same for the purpose of promoting civilization and self-support among the said Indians, under such regulations as the Secretary of the Interior may prescribe: *Provided*, That the Secretary of the Interior shall report to Congress, on the first Monday in December, 1922, a detailed statement as to all moneys expended as provided for herein.

Mr. ELSTON. Mr. Chairman, I offer an amendment, to strike out the present paragraph and substitute in lieu thereof the following: "The sum of $325,000 is hereby appropriated out of the principal funds to the credit of the Confederated Bands of Ute Indians," and so forth, and in the tenth line the draft I am proposing would strike out the words "and to expend."

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from California.

The Clerk read as follows:

Amendment offered by Mr. ELSTON: Page 44, beginning in line 7, strike out the paragraph ending with line 3, on page 45, and insert: "The sum of $325,000 is hereby appropriated out of the principal funds to the credit of the Confederated Bands of Ute Indians, the sum of $75,000 of said amount for the benefit of the Ute Mountain (formerly Navajo Springs) Band of said Indians in Colorado, and the sum of $175,000 of said amount for the Uintah, White River, and Uncompahgre Bands of Ute Indians in Utah, and the sum of $75,000 of said amount for the Southern Ute Indians in Colorado, which sums shall be charged to said bands, and the Secretary of the Interior is also authorized to withdraw from the Treasury the accrued interest to and including June 30, 1921, on the funds of the said Confederated Bands of Ute Indians appropriated under the act of March 4, 1913 (37 Stat. L., p. 934), and to expend or distribute the same for the purpose of promoting civilization and self-support among the said Indians, under such regulations as the Secretary of the Interior may prescribe: *Provided*, That the Secretary of the Interior shall report to Congress, on the first Monday in December, 1922, a detailed statement as to all moneys expended as provided for herein."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. WELLING. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The gentleman from Utah offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. WELLING: Page 45, after line 3, insert a new paragraph, as follows:

"The Secretary of the Interior is hereby authorized to withdraw from the Treasury of the United States the sum of $12,000 of the principal funds to the credit of the Confederated Bands of Ute Indians, and expend the same, under rules and regulations to be prescribed by him, in aid of the public schools in Uintah and Duchesne County school districts, Utah: *Provided*, That Indian children shall at all times be admitted to such schools on an entire equality with white children, the tuition of such Indian children to be paid out of tribal funds to be covered into the Treasury."

Mr. ELSTON. Mr. Chairman, I reserve a point of order on that.

The CHAIRMAN. The gentleman from California reserves a point of order on the amendment.

Mr. WELLING. Mr. Chairman, at the time of the establishment of the irrigation project among the Uintah Indians in eastern Utah it was necessary for the State to appropriate the water that was used on this reservation. It was found that the Indians could not make beneficial use of the water in the time that was allotted under the State law of five years. At the expiration of five years the time was extended for five years. At the expiration of 10 years the time was extended again for 5 years by a special enactment of the Utah Legislature.

Now, it was found that in order to protect the rights of the Indians to the use of this water which had been appropriated by the Indian Bureau it was necessary to prove beneficial use of the water. This the Indians, unaided, were not able to do. It became necessary for the Indian Bureau to advertise extensively and to bring into this region very many white families from other parts of the United States in order to cultivate these lands and thereby prove their right to the water under our irrigation laws.

There is in all in this reservation 83,000 acres of land. Seventy-two thousand acres of land was irrigated last year, and that is every acre that is under the construction works of the project. It has been found, and is shown in the hearings on page 464, that there have been 900 leases made to white men under the project. These leases were issued solely for the benefit of and to protect the water rights of the Indians. It thus happens that 900 white men have come into that region—approximately 900 heads of families—and have brought their families with them. Less than 10 per cent of the land of the entire area is under State control and subject to taxation. Ninety per cent of the land is Indian land within this area and it is not subject to taxation. This condition places an intolerable burden upon the State and local county government in order to raise the necessary funds to support these schools.

Now, this item has been carried in the bill for three or four years past. It was thrown out by the committee this time. It is confessedly under the rules subject to a point of order. I hope on second thought the committee will feel that they ought to permit it to go in, because these children have been brought there solely to benefit the Indian lands and make beneficial use of the waters in this Indian reservation. Furthermore, all these children participate, the Indian children with the white children, in the use of these funds. I hope the gentleman will withdraw the point of order.

Mr. ELSTON. Mr. Chairman, I feel compelled to make the point of order on this amendment.

The CHAIRMAN. The Chair sustains the point of order. The Clerk will read.

The Clerk read as follows:

The Secretary of the Interior is hereby authorized to withdraw from the Treasury of the United States, within his discretion, the sum of $150,000 of the principal funds to the credit of the Confederated Bands of Ute Indians and to expend same for continuing the construction of lateral distributing systems to irrigate the allotted lands of the Uncompahgre, Uintah, and White River Utes in Utah, and to maintain existing irrigation systems authorized under the act of June 21, 1906.

Mr. ELSTON. Mr. Chairman, I offer the following amendment, to strike out the paragraph and insert in lieu thereof a paragraph beginning, "The sum of $150,000 is hereby appropriated out of the principal funds to the credit of the Confederated Bands of Ute Indians," leaving out the words "to expend same" in the text.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from California.

The Clerk read as follows:

Amendment offered by Mr. ELSTON: Page 45, line 4, strike out the paragraph beginning with line 4 and ending on line 12 and insert: "The sum of $150,000 is hereby appropriated out of the principal funds to the credit of the Confederated Bands of Ute Indians for continuing the construction of lateral distributing systems to irrigate the allotted lands of the Uncompahgre, Uintah, and White River Utes in Utah, and to maintain existing irrigation systems authorized under the act of June 21, 1906."

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from California.

The amendment was agreed to.

The Clerk read as follows:

WASHINGTON.

SEC. 22. For support and civilization of the D'Wamish and other allied tribes in Washington, including pay of employees, $6,500.

Mr. HAYDEN. Mr. Chairman, I move to strike out the last word. The gentleman from New York [Mr. SNYDER], chairman of the Committee on Indian Affairs, has been criticized by some Members of the House for making points of order against certain items in this bill which were included therein in violation of the rules of the House. In my opinion the gentleman from New York is entitled to great credit for the courageous stand he has taken. I am sure that a large majority of the Members of the House appreciate the good work that he has done in bringing to the attention of the Congress and of the country in this striking manner the unworkable condition in which this new budget rule places the House. If the committees of the House which by experience know the most about legislation with respect to particular activities of the Government, such as Military Affairs, Naval Affairs, or Indian Affairs, are not to be permitted to make the appropriations, then they must be made within the narrow limitations of specific authorizations provided by law, which will seriously interfere with good administration in every branch of the Government.

There was no member of the present Committee on Appropriations more vehement in his disapproval of what the gentleman from New York [Mr. SNYDER] was accomplishing by making points

of order against items in this bill than my good friend, the gentleman from Oklahoma [Mr. HASTINGS]. In view of his more recent expressions, I would like to read to the committee some extracts from a speech that the gentleman from Oklahoma made when the budget bill was under consideration in the House a little over a year ago. He then said:

There is no reason why the rules should be changed so that the work of all the committees is centered in one large committee of 35, as the proposed rule provides. In fact, I have heard no legitimate argument in its favor.

* * * * * * *

If the powers of the present appropriating committees are preserved, when the estimates are submitted by the President to Congress the estimate for the Postal Service will be referred to the Committee on the Post Office and Post Roads, the estimate for agriculture will be referred to the Committee on Agriculture, the estimate for the Indian Service will be referred to the Committee on Indian Affairs, and the estimates for the other departments will go to their appropriate committees. These committees are thoroughly familiar with the work of the various departments, having spent years in studying the same. They are familiar with the legislation for which the expenditures are asked and are better qualified to recommend whether any particular branch of the Government should be continued or whether it can be cut down without injury.

Mr. BLANTON. Will the gentleman from Arizona yield?

Mr. HAYDEN. I yield.

Mr. BLANTON. At that time our distinguished friend from Oklahoma [Mr. HASTINGS] did not know that he was going to be honored with a place on the Appropriations Committee, and being well versed in Indian affairs he believes now that the work is well done.

Mr. HAYDEN. There is probably some virtue in the statement made by the gnetleman from Texas. At least there are indications that since the gentleman from Oklahoma [Mr. HASTINGS] became a member of the Committee on Appropriations his opinion about the unwisdom of concentrating all the power to report appropriations in a single committee has changed. But let me read further from his speech, which had my hearty approval at the time and in which I still concur:

Again, from time to time, as legislation is enacted, the various committees must of necessity familiarize themselves with the additional financial burdens the same will place upon the Government. They will, therefore, keep better informed as to the current needs of these particular bureaus or departments. In my opinion there is every argument in favor of the retention of the committees and none in favor of their consolidation. A larger committee would have to divide itself into subcommittees and could not possibly give the necessary time to investigate details.

I am quite sure that something was said in the course of this debate to the effect that this bill was considered by the full Committee on Appropriations for only about 25 or 30 minutes, and that the work of the subcommittee was not altered or changed in the slightest particular.

The gentleman from Oklahoma goes on to say in this speech from which I am reading:

It would have to depend upon the information contained in the estimates and such additional information as may be given by the departments and bureaus. It could not make any independent investigation. The old committees have plenty of time to familiarize themselves with every detail of any bureau or department and can be depended upon to see that greater economy is practiced. Many of the old committees have only one department to consider appropriations for.

I can not refrain from congratulating the gentleman from Oklahoma upon the accuracy with which he foretold just what would happen. With prophetic vision he saw how the urgent and important activities of the various departments of the Government would suffer if the power to make the necessary appropriations was taken away from the several committees which are most familiar with their needs.

In view of the fact that the gentleman from Oklahoma [Mr. HASTINGS] has now become a member of the great Committee on Appropriations, where all appropriating power is centered, I want to inquire of the gentleman whether that fact has changed his former views as to desirability of creating such a committee or whether he is still of the same opinion as expressed in the speech which he made on October 20, 1919?

Mr. HASTINGS. When the gentleman from Arizona has completed his remarks, it is the purpose of the gentleman from Oklahoma to ask permission to address the committee, and then he will answer in his own good time.

Mr. HAYDEN. I believe, Mr. Chairman, that I am justified in making the observation that human nature is such that it may make a difference whether a gentleman is a member of the most powerful committee of the House or not, as to what his attitude may be on an important question of this kind. I merely desire, in the best of good spirits, to call the attention of the House to the fact that the gentleman from Oklahoma [Mr. HASTINGS] was a severe critic of the creation of the proposed budget committee. Now that he is a member of that committee he most ardently defends its work.

Mr. HASTINGS. Mr. Chairman, I ask permission to proceed for 10 minutes.

The CHAIRMAN. The gentleman from Oklahoma asks unanimous consent to proceed for 10 minutes. Is there objection?

There was no objection.

Mr. HASTINGS. Mr. Chairman and gentlemen of the committee, my good friend from Arizona [Mr. HAYDEN] is always diligent, always in good humor, and always a capable Member of the House. I am fond of him personally. I am glad to see the industry that he has displayed in looking back over what I regard as some very pertinent remarks that I made when the budget bill was brought before the House, as I now recall a year ago last October. I think I called attention to the fact that if that bill passed and the rule that was introduced at the same time was adopted, it would have a certain effect upon the House of Representatives. I called attention then to the fact that you would have a consolidation of these committees into one big committee, and I said then that this big committee would have to be subdivided into small committees, and I called attention to what would come about if that were done. Now, Mr. Chairman and gentlemen of the committee, when I called attention to that at that time, I did not have the support of my good friend from Arizona [Mr. HAYDEN]. He did not take the floor as I did then and call attention to what would come about. Why, I suspect that perhaps some of those who are now inveighing against this procedure thought that perhaps the lightning would strike them and that they would be on this large committee. My good friend from New York [Mr. SNYDER], genial, capable, helpful, as he always is, always industrious—I did not have his good support then as we have had it here in the last three or four days. And my good personal friend and colleague from Oklahoma [Mr. CARTER] did not come to my assistance when this resolution was reported. They uttered no protest a year ago last October. Why? I suspect that my good friend from Oklahoma [Mr. CARTER] and my good friend from New York [Mr. SNYDER], both of whom I love, and both of whom I commend to the committee and the country, as well as my good friend from Arizona [Mr. HAYDEN]—I suspect that they had no objections then because they thought and perhaps had reason to believe that they would be placed on this committee.

Now, I want to say, Mr. Chairman, that I entertain the views I thus expressed. I was against the consolidation of these committees. But let us see what has been the practical result. It so happens that without my knowing about it, in my absence, I was selected as a member of this committee. What has been the result of our work? I dare say that when you look it over, when the membership of the House examines it more closely, they will find that it is the best Indian appropriation bill that has ever been brought into the House since I have been here. We have cut down the appropriation $903,000. We have not put any legislation on it other than that indorsed by the gentleman from Arizona and by the chairman of the Indian Committee, the gentleman from New York, and my good friend the minority member of the committee from Oklahoma. Every one of them said that these provisions were good last year. They all said that they were good for the Indian Service for the last 10 years.

Mr. CARTER. The gentleman has not heard me say anything about their being bad.

Mr. HASTINGS. No; but I am calling to the attention of the House the fact, as I thought the gentleman was protesting against the procedure.

Mr. GARRETT. If the gentleman will yield, although I have not followed the bill closely, I have got the idea that by the time the gentleman from New York gets through with the bill there will not be much left of it.

Mr. HASTINGS. There are only three or four items that were knocked out by the gentleman from New York, not on their merits but by points of order, and those are items which the gentleman from New York has indorsed for the last five years. He said that these items were for the good of the Indian Service. When we reported them in years past he said they were all right and said they were proper items on an appropriation bill.

Mr. GARNER. Will the gentleman yield?

Mr. HASTINGS. Yes.

Mr. GARNER. The gentleman makes a sound argument for the consolidation of these committees because he says that this is the best Indian appropriation bill that has been brought in for the last 10 years. I congratulate him on the fact that the committee did bring in the best Indian appropriation bill that has been brought into the House of Representatives.

Mr. HASTINGS. I am trying to tell the House about it. Suppose I had not been placed on the committee, suppose the responsibility had not been upon me to assist in preparing this bill. I would not have felt myself called upon because I was a little bit peeved, because I did not get on the committee, because I did not help frame the bill—unless I had had some objections to the real substance of it—I would not have felt called upon to come into the House and try to destroy the Indian Service. I think too much of the Indian Service. The Indians are the helpless wards of the Government. Because I might be opposed to the form of the bill I would not feel called upon to vent my spleen on Indians who can not help themselves. It is the Indians who will suffer.

I want to say that when I fight I never strike below the belt; I strike a body blow. I never strike at the children of the country, and these Indians are the wards of the Government; they can not help themselves; they are helpless. In striking out these three or four items in the first part of this bill, let me say, Mr. Chairman and gentlemen of the committee, you strike at the Indian Service of this country. I do not agree with the Indian Bureau in many of the things that are done, but I want to say that because I do not agree with the Indian Bureau I am not going to get peeved and I am not going to try to wreck the Indian Service.

Mr. HAYDEN. Will the gentleman yield?

Mr. HASTINGS. Yes.

Mr. HAYDEN. I would like to have an answer to my question. Is the gentleman now in favor of one large appropriating committee or would he prefer that the appropriations be made in the old way, by bills reported from a number of committees, as he stated in his speech made in October, 1919?

Mr. HASTINGS. The gentleman has asked me a direct question, but inasmuch as I am not permitted to be here next session, and inasmuch as I am not going to take any part in the adoption of the rules next session, I want to suggest to my good friend and others that the place to thresh this out is not here on the Indian appropriation bill, when you are providing for the Indians themselves, but the place for you to fight it out is in your caucuses and in the House on the adoption of the rule. If you do not like it when Congress reconvenes, as I understand it will in March or April of this year, then is the time for you to fight it out.

Mr. HAYDEN. Will the gentleman yield again?

Mr. HASTINGS. Yes.

Mr. HAYDEN. Will not the gentleman concede that the most effective way to direct attention to the present situation, whereby all the authority to report appropriation bills is concentrated in a single committee of 35, is to make points of order on the appropriation bills whenever that committee exceeds its authority?

Mr. HASTINGS. No; I do not agree to that for this reason: The gentleman is too good a Member and too frank not to admit that points of order could have been made and raised against every one of these items last year just as effectively as now. You did not object to them on their merits.

The CHAIRMAN. The time of the gentleman from Oklahoma has expired.

Mr. CARTER. Mr. Chairman, I ask that the gentleman may have one minute more.

Mr. ELSTON. Mr. Chairman, I object. I think that this would provoke a general discussion. I have been quiet upon the general proposition, although I might like to be heard.

Mr. CARTER. Will not the gentleman permit him to speak for one minute.

Mr. ELSTON. I feel that I should object.

Mr. CARTER. If the gentleman does not want to do that, of course, we can cause the loss of a considerable amount of time.

Mr. ELSTON. If it is only for one minute, very well; but I feel that I might be heard on this myself, though I will not ask the indulgence of the committee. I shall not object to one minute.

The CHAIRMAN. The gentleman from Oklahoma asks that the time of his colleague might be extended for one minute. Is there objection?

There was no objection.

Mr. CARTER. Mr. Chairman, I want to ask the gentleman if, after his vast experience here, he does not think it might be a good idea for him to leave some suggestions for the guidance of the House after he departs on the 4th of March next?

Mr. HASTINGS. Oh, I have left some suggestions here through the reporting of this bill, which I think is a model bill for my colleague to follow in the next Congress.

Mr. CARTER. I mean suggestions as to whether we should concentrate appropriations in one committee or keep them in the different committees as we have in the past.

Mr. HASTINGS. I want to say to the gentleman that I recommend that he reread the speech that the gentleman from Arizona [Mr. HAYDEN] has dug up, and then we would like to have the assistance of my good friend from Oklahoma in seeing that that sort of a rule is adopted.

Mr. CARTER. Oh, the gentleman will have my assistance, but evidently I did not hear that speech. It might have affected my vote if I had, possibly a great deal more than it did the other Members of the House, because I understand that, even after that speech was made, there were only three votes against the concentration of appropriations in this one committee.

Mr. HASTINGS. Oh, yes; but that included the gentleman from Oklahoma as well as the other members of the Committee on Indian Affairs.

Mr. CARTER. Oh, but the gentleman did not vote, for he was not here.

Mr. HASTINGS. Oh, I thought he was always here, attending to his duty.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For continuing construction and enlargement of the Wapato irrigation and drainage system, to make possible the utilization of the water supply provided by the act of August 1, 1914 (38 Stats. L., p. 604), for 40 acres of each Indian allotment under the Wapato irrigation project on the Yakima Indian Reservation, Wash., and such other water supply as may be available or obtainable for the irrigation of a total of 120,000 acres of allotted Indian lands on said reservation, $250,000: *Provided*, That the entire cost of said irrigation and drainage system shall be reimbursed to the United States under the conditions and terms of the act of May 18, 1916: *Provided further*, That the funds hereby appropriated shall be available for the reimbursement of Indian and white landowners for improvements and crops destroyed by the Government in connection with the construction of irrigation canals and drains of this project.

Mr. SUMMERS of Washington. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Amendment by Mr. SUMMERS of Washington: On page 46, line 16, strike out "$250,000" and insert in lieu thereof "350,000."

Mr. SUMMERS of Washington. Mr. Chairman and gentlemen, this refers to an appropriation in behalf of the Wapato irrigation and drainage system, to which I referred on the floor of this House a few days ago. I desire to read a telegram which comes from the Yakima Reservation irrigation district:

YAKIMA, WASH., *January 15, 1921.*

Hon. JOHN W. SUMMERS,
House of Representatives, Washington, D. C.:

Engineer Holt requested appropriation $600,000 for Wapato project, which the department reduced to $350,000 and which is further reduced by the committee to $250,000. We feel serious mistake to so hamper engineering department, when all equipment is on the ground ready for continuous development. Much of the work during the last two years was in extending main canals, so that from now on practically all appropriations will be expended on constructing laterals and drains, thereby rapidly increasing the irrigable acreage. For example, completion of lateral No. 4, which is the next work projected, will bring under cultivation about 34,000 acres, at an estimated cost of $20 per acre or less. Good business judgment should prompt sufficient appropriation to keep present crew and equipment actively engaged, so as to reduce per acre construction cost for the Indians.

YAKIMA RESERVATION IRRIGATION DISTRICT,
By F. A. WIGGINS, *President.*

Gentlemen, this money is all reimbursable. And it is not a question of some distant date. The bill of one year ago carried a provision that all this money is reimbursable at the rate of $5 per acre per annum, beginning with last December. One hundred and thirty thousand dollars are now being collected in the way of repayments. There is not a question of the repayment of this money, there is not a question as to the expenditures that have been made on this project. The Commissioner of Indian Affairs, the Indian Committee, and everyone conversant with the situation agrees that this is one of the best managed, the most fertile, the most productive of irrigation projects in the whole Indian Service.

Mr. MADDEN. Mr. Chairman, will the gentleman yield?

Mr. SUMMERS of Washington. I yield.

Mr. MADDEN. How much is the total cost of this project?

Mr. SUMMERS of Washington. There are 120,000 acres in the Wapato project, of which some 70,000 are already under cultivation. Approximately $3,000,000 have been expended during the past several years.

Mr. MADDEN. How much an acre is it going to cost?

Mr. SUMMERS of Washington. Something like $30 an acre. It is one of the very cheapest projects that has ever been undertaken. The crop yield last year was equal to more than three times the total amount that has been expended on the project by the Government. About $3,000,000 has been expended, and the crop yield last year alone was between nine and eleven million dollars.

Mr. MADDEN. How much money has been reimbursed?

Mr. SUMMERS of Washington. There was no time fixed for the reimbursing until a year ago. We then fixed $5 per acre, and on the 30,000 acres owned by white settlers they are now collecting for last year $150,000.

Mr. MADDEN. What about that controlled by the Indians?

Mr. SUMMERS of Washington. That is all to be repaid, but I could not answer so definitely as to their repayments. This project has everything to recommend it to your favorable consideration, and I trust the amendment will prevail.

The CHAIRMAN. The time of the gentleman from Washington has expired.

Mr. ELSTON. Mr. Chairman, the committee reluctantly oppose this amendment. The committee believes that it has given sufficient for maintenance and operation and for reasonable enlargement. There must be a leveling decrease in appropriations for these projects. The gentleman from Washington [Mr. SUMMERS] made a very strong argument in the House not long ago, and his presentation before the committee has been earnest and able. There is no question but that this project is one of the best projects in the Indian Service, and is returning in the way of products a large amount of money, but the committee did not feel that they should begin a policy of enlarging these projects at this time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Washington.

The amendment was rejected.

The Clerk read as follows:

For operation and maintenance, including repairs, of the Toppenish-Simcoe irrigation system, on the Yakima Reservation, Wash., reimbursable as provided by the act of June 30, 1919 (41 Stat. L., 28), $5,000.

Mr. SUMMERS of Washington. Mr. Chairman, I offer the following amendment which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. SUMMERS of Washington: Page 47, line 3, strike out "$5,000" and insert "$50,000."

Mr. SUMMERS of Washington. Mr. Chairman, the situation of this project is this: Last year we appropriated $75,000, with which a dam and some diversion works were constructed.

We have provided for the repayment charge to begin at once on this project and we have not gotten water to the land. Fifty thousand dollars, the additional appropriation, which was asked for last year, will help to carry the water over a large body of land and will make it possible for the settlers to make the repayment charge. But I insist that it is hardly a reasonable proposition to extend to a questionable irrigation district on Indian lands over in Montana a period of 10 or 15 years' time before the repayment charge begins, and then in another instance here, on lands about which there is no question, we partly complete a little project and then demand the repayment charges even before we have gotten the water onto the land. I sincerely trust that this small appropriation will have your favorable consideration. I believe this is the minimum amount that should be appropriated.

The lands are in great demand, as they lie adjacent to Toppenish, which is a thriving little city of 3,000 people. A business town that is growing by leaps and bounds, and of which any State might well be proud.

Mr. ELSTON. Mr. Chairman, the estimates made by the department for this project is only $5,000, and they gave reasons for no larger sum, and the committee felt it was justified in appropriating only $5,000. In this case the judgment of the committee and the judgment of the bureau are exactly the same, and I feel that the amendment should be defeated.

The question was taken, and the amendment was rejected.

The Clerk read as follows:

For operation and maintenance, including repairs, of the Ahtanum irrigation system on the Yakima Reservation, Wash., $3,000, reimbursable under such rules and regulations as the Secretary of the Interior may prescribe.

Mr. SUMMERS of Washington. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Mr. SUMMERS of Washington offers the following amendment: On page 47, after line 13, insert a new paragraph, as follows:

"For continuing construction of an irrigation system on the Yakima Indian Reservation adjacent to Satus Creek, reimbursable as provided in the act of May 18, 1916, $100,000."

Mr. ELSTON. Mr. Chairman, I reserve a point of order on that.

Mr. SUMMERS of Washington. Mr. Chairman, in 1913 the Congress recognized that the Indians of the Yakima Indian Reservation had been deprived of their just water rights and a joint congressional commission was appointed, which examined into the whole subject, reporting back that water sufficient for a 40-acre Indian allotment for each Indian of the Yakima Tribe was just and should be provided, and the law of August 1, 1914, makes such provision, but does not provide for any specific part of the reservation. It provides for the "Yakima Indian Reservation." Time and again that language is used, and it speaks of water "adequate for the irrigation of 40 acres on each Indian allotment; the apportionment of this water to be made under the direction of the Secretary of the Interior." A little further along occurs this language:

The Secretary of the Interior is hereby directed to prepare and submit to Congress the most feasible and economic plan for the distribution of said water upon the lands of said Yakima Reservation, in connection with the present system and with a view of reimbursing the Government for any sum it may have expended or may expend for a complete irrigation system for said reservation.

Immediately after that occurs the appropriation for "operation and maintenance of the irrigation system on lands allotted to Yakima Indians in Washington."

Mr. ELSTON. Will the gentleman yield?

Mr. SUMMERS of Washington. I will.

Mr. ELSTON. This is a new unit of the whole project?

The CHAIRMAN. Will the gentleman allow the Chair to ask a question?

Mr. SUMMERS of Washington. I will.

The CHAIRMAN. Is there any limit of cost placed on the project by the original act?

Mr. SUMMERS of Washington. Yes; it provided for a certain amount of water for each 40-acre allotment on the Yakima Indian Reservation, and——

The CHAIRMAN. The question the Chair desires to ask is, Was there any limit fixed on the cost of the entire project and whether this $100,000 proposed to be appropriated is an amendment in excess of the limit of cost?

Mr. SUMMERS of Washington. Mr. Chairman, this is a continuing appropriation, I contend, and is not subject to a point of order. There have been appropriations one after another for continuing this work on the Yakima Indian Reservation. I have ascertained that the Secretary of the Interior has prepared a plan and the recommendations as authorized by law, and they have been submitted to the Congress. There was a report made as long as five years ago. It was brought to the attention of the committee again this year. It is adjacent to what we speak of as the Watato and Toppenish-Simcoe irrigation systems. It is all part of the same tract of land, it is for the same Indians except we are taking care of part of the Indians, and we are neglecting to do anything for other Indians.

Mr. ELSTON. Mr. Chairman, the point which the gentleman has presented would require some examination. I do not feel like pressing my reservation or point of order, because I believe this is a new project and comes more within the criticism I have made before with regard to the enlargement of these projects. We have declared a policy of reducing them without drastic action, and I feel it would take less time of the committee for me to withdraw the point of order and bring the matter to a vote, which I do.

Mr. HAYDEN. Mr. Chairman, I desired to be heard on the point of order, but I understand the gentleman has withdrawn it.

The CHAIRMAN. The point of order is withdrawn, and the question is on the amendment.

Mr. SUMMERS of Washington. Mr. Chairman, I would like to be heard on the amendment. I want to say this is part of the same tract of land and that we are under obligation to do something for these Indians the same as for the Indians who live a few miles away on the same reservation. It is shown conclusively by affidavits which have been submitted that the production here runs from $125 to $275 per acre on land adjacent, and that the day that these lands are irrigated they will change in value from about $5 an acre to $200 on up to $400 an acre. There is no question about the return of this money. We are asking for only a small amount. The department has made this small estimate even in view of the fact that they could use, and could economically use, a very much larger sum of money.

The following telegram from one of the leading citizens of that community covers the situation:

MABTON, WASH., *January 14, 1921.*

JOHN W. SUMMERS, M. C.,
Washington, D. C.:

Impress opposition with facts. Satus not new project but merely part Yakima Reservation irrigation system commenced years ago. This part has been shamefully neglected in favor of other parts of system. Work should have started in 1915, and further delay should not be permitted on wrong impression that it is new project.

T. W. HOWELL.

Let me go into detail on the Satus project:

LOCATION.

The Satus project lies in the old John Day Lake bed and is situated in Yakima County, Wash., constituting a part of the

Yakima Indian Reservation. In fact, the Satus project may properly be considered an extension of the Wapato and Toppenish-Simcoe projects. The Satus project was reported on favorably by engineers of the Indian Service in 1915. Appropriations have been made for development work on other parts of the reservation, but to this date the Federal Government has done nothing for the allottees on this part of the reservation. These lands can be developed at an exceedingly low cost, and every dollar put into the project will be reimbursable to the Treasury of the United States.

SOIL.

The soil on the Satus project is from a few feet to 50 or 60 feet deep, mostly a sandy, Yakima loam. It is similar to the soil in the Sunnyside project, which leads all other reclamation projects, producing $13,000,000 of crops in 1919, and the Toppenish project, which produced $10,000,000 in crops in 1919. Both of these projects adjoin the proposed Satus project. Naturally the climate is precisely the same as on these two most successful projects.

BOUNDARIES.

The boundary of the project is formed by the Yakima River on the north and east and Toppenish Creek on the north, while Satus Creek flows through the proposed project.

PRODUCTIVITY.

The land is suitable for growing wheat, oats, alfalfa, timothy, clover, fruit, potatoes, corn, and hops, as well as other crops. Alfalfa, timothy, and clover produce from 6 to 7 tons per acre in three cuttings; potatoes, 8 tons to the acre; corn, as high as 100 bushels per acre. In value this land is capable of producing $125 per acre, or a total of $5,000,000 in crops annually.

ALLOTMENTS.

Of this land 32,000 acres is allotted to 400 Indians; 2,145 acres is sold to 33 whites. These latter tracts run from 40 to 80 acres each.

CLIMATE.

The climate is typical of the best crop producing sections of the West. The temperature runs high in summer, but the heat is not oppressive, due to the low humidity. The summer nights are cool. The winters are mild with the temperature seldom below the zero mark. The growing season is from May to October. The drainage is unusually favorable, and the rainfall is from 5 to 8¼ inches. Three acre-feet of water is required for proper irrigation.

DRAINAGE AREA.

The drainage area from Satus Creek and Dry Creek covers 445 square miles, with an average run-off of 90,000 acre-feet. The return flow from the Wapato project and from other sources is also available so the water supply is more than ample.

MARKETING.

The main line of the Northern Pacific Railroad runs throughout the full length of the project with a station located thereon. No greater than a 6-mile haul would be required from any part of the project. There are also numerous near-by towns that would furnish local markets for Satus farmers.

RIGHT OF WAY.

Right of way for canals have been reserved from allottees and purchasers.

WATER RIGHT.

The allottees desire irrigation, and action should be taken at once to secure water right before it is filed on by others. The allottees have had no help whatever in the way of irrigation facilities. The major portion of the land is valueless without water.

ESTIMATED COSTS.

In 1916 the estimated costs of irrigating 40,000 acres was $53.40 per acre, but it is now estimated at $75 per acre. About 9,000 acres can be irrigated and drained at $20 per acre. This can be completed in one year's time, and there are now hundreds of idle ex-service men in the county who could be employed on this work.

WATER SUPPLY.

This 9,000-acre tract could be irrigated from the return flow from the Wapato project, which water is now wasted, but may be forfeited by delay. The 9,000-acre tract is practically all owned by Indians. A total of $174,280 is requested for irrigating the 9,000 acres. The crop yield for one year will be about double the cost of construction.

TESTIMONIALS.

I have been furnished with sworn statements from a number of farmers who are farming in the immediate vicinity of the proposed Satus project. I will quote from a few of them:

E. E. Cotter farms 76 acres, which is now of the reasonable market value of $250 per acre, but prior to being put under water was worth $3 per acre. His entire ranch is in hay, of which he sold $10,400, or an average of $136.84 per acre, from his 1919 crop.

W. T. Livingston farms 80 acres, which is of the reasonable market value of $250 per acre, but prior to being put under water was worth $5 per acre or less. From 33 acres of alfalfa hay he received $3,300, or $100 per acre in 1919.

C. B. Cox farms 80 acres which he swears is of the reasonable market value of $800 per acre, but prior to being put under water it was worth $2.50 per acre. On 50 acres, in 1919, he produced 11,500 boxes of apples and peaches and sold said crop for $24,725, or an average of $494.50 per acre.

C. A. Munson farms 55 acres that is of the reasonable market value of $450 per acre, but prior to being put under water was worth $2.50 per acre. His 42 acres of alfalfa produced 210 tons; his 4 acres of wheat, 200 bushels, which crops he sold for $5,625, or an average of $122.28 per acre in 1919.

Alex Brandenburg farms 19 acres valued at $500 per acre, which, prior to being put under water, was worth $3 per acre. From 13 acres of alfalfa he raised 85 tons; from 3 acres of corn he husked 225 bushels. He also grew 2 acres of potatoes and beans and sold from the 18 acres in crop $2,277.50, or an average of $126.53 per acre.

Charles Wagner farms 41 acres now worth $400 per acre; without water worth $2.50. His 1919 crop was sold for $11,000, or an average of $275 per acre.

Dan Roddy farms 20 acres now worth $350 per acre, but without water, $2.50 per acre. From 9 acres of potatoes he harvested 75 tons; from 9 acres of alfalfa, 40 tons. His total 1919 crop yielded $6,000, an average of $333.33 per acre.

F. R. Westcott farms 20 acres valued at $350 per acre; without water $2.50 per acre. From 5 acres of potatoes he harvested 45 tons; from 1 acre of corn, 80 bushels; from 12 acres of alfalfa 60 tons. He sold said crops for $3,560, or an average of $187.38 per acre.

John Williams farms 35 acres valued at $550 per acre; without water $2.50 per acre. From 20 acres of apples he received $5,600; from 10 acres of hay he received $1,500; from 4 acres of potatoes, $450. A total of $7,550, or an average of $220 per acre in 1919.

J. J. Sanderson owns 40 acres, valued at $400 per acre now, but which was worth only $1 per acre before securing water. From 20 acres of potatoes, half an acre of orchard, 6 acres of alfalfa, and 12½ acres of corn he sold $11,000, or an average of $282.05, in 1919.

M. Dunnington farms 15 acres, now valued at $350 per acre—without water, $2.50 per acre. From 9 acres of corn he harvested 850 bushels; from 5 acres of wheat, 150 bushels, and sold crop for $1,650, or $117.15 per acre in 1919.

Alex Simpson farms 60 acres, now valued at $400 per acre, but which was valued at $2.50 per acre before securing water. From 30 acres of alfalfa he cut 180 tons and sold the hay at $4,500. From 7 acres of corn he received $588; from 2 acres beets, $308; from 15 acres barley, 450 bushels, for which he received $747.50; from 5 acres spuds, $480. His total 1919 crop figured at $6,623.50, an average of $112.26.

All of these statements as to production and value of lands are made under oath. The various farmers further testify that their lands are located near the Satus irrigation project. They further testify that the land owned or farmed by them is identically similar to the land in the proposed Satus project.

This project merits an appropriation of half a million dollars at this time, but I have made my amendment conform to the estimate submitted by the Indian Department.

The CHAIRMAN. The question is on the amendment of the gentleman from Washington [Mr. SUMMERS].

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For support and education of 275 Indian pupils at the Indian school, Tomah, Wis., including pay of superintendent, $63,875; for general repairs and improvements, $8,000; in all, $71,875.

Mr. ESCH. Mr. Chairman, I wish to offer an amendment.

The CHAIRMAN. The gentleman from Wisconsin offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 47, line 22, after the figures "$8,000," insert "for completion of additions to school building and girls' building and equipment for same, $8,000." Change in same line the total to read "$79,875."

Mr. ELSTON. Mr. Chairman, reserving the point of order, I would like to ask the gentleman whether this is a matter about which he talked with me? It appears to be an item for the completion of a building already authorized and under construction and which would probably be destroyed if discontinued.

Mr. ESCH. Yes, sir. In fact, it is authorized in chapter 146 of the laws of 1917, and unless the appropriation is granted those additions will remain with nothing but the walls up and with no roofs, windows, or doors.

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

California: Capitan Grande, $1,500; Hoopa Valley, $3,000; Malki, $160; Round Valley, $8,020; Tule River, $1,500.

Mr. HAYDEN. Mr. Chairman, I move to strike out the last word.

It is my recollection that the Commissioner of Indian Affairs, at the request of the Committee on Indian Affairs, agreed to submit separate estimates for these various appropriations from tribal funds in the same detailed form as is provided for gratuity appropriations from the Treasury in other parts of the bill. I would like to inquire of the gentleman from California [Mr. ELSTON], the chairman of the subcommittee, what explanation was made for the failure to so submit this legislation in that form rather than simply reenact it in the same form which has been used for the last four or five years?

Mr. ELSTON. What particular point is the gentleman referring to?

Mr. HAYDEN. The gentleman from California will remember that last year the Committee on Indian Affairs was not satisfied with the lump-sum appropriations made for various Indian tribes out of Indian moneys, as is now provided in this bill. A resolution was passed by that committee requesting the Indian Bureau in making up the estimates for the fiscal year ending June 30, 1922, to submit such estimates in the same form as estimates are submitted for other activities where a direct appropriation is made out of the Treasury. The pending bill does not appear to have any change in its form in that particular, and Congress is still asked to make lump-sum appropriations out of tribal funds.

Mr. ELSTON. I think the Bureau of Indian Affairs interpreted the action of the committee to be that they should offer justification for each of the items taken from the tribal funds of the particular tribes and should submit an allocation of the various amounts under various subheads of activities. That is something they have never done heretofore, and therefore the Indian Affairs Committee of last year did a good work in bringing out what has been accomplished in the way of specification. Next year we will carry forward this proposition and carry the items under the subheads in the various parts of the bill.

Mr. HAYDEN. That is the object of my inquiry. It seems to me that where appropriations are made for the Indians of a given tribe it should not be necessary to look in one part of the bill to find out what money is appropriated out of the Treasury, and in another place, many pages away, for the money that is appropriated out of tribal funds. The form of this bill makes it very difficult to compare the different items in order to find out for what purposes the money is expended. Such a method of presenting this bill makes it very hard for a Member of the House who is not a member of the Committee on Appropriations to know what is actually going on.

Mr. ELSTON. I agree with the gentleman, and I made the statement a moment ago that that ought to be the policy, whether the bill is framed by the Committee on Indian Affairs or any other committee.

Mr. DOWELL. Mr. Chairman, I move to strike out the last word. May I inquire of the chairman of the committee if this appropriation of $1,253,000 is not in addition to the appropriations in the various paragraphs in the bill provided for the various tribes?

Mr. ELSTON. These appropriations are not in addition. They are an addition in amount, but they are supplemental in character, and make up in the aggregate only enough to provide for the activity mentioned under the subheads in the previous part of the bill.

Mr. DOWELL. What I am inquiring about is this: As I understand the gentleman, when we reached the items in the bill heretofore, these items provided sufficient, according to the judgment of the committee, for the maintenance of the Indians. Now, at the end of the bill we find a paragraph which appropriates $1,253,000 plus of additional appropriations. Now, is it not possible for the committee to fix an estimate on exactly what is needed when the appropriation is made in the item under the section or paragraph making the appropriation? And why make the estimate of what is needed and then at the end of the bill always add a lump sum?

Mr. ELSTON. The gentleman from Arizona referred to this matter, and I explained it to the gentleman a moment ago, that it has been the practice of the Indian Affairs Committee for 40 years to appropriate in this way, and in a more objectionable manner than in this bill.

The point is that the policy was started by the committee in the last few years, under its present chairmanship, to do away with this bad practice.

Mr. CARTER. Not under the present chairmanship.

Mr. ELSTON. And I presume it has only been enforced in the last few years.

Mr. CARTER. Only since 1915.

Mr. ELSTON. It is not true, as the gentleman assumes, that the sums appropriated in this omnibus clause are in addition——

Mr. DOWELL. That is the language of the section itself.

Mr. ELSTON. Let me finish my sentence. I say in addition to the amount required for the particular activity for which it is to be distributed. It is in addition to the funds appropriated in the previous part of the bill.

Mr. DOWELL. But the gentleman has separated this into two items, one item calling for the extra expense of maintenance, placed in a lump sum at the end of the bill; the other for employees, in a lump sum in addition to what was provided in the paragraphs under which the items were considered.

Mr. CARTER. I think I can explain how that came about, if the gentleman will permit me.

The CHAIRMAN. Does the gentleman from Iowa yield to the gentleman from Oklahoma?

Mr. DOWELL. In just a moment. Was it not possible for the committee when it recommended the amounts necessary for maintenance and the number of employees needed to have found the correct amounts and obviated the necessity for this appropriation of a lump sum for the extra employees, and then another lump sum for the maintenance?

Mr. CARTER. Mr. Chairman, if the gentleman will yield to me I will explain fully the necessity for it.

Mr. DOWELL. I yield the floor. The gentleman can do it in his own time.

Mr. CARTER. Mr. Chairman, prior to 1915 there had been various amounts which had been expended by the Secretary of the Interior under standing or continuing appropriations, without the necessity of making specific annual appropriations. These amounts were paid out under many different and varied laws, treaties, and agreements. A tribe would be settled with under a treaty, and there would be a provision in the treaty, for instance, that schools were to be kept up. In another treaty there would be a provision that certain agency activities should be kept up. In another treaty there was a provision that certain farmers were to be furnished to Indians. Standing appropriations would be carried in the respective treaties and laws for these different activities. Then an act would be passed for the settlement of an Indian reservation. It would be necessary to make roads. It would be necessary to provide for allotments, and perhaps to make different arrangements with reference to schools. Those things were provided by special act of Congress, and all the appropriations for carrying out these various schemes were what we know as continuing appropriations, under the terms of which there was no necessity for annual appropriations. But the difficulty is that Congress had no supervision over nor even any definite information concerning these expenditures.

Now, in 1915 the Committee on Indian Affairs secured the passage of an amendment to the Indian appropriation bill prohibiting the Secretary of the Interior from the further use of the tribal funds without a specific appropriation by Congress. The committee thought that was good business and in the interest of economy, because it brought before the House and before the Senate an estimate for these measures every year, so that the House and Senate might scrutinize the items and see whether these sums should be paid from tribal funds or not, whereas in the past the Secretary had simply been spending the money without reporting to Congress or without anyone knowing just how much of the different Indian funds he was using.

After that was done it was necessary to carry these items in this bill as they are carried now. For instance, in Arizona, "Colorado River, $4,250." Previously that amount was carried in an act providing as a standing and continuing appropriation for this amount each year. Likewise, "Fort Apache, $75,000," and so on all through the bill.

Mr. HERNANDEZ. Mr. Chairman, will the gentleman yield?

Mr. CARTER. I will yield to the gentleman from New Mexico in a moment if he will let me finish this statement.

It was necessary to carry these amounts in the bill, not as new appropriations, but simply making specific appropriations of amounts that had hitherto been standing and continuing

appropriations, but as to which the House knew nothing on the face of the earth; so that the committee then, and the committee now in charge of this bill, deserve the sanction and the commendation of the House rather than its condemnation.

Now I yield to the gentleman from New Mexico.

Mr. HERNANDEZ. Following the gentleman's thought, there is an application here for the Apache Jicarilla Indians for $75,000. That is not carried in any other part of the bill. That provides for all the activities of that tribe.

Mr. CARTER. Yes; and before we prepared this bill in this way that item was authorized to be expended in a standing and continuing appropriation.

Mr. HERNANDEZ. And then there is an item, "Mescalero, $30,000" in New Mexico. That is carried to cover all those Indians. That is not carried anywhere else.

Mr. CARTER. That is correct.

The CHAIRMAN. The time of the gentleman from Oklahoma has expired. The Clerk will read.

The Clerk read as follows:

New Mexico: Jicarilla, $75,000; Mescalero, $30,000; Northern Pueblos, $880; Pueblo Bonito, $1,300; San Juan, $2,670.

Mr. SNYDER. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from New York moves to strike out the last word.

Mr. SNYDER. I do so just to say one word more about these items. Considerable has been said, and I would like to ask the chairman of the subcommittee if each particular item has a particular itemized justification?

Mr. ELSTON. I would state that there is a separate and particular justification for each item in the back of the hearings.

Mr. SNYDER. Then it is a fact that the instruction of the committee, or at least the request of the committee, made within the last year or two, that these items should be particularized, has been carried out?

Mr. ELSTON. Yes. I made that statement. This is the further progress on what has been started by the Committee on Indian Affairs on this thing. This is the latest step taken, and it is the first step they have taken in this direction.

Mr. SNYDER. And the House has now and hereafter can have all the knowledge there is in regard to it?

Mr. ELSTON. Yes.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn. The Clerk will read.

The Clerk resumed and completed the reading of the bill.

Mr. SINNOTT. Mr. Chairman, I move to strike out the figures "$70,000," for the purpose of asking the chairman of the committee a question as to line 22 on page 51, "Warm Springs, Oreg., $2,554." What is that item for?

Mr. ELSTON. The justification in support of this item is not so full as it might be, but it states that this entire amount will be required for administrative expenses connected with the sale of timber from unallotted Indian lands on this reservation.

Mr. SINNOTT. None of that is for irrigation on that reservation?

Mr. ELSTON. None whatever, according to the explanation of the item.

Mr. SINNOTT. I wish to state to the chairman of the committee that on the Warm Springs Reservation, at the junction of the Warm Springs and Deschutes Rivers, there is about a section of very fine irrigable land with the river on two sides of it, on one side the Warm Springs River and on the other the Deschutes River.

I have had this matter up with the Indian Department. This is the finest piece of land I know in the State of Oregon for irrigation purposes. They can either pump the water from the river, with a lift of not over 15 feet, or they can go not over a mile up the river and with a gravity system irrigate a section of land that is well adapted to the raising of peaches, and that will be worth from $500 to $1,000 an acre. Yet that land has been lying idle ever since I have been in Congress, although I have had the matter up several times with the Indian Department. I wish the next time your subcommittee has the department before you, you would interrogate them as to why this piece of land is lying idle. I know any white man in that country who is familiar with fruit raising would be willing to pay at least $250 or $300 an acre for that land. Yet it has been lying idle all these years.

Mr. MADDEN. How much would it cost to prepare it so it would be worth $250?

Mr. SINNOTT. I am considering the value of the land without any irrigation—in its present state. To increase its value to the figure I have stated would cost merely the digging of a ditch, possibly not longer than a mile, or the putting in of a pumping plant to raise the water 10 or 15 feet to irrigate that land.

Mr. KNUTSON. How much land is there?

Mr. SINNOTT. About one section.

I withdraw the pro forma amendment.

Mr. SUMMERS of Washington. I ask unanimous consent to revise and extend my remarks.

The CHAIRMAN. The gentleman from Washington asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. ELSTON. Under the agreement I ask to return to page 28, where I wish to offer an amendment to the Crow item, which was passed over for revision.

The CHAIRMAN. The Clerk will report the amendment of the gentleman from California.

The Clerk read as follows:

Amendment by Mr. ELSTON: Page 28, after line 8, insert the following: "The sum of $200,000 of any tribal funds on deposit to the credit of the Crow Indians in the State of Montana is hereby appropriated for improvement, maintenance, and operation of the irrigation systems on the Crow Reservation, Mont., including maintenance assessments payable to the Two Leggings Water Users' Association, and including the proportionate part of the cost of constructing the Bozeman trail ditch on the Crow Reservation, Mont., properly assessable against lands allotted to the Indians irrigable thereunder, said sum, or such part thereof as may be used for the purpose indicated, to be reimbursed to the tribe under such rules and regulations as may be prescribed by the Secretary of the Interior. Of said appropriation of $200,000 the sum of $150,000 shall be available for construction of a dam on the Big Horn River and $50,000 for maintenance and operation of said irrigation systems."

Mr. HAYDEN. Mr. Chairman, I think the word "divergence" should be inserted before the word "dam." It might be understood that the dam on the Big Horn River was intended as a storage dam. What is really intended is to construct a divergence dam.

Mr. ELSTON. I have no objection to that modification.

The CHAIRMAN. Without objection the amendment will be modified as suggested by the gentleman from Arizona.

There was no objection.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. KNUTSON. Mr. Chairman, I ask unanimous consent to return to page 22.

Mr. ELSTON. I am very sorry, but I shall have to object.

The CHAIRMAN. Objection is made.

Mr. ELSTON. Mr. Chairman, I move that the committee do now rise and report the bill to the House with amendments, with the recommendation that the amendments be agreed to and the bill as amended do pass.

The motion was agreed to.

The committee accordingly rose; and the Speaker having resumed the chair, Mr. LONGWORTH, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 15682, the Indian appropriation bill, and had directed him to report the same back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

Mr. ELSTON. Mr. Speaker, I move the previous question on the bill and amendments to final passage.

The motion was agreed to.

The SPEAKER. Is a separate vote demanded on any amendment?

There was no demand for a separate vote.

The amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. ELSTON, a motion to reconsider the vote by which the bill was passed was laid on the table.

LEAVE OF ABSENCE.

By unanimous consent, the following leave of absence was granted:

To Mr. DREWRY, indefinitely, on account of sickness in family.

To Mr. AYRES, indefinitely, on account of sickness.

EXTENSION OF REMARKS.

Mr. NOLAN. Mr. Speaker, I ask unanimous consent to extend my remarks by printing in the RECORD an address of my colleague, Mr. KAHN, delivered before the Traffic Club of Philadelphia, January 18, 1921.

The SPEAKER. The gentleman from California asks unanimous consent to extend his remarks in the manner indicated. Is there objection?

There was no objection.

UMI

ENROLLED BILL PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. RAMSEY, from the Committee on Enrolled Bills, reported that this day they presented to the President of the United States, for his approval, the following bill:

H. R. 12469. An act to authorize the award of a medal of honor to Chief Gunner Robert Edward Cox, United States Navy.

ORDER OF BUSINESS.

Mr. ANDERSON. Mr. Speaker, I would like to see if we can come to some agreement by unanimous consent respecting general debate on the Agricultural bill in the morning. What time does the gentleman from Missouri suggest?

Mr. RUBEY. I have had requests for 2 hours and 55 minutes, and with one or possibly two exceptions those speeches are to be on the bill itself. So the demand on this side is pretty strong.

Mr. ANDERSON. I have demands for very much less time on this side. If the gentleman can get along with two hours I would be glad to ask for four hours.

Mr. RUBEY. That will be satisfactory.

The SPEAKER. The gentleman from Minnesota asks unanimous consent that the time for general debate on the Agricultural appropriation bill be limited to four hours, two hours to be controlled by the gentleman from Minnesota and two by the gentleman from Missouri. Is there objection?

Mr. MONDELL. Reserving the right to object, I realize that both gentlemen are anxious to have general debate as brief as possible. It does seem to me that four hours of general debate at this time in the session on the Agricultural bill is a good deal of time to give for that sort of discussion. We are going to have appropriation bills follow each other right along for a considerable length of time, and there is going to be opportunity for debate on each bill.

Mr. BLANTON. Will the gentleman yield?

Mr. MONDELL. Yes.

Mr. BLANTON. Does not the majority leader of the House realize that agriculture is a very important subject to the country?

Mr. MONDELL. I do; I was raised on a farm, so I know all about it.

Mr. BLANTON. Four hours ought not to be very excessive on a big subject.

Mr. RUBEY. Will the gentleman yield?

Mr. MONDELL. If I have the floor.

Mr. RUBEY. The agricultural bill is not only an important bill, as suggested by the gentleman from Texas, but we come before the House this year under different circumstances than heretofore. We come here under the new arrangement. I am glad to say that we come before the House with a bill which has been unanimously agreed upon by the subcommittee and the main Committee on Appropriations. That indicates that we will have less time consumed under the five-minute rule, because there will be no contest among members of the committee. Therefore I think we ought to have more for general debate, especially when the request comes from men who want to speak on the bill itself. If we were going to have long debate on questions not relating to the bill, I think the gentleman's position would be well taken, but inasmuch as the subject matter of this general debate will be confined almost entirely to the bill, I think we ought to have that much time, and I hope the gentleman will accord us that much.

Mr. MONDELL. It is not for the gentleman from Wyoming to say how much time for general debate there will be; that is for the House to decide, but we are all of us anxious to get on with our appropriation bills. It does seem rather liberal use of time to devote an entire day to general debate on one appropriation bill.

Mr. McLAUGHLIN of Michigan. Mr. Speaker, will the gentleman yield?

Mr. MONDELL. Yes.

Mr. McLAUGHLIN of Michigan. Mr. Speaker, I think I am right in saying that the time will be largely taken or is asked for largely by gentlemen who have been a long time members of the Committee on Agriculture and who will not be Members of the next Congress. This affords about the only opportunity these gentlemen will have to speak on the general subject of agriculture during the session and have their remarks appropriate to the proposition before the House.

Mr. ANDERSON. Mr. Speaker, I renew my request.

The SPEAKER. Is there objection to the request of the gentleman from Minnesota? [After a pause.] The Chair hears none, and it is so ordered.

ADJOURNMENT.

Mr. ANDERSON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 59 minutes p. m.) the House adjourned until to-morrow, Friday, January 21, 1921, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

260. A letter from the Secretary of War, transmitting a third report from the Chief of Engineers in connection with river and harbor contracts that have become inequitable and unjust (H. Doc. No. 986); December 22, 1920, referred to Committee on Rivers and Harbors; January 20, 1921, ordered to be printed.

356. A letter from the Georgetown Barge, Dock, Elevator & Railway Co. transmitting annual report of that corporation for the year ending December 31, 1920; to the Committee on the District of Columbia.

357. A letter from the Secretary of the Treasury, transmitting an estimate of appropriation to provide for the erection of a vault for the United States Treasury in the north court of the Treasury Building (H. Doc. No. 987); to the Committees on Appropriations and Public Buildings and Grounds and ordered to be printed.

358. A letter from the Secretary of the Navy, transmitting draft of legislation to obviate necessity of appropriation needed on account of overobligations under certain appropriations for the Navy (H. Doc. No. 988); to the Committees on Appropriations and Naval Affairs and ordered to be printed.

359. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on reexamination of project for the improvement of Trinity River, Tex. (H. Doc. No. 989); to the Committee on Rivers and Harbors and ordered to be printed with map.

360. A letter from the Secretary of the Treasury, transmitting estimate of appropriation from the Secretary of Commerce required to provide for the award of a medal of merit to the personnel of the merchant marine of the United States (H. Doc. No. 990); to the Committee on Appropriations and ordered to be printed.

361. A letter from the Secretary of the Treasury, transmitting supplemental estimates of appropriation required by the Bureau of Engraving and Printing for printing 12,750,000 sheets of United States currency in addition to the quantity already provided for during the current fiscal year (H. Doc. No. 991); to the Committee on Appropriations and ordered to be printed.

362. A letter from the Secretary of the Treasury, transmitting estimate of appropriation for payment of damages caused by collision of the Coast Guard cutter *Guthri* with the Pennsylvania Railroad car float *No.* 7, at Philadelphia, Pa., on November 26, 1920 (H. Doc. No. 992); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. THOMPSON, from the Committee on Public Buildings and Grounds, to which was referred the bill (S. 4332) to exchange the present Federal building and site at Gastonia, N. C., for a new site and building, reported the same with an amendment, accompanied by a report (No. 1214), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. EDMONDS, from the Committee on Claims, to which was referred the bill (H. R. 15676) for the relief of the estate of Joseph Matthews, reported the same without amendment, accompanied by a report (No. 1213), which said bill and report were referred to the Private Calendar.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 15759) granting a pension to George W. Vineyard; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 14555) granting a pension to Jennie Fleming; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. WELTY: A bill (H. R. 15820) to prohibit improper and corrupt lobbying, and to provide for the registration of persons employed to appear before departments and bureaus of the Government to advocate or oppose legislative measures in Congress, and to provide that all recommendations to the President for the appointment of judges shall be open for inspection; to the Committee on the Judiciary.

By Mr. BUTLER: A bill (H. R. 15821) authorizing the Secretary of War to deliver to the city of Coatesville, Pa., captured cannons or fieldpieces and suitable outfit of cannon balls; to the Committee on Military Affairs.

By Mr. RAKER: A bill (H. R. 15822) for the prevention of venereal diseases in the District of Columbia, and for other purposes; to the Committee on the District of Columbia.

By Mr. SIEGEL: A bill (H. R. 15823) creating three grades of warrant officers in the Army, and for other purposes; to the Committee on Military Affairs.

By Mr. RAMSEYER: Joint resolution (H. J. Res. 453) proposing an amendment to the Constitution of the United States; to the Committee on the Judiciary.

By Mr. IRELAND: Resolution (H. Res. 647) authorizing estimate of cost of improving a certain portion of the Illinois and Mississippi Rivers; to the Committee on Rivers and Harbors.

By Mr. MADDEN: Resolution (H. Res. 648) requesting the Postmaster General, Secretary of War, and Secretary of the Navy to furnish certain information to the House of Representatives; to the Committee on Military Affairs.

By the SPEAKER (by request): Memorial of the Legislature of the State of Idaho, favoring the enactment of the Fordney emergency tariff bill; to the Committee on Ways and Means.

Also (by request), memorial of the Legislature of the State of Washington, urging a tariff on all the importation of flower and vegetable and other agricultural seeds; to the Committee on Ways and Means.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BRIGGS: A bill (H. R. 15824) authorizing the Secretary of Commerce to convey to Augustus S. Peabody certain land in Galveston County, Tex.; to the Committee on the Public Lands.

By Mr. FOCHT: A bill (H. R. 15825) granting a pension to Catharine Miller; to the Committee on Invalid Pensions.

By Mr. HAUGEN: A bill (H. R. 15826) for the relief of James T. Farrill; to the Committee on Military Affairs.

By Mr. HAWLEY: A bill (H. R. 15827) granting a pension to Sarah G. London; to the Committee on Pensions.

By Mr. RUBEY: A bill (H. R. 15828) granting a pension to Elizabeth Sanders; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

5112. By the SPEAKER (by request): Petition of J. J. O'Brien, chairman of the Springfield (Mass.) Council for the Recognition of the Irish Republic, asking that Daniel J. O'Callaghan, lord mayor of Cork, be admitted to the United States; to the Committee on Foreign Affairs.

5113. Also (by request), petition of Common Council of the City of Milwaukee, favoring resumption of trade with Russia; to the Committee on Foreign Affairs.

5114. By Mr. BRIGGS: Petition of J. H. W. Steele Co., Hutchings Seely Co., and W. P. D. Haden, indorsing and urging passage of House bill 15746, providing for reclassification of salaries of staff in Steamboat-Inspection Service; to the Committee on the Merchant Marine and Fisheries.

5115. Also, petition of Texas Long Leaf Lumber Co., New Willard; First National Bank, Livingston; Mr. George Seely, president Galveston Commercial Association and Hutchings Seely & Co.; Mr. Eustace Taylor, president Galveston Cotton Exchange and Board of Trade, all in the State of Texas, indorsing and urging passage of the Winslow bill (H. R. 15551) for partial payments to railroads; to the Committee on Interstate and Foreign Commerce.

5116. Also, petition of A. G. Gurlack, president of Chamber of Commerce, Livingston, Tex., indorsing and urging passage of the Winslow bill (H. R. 15551) for partial payments to railroads; to the Committee on Interstate and Foreign Commerce.

5117. By Mr. EDMONDS: Petition of Philadelphia Chamber of Commerce, urging the deficiency appropriation for the United States Shipping Board be granted; to the Committee on Appropriations.

5118. By Mr. EMERSON: Petition of the Lions Club, of Lima, Ohio, protesting against the Smith bill (H. R. 12466); to the Committee on Water Power.

5119. Also, petition of Ohio Woman's Christian Temperance Union, favoring the passage of the Fess-Capper bill; to the Committee on Education.

5120. Also, petition of Purchasing Agents' Association of Columbus, favoring legislation to establish commercial bribery as a Federal penal offense; to the Committee on the Judiciary.

5121. By Mr. FULLER: Petition of Eagle-Ottawa Leather Co., protesting against the tariff on hides; to the Committee on Ways and Means.

5122. Also, petition of the Union League Club of Chicago, protesting against abandonment or curtailing of the Great Lakes Naval Training Station; to the Committee on Naval Affairs.

5123. Also, petition of John F. Vonckax, pastor of Presbyterian Church, Ottawa, Ill., favoring the Newberry-Randall bills (S. 3453 and H. R. 8063); to the Committee on the Judiciary.

5124. Also, petition of Illinois Agricultural Association, favoring appropriation to complete dam at Muscle Shoals, Ala.; to the Committee on Interstate and Foreign Commerce.

5125. Also, petition of American Bottlers of Carbonated Beverages, asking repeal of tax on soft drinks; to the Committee on Ways and Means.

5126. Also, petition of Loose-Wiles Biscuit Co., of Chicago, Ill., favoring a gross sales tax in lieu of the excess-profits tax; to the Committee on Ways and Means.

5127. By Mr. GALLIVAN: Petition of C. G. Cronin, Holyoke, Mass., favoring the passage of House bill 15419; to the Committee on the Post Office and Post Roads.

5128. Also, petition of Local No. 800, International Longshoremen's Association, favoring the passage of Senate bill 4606; to the Committee on the Merchant Marine and Fisheries.

5129. By Mr. LINTHICUM: Petition of Wertheimer Bros., of Baltimore, Md., regarding increase in tariff duties on tobacco, and of Loose-Wiles Biscuit Co., of Baltimore, Md., regarding taxation; to the Committee on Ways and Means.

5130. Also, petition of Hebrew Ladies' Sewing Society, William E. Portman, Mr. and Mrs. A. G. Schumacher, Alfred G. Welling, Charles L. Appler, and G. E. Kurtz, all of Baltimore, Md., regarding Smith-Towner bill; to the Committee on Education.

5131. Also, petition of Mrs. Richard J. White, of Baltimore, regarding Senate bill 4485; to the Committee on Public Buildings and Grounds.

5132. Also, petition of John H. Barron, of Baltimore, regarding Senate bill 4487; to the Committee on the Merchant Marine and Fisheries.

5133. By Mr. ROWAN: Petition of J. P. Quinn, of New York City, favoring increase of pay for custom inspectors; to the Committee on Ways and Means.

5134. By Mr. SNELL: Petition of Chamber of Commerce of Ogdensburg, N. Y., for the development of the St. Lawrence River for the purpose of direct transportation from the Great Lakes to the ocean; to the Committee on Rivers and Harbors.

5135. Also, petition of the residents of Clinton County, State of New York, requesting favorable action on maternity bill (H. R. 10925); to the Committee on Interstate and Foreign Commerce.

5136. Also, petition of Clinton County (N. Y.) Farm Loan Association, urging the necessity of the Federal land banks resuming business at an early date; to the Committee on Banking and Currency.

5137. By Mr. WOODYARD: Petition of residents of Huntington, W. Va., favoring the Rogers-Capper bills (H. R. 14961 and S. 4613); to the Committee on Interstate and Foreign Commerce.

5138. By Mr. YATES: Petition of Miss Mary McDowell, chairman National League of Women Voters, Chicago, Ill., favoring the Sheppard-Towner bill; to the Committee on Interstate and Foreign Commerce.

5139. Also, petition of Illinois State Horticultural Society, by Mr. A. M. Augustine, secretary, Normal, Ill., protesting against House bill 12466; to the Committee on Water Power.

UMI

5140. Also, petition of R. A. Fuller, Moline, Ill., favoring House bill 14759; to the Committee on the Post Office and Post Roads.

5141. Also, petition of Rev. W. L. Torrence, for people of Elmira and Stark Counties, urging that entire appropriation asked by the department be granted for dry-law enforcement; to the Committee on Appropriations.

5142. Also, petition of Duke Schroer, city clerk, Quincy, Ill., urging that Congress make ample provision for the preservation of the Quincy Harbor; to the Committee on Rivers and Harbors.

5143. Also, petition of Paul Blatchford, secretary Central Supply Association, Chicago, urging legislation enabling civilians to sue the Government for "damages by Government agencies"; to the Committee on the Judiciary.

5144. Also, petition of Mr. F. P. Hixon, president Shevlin Hixon Co., Minneapolis, Minn., opposing the placing of duty on lumber imported into the United States, particularly from Canada; to the Committee on Ways and Means.

5145. Also, petition of James McNabb, editor Carrollton Gazette, Carrollton, Ill., urging the passage of Mr. DYER'S bill in behalf of men who were members of Philippine Scouts; to the Committee on Military Affairs.

5146. Also, petition of Mr. William B. Joyce, president National Surety Co., 115 Broadway, New York City, urging an appropriation for the continuance of the section of surety bonds; to the Committee on Appropriations.

5147. Also, petition of Joseph C. Belden, president Belden Manufacturing Co., Chicago, urging the passage of the Winslow measure, directing the Treasury Department to honor Interstate Commerce Commission certificates for partial payments; to the Committee on Interstate and Foreign Commerce.

5148. Also, petition of Mr. and Mrs. C. H. Yohn, Mr. and Mrs. Ray C. Peters, Mr. and Mrs. Roy E. Peters, and Chauncey H. Shamberger, all of Chicago, and Martin A. Shale, supervisor department of physical training, Springfield, Ill., all favoring the Fess-Capper bill, House bill 12652, substituting physical training for compulsory military training; to the Committee on Education.

5149. By Mr. YOUNG of North Dakota: Petition of Victory Post, No. 92, American Legion, Northwood, N. Dak.; Kindred Post, No. 117, American Legion, Kindred, N. Dak.; and Charles Beck Post, No. 102, American Legion, Van Hook, N. Dak., urging the passage of House bill 14157, bonus for ex-service men; to the Committee on Ways and Means.

SENATE.

FRIDAY, *January 21, 1921.*

(Legislative day of Tuesday, January 18, 1921.)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

Mr. SMOOT. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Harris	McKellar	Spencer
Borah	Harrison	Moses	Sterling
Brandegee	Heflin	Myers	Sutherland
Capper	Henderson	Nelson	Townsend
Colt	Johnson, Calif.	New	Trammell
Culberson	Jones, N. Mex.	Overman	Wadsworth
Curtis	Jones, Wash.	Page	Walsh, Mont.
Dial	Kendrick	Phipps	Warren
Dillingham	Keyes	Poindexter	Watson
Edge	Kirby	Sheppard	Williams
Elkins	Knox	Sherman	Willis
France	Lenroot	Simmons	Wolcott
Gerry	Lodge	Smith, Ariz.	
Gooding	McCormick	Smith, Ga.	
Hale	McCumber	Smoot	

Mr. CURTIS. I have been requested to announce the absence of the Senator from Connecticut [Mr. MCLEAN], the Senator from New York [Mr. CALDER], the Senator from Ohio [Mr. POMERENE], the Senator from Florida [Mr. FLETCHER], and the Senator from Oklahoma [Mr. OWEN] on official business.

Mr. GERRY. I wish to announce the absence of the Senator from Oregon [Mr. CHAMBERLAIN] and the Senator from South Dakota [Mr. JOHNSON] on account of illness.

I wish also to announce the absence of the Senator from Virginia [Mr. SWANSON], the Senator from Arkansas [Mr. ROBINSON], and the Senator from Massachusetts [Mr. WALSH] on official business.

The VICE PRESIDENT. Fifty-seven Senators have answered to the roll call. There is a quorum present.

CHAPLAIN OF THE SENATE.

Mr. LODGE. I ask permission of the Senator who has the floor for the consideration of the resolution which I send to the desk.

Mr. SHERMAN. I yield for that purpose.

The VICE PRESIDENT. The resolution submitted by the Senator from Massachusetts will be read.

The resolution (S. Res. 490) was read, considered by unanimous consent, and agreed to, as follows:

Resolved, That the Rev. J. J. Muir, D. D., of the District of Columbia, be, and he is hereby, elected Chaplain of the Senate.

CREDENTIALS.

Mr. CAPPER presented the credentials of J. W. HARRELD, elected a Senator from the State of Oklahoma for the term beginning March 4, 1921, which were read and ordered to be filed, as follows:

STATE ELECTION BOARD, STATE OF OKLAHOMA,
Certificate of Election.

The State of Oklahoma, to whom these presents shall come, greeting:

Know ye that at a general election held throughout the State of Oklahoma on the 2d day of November, A. D. 1920, J. W. HARRELD, the regularly selected and legally qualified candidate for the office of United States Senator on the Republican ticket, received the highest number of votes cast at said election for said office, as appears from the records of the State election board of said State.

This, then, is to certify that the said J. W. HARRELD is the regularly and legally elected United States Senator of said State for a term of six years, beginning with and from the 4th day of March, A. D. 1921.

In testimony whereof the State election board of the State of Oklahoma has caused this certificate of election to be issued by its secretary and its official seal to be hereunto affixed on this the 4th day of January, A. D. 1921, in the capital of said State.

[SEAL.]

W. C. MCALISTER,
Secretary of the State Election Board of the State of Oklahoma.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by D. K. Hempstead, its enrolling clerk, announced that the House had passed the bill (H. R. 15682) making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1922, in which it requested the concurrence of the Senate.

PETITIONS AND MEMORIALS.

Mr. TOWNSEND presented telegrams in the nature of memorials from John L. Lovett, general manager Michigan Manufacturers' Association; Carl F. Clark, president Monroe Steel Castings Co.; Everitt Bros.; H. C. Schleuss; H. D. Robertson; the Chas. B. Bohn Foundry Co.; Kennedy Floyd & Co.; E. J. Woodison Co.; C. C. Everhart; W. H. Walker; J. H. Galloway, jr.; Neill Winters; C. E. Mitchell; A. J. O'Connor, traffic manager P. Koenig Coal Co.; Arthur Croyn; Peninsular Smelting & Refining Co.; and John S. Haggerty, all of Detroit, Mich., remonstrating against the enactment of the so-called Calder bill, to regulate the coal industry, etc., which were referred to the Committee on Manufactures.

He also presented a resolution adopted by the Detroit Live Stock Association, of Detroit, Mich., favoring a substantial increase in the Federal appropriation for tuberculosis eradication in cattle and hogs, which was referred to the Committee on Agriculture and Forestry.

Mr. NELSON presented a petition of the American Hoist & Derrick Co., of St. Paul, Minn., praying for the enactment of legislation amending the revenue laws relative to taxation of undistributed profits in relation to individuals and partnerships, which was referred to the Committee on Finance.

Mr. OVERMAN presented a petition of sundry citizens of North Carolina, praying for the enactment of legislation for the relief of the destitute and starving in China, which was referred to the Committee on Foreign Relations.

Mr. BRANDEGEE presented a petition of the jurors sitting in the case of the United States v. the Remington Arms, Union Metallic Cartridge Co., et al., at New Haven, Conn., praying for the enactment of legislation to increase the compensation of United States court jurors, which was referred to the Committee on the Judiciary.

Mr. JONES of Washington presented petitions of sundry citizens of the State of Washington, praying for the enactment of legislation to control the production, importation, exportation, and transshipment of opium, cocaine, etc., which were referred to the Committee on the Judiciary.

He also presented petitions of sundry citizens of the State of Washington, praying for the enactment of legislation to strengthen the Volstead prohibition enforcement act, which were referred to the Committee on the Judiciary.

UINTAH INDIAN RESERVATION LANDS, UTAH.

Mr. CURTIS. I report back from the Committee on Indian Affairs a communication from the Acting Secretary of the Interior, dated December 28, 1920, in relation to the leasing of irrigable Indian land on the Uintah Reservation, Utah, and claims for alleged damages arising in connection therewith.

I ask that it be referred to the Committee on Printing, with a view to having it printed as a document.

The VICE PRESIDENT. It will be so ordered.

EUROPEAN RELIEF.

Mr. BRANDEGEE, from the Committee on Foreign Relations, to which was referred the concurrent resolution (S. Con. Res. 35) submitted by Mr. SUTHERLAND on December 30, 1920, officially indorsing the relief work of the European Relief Council, and calling upon the people of the United States to contribute to its humanitarian activities, reported it with amendments and submitted a report (No. 708) thereon.

DISARMAMENT.

Mr. BORAH, from the Committee on Foreign Relations, to which was referred the joint resolution (S. J. Res. 225) authorizing the President of the United States to advise the Governments of Great Britain and Japan that the Government of the United States is ready to take up with them the question of disarmament, etc., reported it with amendments and submitted a report (No. 709) thereon.

DELAWARE RIVER BRIDGE.

Mr. EDGE. I report back favorably with amendments from the Committee on Commerce the bill (S. 4787) granting consent for the construction, maintenance, and operation of a bridge across the Delaware River from the city of Philadelphia, Pa., to the city of Camden, N. J., and also to consent to an agreement between the States of Pennsylvania and New Jersey and the city of Philadelphia for the construction, maintenance, and operation of such bridge, and I submit a report (No. 711) thereon. As the bill is of great importance, I ask unanimous consent for its present consideration.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The amendments were, on page 2, line 3, after the word "March," to strike out the numerals "3, 1899," and insert in lieu thereof "23, 1906"; on page 2, to strike out all of sections 2 and 3; and renumber section 4 to read "Sec. 2," so as to make the bill read:

Be it enacted, etc., That the consent of Congress is hereby granted to the Delaware River Bridge Joint Commission, acting in behalf of the States of Pennsylvania and New Jersey and the city of Philadelphia, to construct, maintain, and operate a bridge and approaches thereto across the Delaware River at a point suitable to the interests of navigation at or between Green Street and South Street in Philadelphia, Pa., and points approximately opposite in Camden, N. J., in accordance with the provisions of an act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill granting consent for the construction, maintenance, and operation of a bridge across the Delaware River from the city of Philadelphia, Pa., to the city of Camden, N. J."

COLUMBIA RIVER BRIDGE.

Mr. EDGE. I report back favorably with an amendment from the Committee on Commerce the bill (S. 4825) to extend the time for the construction of a bridge across the Columbia River, between the States of Oregon and Washington, at or within 2 miles westerly from Cascade Locks, in the State of Oregon, and I submit a report (No. 710) thereon. I ask for the immediate consideration of the bill.

There being no objection, the bill was considered as in Committee of the Whole.

The amendment was, on page 1, line 9, before the word "years," to strike out the word "two" and insert "one and three," so as to make the bill read:

Be it enacted, etc., That the times for commencing and completing the construction of a bridge and approaches thereto across the Columbia River at a point suitable to the interests of navigation at or near a point within 2 miles westerly from Cascade Locks, in the county of Hood River, State of Oregon, authorized by the act of Congress approved February 3, 1920, are hereby extended one and three years, respectively, from the date of approval hereof.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

BILLS AND JOINT RESOLUTIONS INTRODUCED.

Bills and joint resolutions were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SPENCER:

A bill (S. 4894) to provide longevity pay for reserve officers and National Guard officers serving under orders of the War Department; to the Committee on Military Affairs.

By Mr. CURTIS:

A bill (S. 4895) to amend section 6 of an act approved January 17, 1914, entitled "An act to prohibit the importation and use of opium for other than medicinal purposes," approved February 9, 1909; to the Committee on Finance.

By Mr. WADSWORTH:

A bill (S. 4896) for the relief of the estate of Joseph Matthews; to the Committee on Claims.

By Mr. KNOX:

A bill (S. 4897) to amend section 9 of an act entitled "An act to define, regulate, and punish trading with the enemy, and for other purposes," approved October 6, 1917, as amended; to the Committee on the Judiciary.

By Mr. TOWNSEND:

A bill (S. 4898) to amend the transportation act, 1920; to the Committee on Interstate Commerce.

AMENDMENT TO EMERGENCY TARIFF BILL.

Mr. JONES of Washington submitted an amendment intended to be proposed by him to House bill 15275, the emergency tariff bill, which was ordered to lie on the table and be printed.

MEAT-PACKING INDUSTRY.

Mr. STERLING submitted an amendment in the nature of a substitute intended to be proposed by him to the bill (S. 3944) to create a Federal live-stock commission, to define its powers and duties, and to stimulate the production, sale, and distribution of live stock and live-stock products, and for other purposes, which was ordered to lie on the table and be printed.

Mr. SMOOT submitted nine amendments intended to be proposed by him to the bill (S. 3944) to create a Federal live-stock commission, to define its powers and duties, and to stimulate the production, sale, and distribution of live stock and live-stock products, and for other purposes, which were ordered to lie on the table and be printed.

COAST GUARD ACADEMY, NEW LONDON, CONN.

Mr. BRANDEGEE submitted an amendment proposing to appropriate $281,345 for central heating and power plant, quarters for commissioned officers and warrant officers, remodeling and relocating certain buildings, providing facilities for small boats, filling and grading and retaining walls, and purchase of additional necessary land at the Coast Guard Academy, New London, Conn., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

SUPERINTENDENT OF HOUSE DOCUMENT ROOM.

Mr. NELSON submitted an amendment proposing to increase the compensation of the superintendent of the House of Representatives document room from $2,900 to $3,500 intended to be proposed by him to the legislative, etc., appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

DISARMAMENT.

Mr. FRANCE submitted an amendment intended to be proposed by him to the joint resolution (S. J. Res. 225) authorizing the President of the United States to advise the Governments of Great Britain and Japan that the Government of the United States is ready to take up with them the question of disarmament, etc., which was ordered to lie on the table and be printed.

HOUSE BILL REFERRED.

The bill (H. R. 15682) making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1922, was read twice by its title and referred to the Committee on Indian Affairs.

COMPENSATION OF UNITED STATES EMPLOYEES.

Mr. JOHNSON of California. Mr. President, a parliamentary inquiry. Yesterday there was pending before the Senate the bill (H. R. 5726) to fix the compensation of certain employees of the United States. It is still pending.

UMI

The VICE PRESIDENT. It is.

Mr. JOHNSON of California. While pending, the Senator from Illinois [Mr. SHERMAN] made his address and is in the midst of the address, in which he digressed from that particular bill to speak upon the packers' bill. The RECORD states that "the Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 3944) to create a Federal live stock commission," and so forth, and that the Senator from Illinois spoke upon that particular bill.

The VICE PRESIDENT. There is something wrong with the RECORD. The Chair understands the parliamentary situation to be that what is known as the emergency tariff bill is before the Senate as the unfinished business and has been temporarily laid aside for the purpose of considering what is known as the minimum wage bill. The Senator from Illinois is ostensibly speaking on the minimum wage bill, but in reality he is talking about the packers' bill, as he has a right to do. The rules do not require a Senator to speak to the matter in hand.

Mr. JOHNSON of California. I merely wished to have the RECORD corrected in that respect.

MEAT-PACKING INDUSTRY.

Thursday, January 20, 1921.

Mr. SHERMAN. Mr. President, I wish to avow frankly to the Senate that I rise for the purpose of discussing at some length the packers' bill. It has been agreed that a vote shall be taken next Monday on that measure, and in all probability the vote will be a final one both as to the amendments and the bill itself. I therefore have thought it proper to take such time as might be reasonably necessary to discuss the bill and its various proposals for the regulation of the business concerned, as well as a general consideration of live-stock production, the packing industry, and foreign and domestic markets.

I know of no particular reason, Mr. President, why the packing industry should be singled out to be governed by a commission more than many other enterprises handling staple products. Meat is no more necessary than many other of the essential elements that enter into the living or the kitchen of the average family. Bread ordinarily is spoken of as the "staff of life." There is no more reason for placing the meat industry of this country under commission rule than there is for placing the various flouring mills of the United States, both as to their domestic and foreign markets, under commission rule. Coal, iron, steel, leather, footwear, clothing, building material, medicines, drugs, chemicals, and a host of other merchantable products which enter into the common necessities of the average family offer the same reasons for being placed under a commission that are offered in the case of the meat industry.

The suggestion is often made that, because of the alleged inordinate profits of the packers, some diminution of the margin between cost and selling price ought to be made under the regulatory hand of a commission. The charge is further made that no new money has been put into the packing business for many years; that the reinvested profits of the business have built up the industry to its present magnitude. The charge is heard that they control the purchase of live stock in the live-stock markets of the United States, and that they control the selling price of their packing-house products so that ultimately both producer and consumer are at their mercy. The large packers are, it happens, all found in Chicago, and the charges are leveled against five particular companies or families engaged in the packing business. The five have from the beginning of the meat industry in this country developed their business, it has so chanced, in the largest live stock, and the largest but one of the banking, railway, and commercial centers of the United States. If they have grown to large proportions there, it is no more than other legitimate occupations have done. In the same time that Armour, Morris, Swift, Cudahy, and the predecessors of Wilson & Co., in Chicago, have grown to their present status in the packing business, the estate of Marshall Field, and the business of Marshall Field in his lifetime, have grown into many millions of dollars. The Senator now occupying the floor can remember the time when Marshall Field carried a sample case upon the railways in Illinois, selling dry goods for his own house in Chicago. I can remember when Montgomery, Ward & Co. began business as an original grange supply store. It was intended to eliminate one or more of the middlemen standing between the producer and the consumer. I can remember when Sears, Roebuck & Co., of Chicago, were a small house, and can almost remember when their general freight business was hardly enough to attract the soliciting agencies of the freight departments of the principal railways whose home offices were in Chicago.

The founder of the business came down from Wisconsin and finally formed a partnership. The firm afterwards became Sears, Roebuck & Co., and grew to its present magnitude, now under the management of Julius Rosenwald, at the same time that the packing-house industry in Chicago has grown to its present volume of business.

While the packing industry has grown, there has been a marvelous expansion in every other legitimate enterprise of the United States where its business centered in the larger municipalities of the country. It is to be expected that these industries will either grow, or languish and perish. It is characteristic of every large municipality—from New York and Philadelphia to Chicago, St. Louis, Kansas City, and elsewhere—that no business can last long unless it is commercially successful. It can not live upon very small dividends or no dividends, or take risks upon doubtful percentages of profit. It either goes up or goes down, following the swift rise or fall of commercial enterprises in every great metropolitan district.

So the undertakings that are singled out in this bill are no more in their growth to be the subject of invidious criticism than many others that have grown to figures that are colossal to the average mind. I have seen, as men of my generation have, the iron and steel business of the United States expand to tremendous proportions. I have seen the largest corporate enterprise in the world created in the United States in the individual incorporation known as the United States Steel Corporation. It was the first billion-dollar corporation the world ever knew. We have all seen the development in oil, and how it expanded from a local business. The first oil territory was developed in the State of Pennsylvania. We have seen it grow until it reached the status now attained by the Standard Oil Co.

The Standard Oil Co. is not the only large oil company in the United States. The Sinclair Oil Co. is another. It draws its supplies largely from Oklahoma and from the southwestern oil fields. The late Secretary of the Interior, Mr. Lane, lately became identified with the Sinclair Oil people, to take his experience, his knowledge, and his ability to handle large matters to the conduct of that business.

It is not proposed to put the oil companies under any commission. They were prosecuted several years ago as being in violation of the antitrust act. They embraced not only the Standard Oil Co. but a variety of subsidiary concerns. They were all under one head. This suit was for the purpose of dissolving the single control. They were dissolved finally by a decree meeting with the approval of the Federal Supreme Court. Each of these subsidiary companies is now operating as an independent company, every one of them handling any of the products, whether it be refined oil in some particular form, such as Pratt's Astral Oil, supposed to be a superior illuminant in the day when oil held the lead in that particular, through all the various by-products of lubricants, vaseline, and so forth. All of those companies handling it were dissolved and returned to their constituent bodies. The only result has been to increase the requirement for several bookkeepers on the part of the owners of the Standard Oil Co. and of the subsidiary companies. No change has been observed in the prices. No change has been observed upon the stock market in the dividends paid. The consuming public has not complained of the prices paid for the finished product, and they have been reasonable, nor has the investing portion of the public complained of the return upon its investments. The stocks are still for sale upon the general market.

If there be monopolies because merely of size and success, there are as many alleged monopolies in the oil business as there are in the packing business. As a matter of fact, there are no monopolies in either. The business is an open one, and all the year is an open season for anybody to engage in either or any of the larger occupations of the United States at his pleasure.

It has so chanced in the development of affairs that two of the largest live-stock markets in the world are found in the United States. The first is Chicago. The other is Kansas City. Neither has gained this preeminence by unfair means. First, Kansas City is at the gateway of a great stock-producing region. It commands, both by reason of railway transportation and by natural advantages, great strength in that particular. Therefore much of the western and southwestern country seeking a live-stock market gravitated into Kansas City. It followed, it did not precede, the development of the live-stock business in Chicago. The live-stock market in Chicago, for similar reasons, expanded earlier. It began shortly following the close of the Civil War, when all forms of industrial activity took on renewed life and volume, when the danger of a division of the States was past. We became national in character, and the manufacture, transportation, and commerce of the country flowed undisturbed through all of the trade veins of the Union. So in Chicago began, as well as Kansas City, the phenomenal growth in many lines of enterprise. In none is it more remarkable than

in the live-stock and packing business of the country. If it were possible to touch so prosaic a subject with the wand of imagination, it would be the greatest industrial epic in the world.

It is not merely a live-stock market that is sufficient. There must be other facilities. There must be housing facilities for the numerous employees required in a large business. More than 60,000 people are upon the Armour pay roll; more than that number are upon the pay rolls of Swift & Co., and large numbers are upon the pay rolls of the other packers, Armour and Swift taking the lead in the volume of business transacted. In like manner their houses or branch houses at Kansas City employ large numbers. Great housing facilities are required to care for the employees. Naturally there collect or grow up with or about every large live-stock market banking facilities, cattle loan associations, steam railways, the ordinary commercial lines that all develop together as a natural result of a great center of population. So the packing business normally tends to develop to its full stature in a larger city. Such a packing business could not exist in a town of 5,000 inhabitants. There are no such facilities as are required for their trade, even their domestic volume.

In the beginning of the packing business their market was purely domestic. It was limited in character. Before the days of artificial refrigeration there was no thought of extending the fresh-meat market beyond what could be slaughtered and consumed within a single day during any of the warm months. More than a merely local traffic was not to be thought of in the meat business, except during the severe cold of the winter months and in northern latitudes. Because of this limitation the larger part of the meat business was confined to cured, pickled, salted, or preserved meats that would keep a reasonable length of time and stand higher temperatures.

Matters went on this way, the market absorbing such quantities of live stock as it could assimilate and find a market for among the consumers of the country until a change occurred, beginning in its infancy in 1870. The Senator now occupying the floor can remember, in the principal live-stock markets of the western country, when there was no continuous market. The market was local in character. It was at its best but, say, three times a year. There was a fall market, a spring market, and a summer market to supply the local demands of the fresh-meat producers for such a limited area, as it could be slaughtered and consumed in a limited time. There was no such market as that which exists at the present time. The authors of this bill seem to contemplate that a market for live stock is a natural thing, that it is like fresh air, as free as water, and, like the elements, distributed under the unvarying, unchangeable laws of nature; that a live-stock market will rise anywhere it is wished, and all to be done is merely to touch the magic rug and we will be transported for thousands of miles by the mere wish of our imagination and without the expenditure of a dollar, an hour of thought, or the burning of a ton of coal. Nothing in all the vital relations of civilized society is so complex, sensitive, and subject to destruction as a live-stock market and packing center. It is all artificial, and the clumsy hand of careless or malevolent ignorance can dislocate its mechanism as surely as an incendiary or negligent torch can burn a city.

However, Mr. President, the live-stock market did not exist in Chicago and Kansas City, taking those two as the leading markets of the country at one time. It was purely local in its character. It grew, from well-understood economic causes, to its present magnitude just as the jobbing houses in dry goods in New York City have grown to their present prominence, just as other lines of legitimate enterprise have developed in their day and time until they now occupy the field.

In the seventies Hammond, the elder Armour, the elder Swift, Nelson Morris, and possibly others began to consider the possibilities of artificial refrigeration. Chemists had learned, not as the philosophers of an earlier time had, that artificial freezing was something to be controlled by human agency, not as a mere curiosity nor a toy in the laboratory, but as a great industrial and commercial possibility.

Artificial refrigeration had grown until it became a manufacturing process in embryo. Soon refrigeration in ice boxes and compartments became common, and from that the inquiring, inventive genius of the American mind has naturally led on, as from the bed in your bed chamber or mine Pullman was led to invent the sleeping car for the traveling public.

So those packers, some of them thinking along the same lines, worked out by means of artificial refrigeration the use of ice, brine tanks, and beef racks in a car for the purpose of producing what to-day is the developed and completed refrigerator car. They demonstrated to their own satisfaction its usefulness and its practicability.

They went with their models, with their demonstrations, to the managers of the principal railway lines leading out of Chicago. Even before that time the live-stock car had been developed. It was a specially constructed car for the transportation of meat-producing animals on the hoof. The railroad companies as a rule declined even to build a stock car. They declined with increasing vehemence the proposal to build a refrigerator car and give it as a part of the common carrier service to the packers. The average steam railway manager, who is responsible to his stockholders for results, and to the board of directors as well, has come through many hard experiences to his present knowledge of railroading. It was so even then, a matter of nearly 50 years ago.

They declined to experiment. The whole steam railway business, from its infancy up to the time of their declination to build refrigerator cars, had been a series of developments through costly experiments. Some of them had been disastrous to the investor. There is scarcely a large steam railway system in the United States which does not represent a concentrated capital and the sinking of vast sums of the original investment. It means bankruptcies and receiverships, reorganizations, and the scaling of debts, the par value of securities, and the reformation into new companies. It represents consolidations of constituent companies, hostile legislation, business depressions and panics, and with all this experience in their minds, they declined to enter upon the manufacture of a fleet of refrigerator cars which ran in cost into millions of dollars of good cash.

There was but one remedy left. If the packers extended their market beyond a mere local area of 30 miles or so about Chicago or Milwaukee as a center, it remained for them to demonstrate their faith in their own opinions of refrigerator cars by manufacturing those cars themselves. They did so, and when they did it they followed the course of the successful enterprising men in every other enterprise of any magnitude in this country. When the oil business assumed proportions, when it became vital to the industries of the country, the oil-tank car was invented. Later pipe lines came, and both of them are the necessary instrumentalities of every large oil business in the world, and especially in our own country, where distances are so great to be traversed between the centers of production and the large areas of consumption.

Therefore the packers manufactured and, under arrangement made with the steam railroads, transported their own products, their own fresh meat, in the refrigerator cars from their packing houses to the principal markets of the country. This enlarged the dressed-beef market of Chicago, of Kansas City, of St. Louis, Omaha, St. Paul, and some minor points in the United States in later days from a local market to a national market. Instead of being local, the fresh-meat business became continental in character. Later, when the same refrigeration idea was applied to ocean transportation, the fresh dressed-meat business became international in its export character, and is so to-day, as well as continental in our domestic affairs.

It is now charged in the investigations and the reports made of the packers, Mr. President, that they have committed a great economic offense in owning refrigerator-car lines. So far as there are packing companies operating refrigerator-car lines through separate but affiliated corporations, it is for the purpose of keeping an account of the cost, operating expenses, and earning powers of the cars. It is merely a bookkeeping question. By segregating the original cost of a fleet of refrigerator cars, their maintenance, the charges paid for transportation, and a fair dividend upon the investment, it can be found what the refrigerator car costs to the fresh-beef market, as well as the fresh-beef producer. It has been found, for instance, by this segregation of costs that the refrigerator-car lines are not profitable investments. Some of them lose money, taking a series of years. Some of them no more than pay for themselves and come out even, so that at a given time in the lifetime of a refrigerator car, from its construction, operation, and maintenance until it is on the scrap heap, it would no more than keep itself even, and, like any other of the machinery of the packing house, when it is worn out it must be charged up to profit and loss as a part of plant depreciation.

There is no one of the packers, large or small, owning from 1 packing car to 6,000 or more, who has a practical knowledge of a refrigerator car, who is not uniform in his testimony in the voluminous hearings held in the House before what is commonly called the Sims committee, and before the Senate Committee on Agriculture, of which the senior Senator from North Dakota [Mr. GRONNA] is the chairman, who does not say that it is not a profitable investment. They add that they went into the refrigerator-car business in order to furnish a necessary instrumentality in the fresh-dressed beef or meat trade, which otherwise they could not have; and without these instrumen-

talities their business is of a purely local character, both in slaughter and in distribution.

I can only approximate it, but there are altogether about 20,000 refrigerator cars in the United States equipped for that line of business. They comprise a well-built car with proper sides, with brine tanks, with meat racks, and otherwise constructed to handle that particular line of trade. There are some twenty or more thousand other refrigerator cars, but not of the refrigerator meat-car variety. The others are used in the transportation of vegetables, of perishable fruits, and of that character of market gardening that is of a fragile or perishable character, and requires speedy transportation from southern points to a northern market during the winter months.

The United Fruit Co. did not of itself, except as a necessity, build the fruit car, ventilated and regulated as it is, for the transportation of perishable tropical fruits. Its office is in Boston. It has made the fresh-fruit market of this country as we now know it possible, as the packer has made the fresh dressed meat of the country accessible to distant points. Without it the banana trade would be a nullity, without it pineapples and the large volume of tropical products which northern latitudes had never seen have been opened to the kitchens and the tables of all the peoples of North America.

I have heard many criticisms of the United Fruit Co., much of them of the same character as those directed against the packers. Much of it, too, has come from alien sources. Great Britain's authorities have more than once pointed out the fact that while originally her zone of influence in Central America and the island of Jamaica covered all the sources of banana raising, the trade is now taken by Americans, and the profits upon that business were diverted to American exchequers. Costa Rica, Honduras, and certain others of the Central American countries are, by nature, designed as the great banana-producing areas of the world. Two-thirds of all the bananas of the world are raised in Central America and Costa Rica, and more recently Honduras, it is now claimed, holds the lead in the production of that article.

The other third of the supply of merchantable bananas that goes into the commercial markets of the world comes from Jamaica, a British possession, and there is where our British cousins good naturedly find cause of complaint. Commercially, in world-wide business, the Englishman has learned to cover the globe and he, of course, notices any alien enterprise even if it be American who enters upon it, somewhat as a poacher is upon the grounds of some noble lord. The same criticism which applies to the United Fruit Co. has been applied with great vigor to the packers, because they, too, have not been content to remain in the domestic market, but have gone abroad.

Before I take up the full limit of their activities, Mr. President, I wish to say that in one live-stock animal the United States holds preeminence over the world. She will continue to hold it unless it is taken from her by South America, notably, the Argentina country, and I doubt whether it will ever be done there.

I remember some years ago when we had a United States minister in Denmark. He came from Illinois. Every time a melancholy Dane grew dyspeptic it was attributed to eating American pork. One day the family of some noble gentleman was seized with intestinal convulsions, which resulted in some discomfort. They laid it at once to the American hog and an embargo went out upon that animal. The minister, being of an inquiring turn of mind and being himself from the great American hog-belt, investigated it. He obtained access by consent, under the guise of being an investigator and a searcher for truth, whatever it might be, to the kitchen of the family. He found the iron vessel in which the pork had been prepared. Not satisfied with merely looking at it, he noticed that the interior surface had collected some strange looking substance. He diligently scraped off a quantity of it and took it to a competent chemist to have it analyzed.

The chemist promptly reported that it had been taken from a dye pot, and asked where he got it. He kept his own counsel, ascertained the evil effects of such dyes upon the human anatomy when taken internally, and soon discovered that some of the ladies of the household had been refurbishing their wardrobes and putting up some new colors for spring appearance, and had used this identical pot for dyeing some of their silk wear. I forbear to tell the character of the wear. Senators with more or less vivid imagination can draw their own conclusions. Nevertheless, some of the dyes remained adhered to the interior of the surface of the pot, and in boiling the pork some deleterious quantity had been absorbed in the American hog. The noble family consumed it, with the result aforesaid, as lawyers are wont to say.

A report was promptly made. The United States consul was called upon, and a consular report was forthcoming through official channels. In a little while the American hog was exonerated and his edible character fully restored, but it took persistent advertising, investigation, and official action to remove the ban that had been placed upon American hog products by this accident.

Not many years ago pellagra and various other diseases were charged to the consumers of corn products in Europe. People in Europe do not eat corn meal, dried corn, canned corn, corn in any of the 100 or more various forms of product which the Corn Products Co. sends out as merchantable in the markets. They think it is hog feed. We eat it; they do not. When they were subjects of charity and we sent them corn meal, they often indignantly refused it and preferred to suffer hunger than eat it. In South Africa they have learned better. The mealies, as they are called in South Africa, are nothing more than corn. It is our maize grown south of the Equator.

I call attention to these instances for the purpose of illustrating the power of prejudice, of hostility to an American product, to the difficulty of opening up foreign markets, and the readiness with which anything is seized, foreign or domestic, to destroy our export trade. It will illustrate the damaging character of the Federal Trade Commission's report hereinafter referred to.

Pork products and the raising of the hog can never be separated from the United States. The hog as a commercial article must be raised near the great corn belt. The two are contiguous and twin companions for the supplying of the human table. I know that by the Mosaic law the hog is an unclean animal, but for many centuries a great portion of the human race have used it as an article of food, and with modern development it may be confidently asserted that the hog is one of the permanent principal food-producing animals of the world. South Africa produces him, and by the increased production of corn in that area as well as in the Argentine country the hog there becomes a profitable, merchantable product.

So it is a perfectly natural reason why in Chicago and Kansas City the great live-stock markets of the country have been developed. They did develop and have developed to an unexampled magnitude, not only in pork products but all other meats, so much so that they have excited the alarm of various gentlemen holding Government positions. Here is something I desire to read, not from a wicked packer, not from some dry goods millionaire, but from a national bank, the Irving National Bank of New York. It is seldom that a bank has a sense of humor or permits it to become visible; but this extract rivals anything that Juvenal or Voltaire ever wrote, and the bank is as unconscious of it as we are of being statesmen:

> In the atmosphere of government, as for years we have known it in this country, there appears to be some quality which makes nearly impossible a proper relationship between this atmosphere and the other atmosphere which surrounds it. There appears to be in this atmosphere of government some strange poison which in its milder effect, even upon the sound business man who goes into government, causes him to view himself and his function with a seriousness not in the least justified by facts.
>
> In a more serious form it causes him to imagine that his is a heaven-sent function, and that his chief duty on earth is to discipline some one or to check something, to interfere with some one's plans, to throw the proverbial monkey wrench into some one's machinery. In other words, he is disposed to exercise a function in which the destructive predominates and in which is to be found but little which may be of actual use in building up things.
>
> In the third stage, and unfortunately this stage is not necessarily fatal, he becomes the great protector of the downtrodden, the enemy of oppression, and Wall Street, money domination, and so forth, assume deadly form in his mind. At this stage he usually becomes famous in his home town as an orator.

If there was ever any more complete description of the genesis, the development, and the full flowering unto the perfect day of a demagogue written in the English language, it is written by this prosaic bank that would have the world think it as void of a sense of humor as a cobblestone.

Unfortunately some of these gentlemen have been in public office during our time in the Senate. They have been charged with responsibilities and vested with power. The power rightly used could have been an auxiliary to business. It could have developed our domestic trade and been of infinite value in the development of our exports. Instead of being a menace and exercising the destructive power which they have shown, they might, with an admonitory hand, have directed business where it was in doubt about what it could properly do and where enterprise waited upon the decision of the hour. It could have helped American enterprises in their struggles to enter foreign markets instead of serving as a club in the hands of their distant competitors.

During the depression in 1915 in the bituminous coal trade in the western area, as I now remember, a number of coal operators came to Washington. They laid before me a method by which they could divide the business and open up the idle shafts. Towns of 4,000 population were idle and county support through the poor laws had to be given to some of the dependent families. They desired to remove that condition, but they could only do it

by allocating their output to various markets, and to do that they wished to know whether they would violate the Sherman antitrust law.

They came here with their plan on paper. I took it to the Attorney General's office, that being one of the very few times in the eight years now drawing to a close when I have gone to any department asking anything. I laid the plan before the Attorney General. The Attorney General looked at it and said he could give neither approval nor condemnation; that it might be that upon complaint it would be found to be a violation of law and he would be called upon to indict and prosecute those who entered into it. He said:

> My reasons are further strengthened by the creation of the soon-to-be-in-operation Federal Trade Commission. It is designed to cover just such cases as this, so business men who are in doubt may go and lay their method of transacting business before the commission, and, even if the commission should be mistaken, it would take away any intent of wrongdoing from the contemplated action, or at least it would result in no more than a restraining order or, at most, a nominal fine.

So the Federal Trade Commission was created. Very much was hoped from it. Several gentlemen were appointed upon the commission. They entered upon the discharge of their duties. They have up to the present time produced a number of reports. In response to a Senate resolution of June 10, 1918, they presented a report on profiteering. In contains a mass of material in its 20 pages of printed matter on the dividends of a variety of occupations. In it they lose no chance, of course, to single out the packers as being the chief among the offenders; but the fact remains, nevertheless, that in many other occupations the earnings during the war period, both before we entered the war, prior to 1917, as well as subsequently, were far in excess of those of the packers. Without reading from the pamphlet at length, I note amongst the industries in that category those producing steel, copper, zinc, nickel, sulphur, lumber, coal, petroleum and petroleum products, leather and leather goods. The latter articles may be, directly or indirectly, connected with the packing industry, and so, perhaps, ought to be excepted. I also note the producers of flour, canned milk, and salmon.

I have prepared some additional instances of great profit-earning industries in order to supplement the commission's report since that time. The Western Grocery Co. earned dividends of 19.52 per cent; the Texas Co.—an oil company—earned dividends of 31.77 per cent; the Quaker Oats Co., 20.20 per cent; the Anaconda Copper Co., 20.80 per cent. The Federal Reserve Bank of New York, a Government enterprise, has made earnings which are worthy of note. It must be remembered that the Federal reserve banks took all of their capital stock with which to do business from the member banks; they seized all of the reserves of the member banks and segregated them in the hands of the Federal reserve banks. The New York Federal reserve bank shows earnings of 109 per cent. So the Government is considerable of a profiteer. With money rates running from 5 to 7 per cent up to "call" money at almost any price during the emergency which the person requiring it could pay, it looks as though 109 per cent to the Government would justify some reduction in their dividends and a corresponding reduction of interest rates to the borrowers at the several member banks, because that is where the trouble begins. Member banks are the ones who deal with the depositor and borrower; they are the ones who keep their hands upon the pulse of business and know what is doing in their respective communities. The Monarch Rubber Co. earned a dividend of 30 per cent. In view of these supplementary figures, I submit that the packers are not the only concerns which have made fair or large dividends in their business. There have been many other industries whose profits have been quite as large as those of the packers.

The agricultural-implement business has developed greatly. I can remember the first corn planter I ever saw. Corn planters came in about the day when I was the right weight for the hand dropper, and the boys of my age all remember that we were impressed in the service. We were told, with flattery such as nobody but an old farmer knows how to use, just how we fit on the seat of one of the old wooden corn planters and how the Lord had ordained that we should grow up to be just right for the corn planter at that time. So we fairly enjoyed working ourselves to death and became good droppers. There were no checkrowers in those days. The agricultural-implement business grew apace.

The old hand rake and hand dropper passed away; the self-binder and the mower came, and the cradle, the scythe and the sickle, of literary and biblical days, passed into the discard. With all of this development of farm machinery, of gang plows and steel moldboards, there came a tremendous expansion of agricultural implements. From the time that John Deere started on the banks of the Rock River, in Rock Island, Ill., in 1849, there has grown up on the site of his old shop the John Deere Co., one of the large agricultural implement companies in the world. In common with the Moline Plow Co., with Parlin & Orendorff, at Canton, Ill., and other very large concerns in that section, it has become one of the largest agricultural-implement producing areas in the world. The International Harvester Co. was organized. This will be referred to again. Many of those companies send products around the world; until the great World War it sent them everywhere. The wheat fields in the vicinity of the Black Sea and all the tributary country saw American agricultural implements putting in the crops. They broke the soil in Rumania; American plows cut the sod in Argentina. The American companies sent their agricultural implements to every country where modern agriculture has taught humanity to raise a crop by modern methods. Other great areas developed; and so down State in Illinois, in Indiana, in Ohio, in Missouri, and in all the great sections of the West that are agricultural or of a live-stock raising character the agricultural-implement business grew to great proportions. After a while the International Harvester Co., already referred to, was formed. Its formation led to a prosecution; it further led to a decree in the Supreme Court of the United States, not so long ago, to the effect that, while it was a monopoly in some of its characteristics, it was a harmless monopoly; that, while it was a giant, it had used its gigantic power temperately, to no man's injury; that it had reduced the prices of its products and had opened up new markets; had placed new inventions upon the market; and had been a benefit rather than a burden upon the farmer since its combination. That company paid some dividends, and that was regarded as an unanswerable criticism to be made of them.

The mail-order houses and the great grocery houses grew up during that time, Mr. President. Let me present you, Senators, with a concrete fact. It is not necessary for one living within a radius of 300 miles of any mail-order house or any of its branches in the respective parts of the United States, and especially east of the Rocky Mountains, to order groceries over the telephone.

With that radius it is possible for a person to send an order for anything he needs, from groceries to farm tractors, to a mail-order house and by the following Monday the order, if accompanied by a check, is filled; the tractor will be in the barnyard and the grocery order will be on the back porch. Orders can be sent by telegram. The mail-order houses are the most complete retail business houses in the world.

I know there is a hostility against them, and I know exactly where it comes from. It comes from the retailer and from the jobber. In buying from any of the three or four largest mail-order houses in the world the consumer buys direct from the jobber, because those houses are jobbers and they omit in their economic processes the middleman known as the wholesaler. They have raised up against themselves a host of critics, it is true. We have not forgotten the vociferous crusade against department stores a few years ago by a great army of small retailers. It was insisted nobody be allowed to sell hardware and dry goods in one store. In like manner we have had of late years many criticisms of the number of middlemen who are living off of merchantable products from the time they leave the producer, especially in the case of food products, until they reach the consumer's kitchen.

In last week's number of the Saturday Evening Post there is an article by Mr. Atwood, who takes up this subject at some length. While ordinarily I do not quote newspaper articles, the one referred to so tallies with human experience that I am disposed to quote a paragraph from it. It presents further the indubitable fact that if the middleman in this country is to be eliminated his elimination must come as a result of economic processes and not by any wildcat legislation. There is no legislation in the power of the Congress of the United States or of any State legislature that will destroy a middleman for 24 hours if he is found anywhere in response to an economic demand. He has become a part of the distributing machinery, and he will remain a part of the distributing machinery until economic processes have removed him. Alluding to this subject at great length and fullness of detail, Mr. Atwood says:

> Current distributing practices embrace the entire range of known procedure, all the way from complete dependence upon the middleman for creating and maintaining a market, through every degree of co-operation up to complete assumption by the producer of the entire work of distribution. First of all, we have manufacturers who sell direct to retailers or who even maintain their own retail stores.

The Douglas Shoe Co. is a good illustration of that. That company, a Massachusetts house, maintains branches, sells its own shoes, advertises everywhere, and, as a result, has gained the unmitigated hostility of a certain line of business conducted by retailers; but it has survived that hostility.

Some of the largest manufacturers are free from any entanglement with wholesalers.

The packers and also the milk distributors in the larger cities have cut out the orthodox wholesaler from two important classes of perishable food products. The wholesaler to some extent has been crowded out of the ready-made clothing field; automobile manufacturers seem to have skipped the wholesaler or jobber quite successfully; and the same is apparently true of the many manufacturers of sewing machines, adding machines, candy, and shoes, who, in addition, have in numerous cases established their own retail stores.

I might parenthetically remark that the Singer Co., the largest single manufacturer and distributor of sewing machines in the world, have their own branch houses and sales agencies. It is possible to buy a Singer sewing machine at Pretoria or at Cape Town, at Alexandria, Egypt, or in any part of the Orient. Where machine sewing is known, the Singer sewing machine can be bought. They maintain their own agents, their own branch houses. They do not sell to retailers, but if a purchaser desires a Singer sewing machine he can go to a Singer agent and get it. The agent represents the company at the particular point, and such agents and selling agencies are found everywhere. It is called a monopoly by some, and it is a monopoly if wealth and business ability produce a monopoly, and ordinarily those two combined do in their respective lines of effort produce at least a large concentration of the trade in the particular line.

I might here remark, too, Mr. President, that indictments were secured against the milk producers in northern Illinois within the last two years, embracing farmers and farmers' associations—those who raise for the dairy trade, and especially who send their milk into the Chicago market.

A large number of dairymen, of farmers keeping dairy cows or herds, were indicted for conspiracy. They were prosecuted. They were not prosecuted at the instigation of the consumer. They were prosecuted by those who bought and sold milk in Chicago. It was the middleman, the distributor, who stood between the dairyman and the consumer of milk, who wished an exclusive right to distribute milk in Chicago, and who procured the indictment to perpetuate themselves. It was tried, and the defendants were found not guilty. All the milk producers in northern Illinois, all through the Fox River Valley and the Elgin country, reaching up into Wisconsin, have now formed a distributors' agency, incorporated it, and sell their milk to that agency, and that agency distributes it or sees that it is distributed in Chicago; and the milk middleman who raised the trouble seems to have been effectually eliminated from his business, or he must go out and start a dairy herd. That is open. You can always buy land for grazing; you can put up forage and get grain to keep them through the winter. The business is an open one for anybody who wants to go into it.

I mention these matters as I have in a preliminary way for the purpose of showing that there is equal cause for putting any of the various enterprises, successful in character and paying dividends, under a commission government that there is with the packers. Where is the border line to be found? Somewhere, certainly. Heretofore, the average statesman, the lawmakers, and the publicists who discuss these questions largely theoretically, have found a line of demarcation between a public utility and a private enterprise.

The public utilities are ordinarily those which are not only charged with conducting their business continuously but those which are given what is ordinarily termed a franchise, more than a mere corporate franchise, which is simply a right to exist as a corporation, which is not such other franchise at all. I do not mean that. I mean the franchise by which an exclusive right to occupy streets, alleys, public ground, and public places, or to go upon the private property of others and condemn it for the purpose of their enterprise and often a further exclusive right to render a service or supply a commodity which is vested in them as a corporate right. Some of those privileges, extraordinary in character and exclusive as well in the corporation concerned, are always attendant upon a franchise found in a public utility. The public utility is rightfully subject to regulation in the method of transacting its business, the service rendered, and the price of the commodity sold. The regulations ordinarily in most of those with which we have concern at our respective homes are local in character and are within the regulatory power of the State. Others in interstate commerce are regulated by acts of Congress, notably the steam railways of the country.

It is well understood not only from ancient usage but from modern practice what a public utility is. It is now proposed to advance this line of division and take in the packing industry of the United States and declare it to be a public utility, impressed with a public interest, and subjected not to the regulation of law but to the regulation of a commission of five men, they themselves not acting under law but given the right to make laws, which shall be in some instances, I fear, based upon recent experience, oppressive in character rather than promotive of the welfare of the corporation or business concerned or the welfare of the general public and in no wise necessary for the protection of that public or the private consumer.

Upon what natural ground can this rest? It can not be on the ground that meat is more indispensable to human life than many others of the staple articles now found in the average household. The most ancient form of human food is bread, often referred to as "the staff of life," both in biblical and in modern days. There are tribes, there are whole nations, that live from birth to death without the meat of any of our live-stock animals ever passing between their mortal lips. They are vegetarians. The whole of the Hindu race are nonmeat eaters. They are vegetarians of a most pronounced type. As far as they progress toward an animal diet is the eggs of fowls. They will not take animal life in any form. So, if it be regarded upon natural grounds, meat is not an indispensable necessity to human life as much as bread. Then why ought not the markets of the country for all of the flour-producing grains, the finer grains, be regarded as subject to a public interest? Why ought not all of the commercial flouring mills of the country be regarded as public utilities, impressed with a public interest, and brought under the regulations of a commission form of government? Why ought not their economic and commercial processes be subject to the unbridled discretion of rules promulgated by a commission?

I see no natural reason why all of the breadstuffs ought not be brought within these regulations, bake shops in like manner, and the distribution of bread by retail, because finally it must reach the consumer to be of any value.

One reason I have heard offered is that the packers have so conducted their business as to develop it to an unexampled size, to produce a market which they control; that junction railways, switches, cold-storage warehouses, refrigerator-car lines, terminals, large packing plants, and buildings adequate for the conduct of such large affairs, all pass under the influence of the packers. Failing to see any natural distinction between the meat industry and breadstuffs, building material, and clothing, I shall examine in detail the reasons why this industry is singled out by the authors of this bill for this departure from the elements of sound government.

Food, clothing, and shelter are the primary needs of a human being. Cotton and cottonseed oil, the latter directly related to butterine, ought to come under the commission, for the same reason. If there is any soundness in the reason, then every bale of cotton produced in this country and all the cotton spinners and the weavers of cloth ought to be brought under it; in like manner woolens and all the wool producers, because in the north temperate latitudes, practically from the Tropic of Cancer to the frozen solitudes about the North Pole, every human being must wear clothing in some form. Not only is it requir d by police regulations and the average rules of common society, especially among Anglo-Saxons, but it is an indispensable necessity of weather conditions during the greater part of the year. Why not bring cotton and wool under a commission form of government—for that is what this is—along with flour and all the grain foods producing the foodstuffs of human life?

But it is said that the packers control the commission men; that the commission men sell the cattle produced by the farmer and the live-stock raiser. Let me tell you why I know personally this is not true.

I know one commission firm in Chicago that has been doing business for more than 30 years. Among their customers are farmers and live-stock raisers, men who own a thousand or more acres of as good agricultural lands as there are in the world, who are as independent as anybody, and who would know if they were not getting a fair deal. Some of them were my neighbors, some of them my boyhood friends, my classmates, and they have been stock raisers and farmers for more than 40 years. One of them that I have in mind has sent to a single commission house in Chicago—the firm of Clay, Robinson & Co.—for more than 30 years every hoof of live stock of every kind he has raised. He is as independent as any farmer or stockman in our country. If he did not think he was getting a fair deal, he would quit his commission men in a moment. He does not have to sell there. This man's experience is the experience of hundreds whose names I can give in a single congressional district.

There was an old commission firm founded originally by a native-born Scot. He came to Chicago many years ago, entered into the live-stock commission business after the war, and grew up with the live-stock trade and the packing-house business in Chicago. From another part of Illinois, where I lived for nearly a quarter of a century, many of the live-stock men sent their

products to the commission house of Gregory Cooley & Co. These commission men were as independent of the packers as anybody in the world and as the commission men are to-day. They are controlled by nobody. They represent their customers in the sale of their live stock.

There is a reason for the building up of the live-stock market in Kansas City and Chicago. As I briefly outlined a moment ago, it is because they stand at the gate and thereby become the natural gateway of this traffic, not only in view of natural facilities but of artificial development. The natural facilities are a large area of fertile country and, farther West and Southwest, of grazing land.

I have already adverted to the fact that swine and corn must be contiguous. Not only that, but fertile soil for the production of grains, as well as roughage, or forage, must be contiguous to every great live-stock producing area where corn-fed native animals are produced for the market.

In addition to this, those that come from the range—the grass animals—are added. They are not supposed to be quite as good for general packing purposes, but they are a merchantable article and enter into the live-stock business.

Chicago and Kansas City, with certain other points I have named, being advantageously situated, the live-stock business grew in its natural development and became one of the large industries of those points.

After the refrigerator car came the dressed-meat business was no longer local. It extended, so that Chicago, Kansas City, Omaha, and St. Paul, with some other points, began to distribute fresh meat from those slaughtering points direct to retailers in the various parts of the country. The refrigerator cars can not be kept upon the tracks any great length of time. They are not a profitable concern of themselves. They must be unloaded and the cars returned to the home packing plants, where the initial shipment originates, as early as possible.

This necessarily and naturally led to the construction of branch houses and cold-storage facilities in connection with branch houses, so that the refrigerator car could be unloaded in apt time and be returned to the initial shipping point.

I can say here, to correct some popular misapprehension, that the packers do not engage in the retail meat trade. There have been a few minor exceptions, I think, such as where small packing plants have sold out to one of the larger packers, and where they had retail meat markets connected with them; but these have been conducted just long enough to close them out or sell them. They do not engage in the retail business and, I understand, have no desire to do so.

But either from the refrigerator car or from the branch house they sell to the local meat market, or to the grocer handling meats, at the respective points of the country. The meat market and the grocer reach the consumer. The packers, I repeat, have not engaged in the retail business. The consent decree, of course, prohibits them from doing so in the future.

It so happened—and this is one of the points of which much complaint is made—that the packers engaged in other than the strictly edible meat business. First, it became necessary in the modern packing plant to develop the by-product as an economic method of curtailing waste. Many of the by-products were heretofore wasted. They now are made into merchantable articles. An average steer will dress out, say, fifty-fifty, something like that, sometimes 55 per cent. Twenty per cent can be recovered in by-products, and the remaining 25 per cent is lost. This consists principally of an unavoidable shrinkage of the moisture content of the animal, which escapes and can not be recovered.

In the earlier days of the packing business the by-product was wholly waste. Outside of the hide and horns, nothing was saved, and often nothing by the hide. The development of the by-product into merchantable substances naturally led to the establishment of separate departments and in many cases of subsidiary companies. It is practically the only way to find out in many instances how to conduct the business or to prevent it from incurring a loss. That does not prevent but facilitates the distribution of the cost of the packing business over the whole line of the products of the live animal. They can be equitably distributed to the edible portion of the animal, so that the meats for human consumption shall only carry their fair share of the cost of the reduction of the animal to merchantable form.

Nevertheless, the by-products business grew up. The hair became a subject of saving. At times there could not be found a ready sale for the hides. It will be found in the hearings, voluminous in character, extending over many thousands of pages, that Mr. Armour or his agents give an explanation of the reason why they became interested in a tanyard. They had a glut of hides. The tanners could not absorb the ordinary hide production on the market, to say nothing of taking large quantities from the packers. In order to work up the surplus hides, they bought a small tanyard and developed it, turned in their hides from that packing plant, and in time it became a large tannery business. It became one of the subsidiary concerns of the packing industry, if you want to put it that way.

The laboratories of the four or five packers became great manufacturing research houses. It was industrial chemistry, in applied form, that made possible the salvage of the by-products which heretofore were waste in the packing business. The blood was no longer wasted. It was utilized for several purposes. The albumen was extracted in commercial form. It was shown during the war that albumen so obtained was the base of a glue to unite perfectly the wood veneers in airplanes. The pituitary substance was extracted and converted, when a pound of it was secured, into pituitary liquid. This was known to the surgical world as a modern discovery. It is entirely impossible for the small packer. More than 5,000 hogs must be slaughtered, for instance, to obtain one commercial pound of pituitary substance. It is used in wounds to check bleeding where hemorrhages can not otherwise be treated or reached, and it possesses a profound surgical efficiency in a certain class of cases. There are secretions taken from the alimentary tracts of animals, many thousands of which must be taken, from animals that chew the cud, the clean animal of the Hebrew days, before an appreciable merchantable quantity, which can enter the drug trade, is secured. There is known now to the skillful laboratory searcher and physician the cause of a heretofore obscure disease. Sometimes the pancreas becomes diseased. No surgeon or anatomist has ever yet discovered the precise function performed in the human economy by the pancreas, which lies back of the stomach. But if it be diseased so that it can no longer function, or if it be removed, as sometimes is the case, by surgical operation, the patient languishes and dies; after a course of a few months, or years at best, death is the inevitable result of the disability of this organ. It is an obscure but vital organ in the human anatomy. I have had some experience in diseases of this character in a practical way.

In the old time, before chemical research and medical knowledge had searched out this obscure complaint, its cause was not known, nor was its remedy even attempted. Even after the remedy was attempted it could only be made possible by taking from the alimentary tracts of thousands of animals the chemical extract which the laboratory chemists secreted and segregated from the organ, and found in such form, to supply the substance which was furnished by the pancreas in the human system. So that now the artificial drug will supplement the organ when diseased or removed, and life may be saved. During the war potassium permanganate, used in gas masks to neutralize toxic gases, was urgently needed. Armour's laboratory had a small plant, the only one, I believe, in the United States for its manufacture. The entire output was immediately turned over to the Government. All trade contracts were canceled, and the entire product delivered to the Government at one-half the contract price at which the entire output had before then been sold. The plant, because of interference by enemy agents, was run at a loss to Armour.

I only speak of these things to show, when gentlemen in public office, surrounded by this atmosphere to which this unconscious humorist, the bank, refers, when they speak of the ramifications of the packing industry, that they little know of the great ramifications, indeed, to which it has extended, and of the hidden world, known only to the skilled chemists, where nature's secrets are spied out and where the dark is opened to the knowing eye.

It is objected to that pepsin is a medicinal product. What under heaven would the gum chewers do if pepsin could not be furnished now in commercial form? It gives us an excuse to chew for the stomach's sake, as wine was advised by Paul to Timothy. Just north of the Chicago River there rises the towering flatiron form of a colossal building rivaled by nothing of the kind except in New York City. It is William Wrigley's chewing-gum building. Chewing gum never could have reached its present magnitude if it had not been for the pepsin taken from the packing plants of the country. The confirmed dyspeptic chews pepsin gum. No hurtful results follow. It is not like other bad habits. He has some excuse for it. It produces no rosy blush upon any of his features, and no chronic habit results except the working of the jaws, and that probably is a blessing, for while we are working that way we are not working them some other way to the detriment of our neighbors. So out of that seemingly humble thing, a matter of criticism here, has come a great industry. It is a safety valve for the nervous and a minor activity to us all when under strain.

I speak of this only because Wrigley happens to be my neighbor, and it is a matter of visual knowledge with me that the one industry has been built up upon the other.

Then, again, there comes the use of the intestines. Back in the days of the Greeks they knew something of stringed instruments and some of the translators refer to catgut. It was not part of the anatomy of a feline that strung the ancient lyre; it comes from sheep and other animals. In the economy of the packing process the packer wanted nothing to get away, and he salvaged this part of it. Therefore he began to manufacture catgut.

Before that time every fiddlestring in the country was of Teutonic origin; everything here came from Germany. But the packer has driven the German even out of a part of the European market. It is another cause of complaint that he is selling catgut fiddlestrings. Naturally accompanying the fiddlestrings is the violin bow. Unless you have the two together you can not get much violin music. From it has come the building up of this industry as a subsidiary concern.

An official report, to which I shall refer presently, speaks of nearly 700 different products handled by the packers. A part of it is the most distinguished instance of a vivid imagination coupled with iteration and reiteration to be found among official documents. There is not anything like it even in the Patent Office reports, where sometimes inventions overlap each other and produce interferences. For instance, in the report there are seven times that tongue is referred to as a separate product: There is canned tongue, pickled tongue, dry tongue, salted tongue, just tongue, and so on.

The repetition in many other articles I will not stop to enumerate. I will insert them in the RECORD as part of my remarks later on when I shall conclude.

Altogether there are probably 100 different articles that are mere duplicates, so that out of a total of 639 the list is reduced to the neighborhood of 500. Then of the remainder there are the very many legitimate, it must be admitted, by-products of the packing industry. The different articles known as by-products can not be marketed or manufactured successfully except by the packers.

How could the raw material for strings for musical instruments be transported—salted, canned, preserved, or in any way—from the packers to some distant manufacturer of strings? They must be made upon the spot. It would be an uneconomical and an unnatural way of producing them if any other process were to be followed.

Therefore, I regard these by-products as strictly legitimate, including the tanning part, because the leather is as much a part of the meat-producing animal as the edible portion of the animal.

Since the discovery by a Frenchman of oleomargarine, they have been led naturally to the development of butterine. The French chemist took natural butter and analyzed it. He found the constituent elements that nature put into butter when it was churned in the natural way. Having by this analytical process discovered its constituent elements, he took the natural animal fats, and, by the use of synthetic chemistry, combining them in the proper proportions with other elements he did not produce real butter but he did produce oleomargarine or butterine, a palatable, healthful substitute. With the large quantity of fats coming from slaughtered animals the amount available for butterine purpose would be very great. It was but natural, therefore, that the packers should develop a butterine department of their business. It was as natural as that they should develop the manufacture of fertilizer from certain parts of the refuse of the animal and salvage that heretofore lost product. So both of these developed in due course.

Then again, among civilized men soaps are essential. The packers have all or nearly all of the essential elements that cost money for the manufacture of soap. This led, therefore, to the manufacture of soap by the packers, and they have their well-known brands upon the market, and they are as good as any other.

With the refrigerator cars loaded as they are, and the way the racks are built in the cars, it naturally follows that the average dressed-beef half, or whatever animal it is, whether it be mutton or pork, hanging up on the rack, leaves a space between the carcass and the bottom of the car. That is dead space in transportation. It is a maxim of railway life to haul no dead space if it can be helped. Naturally the packers would put into this empty space any article that could be transported without injury to the meat. They could not load it with bagged onions, because they would taint the meat. Nothing that would spoil the meat could be admitted, but anything that was canned or packed in such form that it would not taint the fresh meat could be shipped in that way.

Bear in mind that the refrigerator car is used for fresh dressed meat. Dressed meat of that character is a highly perishable product. It can not be sold like smoked and cured meats. It can not be sold like other merchantable products. At the utmost, even with the best refrigeration and cold storage, the average dressed beef carcass must be consumed within about two weeks. That is the safety limit.

Therefore, a fleet of 6,000 refrigerator cars, which supply one packer, and possibly more supply another packer, taking the five larger ones, would be sent out loaded with fresh meat. Here is the empty space. Here is the by-product of gelatine, of glue, or of half a dozen other things directly connected with the packing industry. They place in the empty space from the bottom of the carcass to the floor the other products and ship them with their cars in that way. It was an economical process. No one complained about it for a time. They began to fill in with certain canned goods. It was as easy to distribute canned corn, pineapples, figs, and other articles, wherever a fleet of packer refrigerator cars reached, as it was anything else. So they fell into the practice of handling those products.

About that time the Wholesale Grocers' Association began to agitate. Whether they began of their own motion or whether upon the suggestion of the market committee of the National Live Stock Association, I can not say, but the agitation began. Before that time a National Live Stock Association had been formed. The active end of the association is the market committee. The market committee, as most of those things do in large organizations, fell into the hands of a few persons, Mr. Burke, Mr. Lasater, and two or three others whose names I need not mention.

I might, parenthetically, add that one very active spirit, whether or not he appears in person on the market committee, is or was president of the National Live Stock Association, and has been for some time a Member of the Senate. I do not say it in a critical mood. He has a perfect right to act so. He has the right, in his private activities outside of the Chamber, to be a member of the live-stock association from his State. A lawyer has a right to look after his business outside of the Chamber and to be a member of the bar association. But if there were legislation here fixing the fees which a lawyer would be allowed to charge or the market in which he might sell his services, I would begin to think that the lawyer, if he actively promoted the price of his service, probably was getting over the line of professional ethics a little. If I know that some Senator is himself a large producer of live stock, some of it sold in the Chicago markets, I can properly say that it would be as well, for the sake of senatorial ethics, that he abate his activities somewhat. I see no more reason why it is a crime for a packer to come to Washington than it is for a Senator inside the Chamber to promote his private business outside by legislation of this character, as he thinks it will. A former Senator, recently appointed a member of the Federal Trade Commission, has been promoting the passage of this bill in the Senate cloakroom and wherever he could solicit a Senator. An ex-Member of the House has been equally and persistently active. They are public blessings, because they are for the bill. Those who oppose the bill are nefarious lobbyists.

Let me say in this connection that if there be now no law or no amendment pending here prohibiting any Member of Congress from being appointed on this or any similar commission affected by legislation and congressional appropriations, for at least five years after his term shall have expired the legislation, even if it should pass, would be grossly imperfect. I trust such an amendment will be offered.

We ought to live so that even the smell of fire will not be upon our garments; so that we may come out of the furnace of public inquisition unscathed and above any unkind remarks that might be made. Too many "lame ducks" have gone from Congress to positions much more lucrative than membership in this body.

No Member of Congress can live on his salary; nobody expects it nowadays. For myself, I say that I gladly and voluntarily retire from the Senate. My party in my State has been in the ascendancy since 1914; factional troubles inside of the party are well in hand, and, after years of more or less successful struggle, no trouble can be apprehended; still I can not afford to serve in this body. I shall return to my home for the purpose of making a competency before I am disabled by advancing years. I decry the tendency in this body for its ex-Members and for other political "lame ducks" to be placed upon commissions of the character contemplated in this bill, at ten, twelve, or more thousand dollars per annum, furnishing a direct incentive and a moral bribe upon the consciences of Members of Congress to vote for the creation of such commissions in order that they may fill the lucrative places.

Let us put ourselves beyond suspicion in more ways than one. I think before I shall leave this body forever I shall introduce a bill increasing the salary of Members of Congress to $12,000

per annum. It can not possibly benefit me, but I earnestly hope that it may draw public fire, and I am willing to take it. I have been blessed and burned by public criticism for so long that nothing of the kind can affect my sensibilities further.

I hope such a bill may in years to come result in some good. At least a thousand dollars a month should be paid to Members of this body, who sacrifice in private life far more than they can ever obtain here and who render a distinct public service in coming to this body. I know cartoonists in Washington and the humorous paragrapher in the editorial rooms are wont to speak of Senator Somebody, from the back country, and of the Member of the House who is a rank ruralist. They are the objects of the witty men in every place. Let it be so. It does not change the fact that Congress is one of the coordinate branches of the Government; that it contains men of ability; that it contains men who make great sacrifices in order that they may sit in the respective bodies, and that especially in this body, the years ranking higher than they do even in the other, they make sacrifices to come here and to remain any length of time. Therefore, such an amendment ought to be enacted into law; and, therefore, I say, concerning the Senator whose activities are of the character I have mentioned, while he is justified, I believe it would be more in accordance with senatorial ethics for him to refrain somewhat from such prominent part in this agitation, and especially in the live-stock association of which he is president and now serving his third term.

The wholesale grocer, in my opinion, acting, in part at least, under the instigation of the market committee of the National Live Stock Association, procured the introduction of these bills. They resulted in a nation-wide agitation. They further resulted, together with the report to which I shall presently refer, in a bill against the packers being filed by the Attorney General in the Federal court in the District of Columbia. The result was a consent decree. It restrains them from marketing any product not related to the packing business. They were permitted to close out such unrelated merchandise as they had on hand, and certain of the subsidiary products were permitted to be retained as a part of their business; but the decree divorced them entirely from the lines which the wholesale grocers claimed were their particular merchandise.
